> Get "Even More" Out of Google

> 5 Things You Need to Do Right Now

1) Google Advanced Search - www.google.com (Advanced Search)
   Quickly narrow your results by the order of words, file type, domain, etc.

2) Google "Special" Web Searches - www.google.com/help/features.html
   Ex. "Population of China", "weather 92262", "3(12*7)/6", "movie: san diego", "define: love", "beatles", "Bill Clinton age"

3) Google Simple Messaging System (SMS) - www.google.com/sms
   Ex. Send a text message to "466453" with a simple text search like "starbucks 94598", "oakland ca to san jose ca"

4) Google News – news.google.com
   Customize your own newspaper from sources all over the world. Create RSS news feeds based on keywords.

5) Google Alerts - www.google.com/alerts
   Have Google find the news and information you want and deliver it to you via email.

> 5 Things to Play with Soon

1) Google Search Preferences - www.google.com (Preferences)
   Set the language, number of results, and safe search levels for your individual computer.

2) iGoogle - www.google.com/ig
   Add content and rearrange it anywhere on your personal start page. Add Google Gadgets in a click.

3) Google Desktop & Gadgets - desktop.google.com
   Index the files and your personal web history on your computer. Add Gadgets to your desktop.

4) Google Language Tools - www.google.com (Language Tools)
   Search pages in a specific language. Instantly translate pages on the Web.

5) Google Custom Search Engines – www.google.com/coop/cse
   Create your own safe, personalized search engine.
