# PAIRING FLAVOURS

*Wine and food pairing is about combining particular dishes with specific wines to enhance all the flavours of your meal. The reason why food and wine pairing should be kept in mind when dining, is that elements in both the food and the wine react with each other in a certain way. By finding a balanced combination of elements, your overall dining experience is enhanced.*

*Here are a few guidelines to which kinds of wines pair well with certain dishes on our menu, however taste is a subjective experience. That's why a "perfect pairing" for one person could be less enjoyable for someone else.*

**Golden Rule:** *The weight of the wine should match the weight of the food.*

## WHITE

**Merlot:** *Parmesan cheese, steak, caramelised onions, rosemary and berry fruit.*

*Shiraz/Syrah:* *Hazelnuts, salmon, tomato, oregano.*

**Pinotage:** *Lasagna, chili, duck, pork, venison and chorizo sausage.*

**Pinot Noir:** *Lamb, sausage, mushroom, strawberry, cinnamon, fillet and chicken.*

**Malbec:** *Beef, lamb, pork and pasta with creamy tomato sauces.*

**Primitivo/Zinfandel:** *Italian sausage, venison, quail, lasagna and chilli.*
