AUGUST 2022: MAIL ORDER & SHOW/EVENT PRE-ORDER LIST
(USA Sales only)

www.facebook.com/orchidphile
(203) 329-7255

Address all correspondence & orders to: orchidphile@optimum.net
(Please mention "Mail Order" in the subject line)

This list replaces & supersedes all previous lists. All orders (if your order is reserved with a credit card) are tagged and removed from sale in the order in which they are received & are subject to prior sale.

We only ship to the continental US (not Hawaii or Alaska) so prices are listed in US Dollars.

PHALAENOPSIS are separated into their own groups of:

Species, Multi-Floral Minis, Super-Minis, Pelorics, 'BIG LIPS', Waxy Novelties, One-of-a-Kind Cutting-Edge Novelty Seedlings

Other categories include **MINIATURE VANDACEOUS, MINIATURE DENDROBIUMS** & divisions of some of our select **PAPHS, MINIATURE/COMPACT (TETRAPLOID) CATTLEYAS** and **MISCELLANEOUS GENERA** ~ all of which grow & flower happily with our Phals. Each genus is put into their own category following our Phal. lists.

NOTE: Many of our plants are in 3" pots as first or second bloomers with a few new Stem Props & Seedlings in 1.7" pots, in Near Blooming to Blooming Size. The bulk of our stock is currently growing in New Zealand moss unless otherwise noted. Flower size & leaf span measurements noted are approximate at the time, given only as a guideline. Stock quantities of fewer than 10 plants are noted on each month's list since these often sell out quickly.

From the date you place your order, we need an additional week to pull, tag, remove from sale & prepare your order for shipping. We will notify you of the potential shipping date in our email confirmation of receipt of your order.

ORDERING INFORMATION FOR OUR MAIL ORDER CLIENTS:

We ship via **UPS** Ground or Air depending on the final destination.

We reserve the right to withdraw any offering from sale and to limit quantities. We guarantee all plants to be true to their identity to the best of our knowledge. However, since many come in from Taiwan, we have to assume they are properly labeled as to their species or hybrid name. We make no warranty as to the productiveness of any plant sold since everyone's growing conditions vary.

Although we do our utmost to pack carefully, we are not responsible for damage to buds or flowers if buyer specifically requests these plants ~ therefore, risk is assumed by buyer for buds or flowers shipped at this stage since factors beyond our control can contribute to flower or spike damage in transit. Safe arrival of a healthy orchid plant is guaranteed.

Packing & Shipping Charges:

A Packing/Processing Charge of \$5 for the first plant & 1.50 for each additional plant is added to your invoice.

And we only charge our actual Business UPS Shipping Cost which is heavily discounted.

We use UPS Ground for most 1-2 day deliveries within reasonable delivery zones since

Ground Rates are much more reasonable & direct than shipping via UPS Air.

Be aware that no carrier (UPS, FedEx or USPS) will be responsible for damage to perishables (meaning plants), even if they're carrying added insurance. This may cause us to delay shipping your order until the weather improves.

UPS is now our #1 preferred shipper for Air & Ground shipping since they're much more reliable than FedEx has recently been. If you prefer FedEx for shipping, we will not be responsible for shipping delays or lack of accurate/updated tracking information.

Distances greater than a 2-day Ground delivery in winter or summer extremes will be sent via UPS 2nd Day Air.

If a heat pack is needed during the winter, it will be included for an additional \$3.50.

FedEx Shipping: If you prefer FedEx, shipping is at your risk. They do add a surcharge of \$3.50 for "Home Delivery" so many of our clients choose to have their plants delivered either to their office or to a nearby FedEx location that accepts "Hold for Pickup" packages. During the coldest/hottest months, we will **only** ship to FedEx "Hold for Pickup" or Business locations.

This way your package is not exposed to being on the delivery vehicle for too long since Business or "Hold for Pickup" addresses get Priority Delivery, often before noon.

We can research a location near you that accepts "Hold for Pickup" Ground or Express packages.

GIFT CERTIFICATES:

We also have attractive **Orchid Gift Certificates** for any denomination, which can either be emailed directly to the recipient or sent by snail mail with an Angela Mirro note card so you can include it with your own special greeting.

This is the perfect answer for those who are reluctant to send gift plants during extreme weather conditions.

Just let us know the amount, the recipient's name & how you would like it to be sent ~ each certificate is good for 6 months from the date of purchase.

TO PLACE YOUR ORDER:

- 1 ~ Email your order, including your Shipping Address & contact Phone Number for the shipping label, to orchidphile@optimum.net
- 2 ~ **We cannot set aside & remove from sale any orders until we have your credit card information to reserve your plants:**
As soon as we've confirmed receipt of your order via return email, call us at **(203) 329-7255** with your credit card info. For those clients who ask us to hold a shipment beyond a reasonable delivery time-frame, we need a **non-refundable** deposit of 50% of that order total.
- 3 ~ Once we have all that information we will tag & remove your orchids from sale, then arrange a convenient shipping date.

NOTE: Your credit card will **not** be charged until your order is packed & ready to ship since UPS shipping charges vary based on box size & destination zip code. We accept all major credit/debit cards (**not PayPal**) for mail orders ~ your card information is never saved on our computer so it's 100% protected from fraud via our secure Card Processor.

Once your order is packed for shipping you will receive 3 separate confirmation emails:

- 1** ~ Your actual Credit Card Receipt
- 2** ~ Your shipping Tracking Number
- 3** ~ A detailed orchidPhile Receipt for your purchase

SIZE DEFINITIONS:

B/F = Currently in bud and/or in flower (one spike unless otherwise noted)
SP = In spike, just initiating to pre-bud stage (one spike unless otherwise noted)
BS or PF/BS = Blooming size (BS) or Previously flowered (PF/BS) ~ should flower again in season
NBS/BS = Near blooming to blooming size (approximately 6-12 months to flowering, depending on your growing conditions)
S = about 2 years to first flowering

In case we are sold out of an orchid you might want, we can always suggest a substitute of something very similar.

NOTE #1 RE: LARGER POT SIZES POSTED ON VARIOUS ORCHID WEBSITES:

Don't be misled by pot sizes noted on various orchid websites, especially when the plants are coming from the same Taiwan nursery/grower ~ a larger pot doesn't mean a larger or more mature plant! Often plants from Taiwan arrive in larger pots with large leaf spans, but with fewer roots due to Taiwan's perfect growing conditions. And sometimes the moss is beginning to break down or is not of the best quality for vigorous growth. This is not ideal for our more challenged US growing conditions ~ here their root systems often benefit from being in a smaller pot in the best quality moss, extremely important when they're growing in the more moisture-retentive NZ moss.

Their leaf spans are identical for us all, no matter what pot size is listed ~ some commercial nurseries simply "flip" (list & ship) them right away in the same pot & media they arrived in. We prefer to see the roots breaking out to, or robustly encircling, the sides of the pot which is an indication that it's well established in that pot.

We often choose to reduce the larger pot size by selectively repotting some of these plants, based on the vigor of their root system, into a smaller pot with premiere top quality NZ moss to prevent root rot that could result from staying too wet for too long in too large a pot. We make this additional effort to assure everyone of a healthy, properly potted plant that they can continue to grow on without concern or the urgent need to repot it.

The fastest way to lose your orchid is by growing it in too large a pot or in a "lesser-than-top-grade" NZ moss ~ both conditions can lead to root loss with the plant declining & eventually being totally lost! If purchased elsewhere, our suggestion is to examine & consider repotting your plant as soon as possible to avoid root loss due to media breakdown, especially if the plant has been shifted from its plug size pot, with its older media still intact around the roots, into a larger pot.

NOTE #2 RE: FLOWER COLOR & PLANT VIGOR:

We cannot say this often enough ~ with the majority of today's novelty species & hybrids, be aware that flower color is heavily influenced by **light & temperature** at the onset of spiking right into flowering ~ influenced by its species heritage. This means the same plant, flowering in both cooler & warmer months, can look slightly to very different in terms of color intensity/accents.

OUR NEW PRIVATE FB PAGE, orchidPhile Orchid Sales USA, FEATURING OUR NEWEST ARRIVALS:

YOU MUST HAVE A FACEBOOK ACCOUNT IN ORDER TO REQUEST TO JOIN THIS PAGE

We will be sharing our newest arrivals from Taiwan and our One-of-a-Kind seedlings in real time as soon as they flower in the greenhouses. With photos & a brief description, we'll be showcasing them, as flowered, on orchidPhile Orchid Sales USA at: <https://www.facebook.com/groups/241832531066686>

This is a limited Private FB Group, so to join our Group you must answer all the membership questions to be accepted. You'll be among the first to know about new cutting-edge seedlings & exciting new Stem Props the minute they are available. Check the page often since once the plants are released, many of our select plants/seedlings sell out quickly.

PHAL SPECIES:

Most of our Phalaenopsis species are from Taiwan & reflect much improved forms & colors, having been sibbed or selfed, using very select new generation parents. Species like Phal. bellina, violacea, venosa, amboinensis, speciosa, gigantea, viridis and javanica are extremely slow to reach maturity & can be easily lost as small seedlings so we're only offering well-established Near Blooming to Blooming Size plants. As a result of their extra years to reach maturity, the pricing on these plants is higher than is usual for the quicker growing & more readily available Phal. species.

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. amboinensis 'Wilson' <i>(Select clone of the Yellow form of this Species)</i></p> <p><i>One of the backbones of today's cutting edge novelty breeding, this species has been important in bringing vivid color to its progeny ! These brilliant yellow flowers, overlaid heavily with rusty-red barring, are further enhanced with a central white heart. The 5.7cm waxy fragrant flowers will cascade gracefully over the leaves, producing four or more flowers on each inflorescence ~ a fully mature plant can show off with multiple spikes just exploding with bold patterning. Previously flowered spikes will remain green & continue to add additional buds & spikes in season. A dramatic new clone of this wonderfully fragrant species !</i></p> <p style="text-align: center;">WAXY FRAGRANT SPECIES CAN BLOOM TWICE A YEAR</p>	<p style="text-align: center;">SP <i>In spike: 5</i></p>	<p style="text-align: center;">\$ 48</p>
<p>Phal. deliciosa (Silver Leaves)</p> 	<p style="text-align: center;">Phal. deliciosa (Silver Leaves) <i>(Seed-grown sib cross of charming Species with wavy silvery leaves)</i></p> <ul style="list-style-type: none"> ~ Silvery-green attractively wavy upright leaves ~ Multitudes of adorable 3/4" mini flowers touched with a whisper of pink & bold pink lip ~ Compact grower ~ Flowers from summer into fall ~ LEAF SPAN: 6" upright leaf span ~ POT SIZE: 3" pots in NZ Moss ~ Perfect for space-challenged collections <p style="text-align: center;">SILVER-LEAF MINI SEED GROWN ONE-OF-A-KIND SEEDLINGS !</p>	<p style="text-align: center;">BS <i>In stock: 9</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 42</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. equestris f. alba (Rare pure alba form of Species)</p> <p>~ Multitudes of charming ¾" pure white mini flowers to create the ultimate bouquet</p> <p>~ Flowers from summer into fall</p> <p>~ Compact leaves & branching spikes</p> <p>~ Grow shadier than for a standard Phal</p> <p>~ LEAF SPAN: 6-8" upright compact leaf span</p> <p>~ POT SIZE: 1.7" pots in NZ Moss</p> <p>~ Perfect for space-challenged collections</p> <p>These seedlings are from the same population that produced our select 'Tara's Beauty' (pictured on the right). Fuller & longer lasting than is typical for this species ~ could potentially be a 4N population.</p> <p style="text-align: center;">MINIATURE SPECIES ONE-OF-A-KIND SEEDLINGS</p>	<p>BS <i>In stock: 2</i></p> <p>F <i>In stock: 1</i></p> <p style="text-align: center;">NEW !</p>	<p>\$ 55</p> <p>\$ 65</p>
	<p style="text-align: center;">Phal. equestris f. coerulea (Blue Lip form of Species) <i>Mericlone produced to assure strong blue lip stability</i></p> <p>~ Thick fleshy upright compact leaves</p> <p>~ Multitudes of charming ¾" mini flowers touched with dusting of blue & a bold blue-violet lip</p> <p>~ Flowers from summer into fall</p> <p>~ Grow shadier than for a standard Phal</p> <p>~ LEAF SPAN: 6-8" upright leaf span</p> <p>~ POT SIZE: 3" pots in NZ Moss</p> <p>~ Perfect for space-challenged collections</p> <p style="text-align: center;">MINIATURE SPECIES</p>	<p>BS</p> <p>B/F <i>2 spikes</i> <i>In spike: 1</i></p> <p style="text-align: center;">NEW !</p>	<p>\$ 45</p> <p>\$ 65</p>

 <p data-bbox="269 604 509 625">Photo credit: Wilson Orchids</p>	<p data-bbox="735 111 1143 180">Phal. tetraspis (speciosa) coerulea 'Wilson'</p> <p data-bbox="829 195 1049 216"><i>(Blue clone of Species)</i></p> <p data-bbox="667 247 1211 600"><i>We suspect that this particular clone is actually the same as our previously listed Phal. tetraspis f. livida 'Yaphon', also listed by others as speciosa 'L-26' ! Often mericlones are released by a nursery without a particular clonal name, so the nursery that purchases them for resale will put their own clonal name on the plants. It's very possible that all the variously named clones of this blue form of the species are one & the same. But until we've flowered them we cannot be sure of this ~ so it's really worth collecting one of each of the named clones of this new cerulean form !</i></p> <p data-bbox="789 636 1089 663">FRAGRANT SPECIES</p>	<p data-bbox="1281 128 1325 155">BS</p> <p data-bbox="1248 191 1357 268"><i>Limit of 1 plant per client</i></p>	<p data-bbox="1401 128 1479 155">\$ 115</p>
	<p data-bbox="735 707 1143 777">Phal. tetraspis (speciosa) coerulea 'Young Blue'</p> <p data-bbox="829 791 1049 812"><i>(Blue clone of Species)</i></p> <p data-bbox="667 844 1211 1276"><i>We suspect that this particular clone may also be the same as our Phal. tetraspis f. livida 'Yaphon', with that particular clone also being sold by others as speciosa 'L-26' ! Or it could be the grey-blue color form of the species ~ or from some photos we've seen, a result of the brown (brunneola) color form with the blue color form. Often mericlones are released by a nursery without a particular clonal name, so the nursery that purchases them for resale will put their own clonal name on the plants. But until we've flowered them we cannot be sure of this. All we can say is that they appear to be a browned-blue from photos of this clone ~ but then again, photographing blue can be tricky at best.</i></p> <p data-bbox="789 1312 1089 1339">FRAGRANT SPECIES</p>	<p data-bbox="1281 724 1325 751">BS</p> <p data-bbox="1248 787 1357 865"><i>Limit of 1 plant per client</i></p>	<p data-bbox="1401 724 1479 751">\$ 110</p>
	<p data-bbox="764 1381 1114 1415">Phal. tetraspis 'Green' x self</p> <p data-bbox="824 1434 1053 1455"><i>(Green form of Species)</i></p> <p data-bbox="667 1493 1211 1730"> <i>~ All the seedlings from our first import of this selfing produced 'Green' progeny ~ Ever-blooming, producing up to 5 flowers at a time on each spike (spikes remain green) ~ Heavy substance 4.9cm FRAGRANT flowers ~ LEAF SPAN: 5-6" ~ POT SIZE: 1.7" pots in NZ Moss</i> </p> <p data-bbox="789 1770 1089 1797">FRAGRANT SPECIES</p>	<p data-bbox="1248 1396 1365 1453">NBS/BS <i>In stock: 1</i></p> <p data-bbox="1256 1535 1357 1562">NEW !</p>	<p data-bbox="1401 1396 1479 1423">\$ 110</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. tetraspis f. blue-grey <i>(Sib cross of Blue-grey form of Species)</i></p> <p><i>One of the newest of "blue" forms of Phal. tetraspis, this clone bearing blue-grey flowers as opposed to the cerulean blue flowers of the clone 'Yaphon' (L-26). We have had clients collect one of each of these blue color forms to enjoy the amazing range of blue saturation that they add to enhance their collection !</i></p> <p>FRAGRANT SPECIES</p>	<p>BS <i>Very limited</i></p> <p><i>Limit of 1 plant per client</i></p>	<p>\$ 120</p>
 <p><i>Our own photo of the awarded plant from our SEPOS exhibit</i></p>	<p>Phal. tetraspis (speciosa) f. livida 'Yaphon' AM/AOS <i>(Stem Prop from Mainshow Orchids)</i> <i>(Super dark Blue clone of Species)</i></p> <p><i>We were just granted an AM/AOS flower quality award for our plant of this amazingly pure blue form of the species ! Originally released as Phal. speciosa 'L-26', this is now the correct name for this clone. Several of these have already flowered for us & they are a wonderful dark cerulean blue which the camera never seems to capture accurately. As an interesting side note, we've re-flowered several that bloomed in the warmer long-day months which flowered solid blue. But with the short winter days & cooler temperatures, we've seen them throw the odd white segment on what previously flowered as a solid blue flower. No matter which way they flower, they produce great compact spikes over an equally compact leaf span. To see it is to love it !</i></p> <p>FRAGRANT STEM PROP</p>	<p>SP 2-3 spikes</p> <p><i>Limit of 1 plant per client</i></p> <p>STOCK VERY LIMITED</p>	<p>\$ 145</p>
	<p>Phal. violacea f. indigo 'M' <i>(Stem Prop from Mainshow Orchids)</i> <i>(Select Stem Prop of Species)</i></p> <p><i>An exciting just-released Stem Prop of the Indigo form which was achieved as a result of years of sibbing & selfing select strains of Phal. violacea f. indigo ! This intensely colored clone, producing wonderfully full form flowers, is the result of a careful selection of its parents for their increased vigor and robust root systems, building on HP Norton & Krull Smith's original strains of Indigo violaceas. Beautiful richly colored fragrant flowers become their most intense indigo color in slightly cooler & brighter conditions in the spring & fall. Like all Phal. violaceas, if their flower spikes remain green, do not remove them since they will continue to add buds right into the fall & at their next flowering in addition to creating a new spike or two !</i></p> <p>VERY FRAGRANT !</p>	<p>BS/SP</p> <p>RESTOCKED DUE TO POPULAR DEMAND !</p>	<p>\$ 125</p>

PHALAENOPSIS HYBRIDS

Most of these clones are the result of cutting-edge Taiwanese breeding programs & are plants we've selected from some of the most forward-thinking nurseries during our annual trips to Taiwan to judge their Orchid Shows.

Many of the hybrids with a heavy Harlequin influence or red, yellow or orange in their breeding background will show their boldest and most vivid colors when bloomed under cooler temperatures & brighter light during the fall & winter.

MULTI-FLORAL MINIS & MULTI-FLORAL MIDIS (including Novelties, Harlequins & Splash-Petals):

Much to our amazement, many of our Minis & Midis have already spiked again for the second time within 6 months ! Their tendency to flower more frequently is due in large part to today's select breeding using more vigorous cutting-edge parents.

**** We're defining "MULTI-FLORAL MIDI" as those that produce flowers that are around 2 ½" to 3" in size, halfway between a typical mini & a larger flowering classic with their flower size being influenced by a parent of each size.*

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Ark's Little Pink 189 'Ark898' <i>(Jiaho's Pink Girl x Luchia Pink)</i></p> <p><i>An absolute little charmer created with one of our all-time favorite multi-floral mini parents, Jiaho's Pink Girl. Beautifully round full flowers are produced on medium height readily branching spikes in perfect proportion to the leaf span. Combining the best of both parents, its 2 ¼" flowers are large enough to make a sensational show ~ neither too small nor too large & readily tucked into any collection !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI</p>	<p>BS/PF <i>In stock: 2</i></p>	<p>\$ 33</p>
	<p style="text-align: center;">Phal. Chi Yueh Lion King 'CYS154' <i>(Parentage to come)</i></p> <ul style="list-style-type: none"> <i>~ Waxy non-fading yellow multi-floral miniature</i> <i>~ Flushed with pink-red overlay centrally</i> <i>~ Nursery photo does not really show its flower well (we'll post our own photo soon)</i> <i>~ Light & temperature will determine intensity of colors</i> <i>~ FLOWER SIZE: 5.0cm</i> <i>~ SPIKE HEIGHT: 8-9"</i> <i>~ LEAF SPAN: 11"</i> <i>~ POT SIZE: 3" pots in NZ Moss</i> <p style="text-align: center;">MULTI-FLORAL MINI</p>	<p>BS/PF <i>In stock: 2</i></p> <p style="text-align: center;">NEW !</p>	<p>\$ 38</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. (Kaoda Twinkle x pulcherrima) 'A12456'</p> <p><i>This is one outrageous new multi-mini harlequin, producing multiple robust & vigorously branching spikes ! Due to its color intensity, we suspect the coerulea form of pulcherrima was used in this mini to embolden its harlequin parentage. Mated to the harlequin-influenced multi-mini Kaoda Twinkle, this mini produces a dramatic pristine white lip against its dark harlequin-influenced flower, with the pulcherrima influence adding floriferousness & vigor to the novelty Kaoda Twinkle while at the same time creating dark heavily-emboldened harlequin flowers. Like many harlequin-influenced flowers, light & temperature will affect the color intensity & suffusion of its harlequin influence depending on the time of the year when it flowers.</i></p> <p>HARLEQUIN MULTI-FLORAL MINI CAN FLOWER TWICE A YEAR !</p>	<p>BS/PF <i>In stock: 1</i></p>	<p>\$ 33</p>

	<p style="text-align: center;">Phal. Liu's Cute Angel 'KF#3' AM/AOS</p> <p style="text-align: center;"><i>(Jiaho Cherry x lobbii)</i></p> <p><i>We just received an AM/AOS on this floriferous little wonder at a recent orchid show !</i></p> <p><i>Definitely our most favorite of all the Phal. lobbii & parishii hybrids we carry ! Mr. Liu is world-renown for using his amazing collection of Phal. lobbii & parishii which he then breeds with easier-to-grow multi-floral minis ~ and this is one of his most charming & floriferous hybrids to date. Phal. Jiaho Cherry is (pulcherrima x Taisuco Jewel), a rich dark pink multi-floral mini. By crossing it with Phal. lobbii, the result has been a vigorously growing multi-floral mini that still retains that distinctive & fabulous broad lobbii lip. An easy grower, capable of producing multiple branching spikes held in perfect proportion to its extremely compact leaf span, measuring only 8-10" from leaf tip to leaf tip. This clone has flowered for us two or more times each year & tends to create basal keikis around the mother plant for the ultimate display. A great showy miniature that is easily tucked into any collection !</i></p> <p style="text-align: center;"><i>MULTI-FLORAL MINI ! 'BIG LIP' HYBRIDS:

One of the most important factors in today's 'Big Lip' breeding is a large flat lip that is almost identical to the petals ! The clones we choose to carry must have a beautiful broad flat lip tucked right up into the flower itself so it gives the definite impression of a 3-petal ~ or 3-lip ~ flower.

PELORIC NOVELTIES:

These plants were hand-selected in Taiwan, while in flower, specifically for their peloric flowers ~ they are the result of a clonal shift from a population & are quite unique with each hybrid expressing its own special form of peloria. These are not often available to us in the US, but one of our nurseries is always on the look-out for them with us in mind, hand-selecting them while in flower to assure their peloric result. We prefer the flatter peloric expression in pelorics rather than the Lycaste-type peloria so all those offered here produce pleasingly flat flowers.

SUPER-COMPACT ~ PERFECT FOR SPACE-CHALLENGED COLLECTIONS:

These very compact growing Phalaenopsis are ideal for tucking into any space-challenged collection. Their compact leaf spans produce spikes are much shorter than typical for many multi-floral miniatures or novelties, & many produce multitudes of smaller charming, often fragrant, flowers.

Those species & hybrids can flower more than once a year, with many continuing to add additional buds & flowers on previously bloomed spikes while still creating a new spike or more. Some also readily produce keikis (baby plants) from their base or on a spike, or both, to create the ultimate flowering presentation.

	<p style="text-align: center;">Phal. Liu's Cute Angel 'KF#3' AM/AOS</p> <p style="text-align: center;"><i>(Jiaho Cherry x lobbii)</i></p> <p><i>We just received an AM/AOS on this floriferous little wonder at a recent orchid show !</i></p> <p><i>Definitely our most favorite of all the Phal. lobbii & parishii hybrids we carry ! Mr. Liu is world-renown for using his amazing collection of Phal. lobbii & parishii which he then breeds with easier-to-grow multi-floral minis ~ and this is one of his most charming & floriferous hybrids to date. Phal. Jiaho Cherry is (pulcherrima x Taisuco Jewel), a rich dark pink multi-floral mini. By crossing it with Phal. lobbii, the result has been a vigorously growing multi-floral mini that still retains that distinctive & fabulous broad lobbii lip. An easy grower, capable of producing multiple branching spikes held in perfect proportion to its extremely compact leaf span, measuring only 8-10" from leaf tip to leaf tip. This clone has flowered for us two or more times each year & tends to create basal keikis around the mother plant for the ultimate display. A great showy miniature that is easily tucked into any collection !</i></p> <p style="text-align: center;"><i>MULTI-FLORAL MINI !</i></p> <p style="text-align: center;"><i>CAN FLOWER TWICE A YEAR !</i></p>	<p style="text-align: center;">BS/PF</p>	<p style="text-align: center;">\$ 38</p>

BLUES ~ STEM PROPS & CLONES:

The hottest new direction in breeding in Taiwan is for BLUES ~ we currently have several new blue Stem Props in solid blue or with a strong blue accent in their flowers. These will all bloom true to the original select mother plant, with slight variations in their intensity depending on light & temperature when the spikes or buds are forming. (For more seedlings with Blue potential, see our One-of-a-Kind Seedling List)

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. Mituo Blue Bear 'Blue Bear' <i>(Stem Prop from Mainshow Orchids)</i> (Mituo Prince x LD Purple Bear)</p> <p><i>This is the sensational result of a cerulean form of Mituo Prince, with the famous breeding parents of LD's Bear King x LD's Bear Queen, crossed to the cerulean form of LD Purple Bear (LD's Bear Queen x violacea f. indigo) ! Full round fragrant waxy flowers are the result of its LD's Bear King heritage while the violacea adds an extra punch of blue to the hybrid. The intensity of its blue will vary according to light & temperature like many in the blue & red lines of novelty breeding. And like them, it will retain previously flowered spikes, adding additional buds, while continuing to produce new spikes. A worthwhile addition to every collection for its color, form and long-lasting flowers !</i></p> <p>SELECT CLONE FRAGRANT WAXY NOVELTY !</p>	<p>SP <i>In spike: 1</i></p>	<p>\$ 155</p>

We have had clients collect one of each of these blue color forms to enjoy the amazing range of blue saturation that they add to enhance their collection !</i></p> <p align="center">FRAGRANT SPECIES</p>	<p align="center">BS <i>Very limited</i></p> <p align="center"><i>Limit of 1 plant per client</i></p>	<p align="center">\$ 120</p>
 <p align="center"><i>Photo credit: Wilson Orchids</i></p>	<p align="center">Phal. tetraspis (speciosa) coerulea 'Wilson' <i>(Blue clone of Species)</i></p> <p><i>We suspect that this particular clone is actually the same as our previously listed Phal. tetraspis f. livida 'Yaphon', also listed by others as speciosa 'L-26' ! Often mericlones are released by a nursery without a particular clonal name, so the nursery that purchases them for resale will put their own clonal name on the plants. It's very possible that all the variously named clones of this blue form of the species are one & the same. But until we've flowered them we cannot be sure of this ~ so it's really worth collecting one of each of the named clones of this new cerulean form !</i></p> <p align="center">FRAGRANT SPECIES</p>	<p align="center">BS</p> <p align="center"><i>Limit of 1 plant per client</i></p>	<p align="center">\$ 115</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. tetraspis (speciosa) coerulea 'Young Blue'</p> <p style="text-align: center;"><i>(Blue clone of Species)</i></p> <p><i>We suspect that this particular clone may also be the same as our Phal. tetraspis f. livida 'Yaphon', with that particular clone also being sold by others as speciosa 'L-26' ! Or it could be the grey-blue color form of the species ~ or from some photos we've seen, a result of the brown (brunneola) color form with the blue color form. Often mericlones are released by a nursery without a particular clonal name, so the nursery that purchases them for resale will put their own clonal name on the plants. But until we've flowered them we cannot be sure of this. All we can say is that they appear to be a browned-blue from photos of this clone ~ but then again, photographing blue can be tricky at best.</i></p> <p style="text-align: center;">FRAGRANT SPECIES</p>	<p style="text-align: center;">BS</p> <p style="text-align: center;"><i>Limit of 1 plant per client</i></p>	<p style="text-align: center;">\$ 110</p>
  <p style="text-align: center;"><i>Our own photo of the awarded plant from our SEPOS exhibit</i></p>	<p style="text-align: center;">Phal. tetraspis (speciosa) f. livida 'Yaphon' AM/AOS</p> <p style="text-align: center;"><i>(Stem Prop from Mainshow Orchids)</i></p> <p style="text-align: center;"><i>(Super dark Blue clone of Species)</i></p> <p><i>We were just granted an AM/AOS flower quality award for our plant of this amazingly pure blue form of the species ! Originally released as Phal. speciosa 'L-26', this is now the correct name for this clone. Several of these have already flowered for us & they are a wonderful dark cerulean blue which the camera never seems to capture accurately. As an interesting side note, we've re-flowered several that bloomed in the warmer long-day months which flowered solid blue. But with the short winter days & cooler temperatures, we've seen them throw the odd white segment on what previously flowered as a solid blue flower. No matter which way they flower, they produce great compact spikes over an equally compact leaf span. To see it is to love it !</i></p> <p style="text-align: center;">FRAGRANT STEM PROP</p>	<p style="text-align: center;">SP 2-3 spikes</p> <p style="text-align: center;"><i>Limit of 1 plant per client</i></p> <p style="text-align: center;">STOCK VERY LIMITED</p>	<p style="text-align: center;">\$ 145</p>

CUTTING-EDGE NOVELTY ONE-OF-A-KIND HYBRID SEEDLINGS:

Our descriptions on these seedlings is minimal since we haven't seen most of them flower for us yet. When possible, based on the parentage, we've added our thoughts on the results we hope to flower from each, but since all hybrids can produce a range, according to the parentage, we leave it to your best judgment to decide what surprise you'd like to bring into flower.

All are very limited in quantity & are in New Zealand moss, growing in 1.7" – 2.25" pots to match their root systems.

And as One-of-a-Kind Seedlings, you can give those you flower your very own identifying clonal name !

(Yaphon Sir 'Yaphon' FCC/AOS x Yaphon Black Snake #6 [all black red])</p> <p>An interesting new direction in breeding, the heavily barred Yaphon Sir has been bred to a bold heavily pigmented harlequin, Yaphon Black Snake. The potential for super dark to almost black flowers, from the fusing of Yaphon Sir's barring with Yaphon Black Snake's gutsy harlequin spotting, is definitely a possibility.</p> <p>FRAGRANT NOVELTY HARLEQUIN ONE-OF-A-KIND SEEDLINGS !</p>	<p>BS</p> <p>FIRST RELEASE</p>	<p>\$ 125</p>

WAXY ~ OFTEN FRAGRANT ~ VIVIDLY-COLORED NOVELTIES:

This group of Waxy Novelties includes limited Stem Props & Poly Props from Taiwan. As mentioned under Phal. species, due to the heavy influence of the slower-growing species of Phal. bellina, violacea, lueddemanniana, amboinensis & venosa in their breeding backgrounds, it often takes an additional year or two for these hybrids to reach flowering size as opposed to a standard Phalaenopsis. But once they do, they're well worth the wait for their vivid color, thick long-lasting waxy flowers & amazing FRAGRANCE.

Plus, many of these Novelty-type hybrids improve even more in their color intensity and size while adding fuller form on their 2nd & 3rd flowerings. They will often retain previously flowered green spikes, continuing to add more buds to them, while still producing additional spikes ~ within a couple of years these plants can be surrounded with multiple spikes in full flower for a sensational show to please all the senses !

 <p>Photo credit: Wilson Orchids</p>	<p>Phal. AL Redsun Queen 'Fragrant'</p> <p>(Ba-Shi Redsun x LD's Bear Queen)</p> <p>This FRAGRANT waxy novelty is a great mix of all the most important species for cutting-edge novelty breeding ! Violacea, bellina, amboinensis & venosa comprise over 50% of its breeding background producing clear yellow-green flowers with heavy substance. Fully mature robust leaf span. A long-lasting, fragrant & brilliant ray of sunshine for any collection !</p> <p>FRAGRANT WAXY NOVELTY ! CAN FLOWER TWICE A YEAR !</p>	<p>BS</p> <p>Should spike in 4-6 months</p>	<p>\$ 48</p>

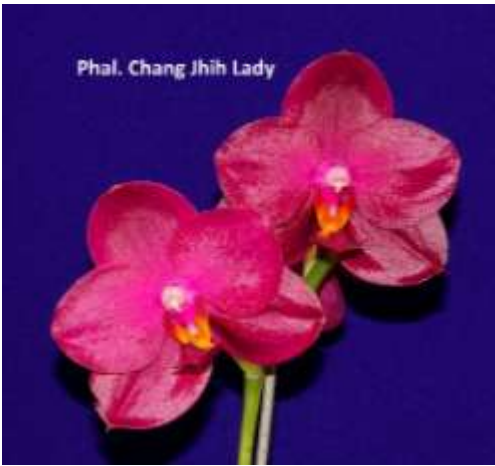

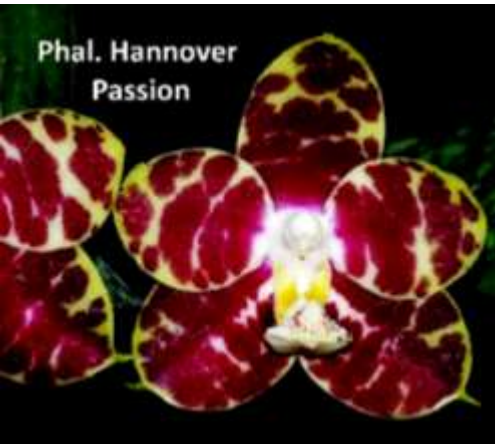

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
 <p>Phal. Chang Jhih Lady</p> <p>Photo credit: Wilson Orchids</p>	<p>Phal. Chang Jhih Lady 'Red' <i>(Sogo Kaiulani x Sogo Key)</i></p> <p><i>An amazing fragrant waxy RED novelty ~ great full form & heavy waxy flowers ! The advantage to this particular clone is that the flowers are held beautifully, well above its round compact foliage, for the ultimate in its display. True to many novelty hybrids, if the spikes stay green in season they will continue to elongate & add more buds in addition to adding a new spike or two. A well-grown fully mature plant can carry 3-4 spikes in flower, all opening at the same time, to create a bodacious show of red !</i></p> <p>FRAGRANT WAXY NOVELTY</p>	<p>SP (1)</p>	<p>\$ 55</p>
 <p>Phal. Fangtastic Green Envy</p> <p>Photo credit: Wilson Orchids</p>	<p>Phal. Fangtastic Green Envy <i>(bellina x Golden Peoker)</i></p> <p><i>We had this Stem Prop several years ago & are so happy that it's been cloned finally ! Spikes are beautifully held on compact spikes over heavily bellina-influenced leaves. Our experience with this particular hybrid is that every deliciously FRAGRANT flower can be slightly different, with the harlequin influence expressing itself randomly on the petals & sepals from one full form flower to the next. Belina contributes half of its breeding background while its other species background creates the perfect spike height for its ultimate display over its bellina-type leaves.</i></p> <p>FRAGRANT WAXY HARLEQUIN</p>	<p>BS SP/B</p>	<p>\$ 48 \$ 58</p>
 <p>Phal. Hannover Passion</p> <p>Photo credit: Wilson Orchids</p>	<p>Phal. Hannover Passion 'Wilson' <i>(Gelblieber x mariae)</i></p> <p><i>Something "old" is new again ! A classic in its own right but also an important breeder behind all of today's barred novelty hybrids. Its dramatically bold barring comes directly from mariae & amboinensis which it readily passes on to its progeny. Its fragrant waxy flowers, if not staked upright, will cascade gently over its leaves on wonderfully compact spikes, creating a waterfall of color. Previously flowered spikes can continue to produce buds in addition to creating new spikes !</i></p> <p>FRAGRANT WAXY NOVELTY</p>	<p>SP/B NEW !</p>	<p>\$ 48</p>

OTHER GENERA WHICH GROW & FLOWER READILY UNDER PHALAENOPSIS CONDITIONS

MINIATURE VANDACEOUS:

All these species & hybrids grow & flower easily WITH our Phals under the same light & temperature conditions since they are miniature growers, requiring much lower light than their larger-growing & flowering cousins. We're growing them in small plastic baskets, with just a little media in the bottom of each basket, to allow their roots to dry slightly between waterings. We then rest the rims of these little baskets onto the rims of deep rose pots, allowing the roots to continue to grow down from the basket into the empty bottom of the rose pot which retains a lot of humidity. This is our own approach to the growing method of "collaring" which the Vandaceous seem to love. These are mostly miniature ~ with a few compact-growing ~ species & hybrids, many of which will readily form basal keikis to become beautiful specimen miniatures producing multitudes of spikes at the same time on all of their mature growths. And many of them are also delightfully FRAGRANT !

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Aerangis biloba x sib (Species sib cross)</p> <p><i>Blooming from late spring through fall, this amazingly fragrant species is found in many countries in the Far East ! When fully mature, each cascading spike can carry up to 30 waxy long-lasting FRAGRANT flowers, creating the ultimate display. Although we choose to grow them in net baskets, they do beautifully when grown mounted with their massive umbrella of flowers cascading from among & over the miniature leaves. Happily grown under Phalaenopsis conditions, these are reliable & wonderfully fragrant showy bloomers !</i></p> <p style="text-align: center;">FRAGRANT MINI ! ONE-OF-A-KIND SPECIES SEEDLINGS</p>	<p style="text-align: center;">BS 2" net basket in bark/moss</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 38</p>
	<p style="text-align: center;">Ascocentrum ampullaceum (Orange form x dark pink form) (Species)</p> <p><i>A great new sibling that could produce a vibrant & intensified new color form of everyone's favorite miniature Vandaceous species, Asctm. ampullaceum ! This particular form of the species crosses the electric orange form with its dark pink form. It also favors the growth habit of the miniature Asctm. curvifolium with a slightly larger spur than most Ascocentrum species. A collector's gem, giving a showier display with a smaller, more compact, leaf span than Asctm. miniatum. Many, from our first group of these seedlings, surprised us with their very first spikes. Although the flowers can vary in their degree of red or red/orange according to light & temperature, our first few of these to flower have produced miniature vivid orange-red flowers as a result of this combination of the two different color forms of its parents !</i></p> <p style="text-align: center;">MINIATURE ! ONE-OF-A-KIND SPECIES SEEDLINGS</p>	<p style="text-align: center;">BS/PF Last 2 2" net basket</p>	<p style="text-align: center;">\$ 35</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Ascocentrum aurantiacum (Miniature Species)</p> <p><i>Producing a charming display of vivid bright orange 3/8" flowers, this species is found in Bali & the Philippines growing under hot to intermediate conditions in dark forests ! A spring bloomer, its erect spikes can produce multitudes of petite flowers for the ultimate display. And as the plant continues to mature, it makes keikis around its base which, when all growths are mature, flower at the same time to create an amazing show !</i></p> <p style="text-align: center;">MINIATURE !</p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS</p>	<p>BS/PF</p> <p><i>2" net basket</i></p>	<p>\$ 35</p>
	<p style="text-align: center;">Ascocentrum miniatum (Miniature Species)</p> <p><i>Capable of putting on a brilliant miniature display, this Vandaceous species will produce multiple growths around the mother plant ! When fully mature, each growth will send up flower spikes creating a fiery bush of petite brilliant orange flowers. An easy grower under Phalaenopsis conditions, it's happily tucked into any collection that's space-challenged !</i></p> <p style="text-align: center;">MINIATURE !</p> <p style="text-align: center;">ONE-OF-A-KIND SEEDLINGS</p>	<p>BS</p> <p><i>2" net basket</i></p>	<p>\$ 35</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Dendrobium lindleyi (formerly Den. aggregatum)</p> <p style="text-align: center;">Select Specimen Size plants ! (FRAGRANT Sib cross)</p> <p><i>We are releasing just a few of our specimen-size plants of this showy species ! Showers of cascading spikes are produced primarily spring through summer & often again in late summer into the fall – FRAGRANT brilliant golden-yellow flowers with a rich dark gold-enhanced lip. This particular sib cross vigorously produces multiple growths yet still remains miniature in height – our plants have grown & flowered beautifully under our higher light Phal. conditions. This strain has been an easy grower & bloomer, totally contrary to all the culture information about this species posted on the web. Once these plants were fully mature, they have vigorously doubled in size each year to produce the ultimate in a fragrant & cascading display of brilliant golden-yellow !</i></p> <p style="text-align: center;">FRAGRANT & AMAZINGLY COMPACT GROWER !</p>	<p>PF/BS</p> <p><i>Specimen size ~ 40-75+ growths !</i></p> <p>LIMITED</p> <p>SPECIAL LISTING</p>	<p>\$ 125 & up</p> <p><i>Each priced based on number of growths</i></p>
	<p style="text-align: center;">Den. Ueang Pheung 'orchidPhile' Division of our Select Plant from this group of seedlings (jenkinsii x lindleyi)</p> <p><i>The particular charm of this FRAGRANT MICRO MINI is that while it retains the miniature leaf habit of Den. jenkinsii, it took on the greater floriferousness of Den lindleyi, creating multitudes of large lindleyi-size flowers on cascading spikes, producing more flowers and buds than Den. jenkinsii's habit of 2-4 flowers per spike. We selected this particular plant for the size & flatness of its flowers in addition to its broader & richer orange-accented lip. Can flower at any time, fall to spring, on its newly maturing growths !</i></p> <p style="text-align: center;">FRAGRANT MICRO MINI ! Divisions of our Select Clone</p>	<p>BS</p> <p><i>2" pots in NZ moss</i></p> <p><i>Very limited</i></p>	<p>\$ 48</p>

PAPHIOPEDILUMS:

A few of our featured Paphiopedilums are divisions of select plants from our own collection ~ and are growing and flowering under the same conditions as our Phalaenopsis. Our particular favorites are miniatures from the brachy & parvi families, especially those with micranthum, armeniacum & delenatii as parents, and the larger growing, always grand & showy multiflorals, using philippinense or rothschildianum as parents. Pricing will vary according to the number of growths of each division/plant. Number of growths for each provided on request.

	<p align="center">Paph. Deena Nicol 'orchidPhile' <i>(philippinense x glanduliferum)</i></p> <p><i>We love Paph. philippinense hybrids for their compact growth, well-defined striping & twisted petals. This has been one of our favorites from all we've flowered ! This fabulous multi-floral has already received 16 AOS awards. Slow to reach maturity but well worth the wait, we selected this seedling from several we have flowered for its well-defined crisp marks & great petals ~ makes the ultimate dramatic statement when in full multi-floral bloom !</i></p> <p align="center"><i>DIVISION OF OUR SELECT CLONE</i></p>	<p align="center">PF (1)</p>	<p align="center">\$ 95</p>
	<p align="center">Paph. Temptation 'orchidPhile' <i>(kolopakingsii x philippinense)</i></p> <p><i>This particular clone of Paph. Temptation has been an amazingly easy grower ! Another multi-floral hybrid which is slow to reach flowering maturity, we were struck by its crisply defined dorsal sepal & charmingly twisted petals ~ its beautifully spaced flowers are presented proudly on tall inflorescences. This stunning multi-floral hybrid has already been the recipient of 42 AOS awards !</i></p> <p align="center"><i>DIVISION OF OUR SELECT CLONE</i></p>	<p align="center">NBS (1)</p>	<p align="center">\$ 95</p>

MINIATURE/COMPACT CATTLEYAS:

*We've expanded our collection of miniature & compact Cattleyas (many of them **Tetraploid** breeding) for their ability to thrive & flower under the same conditions as Phalaenopsis, in addition to many of them rewarding us with twice a year blooming ! Contrary to popular belief, they don't require the same high light that larger members of the Cattleya family need & they're happy growing under warm to intermediate temperatures. Also, their flower color intensifies after a few days from first opening as each flower fully matures. They're the perfect addition to any collection, especially collections that are space, windowsill & under-lights challenged, because they're easily tucked between larger plants, taking up little or no room at all.*

	<p style="text-align: center;">Brassavola Little Stars 'Yasuji Takasaki' <i>(nodosa x cordata)</i></p> <p><i>Delightfully fragrant at night, this primary hybrid is even more floriferous & easy to grow than its "Queen of the Night" Brassavola nodosa parent ! Free-flowering, it can bloom twice a year or more with clusters of light green flowers bearing large 1 3/4" broad crystalline white heart-shaped lips, readily becoming a specimen within a year or two ~ our specimen plant of this is again flowering after having just finished its February blooming. Give it high Phalaenopsis light and allow for good drainage to the point where the medium begins to dry out. We've grown these in bark mixes in a pot & in New Zealand moss in a plastic basket with no problems either way. Its terete leaves indicate it doesn't need high humidity ~ and if getting enough light, it will show red spots on its leaves. The flowers are as large as nodosa but the pollen parent, cordata, has increased its flower count to 6 or more flowers per spike. A compact & forgiving grower with an amazing fragrance that can bloom more than twice a year !</i></p> <p style="text-align: center;">NIGHT-TIME FRAGRANT !</p>	<p style="text-align: center;">BS <i>Large overgrown plants in 2" pots in NZ moss</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 38</p>
	<p style="text-align: center;">C. (Beaufort 4N x Small World 4N) TETRAPLOID POPULATION</p> <p><i>Adorable tetraploid 3" yellows with a large amethyst lip, dramatically accented with dark amethyst-magenta spots from the tetraploid Tokyo Magic ! Again, a new hybrid using our favorite C. Beaufort, the tetraploid form, as the pollen parent which rounds out the flowers of its progeny. Expect multiple flowerings per year with bright yellow long-lasting blooms. Another "just too cute" fragrant miniature Cattleya for every space-challenged collection !</i></p> <p style="text-align: center;">FRAGRANT ! MINIATURE/COMPACT TETRAPLOIDS! ONE-OF-A-KIND SEEDLINGS !</p>	<p style="text-align: center;">NBS/BS <i>2" net baskets in NZ moss</i></p>	<p style="text-align: center;">\$ 33</p>

 <p><i>Our plant of this new hybrid from our recent SEPOS Orchid Show exhibit ~ rich lime green, even deep into the throat.</i></p>	<p>Procatavola Key Lime Stars <i>(Epc. Lime Sherbert x B. nodosa)</i></p> <p>Expect lime green flowers bearing a huge white lip, kissed with a lime green throat ! We love B. nodosa hybrids for their exotic night-time fragrance & this new hybrid is no exception. The result of this mating shows off with the best of both parents, especially their easy-to-grow ability. Lime Sherbert contributes the green petals & sepals while nodosa brings in the large white lip. And the flowers are HUGE in relation to the plant size itself. These have been flowering for the first time in just 1 ½" pots ~ and they're more than capable of exploding in growth to become a specimen in no time at all thanks to its B. nodosa parent. Blooming is usually around September-October, but they've also been known to flower for a second time in the spring, just like their B. nodosa parent. Give them a good draining mix & allow them to approach dryness before watering again.</p> <p>FRAGRANT MINIATURE/COMPACT ! 	<p>Rlc. (Little Magician x C. Beaufort) - 4N</p> <p>TETRAPLOID POPULATION</p> <p><i>Exciting new hybrid of two amazing Tetraploid mini-Catt parents ! Producing bright yellow flowers with bold red lips, several will also have a brush of red on the petals from their Little Magician parent. Expect long-lasting extremely full-form flowers with great substance, crowned with a bold red lip - capable of flowering twice a year !</i></p> <p>MINIATURE ! ONE-OF-A-KIND SEEDLINGS ! TETRAPLOIDS</p>	<p>NBS/BS</p> <p><i>2" net baskets in NZ moss</i></p>	<p>\$ 38</p>

OTHER GENERA ~ ONCIDINAE, MISC SPECIES & HYBRIDS ~ MINIATURES & STANDARDS:

All the plants listed below grow & flower easily WITH our Phals under the same light & temperature conditions since many are miniature growing species or hybrids, requiring much lower light than their larger cousins – they can put on quite a show for their compact size ! In addition, Oncidinae can also be grown under intermediate conditions with bright Phalaenopsis light.

As a side note, all the Oncidinae are growing in New Zealand moss which they seem to love ~ we never would have believed they would do so beautifully in this medium ! The moss not only helps maintain a nice even moisture in the pot, but it also helps the plant retain plumper pseudobulbs while adding to the vigor of the plant's new growths. We've been amazed at the difference the moss makes for all these plants as opposed to growing them in a bark mix.

	<p>Gomesa Jiaho Queen 'Jiaho' AM/AOS <i>(Mulattas x varicosa)</i></p> <p><i>We have waited a long time for this miniature to be available ! Much as we love Gomesa varicosa, we simply cannot grow it well but love its rich color contrast. However, this miniature hybrid is so easy to grow, & so much like varicosa in its dramatic flowers, that we're excited to share them with everyone who has a space-challenged collection. Its chubby round pseudobulbs stand only about 4.5" in height with its branching & self-supporting thick flower spikes reaching only 12-14". The intensely colored lemon yellow broad-lipped flowers are about 4.5cm in size, its sepals & petals rich espresso, perfectly finished with a near-black & boldly contrasting espresso spot on the bright yellow lip. Firm substance flowers with a satiny texture, this is a charmer that is easily tucked into every collection !</i></p> <p>MINIATURE !</p>	<p>BS/PF 3" pot</p> <p>B/F (2) 2" pot</p> <p>NEW !</p>	<p>\$ 45</p> <p>\$ 55</p>
 <p><i>Our awarded plant ~ the flower is so glossy that the flash is reflecting back ! Sepals & petals have a green base but are so heavily overlaid with dark burgundy that they appear solid, almost black, in color. And the contrasting fuchsia lip is just the frosting on the cake !</i></p>	<p>Propetalum La Jolla Delight 'Hilo Orchid Farm' AM/AOS <i>(Promenaea stapelioides x Zygo. 	<p style="text-align: center;">Zed. Kukoo (<i>Zelenkoa onusta</i> x <i>Onc. cheiroporum</i>)</p> <p style="text-align: center;"><i>Kudos, again, to Ginna Plude who just had one of these she purchased from us awarded by the AOS !</i></p> <p><i>We just love this newest petite micro-miniature find from the Oncidium family ~ and fortunately obtained a few more. However, all of them, with the exception of our exhibit plant, sold out at the SEPOS Show last month ! As a primary intergeneric hybrid of two perfectly delightful miniature species, it's capable of producing a multitude of small bright yellow flowers on arching, often branching, spikes over its micro-miniature foliage, the foliage being no more than 3-4" in height. This little charmer is infinitely easier to grow than its species parentage & flowers any time of the year, at least twice a year as its new growths mature, with its display lasting infinitely longer than either of its species parents. A delightfully adorable little accent orchid, perfect for windowsill, space-challenged or under lights growing !</i></p> <p style="text-align: center;">MICRO-MINI ONCIDIUM ! ONE-OF-A-KIND SEEDLINGS</p>	<p>PF/BS (1) <i>Last one</i></p> <p><i>2" pot in NZ moss</i></p>	<p>\$ 48</p>
	<p style="text-align: center;">Zygo. Advance Australia 'HOF' AM/AOS (<i>Titanic</i> x <i>Helen-Ku</i>)</p> <p><i>We received an AM/AOS on this clone a few years ago & still feel it's the best FRAGRANT Zygo around for its flat much rounder flowers & compact growth habit – a very easy and extremely compact grower, much better than most Zygopetalums available today which tend to really spread out & take over your growing space ! The waxy green sepals & petals are almost totally covered with chocolate brown blotches, and its broad lip is heavily overlaid with vivid purple right out to the narrow white picotee, a vast improvement over other Zygopetalum hybrids. As first bloomers they will produce 4-6 flowers on their first spikes. As each plant continues to mature, expect to see up to two spikes per each new growth bearing six or more flowers on each spike and flowering more than once a year ~ fully mature plants with multiple newly emerging growths only add to its delightfully fragrant bouquet ! A vigorous grower for this kind of breeding, it thrives when grown in New Zealand moss. Its heavy chocolate barring only varies with the light and temperature conditions (cooler & brighter versus warmer & shadier) when the spikes are forming. The absolute best of all Zygos. for its solid purple lip, rich rich color, full flat segments, delightful fragrance & great compact growth habit !</i></p> <p style="text-align: center;">FRAGRANT ! CAN FLOWER TWICE A YEAR ! GREAT COMPACT GROWER</p>	<p>BS/PF (1) <i>4" pot</i></p> <p><i>Back due to popular demand !</i></p>	<p>\$ 48</p>
