20,000 OHMS PER VOLT DC-10,000 OHMS PER VOLT AC

40 MICROAMPERE 3" D'ARSONVAL METER MOVEMENT HIGH INPUT RESISTANCE ON ALL DC AND AC RANGES

ONLY

A new multitester with extra-luxury features, at a down-to-earth price. Uses a large 3" meter with two color scales for easy visibility. The 40 micro-ampere meter mavement permits a high input resistance on all ranges: 20,000 shms per valt an DC; 10,000 ohms per valt on AC. This permits the measuring of voltages without unduly loading the circuit, thus preserving accuracy of readings. 1% talerance resistars further help in this respect. A single knob selector switch greatly simplifies operation.

Besides the extreme sensitivity and superior versatility of this instrument, it features ranges not found an other, competitively priced VOM's. Measures 0-10-50-250-300-1000 DC volts, 0-10-50-250-500-1000 AC volts, 0-10K-10K. Imag ohms, 0-500 microamperes, 0-10-250 milliamperes, 20 to +36 decibels, PLUS two special ranges 0-5000 henrys inductance and 250 mmf to .02 mfd capacity. A real bargaint 5ize 3%" x 5½" x 1½". NEW 299 COMPLETE STEREO AMPLIFIER

130 STEREO PREAMPLIFIER

This stereo preamplifier can be used manaurally or as an electronic crossover. Special circuitry permits the sterea cartridge to be used for manaural records. A phasing switch permits phase reversal of one of the channels if program material requires it. A third center channel is provided for another amplifier to achieve optimum realism. Balancing for each of the channels is provided. Visual indication of made af operation is provided. Visual indication of made af operation is provided. Separate bass and treble control is provided for each channel. Sterea selector switch has Balance A, Balance B, manaurally through both amps., Channel B manaurally through both amps. Thannel B andy, loudness; Loudness Valume switch; Phasing switch; Scratch filter; Rumble filter; Input selectar has B positions covering all types of equalization. Pick up selector 1 & 2. Two magnetic stereo inputs available. There are 2 hi level stereo inputs for AM/FM stereo tuner or tape recorder. There are microphane provisions.

Rear controls include: Phana level, NARIB tape level, tape playback level, and 2 level controls for high level inputs—Outputs include: Channel A, Channel B, and center channel. Phase reverse switch places channel A and B 180° out of phase making possible the use of vertical transcription records.

transcription records.

pocifications: Frequency response: 19 to 35,000 cps; armonic distortion: 0.15% at rated output; Size: 5½" x 4¾" x 12½". Shpg. wt., 15 lbs. ... Net 169.95 H. H. SCOTT 130-Less Cose

A new, versatile stereo control center preamplifier-omplifier whose excellent performance, advanced stereo features, compatibility with all existing monarral applications, and low cost make it EASY TO SET UP YOUR OWN STEREO SYSTEM NOW! A tatally new kind of amplifier, the new LAFAYETTE LA-90 has been "customatality of the stereo high fidelity. It has special speaker connections (dual output taps up to 32 ahms) to allow parallel operation of the 2 amplifier channels for 28 watts manaural output to single speaker systems of up to 16 ohms impedance; or, you can add it to an existing 20-30 wat his fis system for a seconde 28-watt stereo channel, providing a balanced stereo system and pratecting yourself against obsolescence of the alder amplifier, since you will always be able to play stereo; or, you can feed one 14-watt amplifier channel to a woofer and the second to a mid-range and tweeter combination for a 28-watt monaural system with electronic crossover. It, performance for standard 2-channel stereo is highly satisfying: frequency response is 20-20,000 cps; full record equalization is provided; inputs are present for every type of stereo or monaural program source, such as tape head, tuner, and crystol or ceramic or magnetic cartridge; it has a channel reverse switch so that music which should be an the left or on the right is properly positioned; it has a speaker phasing switch to overcome the loss of same frequencies due to stereo recording deficiencies sometimes unavaidably present. Other special stereo/manaural features are individual channel balance controls to obtain the balance necessary for good stereo effect, a master level control for controlling volume of both channels without disturbing stereo balance, separate bass and treble tone controls for each channel, mounted concentrically so that bass ar treble can be adjusted individually for each channel—

and once adjusted can be used simultaneously to maintain tonal stereo balance. A special tape monitor output and tape monitor switch allow you to make stereo or manaurol recordings and to play them back, using a tape deck and ane or two record/playback preamplifiers permanently cannected to the LA-90.

FEATURES & SPECIFICATIONS: POWER OUTPUT: 28 wotts monaurally, for either driving a single speaker system or 2 separate speaker systems monaurally, for either driving a single speaker system or 2 separate speaker systems monaurally as on electronic crossover (highs to 1 speaker group, lows to the other). 14 wotts each steree channel. FREQUENCY RESPONSE: 20.20.000 cps. HARMONIC DISTORTION: Belaw 11/5% at 12 watts. HUM AND NOISE: 75 db below full output, either channel. OUTPUT (SPEAKER) TAPS: 8, 16, 32 ohms. CONTROLS: 6-position Selector Switch (Aux, Ceromic or Crystol, Tuner, LP-RIAA, POP, Tape Head); Bolance-Channel A, Balance-Channel B, Moster Level; Treble A, and Treble B (cancentric); Bass A and Bass B (concentric); A-B and B-A Channel Reverse Switch; Stereo-Monaural Switch; Tope Monitor Switch; Speaker Phosing Switch; NPUT IMPEDANCES: Tuner, crystol/ceramic, aux — 0.5 meg-ohms; mag. phono ar tape head — 100,000 ohms. INPUT: Stereo or Monaural; Tuner, Crystol/Ceramic, Magnetic Phono, Tape Head. TAPE MONITOR OUTPUT: Dual for Stereor Monaural. AUXILIARY AC OUTLET: For phono player or tuner. TUBES: 4. 12AX7, 4-EL84; 2-EZ80 (rectifiers). POWER CONSUMPTION: 100 watts, 117 volts, 50/60 cps AC. DIMENSIONS: 4-11/16" h (less feet) x 14-9/16" w x 9'y" d. Styling is hondsome, modern 2-tone, and front panel is removable for console mounting. FEATURES & SPECIFICATIONS: POWER OUTPUT: 28 wotts monaurolly, for

New! GENERAL ELECTRIC LH-12 COMPLETE SPEAKER SYSTEM

Ideal for Stereo

Ideal for Stereo

The new GE "extended bass" system features a compact 2-cu.-ft. infinite baffle enclosure plus a wide range speaker system to meet the high performance and doubled space requirements of stereophonic reproduction. Has a new 12" extended bass woofer with 31 az. Alnico 5 magnet, high-excursion cone, long voice coil, power output capability 4 times (+6 db) that of conventional speakers in comporable enclosures, treated cloth cone suspension for higher compliance and smooth response, and curved cone shape to eliminote audible spurious cone vibrations. Also has a new 2" direct-radiator tweeter with wide-angle sound dispersion for better stereo perspective, 6.8 az. Alnico 5 magnet, combined phasing dome and shorting ring for more uniform high frequency response and for impraved impedance match to amplifier for 4 times increase in output (+6db) at 15,000 cps. Response extends to 18,000 cps. Also includes 1500 cps. L/C crossover network which provides very smooth tweeter response (± 1 db) in the important 1500-7000 cps range. Overall response is 40-8,000 cps; power roting 60 watts Integrated program material; impedance 8-16 ohms. May be placed horizontally or vertically and comes with matching 3" base, Size 23%" x 14%" x 15". Available in mahogany, blonde, cherry and walnut finishes (please specify which). Shpg. wt., walnut finishes (please specify which). Shpg. wt.,

NEW! LA-45 14-WATT AMPLIFIER 39.50 Only 5.00 Down!

The Lafayette LA-45 is a complete 14-watt amplifier with built-in preomplifier-equalizer with wide range frequency response and low hum and distortion to ensure sparkling reproduction that will delight you. This undistorted power is achieved from circuitry employing the new premium quality EL84 tubes in a pentode-connected balanced output circuit. 5 inputs are provided for every type of crystal, ceramic or magnetic phono cartridge, for tuner and tape head as well as high level auxiliary input. The front panel function selector and equalization switch gives instant choice of tuner, aux, or phono with proper equalization for all types of records, and tope head. Equalization positions are RIAA (LP), POP for 78 rpm records, and NARTB tape head equalization. A "Monitar" jack and switch permit tape monitaring, provide a high level signal for tape recording, or allow plug-in use of the new stereo adopters. Other features include a 12 db per octave rumble filter, on auxiliary AC receptacle, provision for mounting in cabinet or on a console ponel, attractive finish that blends harmoniausly with both modern and traditional decor, and a power on-off pilot light, its appearance matches the Lafayette LT-75 tuner, it comes complete with removable case.

LAFAYETTE PROFESSIONAL **BULK TAPE ERASER AND DEMAGNETIZER**

Outstanding Quality Value

- COMPLETELY ERASES TAPE REDUCES NOISE LEVEL • FOR 3", 5", 7", OR 101/2" REELS • TWO ERASING COILS
- **6½ AMPERES DRAIN**

Regularly 49.95

Special 21.50

A corefully designed and precisely manufactured professional tape "degausser" for complete erasing of tapes. Just place the tape reel an spindle of demagnetizer, slow-ly ratate 2 or 3 turns, take off, and that's all-a completely clean tape. The demagnetizer removes every signal on the entire tape—even extro strong sounds too loud to be removed by the recorder's own erase head. Completely clears tape of any prior recordings. In addition, by clears tape of any prior recordings. In addition, by clearing tape completely unmagnetized, it serves to reduce tape hiss to the level of new "virgin" tape. In fact, tape hiss is so low that subsequently naving it over the errors. prefer to permonently disconnect the recorder's erose head, and use only bulk erosure. Two completely separate caits are used for doubly-effective erosure, even of large-draws over 6½ amperes. The latioyette Tape Demoanetizer offers all of these features, and at this special price. Can be used to demagnetize tape, magnetically striped film, plus tools and workhes. This professional unit has a heavy, custom finished case, a ruaged nan magnetiz too. heavy custom finished case, a rugged non magnetic top, heavy duty an-olf switch and power cord. Has built-in fuse. Pilol light prevents accidentally leaving it turned on. Size 6%" x 7%" x 3½". Shpg. wt., 14 lbs. hiss is so low that subsequently passing it over the erase head of a recorder actually INCREASES noise by 4.6 db. To take advantage of this noise reduction, same users

ML-120—Regularly 49.95

LAFAYETTE TAPE HEAD DEMAGNETIZER REMOVABLE POLEPIECES

EXTRA CONVENIENT

Unlike other demagnetizers, the Lafayette Tape Head Demagnetizer uses remayable palepieces. Three complete sets are furnished: stroight, 45°, and 90° (right angle), permitting quick and easy use with any tape head. Tape heads need no langer be removed from the recorder so they can be reached by the clumsy polepieces of older head demagnetizers; the Lafayette Demagnetizer's polepieces reach every head.

Far from being a luxury, o tape head demagnetizer is necessary for best tape recorder performance. Among all the possible sources of noise in tape recorders, there is only one which is common to all recorders and is a perfectly natural, common occurrence—tape hiss due to magnetized heads. Although unmagnetized when new, tape heads gradually become magnetized by shorp switching pulses occurring while switching the recorder from play

to record or vice versa. Same audia sources (especially the human vaice) produce unbalanced signals containing more power peaks in one direction than in the other. This unevenness is also sufficient to cause magnetization of

This unevenness is also sufficient to cause magnetization or tape head.

The solution is to use a demagnetizer to remove this permonent magnetism from the head, thus reducing the noise level. Periodic head demagnetization is required for all tape recorders to insure aptimum signal-to-noise ratio. For this reason, same professional tape recorders are demagnetized as often as several times weekly. Now, Lofayette enables anyone with even the most modest budget to perform this necessary demagnetization, with a minimum of effort. For 110 valts 60 cycles. Shpg. wt., 1 lb.

THE LAFAYETTE KT-600 SOLVES EVERY STEREO/MONAURAL CONTROL PROBLEM

THE LAFAYETTE KT-600 SOLVES EVERY

In Lafoyette's constant effort to bring you the very latest and most advanced developments in electronics—and particularly in high fidelity—ot prices everyone can afford, Lafayette went to the most forward-looking experienced brains in the electronics/high fidelity industry and has now DAFED to produce what we think is the MOST REVOLUTIONARY DEVELOPMENT IN STEREO HIGH FIDELITY—A BRILLIANT NEW ACHIEVEMENT

THE LAFAYETTE KT-600 STEREO MASTER AUDIO CONTROL CENTER!

THE KT-600 pravides 4 dual concentric input level controls for bolanced use of different types of program sources—such as AM and FM tuners, tope recorder with microphone, phonograph plus microphone, etc., and without overloading inputs; 3 controls are for high level input, and a separate level control is provided for the output of the preomplifier stage. The KT-600 provides separate turnover and ralloff dual concentric switches for 24 possible positions of accurate equalization an each channel; equalization on each channel may be set independently at the other. Furthermore, all Inputs can be variably mixed, monaurally, at will (mike with phono, tape recorder with phono, etc.). The Bridge Control permits cross-channel feed or aptionally acts as a volume control for the 3d channel (Bridge) autput to eliminate 'ping-pong' or "hole-in-the middle" effects. An audible, sharp, accurate "null" (dip in saund output) is provided by the "Calibrate" positions of the Stereo Function Switches working in canjunction with the clutch-type Bolance Controls for precise sterea bolance— highly importon for good stereo performance. The 3d channel output can also serve for mixing any stereo program (stereo record, tape, AM/FM stereo) ta produce excellent manoural recordings or to play a stereo program monourally through a seporate amplifier and speaker system in another raom. The KT-600 has Electronic Phase Reversal to make up for reversed-phase recordings cometimes found commerciolly, in which there SPECIFICATIONS

is a loss of some portions of the frequency spectrum, and to correct speakers connected out of phase. Channel reversal is also present for carrect positioning of stereo music to the right or to the left — and this may optionally be accomponied by phase reversal for best overall stereo sound. The KT-600 has a Presence Rise Switch which pulls a sola instrument out of the general musical background with minimum disturbance of orchestrol bolance.

AND STILL OTHER PROFESSIONAL FEATURES OF LAFAYETTE'S KT-600 ARE: Tape head equalization for the new 4-track stereo tapes; Master Gain Control for individual or simultaneous adjustment of channel levels; inputs for constant velocity (magnetic) and constant amplitude (ceramic, crystal or capocitive) phano cartridges, all equalized by the Rolloff and Turnover selector switches; individual channel concentric bass controls and concentric treble controls which permit pre-setting for good stereo tanol bolance and maintaining that bolance at other tane control settings; tane control circuits use treble controls which permit pre-setting for goad stereo tanol bolance and mointaining that bolance at other tone control settings; tone control circuits use 5%-toleronce components and 2½%-toleronce precision potentiometers for occurate centering of their "flat" positions; switched rumble and scrotch filters; switched fletcher-Munson loudness contaur campensation; tape monitar output jacks and tape Monitor-Play switch permit monitaring with recorders having special monitar heads and preomplifiers and also permit a stereo/manaurol tape deck with 1 or 2 record/playbock preamplifiers to be permanently connected to the KT-600 for recording and playbock; "plote follower" autput stages for law impedance (1300 ohm) outputs with extremely low distortion; special low-flux power transformer and DC aperation of all filaments for exceptionally low hum and coal operation; low-noise deposited metal-film resistors and 7 of the new premium low-noise type 7025 tubes are used for extra-goad signol-ta-noise ratio. The KT-600 hos printed circuit board construction for eose af wiring and maximum performance stability.

SPECIFICATIONS

CONTROLS: 12 (6 dual concentric, 6 single) on front panel, 5 on rear (dual concentric). INPUT AND TURNO VER SELECTOR: 7-position, dual concentric, independently set for each channel. Positions: Aus. Tape Ann. Turno, Turno, 18 (18)

LAFAYETTE'S

LAFAYETTE STEREO CENTRAL REMOTE CONTROL MODEL KT-315 ELECTRONIC STEREO ADAPTER KIT

This self-powered electronic adapter offers exciting features unique even in the fast moving stereo field. Inclusion of low-impedance "plate follower" outputs permits remote operation 50 feet or more from the controlled amplifier. Unusual bridge circuit assures precise balancing of the stereo system by means of audible "null." Objectionable "hole in-the-middle" effect can be eliminated by cross-feeding variable amounts of audio from each channel. Includes controlled third-channel output for driving third amplifier and speaker, if desired. Individual or simultaneous control of each channel. Phase reversal with or without channel reversal. Selective monaural operation. Frequency response 10 to 25,000 cps ± 0.5 db; gain 6 db; cross channel rejection better than 50 db.

50 db.

Premium type 7025 dual triodes. Printed circuit boards for easy errorfree assembly. Complete, profusely illustrated manual included. Adapter
with cage measures 6¼" wide x 4½" high x 7" deep (not including
knobs and projections). Shipping weight 7½ lbs.

HFT-90 KIT \$39.95 Wired \$65.95 Cover \$3.95

FM

Newly-designed, extremely sensitive, low-noise "front end" supplied in a cast housing completely pre-wired, pre-aligned, ready to use. This new front end, for the first time makes it sompletely practical even for a novice to build an FM tuner equal to really good professional tactory-wired units. Employs the broad-band detector circuitry used in \$169 FM tuners now on the market. Temperature-compensated components and advanced circuitry completely eliminate need for AFC. Drift is less than 2 parts in 10,000 from cold start. Sensitivity is 6 times greater than other kit tuners and equals that of the most expensive wired tuners; it is 1.5 uv for 20 db quieting. Radiation suppressed far below FCC standards. Also features new DM-70 traveling tuning eye. Input 300 chms, IF bandwidth 260 kc, detector separation of 600 kc. Freq. resp. 20-20,000 cps ± 1 db. Audio output 1 V for 10 uv input with 75 kc deviation. Hum 60 db below 1 V. Gathode follower and multiplex outputs. Flywheel sliderule tuning, AGC, stabilized low limiting threshold for excellent performance from weaker signals, broad-band ratio detector for improved capture ratio and easier tuning, Jull-wave rectifier and heavy filtering, very low distortion. Uses 1-ECC85/6AQ8, 3-6AU6, 1-6AL5, 1-6C4, 1-DM70, 1-6X4. Flexible "low srihouette" design adaptable to any panel thickness for console installation; optional cabinet. HWD: 39-m x 12" x 81/4". Operates from 110-125 VAC, 50 cps line.

THE LAFAYETTE STEREO-TUNER IS UNIQUE AND INCOMPARABLE

More fhan a year of research, planning and engineering went into the making of the Latayette Stereophanic Tuner. Designed against absolescence, it Incarporates every practical and worthwhile feature that is considered necessary for your complete satisfaction of all present and future types of broadcasting. Already, breathtaking stereophanic programs are being transmitted via FM and AM. It will certainly become mare and mare the papular method of high fidelity broadcasting. The tuner also pravides an autput for multiplea FM stereophanic reception, enabling you to enjoy the uttimate in high-fidelity sound reproduction. Since the FM and AM sections are completely independent of each other, this tuner can be used furthermore as a dual-monaural tuner. In this way, the music lovers are able to listen to concert programs on the FM channel in one room, while the younger-set can listen to odifferent program on AM in another room. In addition, on a monaural program which is broadcasted simultaneously via FM and AM, this tener will enable you to tune in both channels and reproduce them through individual amplifier-speaker systems. The improvement of quality will be immediately naticeable because the sound source is now distributed and at the same time, the hole-in-the-wall point source effect is cempletely eliminated. Of caurse, the unit can also be used as an ordinary type of FM-AM tuner, providing you with unsurpassed quality of receptions.

Apart from its unique flexibility, this is, before all else, a superior high-fidelity typer, employing many features faund only in the highest priced units. An inspection of the tubes and parts used will reveal that this tuner is engineered without compromise of any kind. With the Lafayette Stereo-

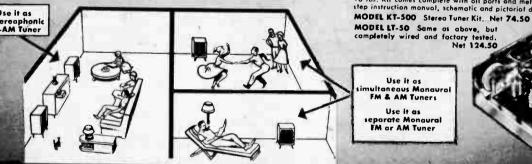

Tuner you are assured of noise-free, drift-free, distortion-free performance. You will not only hear this quality, but also sense it even in the mechanical details; in the "feel" on the velvet-smooth easy flywheel tuning, in the professional appearance of the tastefully selected colors that will blend with any decor. The just-right shade of gald-brass escutcheon contrasts just enough with the dark maroon background, and is set off by matching maroon knobs with gold inserts. The design of the cabinet has the simplicity of modern styling, tauched by a stroke of traditional elegance. Carefully designed for easy installation in console if desired.

designed for easy installation in console if desired.

Deluxe features include separate FM and AM sections, each tuned with its own 3-gauge tuning capacitor, and each has its individual low impedance cathode follower autput. This means that the tuner can be installed using shartest possible FM antenna lead-in wire to minimize undesirable pickup. Long autput cable can be used to cannect tuner to control center without fear of high frequency lass. Also, separate volume cantrols are provided for each channel so that, when used far stereophonic reception, a proper balance between channels can be achieved. Without this important feature, the wanderful realism of stereophanic sound would be destroyed. Convenient front panel switch changes from stereo to manaural use. Simplified accurate knife-edge tuning is provided by magic eye which operates independently on FM and AM. Automatic frequency control "locks in" FM signal permanently. Ferrite rod antenna with loading ring is supplied to bring in weak AM stations for quality reproduction. Designed for easy assembly, the kit is built around two printed circuit boards and prealigned IF's, making construction and wiring simple, even for such a complex unit.

LAFAYETTE SENSATIONAL VALUES in Stereo Turntables and Changers

LAFAYETTE PROFESSIONAL TURNTABLE WITH AUTHENTIC HYSTERESIS SYNCHRONOUS MOTOR ONLY \$6.45

PERFECT FOR NEW STEREO & MONAURAL RECORDS

PROFESSIONAL 4-SPEED TURNTABLE WITH HYSTERESIS-SYNCHRONOUS MOTOR

THE LAFAYETTE TRUE MYSTERESIS-SYNCHP NOUS MOTOR. Since many so-called "hysteresis" motors have appeared and will continue to appear on the et., it is important that you know the difference between the real things as provided by Lafayette, and the imit curs with portial hysteresis motors.

THE LAFAYETTE TRUE HYSTERESIS SYNCHRONOUS MOTOR IS PERFECT FOR THE NEW STEREO AND MONAURAL RECORDS. THE FACT THAT THE NEW STEREO RECORDS CONTAIN VERTICAL MODULATION IMPOSES STRINGENT REQUIREMENTS ON TURNTABLES. THEY HAVE TO BE FREE FROM RUMBLE, FLUTTER, WOW AND SPEED VARIATION. THE LAFAYETTE TRUE HYSTERESIS SYNCHRONOUS MOTOR MEETS ALL THESE REQUIREMENTS WITH EFFORTLESS EASE, RESULTING IN SUPERIOR REPRODUCTION OF STEREO DISCS, AS WELL AS TREMENDOUS REDUCTION IN RECORD WEAR.

REDUCTION IN RECORD WEAR.

ONLY LAFAYETTE'S HYSTERESIS-SYNCHRONOUS MOTOR, in its price class, is made to extremely fine talerances (an the order of .00001 inches)! Only Lafayette's mater has 16 cares, a high permeability rator magnet, ball thrust bearings, ailite sleeve bearings plus felt oil reservoir, cooling fins as an integral part of the rotor and a hollow rotor care for maximum efficiency and minimum heat. Only Lafayette's mater can be ailed from above, without disassembly, through a unique oil feed system. Only Lafayette's mater has a self-oligning armoture.

ONLY LAFAYETTE CAN GIVE YOU A REALLY PROFESSIONAL TURNTABLE WITH TRUE HYSTERESIS—

SYNCHRONOUS MOTOR AT SUCH AMAZINGIY LOW PRICES!

Macric THE turntable—the last word in professional biole-fidality appropriate.

SYNCHRONOUS MOTOR AT SUCH AMAZINGLY LOW PRICES!

Here's THE turntable—the last ward in prafessional high-fidelity perfarmancel A fine pracision instrument in every sense. Just look at some af these OUTSTANDING FEATURES:—WOW AND FLUTTER: less than 0.2% • TURNTABLE: Heavy, diecast aluminum. Lathe-turned for perfect ballance and concentricity, 12" diameter—weighs approx. 4 lbs. and pravides amazingly constant speed; the extra-heavy rim acts just like a flywheel to prevent speed variations • TRUE HYSTERESIS—SYNCHRONOUS MOTOR: Far smooth, low-noise, wow. and flutter-free aperation • RUMBLE AND NOISE: 50 db below average recorded level | INTEGRATED SPEED CONTROL: for all 4 speeds—78, 45, 33½ and 162½ rpm • 2 OVERSIZE, HEAVY DUTY IDLERS: Precision-ground; provide positive constant-speed rim drive • SINGLE BALL THRUST BEARING: Turntable rides smoothly over ball bearing floating on thin film of oil • FREE-FLOATING, SHOCK-MOUNTED MOTOR • RUBBER CUSHION SHOCKMOUNTS • AUTOMATIC IDLER DISENGAGE-MENT • RUBBER MAT • STAINLESS STEEL PRECISION SPINDLE • POWER REQUIREMENTS: For 105-130 volts, 60 cps AC; draws 16 V.A. • ACCESSORIES SUPPLIED: 45 RPM adapter, Strobe disc • SIZE: 2½" above and 4" below motor board; 1434" deep x 1214" wide • SHIPPING WEIGHT: 16 list.

JEWEL BEARING SUPPORT
INSTANT PLUG-IN CARTRIDGE CHANGE
AUTOMATIC FLUID CONTROL
PERFECT RECORD TRACKING
ACCOMMODATES MOST STEREO & MONAURAL
HIGH FIDELITY CARTRIDGES

This Stereo/Monaural transcription arm assures dependable and stable operation, utilizing the floating-action principle of viscous-damping. The arm is supported at a single ciple of viscous-damping. The arm is supported at a single paint by a pivat and iewel bearing having negligible friction. Damping is accomplished by a silicone fluid occupying the gap between a ball and socket. This damping ing the gap between a ball and socket. This damping central permits high compliance and negligible tracking central permits high compliance and negligible tracking central permits high compliance and regigible tracking central permits high compliance and responsible tracking control permits damage to either record at stylus should enter an approximate the tone arm be accidentally dropped. Low frequency resonance, skidding and graove-jumping are likewise minimized. The tone arm accepts all records up to 12" and accammodates virtually all Stereo or Monaural hi-fi cartificates by means of precisely engineered adapters which ridges by means of precisely engineered adapters which the arm has a decorative glossy-block finish. Overall length is 12"; height odiustable from 3," to 2," above materboard; round mounting base is 2,6" in diameter. Shpg. wt., 2½ tbs.

NON-RESONANT WITHIN THE AUDIBLE FREQUENCY RANGE PERFECT TRACKING WITH THE LIGHTEST STYLUS FORCE

EXTREMELY EFFECTIVE FOR PERFECT REPRODUCTION WITH "45-45" STEREO DISCS

RUGGED CONSTRUCTION - FOOLPROOF - TROUBLE FREE

A remarkable advance in tone aim design is presented in these new Lafayette tone arms. An unusual new principle, utilizing 2 vertical and 2 lateral hardened-steel knife-edge pivats supported by hardened steel bearings, pravides extremely low harizontal and vertical friction. This unusual type of bearing provides minimum wavefarm distortion and no undesirable motion or loase-jainted action as viewed from the stylus end. Groave tracing is smooth, with excellent tracking even with very light pickup weight, due to the absence of frictional lasses. Friction in horizonal and vertical directions is law, but mechanical impedance is high at 45°, providing maximum effectiveness with 45-45 stereo cartridges. The unique knife edge bearing construction makes it possible to draw out the 2 shielded leads from the center of the support column, eliminating "stiffness friction" due to the leads. A highly-precise bubble level is provided at the tap at the support column; the bubble plus 3 adjustments on the base make far perfect levelling. Height of the arm is adjustable from 11%" to 23%" above motorboard. Overall length af PK-270 12" arm is 1234"; linear distance from support column to stylus tip is 10°; the PK-280 16° orm is 141/y" averall; effective length is 111/2".

NEW! LAFAYETTE-GOODMANS 3.WAY EXTRA VALUE HIGH FIDELITY SPEAKERS

● 11/4 LB. TO 61/4 LB. MAGNETS OF "ALCOMAX"-THE MOST EFFICIENT MAGNETIC MATERIAL AVAILABLE! ● FREE-EDGED CONE SUSPENSION MADE BY EXCLUSIVE GOODMANS PROCESS • 12" AND 15" MODELS, ALL 3-WAY WITH SMOOTH LOW-, MID- AND HIGH-FREQUENCY COVERAGE • ALL MODELS HAVE SPECIAL LOW-RESONANCE WOOFER CONES, STIFF MID-FREQUENCY RADIATOR CONES, COMPRESSION-DRIVER TWEETER HORNS • FREQUENCY RESPONSE 30-20.000 CPS • HIGH POWER-HANDLING CAPACITY ● HIGH EFFICIENCY WITH LOW-DISTORTION TRANSIENT RESPONSE ● WIDE DISPERSION-ANGLE TWEETER WITH SELF-ALIGNING ALUMINUM VOICE COIL & DIAPHRAGM 🌑 PLUG-IN 12 DB/OCTAVE CROSSOVER NETWORK WITH HIGH FREQUENCY LEVEL CONTROL SUPPLIED WITH ALL MODELS

SUPPLIED WITH ALL MODELS

LAFAYETTE went to this leading English speaker manifecturer for these outstanding custom speakers to provide you with this SUPER-PERFORMANCE VALUE by direct importation. These speakers are all 3-way units, with woofer, mid-range radiator and tweeter all axially mounted to provide an efficient, low distortion, wide-range speaker system. Avoilable in 12" and 15" models, all speakers employ extremely heavy Alcomax magnets—the most efficient magnetic material avoilable—for converting electrical impulses to sound with minimum distortion, especially with musical program material. In the exclusive Goodmans process used in manufacturing the woofer cones of these speakers, the cone rolls and cone edges are bomborded with minute particles of specially-blended plastic ma-

terials to form a virtually free-edged cone suspension withaut the usual joint faults found in so-called free-edged canes and eliminating standing waves and surround resonances. Frequency response of all models is 30-20,000 cps, voice coils are all 16 ohms. Free-oir woofer cone resonances are 25 cps for 15" models, 35 cps for 12" models. At 2000 cps the stiff-coned mid-frequency radiator provides smooth mechanical crossover; the compression driver tweeter has a rigid plostic harn with 2½" circular mouth, 1" diameter aluminum voice coil and dipling min a self-aligning assembly with an air chamber and phase equalizer and utilizes the plug-in 12 db per actave electrical network for smooth crossover at 5000 cps. The network has high-frequency level control with attractive escutcheon

NEW! LAFAYETTE 8" HI-FI SPEAKER

• "MECHANICAL 2-WAY" SPEAKER OF UNUSUAL DESIGN • EXTRA-HEAVY MAGNETS. EXTREMELY HIGH FLUX . RESPONSE 40-16,000 CPS . SPECIAL PATENTED CONE CONSTRUCTION AND MATERIAL FOR SMOOTH, DISTORTION-FREE RESPONSE · EXCELLENT FOR STEREO

A most unusual dual-cone construction is used in these extra-high-quality 8" speakers to economically provide the same type of wide-range frequency response normally found only in true coaxial speakers or multiple speaker systems. There are 2 separate cones, acting through a comman voice coil. The outer edge of the tweeter cone is affached to the mid-section of the woofer cone; both cones "float" on flexible, corrugated edges. This maunting, plus apertures crossover so that both cones operate in phose at low frequencies, but only the tweeter cone operates at high frequences. This gives improved high frequency directional

characteristics and minimum distortion. The patented cone materials provide extremely smooth reproduction. Magnets total flux of 56,000 maxwells. Their high efficiency means ago and transient characteristics, low distortion, and good response at either high or low sound levels. Terminals are strew-type for solderless connections. Sensitivity is 99.5 is 8" diam., 4½" deep; requires 6½" diam. boffle openis. Sheps. wt., 5½ lbs.

ACOUSTIC RESEARCH A and AR-2 SPEAKER SYST

Bosed on new "occustic suspension" principle, Utilizes cobinets filled with Fibreglos, and with specially-constructed speaker-mechanism suspension plus oir-tight "cabinet in which compression of the oir by the speaker couses spring-like return of the speaker cone.

Advantages of this new principle are lowest bass harmonic distartion in the industry, exceptionally uniform extended low frequency tesponse, and small cabinet size for aptimum performance. The AR-1 includes an acoustically-suspended 12" low-frequency mechanism and an 8" mid-range and high-frequency unit. AR-1 is a 4-ohm system. Amplifier should be 10 to 30 watts; domping foctor 1 for standard use, 4 for corner use. Waafer magnetic circuit is 3.3 lbs. Alnica 5 plus 6 lbs. Armon iron. System resonance: 43 cps ±16 cps. Response 38-1000 cps ± 1½ db; 1,000-13,000 cps ± 5 db; down 15 db at 20 cps and 17,000 cps. Harmonic distortion (10 watts input) 25-70 cps: 4½%; 70-1100 cps: 1½; 1100-14,000 cps: less than 1½.

The AR-2 is a lower-priced version of the AR-1 with 10" acoustic-suspension speaker and newly-developed tweeter assembly. Response 42-14,000 cps ± 5 db; down 10 db at 30 and 16,000 cps. Harmonic distortion (10 watts input) under 2% down to 60 cps, under 3% down to 50 cps, 8 ohms. Requires amplifier delivering 10 or mare clean watts over entire audia range. Size: AR-1-25" w x 11½" d x 14" h; AR-2 24" w x 11½" d x 13½" h. Shpg. wt., AR-1: 60 lbs.; AR-2: 45 lbs.

LAFAYETTE UNIVERSAL HI-FI BASS REFLEX ENCLOSURE KITS

BASSREFLEX ENCLOSURE KITS

• EASIEST TO ASSEMBLE – ALL YOU NEED IS A SCREWDRIVER! • ¾" WHITE BIRCH • PRECISION-CUT – FITS TOGETHER SMOOTHLY • PERFECT FOR SINGLE WIDE RANGE, 2-WAY OR 3-WAY SPEAKER SYSTEMS • HIGHBOY OR LOWBOY STYLE

All pieces of these carefully designed bass reflex high fidelity speaker enclosures are accurately precut of ¾" veneers to fit snugly together and eliminate spurious picture-frame moulding and covered with pleasingly decorative plastic acoustic grilles to blend with any finish and room decor. Attractively tapered offset legs are protected by good-looking brass ferrules. Acoustic lining maprovided for 15" speaker plus adapter for 12"; 8½" or 8" midrange plus adapter for 5" and blank wood block if no midrange speaker is used; Jensen compression hom tweeter plus adapter for Lafayette HK-3, HW-7 or Lafayette-Goodmans SK-104 tweeters plus blank wood block if no tweeter is used. Thus, any single wide-range 12" or 15" speaker may be used, or any Lafayette 2- or 3-way speaker system, or almost any other combination of speakers. Kits are supplied unfinished, smoothly sanded and ready for finishing. The lowboy-style cabinet dimensions are (less legs) 28½" w x 23½" h x 16¾" d; legs are 7" high. Highboy has same dimensions with height and width interchanged. Instructions, all parts, hardware, and grille are included with each kit. Shpg. wt., 54 lbs.

E-GOODMANS High Fidelity Speakers LAFAYET FROM ONE OF ENGLAND'S

3-way SPEAKER SYSTEM

• HANOLES 30 WATTS • FAMOUS ENGLISH GOOD.

MANS-MADE 12* WOOFER, 8½/* MIDRANGE, COMPRES.

SION-DRIVER HORN TWEETER • LAFAYETTE L/G

IZ* WOOFER CROSSOVER NETWORK • SYSTEM RESPONSE 30.

Here is an outstanding 3-way high fidelity speaker system which we are indeed proud to be able to offer. It includes a groep of speakers custom-made for Lafayette by Goodmans, famous English manufacturer of some of the world's best high fidelity speakers. The system is ideal for installation in Lafayette hass reflex speaker enclosures, and provides the extremely wide range of 30 to 16,000 cps (8 db down at 20,000 cps) smoothly and without unpleasant peaks. Power handling capacity of the system is 30 watts of integrated program material. Included in the system are the Lafayette-Coodmans SK-102 12* woofer covering the range from 30 to 700 cps, the Lafayette-Goodmans SK-103 8½* midrange speaker covering 700 to 5,000 cps, and the Lafayette Goodmans SK-104 compression driver tweeter operating at from 5,000 cps to over 16,000 cps. Also included is the Lafayette LN-Binductance-capacitance (L/C) crossover network with attached Brilliance (high-frequency) and Presence (midrange) controls. System impedance is 16 ohms. This is a really great system at an unusually low pricel Shog wt., 25 lbs.

SY-163 Lafayette-Goodmans
3-Way Souther St. 100 cps.

Net 49.50

An outstanding 3-way speaker system similar to SY-163 system above, but featuring the new SK-101 15" Lafayette-Goodmans woofer for extra high efficiency even at subaudible frequencies. System response 25 to 16,000 cps. Complete with LN-5 crossover network and SK-103 8%" midrange speaker and SK-104 tweeter. A superb speaker system with wide, smooth response and a new law in distortion and tone calaration.

LEADING SPEAKER MFR'S! Made to Lafayette's own rigid specifications

LAFAYETTE-GOODMANS 15" WOOFER

An all new 15" low-frequency speaker featuring smooth, powerful reproduction down into the sub-audible frequencies. Its rigid construction and high efficiency design permit the reproduction of even the loudest low frequency transients without ringing or distortion. Response 25 to 7000 cps. Alcomax magnet with flux density of 13,000 lines and total flux of 89,500 maxwells assures the utmost linearity at full power 30 watts of program material. Voice coil diameter 134". SK-101 lmpedance 16 ohms. Shpg. wt., 15 lbs.

SK-101-15" Lafayette-Goodmans Woofer Net 28.50

LAFAYETTE-GOODMANS 12" WOOFER

A highly-efficient low-frequency transducer for faithful reproduction of the lowest audible frequencies without tone coloration or distortion. Incorporates high flux Aicgmax nagnets for smooth response and good power sensitivity. Frequency response is 30-7,000 cps, with recommended crossover at 700 to 1000 cps. Total flux is 89,500 maxwells; voice coil diameter is 134". Rated at 30 watts power handling capacity for integrated program material in a multiple speaker system with an LC crossover network. Voice coil impedance 16 ohms. Size 1244" diam. x 6" deep. Shpg. wt., 9 lbs.

AN IDEAL LABORATORY KIT WHICH ASSEMBLE THE BASIC COMPONENTS HELPS TEACH YOU HOW TRANSIS-THEN WIRE EACH CLEARLY EX-PLAINED CIRCUIT BY SIMPLY CON-TORS WORK IN A PRACTICAL WAY. NECTING THE PROPER LEADS.

THE MOST EXTENSIVE TRANSISTOR LAB KIT IDEAL FOR STUDENT - HOBBYIST - EXPERIMENTER

Lafayette's new 15-in-1 transistor experimenters kit is the most practical introduction to the understanding of the operation of transisters — since it utilizes have created and circuitry. Its unexcelled simplicity of construction provides a fascinating and educational program of instruction. You build practical profile presents a program of transister devices that tend to the control of the contro cal, useful operating transister devices that teach you transister fundamentals

This versatile kit is supplied complete with transistors, relay, photosell, dual headphones and all necessary items including lead wire, solder. You also receive an easily understood instruction manual which explains just how each of the 15 circuits works. Battery powered, the kit is shockproof and safe—
ideal for beginners. Shpg. wt., 4 lbs.

EXCITING "EXPLOR-AIR" RECEIVER KIT

4 Bands for total coverage: 550-1600 Kc broadcast

• 1.7-5.0 Mc., 5.0-14 Mc., 14-30.Mc. shortwave bands

Complete bandswitching from front panel

Built-in Big 4" PM Loud-speaker

The most sensational shartwave economy receiver kit ever affered. A complete shartwave and standard broadcast set which covers the entire region from 550 kilacycles to 30 megocycles. Faur whale bands of fascinating programming unavailable elsewhere. Perfect far students of languages, radia amateurs and casual listeners.

Only a regenerative circuit can affer such amazing performance and yet be so simple to build. Building this fine kit is an absolute pleasure — it is so well designed you can't go wrong. Kit includes all the parts you need, and the detailed step-by-step instruction book with its giant pictorial drawings shows you just how to put them together.

One front panel knob does all the bandswitching at the flick of the wrist, immediately taking you fram band to band. All calls are prevound for greater accuracy. This kit is so easy to build a child who can read could do it (and many already havel) The chassis is completely isolated fram the circuit, so there is no shock hazard.

This precision radio kit is just full of extra features. Complete 4 band caverage of broadcast stations, international broadcast bands, amateur, maritime, fire and police services, yes, even satellite signals! Big 4" speaker and sensitive circuit with 50C5 autput stage and 12AX7 regenerative detection and amplifier stages give you all the volume you want. Phane jock for privacy automatically discannects speaker. All controls are an the front panel: On-Off Volume, Main Tuning, Band Spread, Bandswitch, Antenna Tuning, and Regeneration. 110 Volt 50-60 cycle AC-DC power supply lets you use this fine set anywhere. Size: 10" x 7" x 5". Everything needed far unexcelled reception is cambined in a compact, economical package.

KT-135" EXPLOR-AIR RECEIVER KIT (Less Cabinet)

SUPER-SENSITIVE PHOTOCELL ELECTRONIC RELAY

two Lafayette 5K-109

 ADJUSTABLE SUPER SENSITIVITY— WORKS WITH JUST A FLASHLIGHT AT 250 FEET!

. NEEDS NO SPECIAL HIGH-INTENSITY LIGHTS

INSTANTANEOUS OR SUSTAINED OP-**ERATION ON THE FLIP OF A SWITCH!**

Lafayette's latest achievement in a super-sensitive phatocell relay kit. Ideal far sustained operation required for burglar alarms, door buzzers, for turning on porch and home lights at night to discourage prowlers when away in the evening. Excellent for instantaneous am-off operation required far counters, packaging, doar opening, motor activation and countless industrial applications. A flip of the switch converts unit from instantaneous "on-off" to sustained "an" aperation. A simple push on the "RESET" switch opens the external circuit and turns off the atorm. The unit operates on 110 valts AC and incorparates the efficient 5823 cold cathode tube, permitting longer life since there are no filaments to burn out. The controlled circuit is plugged into a convenient 110V AC output socket. A simple change in wiring (in instructions), as well as convenient input terminals, enable you to supply the external circuit with any desired valtage. Ealoy centacts rated at 3 amps permitting up to 300 watts external load on 110 Valts AC. Camplete with all parts, photocell, tube, chassis, silk-screened metal cabinet and easy-ta-follaw illustrated instructions. Size: 3" x 4" x 5". Shpg. wt., 3 lbs. KT-133—Kit, Camplete

59.95

This is a camplete 4-watt hi-fi sterea amplifier having 2 watts autuut per chonnel. Features separate valume contral for each channel; ganged tane contrals; Sterea-manaural switch to feed one channel to both speakers and to reverse the channels. Just right far any use where a small stereo amplifier is required—ideal for custom mounting in even the tightest locations; specially designed far small apartment sized stereo

for custom mounting in even the tightest locations; specially assigned to systems.

An isolation transformer makes this circuit extra safe. Other circuit features for better performance include application of negative feedback to driver and autput stages for wide-range response and extra low distortion. Doubtriode 12AX7 tubes function as voltage amplifier and driver, providing very high gain: 40 millivalts drives this unit to full autput. This tremendous gain, plus an extremely high input impedance, make this amplifier perform exceptionally well with all types of ceramic and crystal pickups, as well as tuners, tope recorders, etc. Selenium rectifier power supply has extremely good regulation. Logical layout, high quality parts, plus complete instructions for assembly, make this kit a pleasure to build and use. For 3.2 or 8 ahm speakers. Tubes: 2-50C5, 2-12AX7 plus selenium rectifier, Size: 9½" x 5" x 4½". Camplete with all parts. For \$10-120 volts, 60 cycle AC. Shpg. wt., 7 fbs. KT-126-Kit, Camplete

COMPLETE STEREO PHONO SYSTEM KIT

Enjoy fine sterea performance with this "easy-to-assemble" exclusive Lafayette package. The camplete system consists of Lafayette KT-126 bosic stereo phono emplifier kit, the renowned Colloro TSC-640 4-speed automatic record changer, the new Ronette "OV" Turnover Stereo cartridge with dual sapphire styli for sterea and monaural recards, and twa Lafayette SK-109 Minioture Mi-Fi Speakers and Enclosures. The amplifier kit has many fine features including 2 waits per channel with separate valume control, "sterea-reversal-manaural operation" switch, and isolation transformer to eliminate shock hazard. The 4" x 6" 5 wait speakers are haused in beautiful mehogany waod cabinets, wark fram either 4 pr 8 ohm outputs and are supplied with 25 ft. af cable for haakup. Yau save 16.58 over regular catalog prices!

NEW! MULTI-PURPOSE ELECTRIC SERVO MECHANISM

- POWERFUL MOTOR DRIVEN R/C ACTUATOR
- POSITIVE, INSTANTANEOUS ACTION
- . FOR MODEL BOATS AND CARS

Lafoyette's new, mator driven, remote control serva-mechonism. Imported by Lafayette ta sell for half the price of any camparable unit! Carefully constructed far power, durability and rugged use. Operates with any single chonnel, remote control receiver and transmitter. When operated at the prescribed 3 volts, the oction is accurate and rapid. Provides far selective steering and automatic return to neutral. Extremely efficient when used with model boats or land vehicles. Habbyists will find uses for the servo-mechanism restricted only by their imagination. Single pulse operation—electronic neutralization. Measures only 2½° x 2″ x 1¾° overall. Includes instructions and linkage to extend actuator arm. Shpg. wt., 8 ozs.

REMOTE CONTROL ESCAPEMENT

. AT THE LOWEST PRICE ANYWHERE!

A sturdy 2 arm self-neutralizing escapement. Completely wired (not a kit). Converts electrical impulses from remate control receiver to mechanical mation for varying movement of plane, boat, or car. Four 90° rotations—two by armature activation, two by neutralization. Has ratchet gavernor for maintaining foolproof retating speed. Weighs only 7/8 az. Size: 1-3/8" L x 2" W overall. Shpg. wt., 5 az.

As Low

As \$1.10

REMOTE ENGINE CONTROL ESCAPEMENT

tafayette's exciting new air-bleed self-neutralizing remale engine control. Varies angine speed of your model. Neutral position of one arm is low speed, neutral position of 2nd arm is high speed, and maintained activated position of either arm (armature activated) staps motor. Perfect mate for Lafayette F-256. Compact and weighs anly 3/4 oz. Requires 1-1/2 volt battery. Law current drain. Size: 1-5/8" x 1" x 3/4". Shpg. wt., 5 az. Net 3.45

COMPOUND REMOTE CONTROL ESCAPEMENT · LAFAYETTE'S AMAZING VALUE IN A 4-ARM SELF-NEUTRALIZING COMPOUND ESCAPEMENTE

. NO NEED TO WORRY ABOUT LOSING YOUR MODEL!

You have no sequence of operation to worry about! Simple as A B Cl. One pulse always gives right turn; two pulses always gives left turn. Three pulses closes the circuit for the supplementary control such as motor (F-257) ar elevator, if used. The rudder always returns to neutral position after any turn as soon as transmitter keying button is released. With ratchet governor for faalproof operation. Sturdy construction—low current deain. Uses 1-1/2 valt battery. Weighs 1-1/8 ax. Size: 2-7/8" L x 1-9/16" averall. Shop. wt.,

NEW! COMPLETE TRANSISTOR BROADCAST RECEIVER COIL KIT MINIATURE 2-GANG POLY-VARI-CON TUNING CONDENSER

• MATCHED MICRO-MINIATURE COILS

● 3-455KC IF'S ● OSCILLATOR ● FERRITE LOOP ANTENNA

A complete set of matched micro-miniature coils for use in subminiature transistorized radio receiver circuits. Shielded IF and Oscillator coils measure only 7/16" high above chassis and are ¾" in diameter! Correct impedances are provided for maximum gain in transistor circuits; high "Q" coil design and impregnation for maximum stability make these units hard to beat at any price!

The oscillator coil has an inductance of 261 μ h, variable \pm 20% by means of a tuning slug. The last IF call (converter output) primary impedance 15,000 ohms; secondary 350 ohms; center frequency 455KC. The 2nd IF (interstage) the same but secondary 500 ohms. The 3rd IF (detector) also the same except secondary 5,000 ohms. The ferrite loop antenna is flat type, 2½" long x 9/16"w x ½" thick, includes famous Poly-Vari-Con 2-gang tuning condenser. Shpg. wt. of kit is 1 lb.

MS-450

SUBMINIATURE TRANSISTOR RECEIVER COIL KIT

Includes same set of high "Q" miniature components as M5-450 except far the tuning candenser MS-440 Same as above, less tuning capacitor.

LAFAYETTE LETELY TEST SENSATIONAL VALUES AT LESS THAN THE PRICE OF KITS!

LAFAYETTE SIGNAL GENERATOR NEVER BEFORE HAS A COMPLETELY WIRED AND TESTED INSTRUMENT OF SUCH ACCURACY AND QUALITY BEEN OFFERED AT SUCH A PRICE!

FREQUENCY 120 KC TO 260 MC
 120 KC TO 130 MC ON FUNDAMENTALS
 LABORATORY ACCURACY AND QUALITY

**A completely wired and tested instrument not to be confused with units sold in kit form at almost the same price, but with a quality and accuracy of instruments 3 to 4 times its price. Six overlapping runges generate signals of 120KC - 320KC - 320KC - 1000KC, 1MC - 3.2MC - 11MC - 138MC and 37MC - 130MC all on fundamentals with calibrated harmonics from 120MC to 260MC. Selector switch gives instant choice of ranges. Switch gives choice of internal modulation of 400 cPS or use of any external source at other frequencies. For October of single signal can be used separately. A sudio testing the 400 cycle signal can be used separately. Outputs are unmodulated RF and 400 CPS audio. RF output is in seves of 100,000 microvolts and jacks are provided for choice of either high or low RF output, Stability is insured by special circuit design. Has a fine adjustment, RF control. AF output is a seven of 100,000 microvolts are grown and plastic bezel. Common AF terminals for EXT-MOD input and INT-AF for audio tests eliminate need for special AF output connectors. Machine engraved planel lettering, Handsome gray metal case with carrying handle. Measures 6½ "× 10" x 4½". Comes complete with pair of leads. AC line cord and plug. Operates on 105-125 y 50-60 cycle AC. Shpg. wt. 8 ibs.

the semi-kit is a new concept in test equipment kits. All the important or difficult ports are already mounted. All that remains to be done is to mount and wire in a small parts — a job so simple you'll finish before you realize it, and best of all, you'll have one of the finest high sensitivity multitesters on the market. When used in a circuit, the high input resistance on all DC and AC ranges does away with the highly inaccurate readings.

LA AYETTE SPECIAL

COMPLETELY WIRED - NOT A KIT MOST ADVANCED ENGINEERING TO FIT

A new streamlined tube tester with a realistic approach to the problem of quickly testing the ever increasing number of tube types. It incorporates new and advanced engineering feetures and all at a price of about half of even the most ordinary tube tester. Read these Specifications.

Tube tester. Read these Specifications.

"FREE POINT": ELEMENT SELECTOR SWITCHING: Newly designed, it reduces possibility of
obsolescence to a minimum because any pin may
be used as filament pin and voltage applied between it and any other pin, or even the "top cap".
Tubes with tapped filaments or with filaments terminating in more than 1 pin are truly tested.

minating in more than I pin are truly tested.

MULTIPURPOSE TUBES: Special Isolating circuit
ellow each section of multi-purpose tubes to be
tested individually as if it were in a separate

envelope.
SMORTS AND LEAKAGES: Supersensitive method checks shorts and leakeges up to 5 megohm between any and ALL elements; continuity between values sections individually indicated.

various sactions individually indicated.
SIMPLICITY: Fast simple operation. The 4 position fast action snap switches are all numbered in exact accord with RMA standards. Thus when testing element terminating in pin No. 7 of a tube—you use button No. 7. You cen't insert a tube in the wrong sacket—there's one for each type of tube base.

TUBE TYPES: Tests all octal, loctal, 7 pin minis-tures, 9 pin miniatures as well as the new noval and Sub-Minar types. Old type sockets used for setting obsolete types—that you rarely see any-more—have been eliminated.

SIZE: A practical size to carry with you as well as for use in the shop—only 81/2 x 61/6 x 21/4" deep. far use in the shop—only 8½ x Shpg, Wt. 5 lbs. MODEL TD-55—camplete with carrying case and instructions.

Wew! MINIATURE POCKET MULTITESTER

ONLY 22.50

- 1% RESISTORS

- . 10,000 Ω/v AC SENSITIVITY
- 23 RANGES 38 µA MOVEMENT
- . COMPLETELY WIRED
- 20,000 Ω/v DC SENSITIVITY

A terrific bargain in an all-round extra sensitive multimeter. Here is the ideal all-purpose multitester for troubleshooting anything electrical or electronic — can be used
for repairing automobile wiring, checking ordinary household appliances, such as irons, heaters, and motors;
troubleshooting complex electronic equipment in the
home, in the shop or in the field. Ideal for TV sets, home
radios, high-fidelity sets, amateur geav, commercial cammunications equipment — wherever a truly portable unit
is required. This is a completely wired precision instrument,
NOT A KIT. Uses a sensitive, rugged 38 microompere
basic meter, a d'Aronard movement with jewelled bearings providing easy, accurate read-aff from its large, clear
scales. 2½ "meter face. 1½ precision resistars guarantee
tap-notch accuracy. This unit weighs anly 10 oz., measures
only 4½ "x 2½" x 1½"—fits into packet without bulging, without weighing down. The entire front is pratected
by a thick, clear sheet of plastic, preventing scratching

and eradicating of switch markings, protecting your meter and preserving its appearance. Single selector switch with positive detents and clearly marked positions permits ane-handed operation. Recessed, break-proof zero-ohms knob-permits easy adjustment, yet cannot be broken even under rough handling.

Mas 23 ranges at the unusually high sensitivities of 20,000 ahms per valt DC, 10,000 ahms per valt AC: DC Valts, 0.5-25-100-500-1000; AC Valts, 0.5-25-100-500-1000; OHMS; 0.6 K-600K-6 Meg-60 Meg: DC MILLIAMPERES, 0.05 (50 micraamps) -5-50-500; DECIBELS, -20 to +64 in 5 ranges.

 SURPASSES PERFORMANCE OF MOLDED PLASTIC TUBULARS

They're new, they're different, ond they're better! Now, et e price for less than that of ordinary plantic molded tubulars, kalayette brings you, for every day service work, a condensor that was designed for criticat industrial applications. The case is of durable gleaming parcelain, a ceramic known for its high degree of imperviousness to maisture and resistance to heart. The capacitor is of finest quelity, bested at 3 times the rated voltage with much closer capacity belarance. It maintains its characteristics under extreme conditions of heat and humidity. It's mechanical construction is excellent, beloads ore firmly offsched and isocialed — they won't twist or break off. We've selected the most popular values and put them up in two servicement designed kits. Each condenser is plainty marked. Each view is mounted on apparate handy strips. All are consensatively rated at 600 DC working volts. See chart for contents of each kit.

HEAVY DUTY 10 AMP DPDT MOTOR SWITCH

. MOLDEO PHENOLIC 79

METAL FACE PLATE

Workmonship on this switch is of the best quality. Terminals are oversize, flow-free solder type which makes for neot, ne-arc connections. Roted 10 Amps at 125 Votts, contacts easily take the current surges of motor starting. Sizes 1½ "x 1/6" x 1". Sushing 7/16" dia., 3/6" long, bot handle ½" long. Shops, wt., 6 oz. SW-26 DPDT Toggle Switch.

thumb rest and insulated borrel. Strong spring with hard bite. Solder lug connection. Overall length 215". Shpp. wt., 4 oz. Supplied in Red and Black.

A FABULOUS BUY! GENUINE LOC and ALLEN-BRADLEY Resistor Kit

INSULATED RESISTORS 100

WITH QUANT. DHMS PLASTIC HINGED BOX!

Lafayette leads the fleid with a genuine Allen Bredley and IRC ½ wait, 10% tolerance, molded resistor kit with a Transparent Plastic Utility Box (built in particular) size: 9½ x 14% x 1-3/10". The finest resistors on the market. Molded insulated composition resistors. Meet JAN-sulated composition resistors. Meet JAN-interestor and high humidity call water, function and high humidity call.

These oil-filled and all impregnated paper capacitors are manufactured to high standards. Features 10% tolerance. Operates efficiently from —40°C to +100°C. Ruggedly constructed in metal case with plastic insulating outer sleeve to withstand shock, voltage surge, moisture, and other adverse operating conditions. Has low dielectric leakage, low power factor and exceptional capacitance stability, lightweight campact, mode to render long servicing life. Ideal for reptacement and original applications in radio, TV and other electronic equipment. Outside fall is clearly printed. Doubly tinned capperweld type leads are firmly attached to the case. Conservatively rolled of 600 WVDC. Ave, shpg. wt., 5 oz. each.

THE IDEAL REMOTE SPEAKER

• PERFECT FOR STEREO

• FITS INTO BOOKSHELF

SPEAKER ENCLOSURE

Only careful Lafayette planning can result in such a handy enclasure priced so low! A beautifully built cabinet with smooth, shining finish available in mahagany, walnut or striking blande, this enclosure will match any type of room decor. Ruggedly constructed at 1/2" wood sides, top and bottom 1/2" wood front and bock. Sturdy enough to withstand ever very high volume levels without vibrating. This handsome enclasure has a thausand and one uses. These units make the ideal two or three channel stereo system or can be used to supplement existing speakers either as the second channel speaker, or as a center stereo speaker for better bolance. Ideally suited as the remote speaker in stereo use, that enclosure can, of course, be used wherever a small hisfi speaker is desired. Anywhere you use it, you will find its appeal once just right. Put it an a bookshelf in the library, on a table or cabinet in the den or living room, even mount it on the wall. One of the three finishes will match any room.

any roam.

Takes a 6" ar 6½" speaker for optimum reproduction of both lows and highs, has small port for port-loading of speaker. Completely enclased back. Will make any speaker saund better. Only 9½" high, 14¾" long, 8" deep. Rubber feet protect other furniture. Shpg. wt., 12 lbs.

NEW! LAFAYETTE 8" HI-FI SPEAKER

. "MECHANICAL 2-WAY" SPEAKER OF UNUSUAL DESIGN . EXTRA-HEAVY MAGNETS. EXTREMELY HIGH FLUX . RESPONSE 40-16,000 CPS . SPECIAL PATENTED CONE CONSTRUCTION AND MATERIAL FOR SMOOTH, BISTORTION-FREE RESPONSE . EXCELLENT FOR STEREO

A most unusual dual-cone construction is used in these extra-high-quality 8" speckers to economically pravide the some type of wide-range frequency response normally found only in true coaxial speakers or multiple speaker systems. There are 2 seporate cones, octing through a common voice cail. The auter edge af the tweeter cone is attached to the mid-section of the woofer cone; both cones "float" on flexible, corrugated edges. This mounting, plus apertures provided behind the woofer cone, results in mechanical crassover so that both cones operate in phase at low frequencies, but only the tweeter cone operates at high, frequencies. This gives improved high frequency directional

characteristics and minimum distortion. The patented cone materials provide extremely smooth repraduction. Magnets ore large and heavy, with flux density of 10,500 gauss and total flux of 56,000 maxwells. Their high efficiency means total flux of 56,000 maxwetts, their miground good re-good transient characteristics, low distortion, and good re-sponse at either high or low sound levels. Terminals are

BLONDER-TONGUE UNIVERSAL

- BOOSTS SIGNAL FOR 1, 2, OR 3 TV SETS
 - COUPLES 1, 2, OR 3 TV SETS
 - WITH I ANTENNA WORKS WITH ALL TV SETS
 - -IDEAL FOR COLOR TV
 - PERFECT FOR MULTIPLE DWELLINGS
- FIXED TUNED-CHANNELS 2-13. HANG IT ON REAR OF SET AND FORGET IT!

Made by the leading manufacturer of television amplifying equipment, this flexible combination television booster and 3-set coupler is a fine example of advanced engineering design and construction. It provides improved home TV reception without the need for tuning or adjustments. Simply make connections to convenient screw terminals, hang it on the back of the TV set, and forget it. Automatically emplifies channels 2 through 6 more than 6 db; channels 7 through 13 more than 2 db. Input for standard 300 ohm balanced antenna. Outputs for 1, 2 or 3 TV sets, 300 ohm balanced. Low noise figure—works well with all latest types of TV sets and reduces Interference. Amplifies the signal on 1 or 2 TV sets, whether one or both are operating. Permits use of 1 antenna on up to 3 TV sets—outperforms all non-powered couplers by more than 2 to 1. Size 6½" x 3¾" x 2½". Uses 6BK7A or 6BK7B tube. For 117 volts. 60 cps AC. Shpg. wt., 2 lbs.

- FULLY CONTROLLED, INTEGRAL MECHANICAL MOVEABLE STAGE

FULLY CONTROLLED, INTEGRAL MECHANICAL MOVEABLE STAGE

This superb instrument closely parallels the "Society" grade microscope in every desirable detail and yet is available at very low cost. Provides heavy, stable horseshae boxe, smooth acting joint, enabling the body to turn through 60°, perfectly balanced at any angle. Tube length is 140 mm. Four Huyghens eyepieces and four achromatic abjectives yield 16 combinations of power from 25X to 1200X. By means of two knurled micro-motion screws at the rear of the stage, it is possible for the aperator to move the stage (and the stide) a distance of 3/16".%", in any direction, while looking through the eyepiece. Mordware is of the finest quality. Tubes are of the highest grade chrome-ploted brass. All fittings are expertly machined and threaded, making this scope suitable for the most exacting work. Scape comes with a set of 5 basic dissecting instruments, made of high-grade instrument steel. 10 slides, a pack of cover slips and a tube of mounting fluid. Includes davetailed wooden carrying case. Shipping wt., 10 bs. Net 44.50 Net 44.50

MECHANICAL SLIDE HOLDER

 CENTERS SUBJECT MECHANICALLY

An ingenious, inexpensive device to aid in centering—positioning—and shifting slide mounted subjects. Mode to work with jour F-10. F-334, & F-377 microscopes—or others neving no larger stages. Made entirely of plated brass. Will accommodate slides up to 1"x3". An indispensable accessory for the careful study of mounted micro-subjects.

F-122 Net 1.50 LAFAYETTE MICRO-LTT

. USE WITH ANY MICROSCOPE

· FURNISHES BRIGHT, EVEN LIGHT

Specially designed for microscope illumina-tion. Provides a bright, evenly lighted field of view. Controlled Intensity, by means of focus-able condenser lens. Lomp may raised or lowered to any desired height on its 4½," stanchion. Inclination and elevation joint permit swinging through 360° in both horizon-tel and vertical plane. Fully adjustable for transparent or opaque specimens, direct or indirect Illumination. Invaluable where ob-lique light is necessary. Operate on 110-120 volts AC/DC. Lamp is easily replaced. Self contained switch, cord and plug. Lamp body is 5½," tong, stand is 5½," high including bote. Shpg. wt., 1 lb.

HUNTING WITH THE MICROSCOPE

Guide for beginners and advanced users of microscopes. How the microscope works. How to prepare and study cultures—set up a microscopic zoo and garden—grow micro organism—perform micro surgery. Profusely illustrated with photographs and drawings. 14 chapters of easy-to-read, highly informative text.

Achromatic BARLOW LENS

- Makes Any Gaed Telescope Better! Daubies Your Telescope's Pawer!
- · Improves Definition!

F-423

- · Provides Greater Eye Relief! Greater Illuminotion—Wider Field!

The Barlow Lens is a negative (diverging) lens which can increase the range of magnification of any given set of eyepieces. Greater eye relief is provided—even on short focal length eyepieces. Sharpens definition and reduces image deterioration by permitting use of low-pawer eyepieces to achieve high magnification. This also provides for greater illumination and a wider field. By increasing the effective focal length of the objective—and reducing its relative aperture—it greatly reduces aberrations present in paarly corrected eyepieces. Lafayette's Barlow lens will make any good telescope perform like a much larger one. Fits all Lafayette telescapes except F-330 Explorer. Accepts eyepieces of 24.5mm (.97") O.D. and fits drow tubes of that size, Shpg. wt., 1 lb.

ACCESSORY EYEPIECES

 Highly Corrected • Hard Coated • 24.5 mm O.D. Finest Quality

Manufactured to extremely close tolerances by one of world's leading manufacturers of optical accessories. These oculars allow you to obtain maximum performance from your refractor or reflector. You can determine the magnification possible by dividing the focal length of the eyepiece into the focal length of the telescope objective lens. All are hard coated. The 24.5 mm O.D., (.97") fits most telescopes currently available.

SLIDE RULE

INDOOR-OUTDOOR

THERMOMETER

● 400-800 MILLIMICRON SCALE

- ADJUSTABLE SLIT WIDTH: DRAWTUBE SLIT FOCUSING
- HORIZONTALLY SPLIT FIELD

A prismatic type, hand-held instrument that has most features of the finest standard laboratory instruments. The millimicron scale is adjustable for sharp facus and for position (with "lock-in" feature to fix scale with relation to known spectral lines). Highest grade aptics yields a broad dispersion field of high intensity obtained from best quality giass dispersing prisms, while excellent lens system resolves the closest spectral lines into 2 distinct lines. By a twist of the callar, a harizantally split field is abtained by which a comparison can be made of two light sources simultaneously. Tubes and callars are constructed of highly polished corrasion proaf steel. Equally suited to laboratory or field work, the spectroscope has a wide array of applications: emission spectromanolysis of light sources, qualitative chemical analysis and metallurgical analysis by emission spectra; qualitative analysis of absorption spectra by examining aqueous or ather salutions contained in the small test tubes provided. Absorption spectrum analysis has application in many branches of technology—calor and dye chemistry, blood chemistry, clinical medicine, criminology. Complete with plush-lined case, shipping wt., 1½ lbs.

VISION FIELD

Spectrum.

A broad dispersion field of high intensity is obtained from several dispersing prisms of matched glass, while a high grade aptical system yields good resolution, sufficient to separate 5769.6A from 5790.6A in the spectrum of a fluorescent lamp. The slit has adjustable width and can be facused sharply by means of an eye piece draw-tube. assuring easy viewing and establishment of Fraunhafer lines of the Salar spectrum or bright lines of the emission spectra. Metal parts are made of highly polished carrosion-proof steel. Cames in plush-lined case. Shipping wt., 9 oz. Net 19.50

TO DETERMINE REFRACTIVE INDEX

Here is a beautifully constructed scientific tool of simple design, easy to operate, with na maving parts, except for the focusing eye piece.

Operation is very simple. A few drops of the sample are placed on the prism, the cover is closed and observation is made by means of tungsten illumination or daylight. A perfectly clear field, completely calar carrected, shages a reficie graduated in percent from 0.32%. With the sample in place as described above the field will show a sharp dividing line between a bright and dark partion; where the dividing line falls determines the reading, which can be estimated to 0.1% accuracy. The instrument can be converted to a universal laboratory type by changing % readings to "index of refraction" readings, No. (Consultation of the converted to a universal laboratory type by changing % readings to "index of refraction" readings, No. (Consultation of the converted to a universal laboratory type by changing % readings to "index of refraction" readings, No. (Consultation converted to a universal laboratory type by changing % readings to "index of refraction" readings, No. (Consultation, agricultural, foad technology, medicine, theare tical chemistry, etc.

REGENCY FM TELEVERTER

 MAKES ANY TV SET AN FM RECEIVER

 COMPLETELY TRANSISTORIZED

 SIMPLY INSTALLED BY ANYONE

MODEL RC-103 The Regency Madel RC-103 TeleVerter makes any TV set an FM receiver at the flip of a switch, yet does not interfere with normal TV reception. Utilizes the TV audia system and large speaker baffle to produce tane quality for superior to small table model FM receivers. Campletely transistarized, its power source is 3 tiny penlight batteries with current drain so low (300 MA) that battery life expectancy approaches shelf life. Simply installed by anyone in 5 minutes—the anly cannections necessary are to TV set antenna terminals and antenna. Meets FCC radiation requirements. Large easy-ta-read dial and planetary drive make fine tuning easy and razor sharp. Haused in attractive 41/2" x 6" x 41/2" plastic cabinet. Shpg. wt., 5 lbs.
