

CITYMULTI[®] CATALOG

VARIABLE REFRIGERANT FLOW ZONING SYSTEMS

MITSUBISHI ELECTRIC IS A WORLD LEADER IN PRODUCTS THAT HELP PEOPLE LIVE BETTER.

When it comes to providing personalized comfort in every room of every building, we are here to help. No other company is as committed to creating environmentally friendly and affordable technology that's ideal for today's home and work environments, no matter the size or shape.

QUALITY

Mitsubishi Electric is consistently recognized by HVAC contractors as the #1 preferred brand with the highest quality rating among manufacturers. With over 30 years of industry leadership, we are proud to be America's #1 selling brand of variable refrigerant flow (VRF) zoning technology.

PERFORMANCE

We deliver a complete range of compact and powerful heat pump products that are also intelligent, quiet, and use energy effectively.

TRAINING

We provide comprehensive product and applications instruction through our regional training centers across the United States.

SUPPORT

We offer the most extensive network of experienced VRF zoning system professionals to provide project consultation in the areas of application planning and design, plus installation and start-up. Post installation, we can provide support, including user training and operation monitoring.

GROWTH

Our products and services provide opportunities for architects, engineers, distributors and contractors to enhance and grow their businesses. With nearly 20 years of consistent double-digit percentage growth, we continue to lead the market's growth acceleration.

ECO CHANGES

Eco Changes is our commitment to continuously strive for a greener tomorrow through cutting-edge global environmental technologies and outstanding strength in manufacturing.

AMERICA'S #1 SELLING BRAND OF VRF ZONING TECHNOLOGY

PRODUCT OVERVIEW

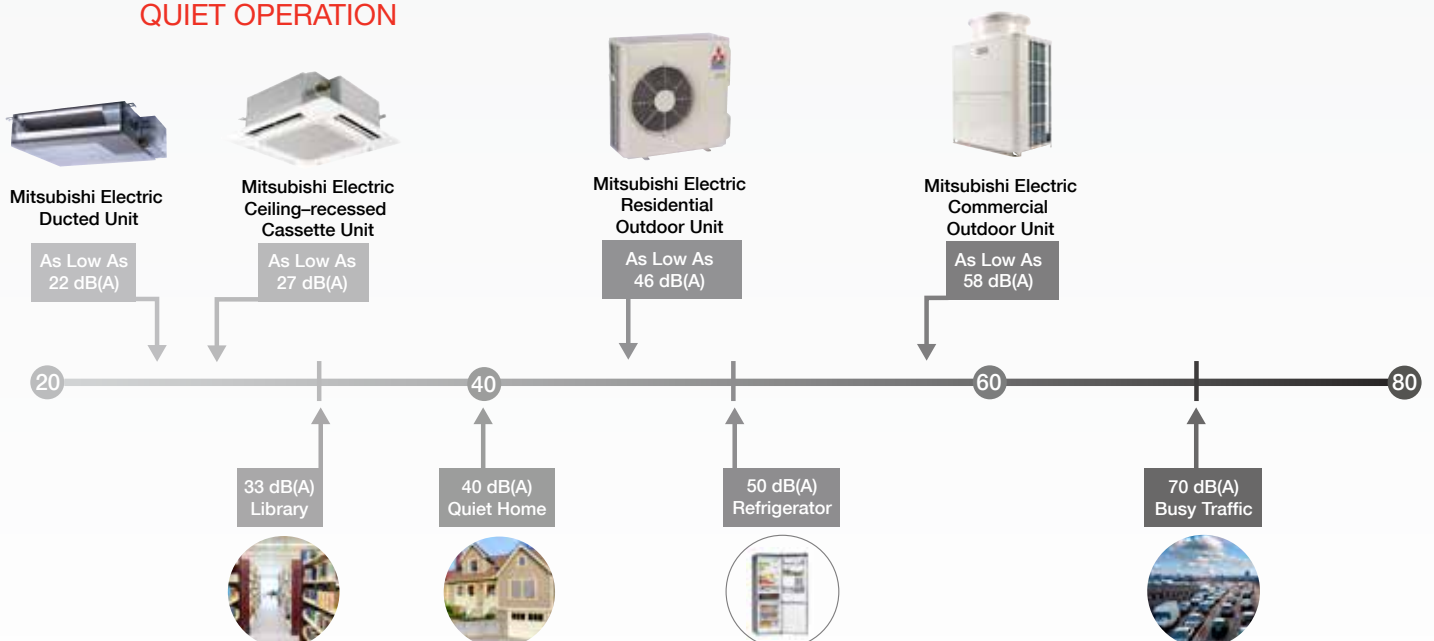

WHY CITY MULTI VRF ZONING SOLUTIONS?

As a global leader in VRF zoning solutions, you can trust that you're getting the most advanced technology and dedicated support in the industry.

ADVANTAGES CITY MULTI OFFERS:

- **Ultra-efficient design** to ensure total comfort in any commercial space.
- **Advanced INVERTER technology** varies the speed of the compressor for more efficient cooling and heating.
- **Complete zoning control** so you heat and cool the areas that need it without paying for the ones that don't.
- **Design flexibility** for any application, from modern designs to historic renovations.
- **Complete product family** to handle every job from the smallest spaces to the largest buildings and campuses.
- **Green technology** that contributes to Leadership in Energy & Environmental Design (LEED) credits and saves energy.
- **Quiet operation** that's even softer than a human whisper.
- **Simultaneous operation** to cool and heat with just two pipes.

PRODUCT ADVANTAGES

CITY MULTI® HIGH-PERFORMANCE, MODULAR VRF ZONING SYSTEMS

CITY MULTI outdoor units feature a lightweight modular design with a smaller footprint, lower sound level, easy piping, maintenance and much more.

1. INVERTER-DRIVEN COMPRESSOR TECHNOLOGY

The compressor varies its speed to match the indoor cooling or heating demand to consume only the energy that is required. No other compressor design can match the efficient performance.

2. EASY MAINTENANCE

In many cases, our systems allow an indoor unit to be serviced while other indoor units within the same piping system are still in operation. Indoor units only require periodic filter changes and cleaning. Protective coating comes standard on air-source outdoor units to lengthen coil life while additional Bermuda Special treatment, designated -BS within the model number, provides enhanced protection for the rest of the outdoor unit in sea-coast environments.

3. LONGER LINE LENGTH

The R2- and Y-Series outdoor units allow for increased line lengths to the connected indoor units. Maximum total length of refrigerant piping is up to 2,624 feet for R2-Series and up to 3,280 feet for Y-Series.

4. ADJUSTABLE STATIC PRESSURE

R2-, Y- and H2i® R2- and Y-Series outdoor fan features adjustable static pressure up to 0.24" W.G., enabling the use of louvers or ductwork in its installation. The static pressure setting is adjustable by changing a dip switch. The default setting is 0" W.G., with options 0.12" and 0.24" W.G.

5. QUIET OPERATION

CITY MULTI air-source outdoor units operate at sound levels as low as 58 dB(A)—the level of a common office environment, restaurant conversation or background music. Water-source units operate as low as 47 dB(A). Contributing features include our INVERTER-driven compressor compartment sealed by insulation-lined metal panels, vibration-absorbing compressor mounts, INVERTER-driven fan and Low Noise operating mode.

LOW AMBIENT OPERATION

CITY MULTI systems provide 100% cooling capacity down to -10° F with the optional low ambient kit. Systems provide guaranteed heat down to -13° F (H2i® systems only). See page 29 (Low Ambient Cooling) for more information.

R2-SERIES

The only two-pipe heat recovery system that simultaneously cools and heats.

The R2-Series simultaneously cools and heats different zones within a building to provide energy-saving heat-recovery operation through the use of the Branch Circuit (BC) Controller.

KEY FEATURES: L-GENERATION

- Up to 54% increase in efficiency ratings.
- Single modules up to 14 tons with the ability to combine modules for systems up to 28 tons.
- HexiCoil™ aluminium flat tube heat exchanger technology, eliminating copper tubing from the coil.
- Up to 50% less refrigerant charge required than previous generations.
- Supports up to 50 indoor units per outdoor unit.
- Optimized refrigerant circuit and component design for improved flow distribution, allowing maximum energy transfer with minimal power input.
- Superior high-ambient cooling performance with guaranteed operation to 126°F.
- Extended 10-year parts and compressor warranty available.

HEXICOIL™ CONDENSER COIL TECHNOLOGY

- Turbulated tube walls and optimized cross section ensure maximum heat transfer.
- Zinc coated for long-term corrosion resistance.
- Unique fin shape and coating provide water shedding capability.
- Capillary tube system leading to even fluid distribution.

Refrigerant Piping Lengths (Maximum Feet)	
Total Length ¹	1,761-3,073
Farthest Indoor from Outdoor	541 (623 equivalent)
Maximum Length between Outdoor and Single/Main BC Controller	360
Maximum Length between Single/Main BC Controller & Indoor	131-197
Vertical Differentials Between Components (Maximum Feet)	
Indoor/Outdoor (Outdoor Higher) ³	164
Indoor/Outdoor (Outdoor Lower) ⁴	131
Indoor/BC Controller (Single/Main) ²	49
Indoor/Indoor	98
Main Controller/Sub BC Controller	49

1. Maximum Total Length is dependent on the outdoor unit model and distance between BC Controller.

2. Maximum length between single/main BC Controller and indoor is dependent upon the vertical differential between the single/main BC Controller and the indoor unit.

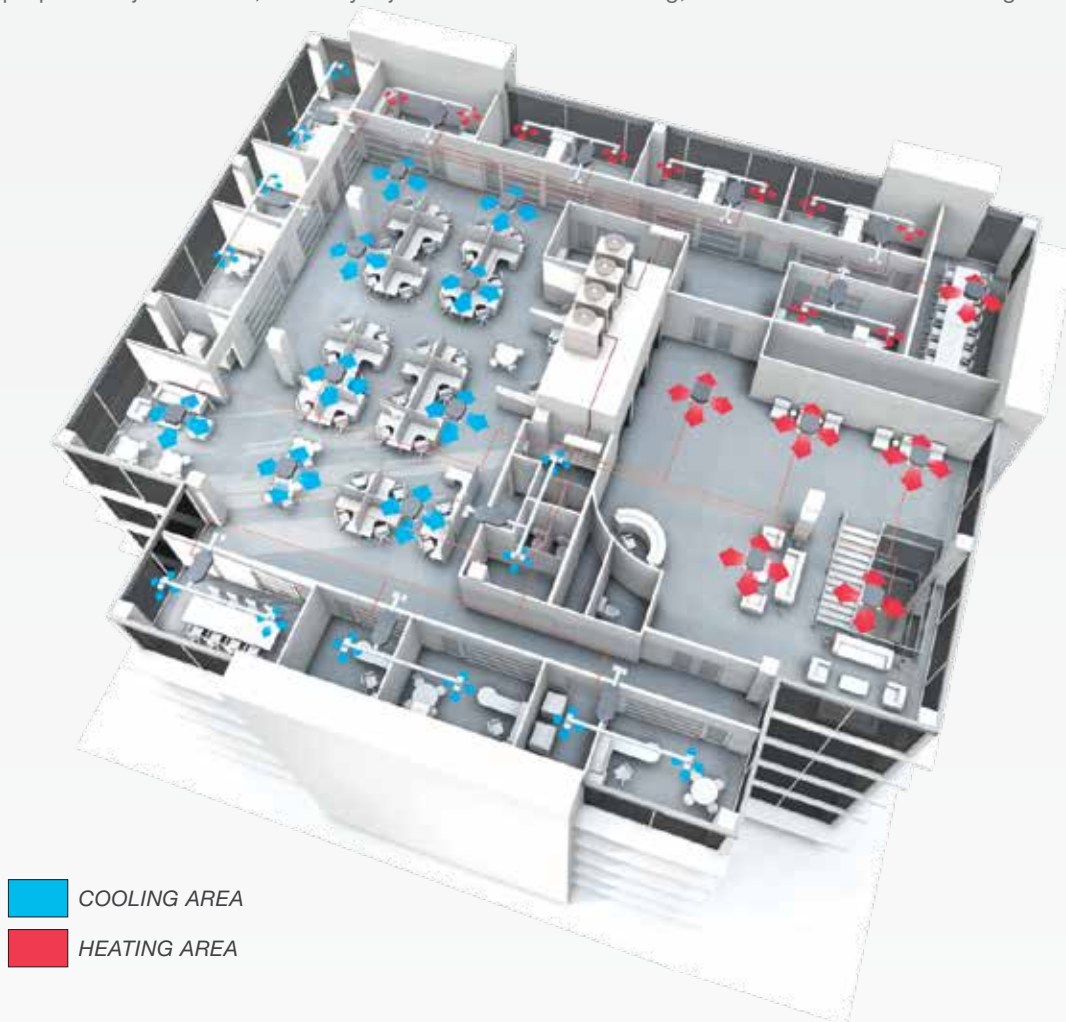

3. 295' is available depending on model and installation conditions. For more detailed information, contact your local distributor.

4. 197' is available depending on model and installation conditions. For more detailed information, contact your local distributor.

Benefits

SIMULTANEOUS OPERATION

CITY MULTI® VRF systems provide simultaneous cooling and heating any time of year. This innovation optimizes repurposes rejected heat, normally rejected outside the building, to be used within the building.

 COOLING AREA
 HEATING AREA

Branch Circuit Controller

The BC Controller is the technological heart of the CITY MULTI R2-Series. It works in unison with the outdoor unit to provide simultaneous cooling and heating, something no other two-pipe system can do.

Single BC Controller:

For systems with up to 120,000 Btu/h nominal cooling capacity that require only one BC Controller.

Main BC Controller:

For larger systems that require the use of Sub BC Controllers.

Sub BC Controller:

Used with a Main BC Controller to connect additional indoor units. A maximum of two Sub BC Controllers can be connected to one Main BC Controller per system.

THE TWO-PIPE ADVANTAGE

Provides simultaneous cooling and heating with just two pipes, something no other VRF manufacturer can do. As the number of indoor units grow, so do the two-pipe installations savings, in terms of connections (refrigerant and electrical) as well as maintenance access.

FEWER CONNECTIONS REQUIRED FOR SIMULTANEOUS OPERATION

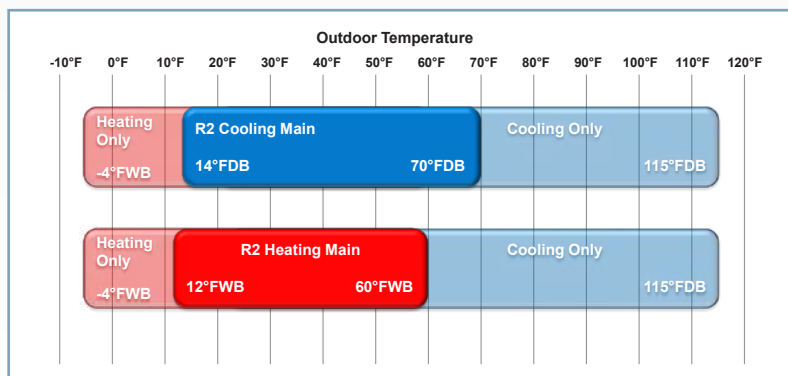

EFFECTIVE ENERGY USAGE

The total applied capacity of the R2-Series system's indoor units can be up to 150% of the capacity of the outdoor unit. This is made possible by taking advantage of load diversity and simultaneous cooling and heating operation. CITY MULTI VRF zoning systems can satisfy a significantly higher building load by efficiently distributing the capacity to the outdoor unit and indoor units while using much less energy. CITY MULTI systems, in combination with Mitsubishi Electric's TG-2000 integrated control system configured with optional Energy Allocation software, appropriately allocates the cooling and heating usage among the tenants. The allocation is based on each tenant's usage of comfort control based on the temperature setting on their system controller. Energy Allocation can control up to 2,000 indoor units from a single PC.

MODULAR SCALABILITY

With the Twinning Kit accessory, the modular units easily combine in the field to create a larger capacity system. Only two refrigerant pipes need to be twinned, saving time and materials. Oil and pressure equalization lines aren't needed when combining modules. This also helps to reduce installation cost.

SIMULTANEOUS OPERATING RANGE

Y-SERIES

Two-pipe zoned system designed for heat pump operation

Y-Series outdoor units are flexible enough to cool or heat up to 50 individual zones, maximizing building design options. The modular unit design features a small footprint and low operating sound.

KEY FEATURES: L-GENERATION

- Up to 54% increase in efficiency ratings.
- Single modules up to 14 tons with the ability to combine modules for systems up to 30 tons.
- HexiCoil™ aluminium flat tube heat exchanger technology, eliminating copper tubing from the coil.
- Up to 50% less refrigerant charge required than previous generations.
- Supports up to 50 indoor units per outdoor unit.
- Optimized refrigerant circuit and component design for improved flow distribution, allowing maximum energy transfer with minimal power input.
- Superior high-ambient cooling performance with guaranteed operation to 126° F.
- Extended 10-year parts and compressor warranty available.

HEXICOIL™ CONDENSER COIL TECHNOLOGY

- Turbulated tube walls and optimized cross section ensure maximum heat transfer.
- Zinc coated for long-term corrosion resistance.
- Unique fin shape and coating provide water shedding capability.
- Capillary tube system leading to even fluid distribution.

Maximum Refrigerant Piping Lengths (Feet)

Total Length	3,280
Indoor to Outdoor	541
Indoor to First Branch	295
<i>Vertical Differentials Between Units (Maximum Feet)</i>	
Indoor/Outdoor (Outdoor Higher) ¹	164
Indoor/Outdoor (Outdoor Lower) ²	131
Indoor/Indoor	98

1. 295' is available depending on model and installation conditions. For more detailed information, contact your local distributor.

2. 197' is available depending on model and installation conditions. For more detailed information, contact your local distributor.

*benefits***ULTIMATE IN ZONING**

The CITY MULTI® Y-Series uses a two-pipe system with a wide variety of indoor units and individual zone controllers to provide the ultimate zoning system. Headers and T-branches simplify the piping design and provide design freedom for placement of both piping and indoor units. Individual zones are managed by remote controllers placed in each zone or by the centralized controller.

**INTELLIGENT ENERGY USAGE**

The highly responsive INVERTER technology and customized zone control of the CITY MULTI Y-Series provides year-round savings. In warm summer months, the Y-Series provides exceptional zoned cooling, and in cold winter months, the INVERTER-driven compressor provides outstanding heating performance. CITY MULTI systems, in combination with Mitsubishi Electric's TG-2000 integrated control system configured with optional Energy Allocation software, appropriately allocates the cooling and heating usage among the tenants. The allocation is based on each tenant's usage of comfort control based on the temperature setting on their system controller. Energy Allocation can control up to 2,000 indoor units from a single PC.

DESIGN FLEXIBILITY

Flexibility is the key with the CITY MULTI Y-Series. The Y-Series, just like the R2-Series, can condition up to 50 zones. By using T-branches and headers, the Y-Series provides the ultimate in piping design flexibility that is truly simple in application.

H2i® R2-SERIES

Bringing year-round comfort to extreme climates with energy recovery

The Hyper-Heating INVERTER (H2i®) R2-Series simultaneously cools and heats different zones within a building to provide energy saving heat recovery operation. Our 2-pipe H2i® R2-Series gives you the flexibility to fit the specific needs of any building and provides reliable cold-climate heating performance.

KEY FEATURES

- 2-pipe, simultaneous operation for up to 48 zones.
- Available sizes: 6, 8, 12, and 16 ton.
- 50%-150% connectable capacity.
- Extreme performance provides up to 100% heating output at 0° F and 83% heating capacity at -13° F.
- Simultaneous cooling and heating possible down to -5.8° F.
- Uses BC Controllers and headers to provide piping design flexibility and simultaneous operation.
- INVERTER-driven compressor for outstanding performance and optimized energy usage.
- Connects to CITY MULTI® indoor units; controlled via CITY MULTI Controls Network (CMCN).

Maximum Refrigerant Piping Lengths (Feet)	
Total Length (Maximum Total Length is dependent on the outdoor unit model and distance between BC Controller)	1,804-2,460
Farthest Indoor from Outdoor	541 (623 equivalent)
Maximum Length between Outdoor & Single/Main BC Controller	360
Maximum Length between Single/Main BC Controller and Indoor	131-197
Vertical Differentials Between Components (Maximum Feet)	
Indoor/Outdoor (Outdoor Higher)	164
Indoor/Outdoor (Outdoor Lower)	131
Indoor/BC Controller (Single/Main) (Maximum length between single/main BC Controller and indoor is dependent upon the vertical differential between the single/main BC Controller and the indoor unit)	49
Indoor/Indoor	49
Controller/Sub BC Controller	49

H2i® Y-SERIES

Bringing year-round comfort to extreme climates

Hyper-Heating INVERTER (H2i®) technology enhances the Y-Series by providing full heating capacity to -4° F outdoor ambient temperature. H2i® patent-pending technology is exclusively from Mitsubishi Electric and is available in select CITY MULTI® VRF models.

KEY FEATURES

- Heat pump that provides either all-cool or all-heat operation up to 41 zones.
- Available sizes: 6, 8, 12, and 16 ton.
- 50%-130% connectable capacity.
- Extreme performance provides up to 100% heating output at -4° F and 85% heating capacity at -13° F.
- Uses T-branches and headers to provide piping design flexibility.
- INVERTER-driven compressor for outstanding performance and optimized energy usage.
- Connects to CITY MULTI indoor units; controlled via CITY MULTI Controls Network (CMCN).

Maximum Refrigerant Piping Lengths (Feet)	
Total Length	984
Indoor to Outdoor	492
Indoor to First Branch	131
Vertical Differentials Between Units (Maximum Feet)	
Indoor/Outdoor (Outdoor Higher)	164
Indoor/Outdoor (Outdoor Lower)	131
Indoor/Indoor	49

Benefits

EXTREME HEATING PERFORMANCE

With its expanded heating capabilities, the CITY MULTI® H2i R2- and Y-Series provides year-round comfort, even in extreme climates.

- At -13° F outdoor temperature, the H2i system can provide 100° F discharge air temperature from the indoor unit.
- At 5° F outdoor temperature and above, the discharge temperature reaches an impressive 110° F.
- At start-up, a special circuit assures that normally dormant refrigerant quickly enters the conditioning cycle. This process rapidly increases the mass flow rate in the system, which quickly provides comfortable discharge temperatures from the indoor units.

UNEQUALED COMFORT

The patented flash injection process cools the compressor, allowing higher speeds at a lower outdoor temperature without overheating. This also allows the system to maintain indoor coil temperatures providing phenomenal heating performance at low temperatures. The Hyper-Heating INVERTER combines the ultimate in application flexibility and powerful conditioning capabilities to deliver personalized comfort control to multiple zones of a commercial or institutional building. The outdoor units deliver full-sized performance from a compact, space-saving design for ease of transportation and installation. The INVERTER-driven scroll compressor delivers the precise amount of comfort to the zones as required.

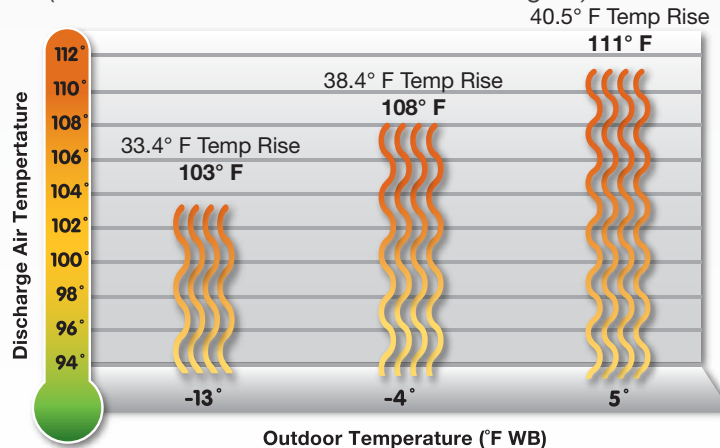

HYPER-HEATING INVERTER VS. OTHERS

(72,000 Btu/h, 70° F W.B. entering Indoor Unit)

INDOOR UNIT HEATING DISCHARGE TEMPERATURE

(PEFY-P24 NMAU-E with 70° F Entering Air)

S-SERIES (PUMY)

Solutions for light commercial and large residential applications

The CITY MULTI® S-Series is a single-phase heat pump system perfect for light commercial or large residential applications. It uses the CITY MULTI Controls Network (CMCN) to cool or heat up to 12 individual zones with a choice of indoor unit styles.

KEY FEATURES

- Single-phase 208/230V operation—allows use in residential and light commercial applications.
- Available in 36,000, 48,000 and 60,000 Btu/h.
- Connects up to 12 indoor units.
- 50%-130% connectable capacity.
- Utilizes single-phase power.
- Service accessible through both a front and side panel.
- Heat pump that provides either all-cool or all-heat operation.

Maximum Refrigerant Piping Lengths (Feet)	
Total Length	492 ¹
Indoor to Outdoor	262
Indoor to First Branch	98
Vertical Differentials Between Units (Maximum Feet)	
Indoor/Outdoor (Outdoor Higher)	164
Indoor/Outdoor (Outdoor Lower)	131 ²
Indoor/Indoor	49

1. 393' on PUMY-NHMu models.

2. 65' on PUMY-NHMu models.

Benefits

EASY INSTALLATION AND SERVICE

Single-phase 208/230V power provides easy installation in light commercial and residential applications. The unit's compact dimensions and easy accessibility allow multiple units to be stacked side-by-side in tight areas, saving valuable space and resources. The S-Series outdoor unit can be accessed for service through both a front and side panel.

FLEXIBLE APPLICATIONS

Connect up to 12 indoor units in various combinations using T-branches and headers with a total connected capacity of up to 130%.

S-SERIES TWO-PIPE COOLING OR HEATING SYSTEM

W-SERIES

Modular heat pump systems that combine the convenience of water source with VRF technology

W-Series units are easily installed indoors, which means that system performance efficiency is independent of outdoor ambient temperatures. W-Series includes WR2 models for simultaneous cooling and heating, and WY models for independent cooling and heating operation.

WY- and
WR2-Series

KEY FEATURES: L-GENERATION

- Single modules up to 20 tons with the ability to combine single modules for systems up to 30 tons.
- 208/230V, 3-Phase, 60 Hz and 460V, 3-Phase, 60 Hz options.
- 0-10V output signal to modulate water flow for compliance with energy codes.
- Enhanced water-side heat exchanger design for improved efficiency and reduced risk of clogging.
- Designed for closed water loops.
- Connects to CITY MULTI indoor units and controlled via CITY MULTI Controls Network (CMCN).
- Stack multiple units on a field-supplied rack to take advantage of vertical space when available.
- Extended 10-year parts and compressor warranty available.

Benefits

CITY MULTI SYSTEMS AND GEOTHERMAL APPLICATIONS

CITY MULTI water cooled systems, used in geothermal applications, work by taking heat or rejecting heat from/ to the ground. Closed loop systems accomplish this by circulating water through a series of wells or loops that are installed in the ground, turning the ground into a large heat exchanger. Because the ground remains relatively unaffected by outdoor ambient temperatures, the loop runs at temperatures lower than ambient temperatures throughout the cooling season and higher than ambient temperatures throughout the heating season.

Benefits

DOUBLE-HEAT RECOVERY

The double-heat recovery feature of the WR2-Series helps recover energy that would normally be rejected to the condensing water loop. First, within the system, energy is absorbed in units providing cooling. The energy is redirected by refrigerant to units that are in heating mode. Secondly, energy can be recovered between systems through the water loop.

EXTENDED TEMPERATURE RANGE

WR2- and WY-Series CITY MULTI® water-source units can handle entering water temperatures down to 23° F (with the addition of glycol to the condenser water loop) in both heating and cooling mode allowing more possibilities for geothermal applications. Coupling the water-source units with a geothermal loop will not only provide the benefit of higher efficiencies by using a lower entering water temperature but will also provide all the benefit of an INVERTER-driven CITY MULTI system.

LOW AMBIENT COOLING KIT

Full cooling performance at extreme conditions

The specially designed wind deflectors will block unwanted wind that could impede operation and will allow full airflow when required at higher ambient temperatures or in heating mode. The assembly also provides a more efficient defrost cycle when the unit is operating in heating mode. Complete Low Ambient Kit requires hood with control damper assembly and wind deflectors.

PATENTED TECHNOLOGY

Low ambient hood (LAHK1 or LWHK2) and side deflector (SWDK1).

KEY FEATURES

Allows system to operate at 100% cooling capacity at reduced outdoor temperatures:

- Y-Series Outdoor Units (down to -10° FDB Outdoor Temp.)
- R2-Series (includes H2i[®] R2-Series) Outdoor Units (down to -10° FDB Outdoor Temp.)

ADDITIONAL FEATURES

- Hood and wind deflectors constructed of 20 gauge hot-dipped galvanized G-90 steel.
- Heavy-duty polyester-based powder paint finish.
- Designed to work with both 208/230 and 460V 3-phase units.
- NEMA 4X control box protects electrical components from the elements.
- Kit easily connects to outdoor unit with plug-in electrical connections.
- Wind deflectors easily install in place of existing wire guard.

APPLYING TO MULTIPLE OUTDOOR UNITS

For outdoor units with multiple modules, a minimum 1-3/16" separation between the modules is recommended. If modules are placed more than 15" apart, more than one set of side wind deflectors may be needed. For multiple units or module sets placed in a row, only one side wind deflector is needed for each of the outside module coil surfaces.

COLD WEATHER SOLUTIONS GUIDE

Low Ambient Cooling (LHKA Series)

The specially designed wind deflectors block unwanted wind that could impede operation and allow full airflow when required at higher ambient temperatures or in heating mode. The wind deflectors also provide a more efficient defrost cycle when the unit is operating in heating mode. The complete Low Ambient Kit requires a hood with a control damper assembly and wind deflectors. With the addition of wind deflectors, CITY MULTI® Y-Series and R2-Series outdoor units feature 100% cooling capacity at outdoor temperatures down to -10° F. The wind deflector kit easily installs in the place of the existing wire guard, and connects to the outdoor unit with plug-in electrical connections.

Hail/Snow Guards (SGK Series)

Mitsubishi Electric hail/snow guards are designed to protect the outdoor unit coil surfaces from hail damage or snow build-up in severe climates. Made of 20-gauge, hot-dipped galvanized G-90 steel, the hail/snow guards feature a heavy-duty polyester-based powder paint finish to match the outdoor units. Using existing wire guard fasteners, the hail/snow guards are easily installed to the sides and rear of the unit in just minutes.

Hail/Snow Hoods (SHK1)

Mitsubishi Electric hail/snow hoods are made to the same specifications as the hail/snow guards, and protect the outdoor unit fan guard from hail damage and snow build-up in severe climates. Using existing wire guard fasteners, the hail/snow hoods are easily installed to the sides and rear of the unit in just minutes. Hail/snow hoods are sold separately, or can be order in a combination kit with hail/snow guards.

Base Pan Heaters

Mitsubishi Electric base pan heaters feature a heating coil controlled by the CITY MULTI outdoor unit which prevents ice buildup. The base pan heater is ideal for low temperature, high humidity environments where the outdoor unit will be operating in heating mode for an extended period of time. A complete base pan heater kit order includes a relay box, the heating element(s), required mounting brackets, and all other associated items required for installation. *Note: Snow hoods and side/rear snow guards are also recommended for installations with base pan heaters.*

Cold weather stands and supports

Mitsubishi Electric features multiple configurations of stands and supports for M-Series, P-Series, and CITY MULTI outdoor units. The sturdy stands and supports are designed to keep the outdoor unit above or off the ground and away from snow drifts in cold weather climates

Also Available

CITY MULTI Outdoor Units: U-Bar with Feet

- Rubber roof friendly.
- Adjustable height in ¼" and ½" increments.
- U-Bars made from 11 gauge steel square tubing.
- Available leg heights: 12" , 18", and 24".

M-Series and P-Series: Adjustable Stands

- Four points of anti-vibration isolation washers.
- Adjustable footprint from 34" to 40" in 1" increments.
- Single and two-fan models are available in 12" and 18" heights.
- Maximum capacity of 400 pounds.

M-Series and P-Series Outdoor Units: Wall-mount Supports

- 25" mounting rails.
- Nine points of anti-vibration isolation.
- Available in painted steel (QSWB2000M-1) and 316 stainless steel (QSWB2000SS).
- Maximum capacity of 500 pounds.

Outdoor unit must be mounted at least 12" off the ground or 12" above the highest average snow depth, whichever is greater. The outdoor unit may require additional mounting restraints depending on the mounting location.

PKFY (Wall-mounted)

Elegant design and compact dimensions

Whatever the size or shape of your room, there's a Mitsubishi Electric PKFY wall-mounted unit that is just right for you. PKFY units mount high on the wall and blend beautifully into any space. Perfect for hotels, assisted living facilities, offices, residences and other applications where wall space is available.

KEY FEATURES

- Ranges from 6,000 to 30,000 Btu/h.
- Compact, lightweight and features a built-in wireless sensor for use with an optional wireless remote controller.
- Extremely quiet: as low as 32 dB(A).
- Multiple fan speed settings.
- Multiple vane settings and swing setting adjust airflow in vertical directions.
- Front panel opens easily—no tools are needed to gain access to the filter.
- Refrigerant and drain piping can be connected from the rear, right, base, or left of the unit.

benefits

EASY FILTER CLEANING

The front grille hinges open easily—no tools are needed to gain quick access to the filter. The filter can be removed and cleaned as needed.

QUIET OPERATION

The unit incorporates a random-pitch fan to assure quiet operation. The optimal design of the airflow passage features a small fan diameter to allow for a compact installation. Thanks to practical casing configuration, airflow generated by the fan is uniformly distributed.

SUPERIOR AIR DISTRIBUTION

A user-selectable vane swing setting with the SmartME and SimpleMA remote controllers enhances air distribution in the conditioned space.

FLEXIBLE INSTALLATION

Refrigerant and drain piping can be connected from the rear, right, base, or left of the unit, providing much greater flexibility for piping and selecting an installation site.

PLFY (Four-way Ceiling-recessed Cassette)

Adjustable airflow to meet your every need

The PLY-Series four-way ceiling-recessed cassette provides exceptional performance and air coverage. Two styles are available: the PLY-P-NBMU and the PLY-P-NCMU. Both models can be accessorized with installation trim panels to ensure a seamless integration into any ceiling.

PLFY-NBMU

KEY FEATURES

- 33" x 33" cabinet size.
- Capacity range of 8,000 to 36,000 Btu/h.
- Sound levels as low as 27 dB(A).
- Ventilation air connection (Second connection found in Multi-function Casement).
- High-efficiency filter option (MERV-10 requires Multi-function Casement).
- Branch ducting capability.
- Four-speed fan settings.
- Integrated condensate lift mechanism to provide up to 33-1/2" of lift.

PLFY-NCMU

KEY FEATURES

- 22" x 22" cabinet size to fit in standard T-grid ceiling.
- Capacity range of 8,000 to 15,000 Btu/h.
- Sound levels as low as 29 dB(A).
- Ventilation air connection.
- Four-speed fan settings.
- Integrated condensate lift mechanism to provide up to 19-11/16" of lift.

HIGH PERFORMANCE AND VERSATILITY

The four-way cassette unit is compact and recesses easily into a ceiling space, so all you see is an attractive flush-mounted grille. The PLFY-NBMU has a unit height of only 10-1/4" or 11-3/4", depending on the model. At 8-3/16" in height and 22-7/16" x 22-7/16" width, the PLFY-NCMU makes satisfying even the tightest of ceiling installations a possibility.

QUIET OPERATION

This powerful indoor unit is whisper-quiet, down to 27 dB(A) for the PLFY-NBMU and 29 dB(A) for the PLFY-NCMU.

CUSTOMIZE THE AIRFLOW PATTERN TO MEET YOUR NEEDS

The different airflow options provide the best solution for a variety of room layouts and air-conditioning requirements. For extra versatility, you can select up to 72 airflow patterns with two-, three-, or four-way airflow.

BUILT-IN CONDENSATE LIFT MECHANISM

The drain piping of the PLFY-NBMU can be positioned anywhere up to 33-1/2" from the ceiling's surface, allowing for long piping and versatility. The PLFY-NCMU model has a built-in pump that lifts condensation 20" from the ceiling's surface. The unit recognizes if there is a pump failure and safeguards against leaks.

CORNER-POCKET DESIGN SIMPLIFIES MAINTENANCE AND INSTALLATION

PLFY-NBMU allows access through the pockets equipped on each of four corners of the grille to complete installation, maintenance work, and height adjustment.

EASY MAINTENANCE, LONG-LIFE FILTER

The washable filter provides about 2,500 hours of use in a normal office environment before cleaning is needed.

4, 3, OR 2 WAY AIRFLOW

FIXED AIRFLOW DIRECTION PER VANE

INDEPENDENT VANE MOTOR CONTROL

This amazing technology constantly monitors and adjusts temperatures for maximum comfort and efficiency.

- Measures infrared rays generated from surrounding walls and surface angles.
- Rotates 90 degrees slowly in five second intervals.
- Efficiently adjusts temperatures to ideal comfort levels for occupants.

PMFY (One-way Ceiling-recessed Cassette)

Compact and lightweight, perfect for office spaces with windows

The PMFY model is a ductless, one-way, ceiling-recessed cassette that moves air in one direction, and has the capability of introducing ventilation air.

Capacity Range:
6,000–15,000 Btu/h

KEY FEATURES

- The PMFY is available in 6,000, 8,000, 12,000 and 15,000 Btu/h.
- Standardized cabinet size for all models: 31-31/32".
- Airflow control technology operates as low as 27 dB(A) for industry-leading quiet performance.
- Integrated condensate lift mechanism to provide up to 23-5/8" of lift.
- Full unit access through front cover panel.

Benefits

QUIET OPERATION

Specialized airflow control technology operates as low as 27 dB(A) for industry-leading sound performance.

BUILT-IN CONDENSATE LIFT MECHANISM

The drain pipe can be extended anywhere up to 23-5/8" above the ceiling's surface.

EASY INSTALLATION AND MAINTENANCE

PMFY body size has been standardized for all models at 31-31/32" for easier installation. With a height of only 9-1/16", the profile is one of the smallest of all CITY MULTI ceiling models. Unit weight is only 31 pounds for the main unit and seven pounds for the panel, making this unit one of the lightest available.

PCFY (Ceiling-suspended)

Compact design ideal for classrooms, restaurants and stores

The PCFY model features powerful air throw to cover entire spaces quietly and efficiently.

Capacity Range:
15,000–36,000 Btu/h

KEY FEATURES

- Available in 15,000, 24,000, 30,000 and 36,000 Btu/h capacities.
- Auto-vane and wide-range outlet provides uniformly distributed conditioned air to all corners of the room.
- Four-speed fan settings.
- Accessory filters are available to increase filtration effectiveness.
- Optional pump kit is available for condensate removal.

Benefits

POWERFUL PERFORMANCE

The easy-to-install, ceiling-suspended unit delivers enough cold or hot air to make any space more comfortable. Manually adjusted, over-sized swing louvers direct the airflow left or right, covering the entire space quietly and efficiently.

THE i-SEE SENSOR™ ACCESSORY

This amazing technology constantly monitors and adjusts temperatures for maximum comfort and efficiency.

- Measures infrared rays generated from surrounding walls and surface angles.
- Rotates 90 degrees in five second intervals.
- Efficiently adjusts temperatures to ideal comfort levels for occupants.

QUIET, EFFICIENT AIRFLOW

Appropriate airflow can be selected to enhance space conditioning efficiency and comfort while operating at a low sound level. PCFY's auto-vane and wide-range outlet swings the conditioned air and distributes it uniformly to all corners of the room.

EASY INSTALL

The PCFY's direct suspension allows installation on most ceiling surfaces quickly and securely using only suspension bolts and the durable attachment fixture. An optional pump kit is available to dispose of condensate.

PEFY (Ceiling-concealed Ducted)

Flexible design allows elegant interior layout

The PEFY models are high-performance, ceiling-concealed, ducted indoor units. An excellent choice for office buildings, schools, hotels, assisted-living facilities and other applications where ceiling space is available.

KEY FEATURES

- External static pressure settings are adjustable to meet varying application conditions.
- Choice of fan speed settings.
- Side access to control panel.
- Integrated condensate lift mechanism (low- and mid-static).

LOW PROFILE (NMSU)

- Extremely quiet, with sound ratings as low as 26 dB(A).
- Capacities range from 6,000 to 24,000 Btu/h.
- Integrated condensate lift mechanism to provide up to 21-11/16" of lift.

MEDIUM STATIC (NMAU)

- Provides up to 0.60" external static pressure.
- Extremely quiet, with sound ratings as low as 26 dB(A).
- Capacities range from 6,000 to 54,000 Btu/h.
- Integrated condensate lift mechanism to provide up to 27-9/16" of lift.

HIGH STATIC (NMHU-E2/NMHSU)

- Provides up to 1.00" external static pressure.
- Extremely quiet, with sound ratings as low as 36 dB(A).
- Capacities range from 15,000 to 96,000 Btu/h.
- Integrated condensate lift mechanism to provide up to 27-9/16" of lift.

benefits

CHOICE OF EXTERNAL STATIC PRESSURE

Additional external static pressure capacity provides flexibility for duct extension, branching, and air outlet configuration. The factory setting can be field-adjusted to match the installed ductwork for PEFY indoor units. The PEFY indoor unit is available in a low-profile option with up to 0.20" W.G. and a high-static option for up to 1.00" W.G.

QUIET OPERATION

The specially designed centrifugal fan provides exceptionally quiet operation, even at high operating speeds.

OPERATING SOUND RANGE

PEFY-P-NMAU-E		P06	P08	P12	P15	P18	P24	P27	P30	P36	P48	P54
Sound Level dB(A)	Fan Speed and Low-High	26-29		28-34		28-35	29-36	30-38		32-41	35-44	36-45

PEFY-P-NMSU-E		P06	P08	P12	P15	P18	P24
Sound Level dB(A)	Fan Speed and Low-High	22-28	23-30	23-35	28-33	30-37	30-40

PEFY-P-NMHU-E		P15	P18	P24	P27	P30	P36	P48	P54	P72	P96
Sound Level dB(A)	Fan Speed and Low-High	34-39		36-41	35-41	38-43	38-44		36-43	39-46	

BUILT-IN CONDENSATE LIFT MECHANISM

The drain piping can be positioned anywhere up to 21-11/16" for NMSU or 27-9/16" for NMAU and NMHU-E2 from the ceiling's surface, allowing for long piping and versatility. A built-in switch halts operation if an error with the pump occurs, ensuring that no water leaks occur.

COMPACT OPTIONS (PEFY-P-NMSU)

The PEFY-P-NMSU-E model is very compact, with a height of 7-7/8". Standard features include brazed refrigerant connections, rear air return, and auto fan mode. The unit operates as low as 22 dB(A), and the control panel is located on the opposite side from other ducted models. This unit is an ideal choice for guest rooms in hotels, dormitories, assisted living centers or any application with tight vertical clearances and minimal duct work.

FB (M,L,H) FILTER BOXES

Designed for CITY MULTI® Ceiling-concealed Ducted Indoor Units

Low-Profile FBL1 boxes include 1" thick pleated MERV 8 filter(s).

Medium-Static FBM2 boxes include 2" thick pleated MERV 13 filter(s).

High-Static FBH4 boxes include 4" thick pleated MERV 13 filter(s).

KEY FEATURES

- Rated Class 2 under UL Standard 900.
- Cabinet is constructed of non-insulated 20 gauge G-60 galvanized steel.
- Foam gasket provides air-tight connection to indoor unit and access door.
- Return connection in rear easily field converted to bottom.

Part Number	Used on CITY MULTI Models	Filters Included	Net Weight (lbs.)

PFFY (Floor-standing)

Effectively use perimeter areas for space conditioning

PFFY floor-standing models are available as exposed or concealed indoor units. At less than nine inches deep, these units are easy to install in peripheral spaces, yet offer highly efficient air-conditioning performance. Their low operating sound and compact size make them ideal for hotel rooms, schools and office buildings.

PFFY-P-NEMU-E
Exposed Type

PFFY-P-NRMU-E
Concealed Type

KEY FEATURES

- PFFY-NRMU—designed for applications requiring a built-in, concealed, floor-standing unit.
- PFFY-NEMU—exposed-type model, perfect for most applications and requires no finish work.
- Available in 6,000, 8,000, 12,000, 15,000, 18,000 and 24,000 Btu/h.
- Two-speed fan settings.
- The PFFY-P-NRMU-E unit can be field converted from top discharge to front discharge.

Benefits

OPTIONAL MOUNTING FOR REMOTE CONTROLLER

PFFY units can house a remote controller in the top corner (under a cover panel). The remote controller can be mounted on the wall or in the PFFY unit.

INSTALLATION FLEXIBILITY

The PFFY-P-NRMU-E unit can be field converted from top discharge to front discharge to increase installation flexibility.

INSTALLATION FLEXIBILITY

PVFY (Multi-position Air Handler)

Ideal for closet, attic, or equipment room installations

PVFY multi-position air handlers can be connected to a system with other CITY MULTI® indoor units for complete system design flexibility. The multi-position design is suitable for any application, requiring no additional kits even for down-flow configuration, making it ideal for installation in a closet, attic, or an equipment room.

Capacity Range:
12,000-54,000 Btu/h

KEY FEATURES

- Selectable external static pressure up to 0.80.
- Reusable standard-size 1" filter.
- Side return available (P12-P24 only).
- Unique cabinet insulation design allows for no thermal penetration into the coil section.
- Cabinet can be fully disassembled to install in extra-tight spaces.
- Heavy gauge, high-gloss powder coat finish steel cabinets with 1" fiberglass-free foam insulation (R-4.2 insulation value).
- Accessories available for various custom applications, including two-stage auxiliary heat, fan speed indication, humidifier control, and more.
- Cabinet sections are embossed with fan, coil, and other components for easy identification and maintenance.

VERTICAL AIRFLOW

HORIZONTAL LEFT AIRFLOW

HORIZONTAL RIGHT AIRFLOW

DOWN FLOW

PWFY (Hydronic Heat Exchanger)

Heat and cool water, quickly and efficiently

The PWFY Hydronic Heat Exchanger is available in two configurations, the HEX (-AU) and the Booster (-BU). Each provides unique solutions to incorporate into an existing VRF system for an efficient means to heat and cool water. The PWFY is a closed-circuit water heater that works with the Y-Series or R2-Series outdoor units. They are not suitable for direct potable water flow.

Available Sizes:
36,000 and 72,000 Btu/h

PWFY-P36/72NMU-E-AU

KEY FEATURES

- Heats water to 113° F.
- Hydronic heat exchanger transfers energy from refrigerant to water.
- Can be used to recover waste heat from cooling operation to water when combined with any R2-Series, resulting in large energy savings.
- Cools water to 41° F to be used for cooling outside air, cooling pool water, misting stations, process cooling and more.
- Applications include radiant heating, snow melting, reheating air, pre-heating hot water and more.

Available Sizes:
36,000 Btu/h

PWFY-P36NMU-E-BU

KEY FEATURES

- Heats water to 160° F.
- Hydronic heat exchanger transfers energy from refrigerant to water.
- Compatible with R2-Series only.
- Can be used to recover waste heat from cooling operation to water, resulting in large energy savings.
- Includes R134A compressor circuit for boosting water temperature.
- Applications include radiant heating, hot water preheating, snow melting, reheating air, warming pools, and more.

VENTILATION

PremiSys® DOAS/Lossnay® Energy Recovery Ventilators (ERVs)/DOAS

PREMISYS® DEDICATED OUTDOOR AIR SYSTEM

PremiSys®

PREMIER VRF
VENTILATION
SOLUTIONS

The PremiSys series of rooftop ventilation products is a premier solution for conditioning outdoor air for commercial buildings. Designed to handle 100% outdoor air with optional energy recovery, PremiSys products offer premium features ideal for handling ventilation air in variable refrigerant flow (VRF) applications.

The PremiSys models MP and MPE (with energy recovery), are pre-engineered to provide semi-custom flexibility while maintaining the quality, consistency, and value of a standardized product.

Unit Size	Nominal Tonnage (tons)	Height (H)	Width (W)	Length (L)	Intake (A)	Condensing Section (B)	Nominal Weight (lbs)	Outdoor Intake	Supply Discharge	Exhaust Discharge
MP-1	5 - 15	58	81	117	22	30	2500	End	Bottom or Side	N/A
MP-2	10 - 25	70	100	130	22	36	3600			
MP-3	15 - 30	82	100	143	27	32	4500			
MPE-1	5 - 15	58	81	169	22	30	3600	End	Bottom or Side	Side
MPE-2	10 - 25	70	100	184	22	36	4900			
MPE-3	15 - 30	82	100	205	27	32	6200			

The PremiSys series of rooftop ventilation products is a premier solution for conditioning outdoor air for commercial buildings. Designed to handle 100% outdoor air with energy recovery models, PremiSys products offer premium features ideal for handling ventilation air in VRF applications.

The PremiSys Fusion is the latest addition to the family of dedicated outdoor air systems. The MP-1 and MP-2 (split system with energy recovery) models are pre-engineered to provide semi-custom flexibility while maintaining the quality, consistency, and value of a standardized product. Take advantage of the split-system design to further enhance the flexibility of applying Mitsubishi Electric products to any building.

Unit Size	Nominal Tonnage (tons)	Height	Width	Length	Intake	Nominal Weight (lbs)	Outdoor Intake	Supply Discharge	Exhaust Discharge
MPF-1	5 - 12	58	53	148	22	2200	End	Bottom or Side	Side
MPF-2	10 - 20	71	64	163	22	2800			

LOSSNAY ENERGY RECOVERY VENTILATORS (ERVs)

Outdoor air solutions for improved indoor environmental quality

KEY FEATURES

- Lossnay core.
- Over 50% enthalpy exchange efficiency.
- Four fan speeds on 300, 470, 600 models: extra low, low, high, extra high.
- M-NET connectivity for use with CITY MULTI® central controllers and BMS interfaces.
- Sound pressure level: maximum sound level 42.5 dB(A).
- Three ventilation modes: Auto, Bypass, Heat Recovery.

Benefits

INTERLOCK

Networking systems with Mitsubishi Electric air conditioners has never been easier. The M-NET adapter comes standard, and there is no need to purchase additional parts. Systems can be assembled simply and logically, reducing construction times and keeping initial costs low.

SYSTEM COMPATIBILITY

The LGH-F-RX5-E series is fully compatible with our controls network, further increasing the scope of total system management.

MULTI-FUNCTION LCD REMOTE CONTROLLER

The compact and attractive remote controller with a liquid crystal display is designed for easy visibility.

- ON/OFF, Run mode, and Ventilation mode.
- Filter Maintenance Display.
- Controls up to 16 Lossnay units in a single group.
- Night Purge.
- Timer Operations.

BYPASS VENTILATION STANDARD

Lossnay models offer three ventilation modes:

- Energy Recovery—Heat Exchange.
- Bypass—No Exchange.
- Automatic—Heat Exchange/Bypass.

With conventional ERVs, bypass ventilation was impossible without attaching additional dampers and adapters. With the LGH-F-RX5-E series, however, this mode is available without the use of other parts. An automatic mode allows the system to select recovery or bypass as required. Mode selection is easy when interlocked with M-NET systems using the PZ-60DR remote controller, which is sold separately.

PZ-43SMF

PZ-60DR

DEDICATED OUTDOOR AIR SYSTEM (DOAS)

Provides pre-conditioned outdoor air

The award-winning PEFY-AF Dedicated Outside Air System comes in two configurations, the CFM and the CFMR. Both configurations offer high capacity coils that will condition incoming air, making it suitable for distribution to down-stream fan coil units.

KEY FEATURES

- Single-speed 1200 CFM fan.
- Multiple external static pressure set points.
- Large DX coil with high latent capacity.
- Entering air temperature and humidity sensors factory installed.
- Thin 18-9/16" high cabinet installs in small areas.
- Drain lift mechanism up to 21-11/16" included as standard.
- 50° F to 70° F saturated air available in cooling mode (CFM/PUHY-P120).
- Reheat capabilities using recovered energy from cooling through the branch controller (CFMR/PURY-P120).
- 50° F to 60° F saturated air available leaving cooling coil (CFMR/PURY-P120).
- 63° F to 83° F leaving air temperature available leaving reheat coil (CFMR/PURY-P120).

CFM

CFMR

CONTROLS AND SOFTWARE TOOLS

CONTROLS NETWORK

Our CITY MULTI® Controls Network (CMCN) makes it easy to manage your building.

The CMCN manages up to 2,000 indoor units from a single networked PC. The CMCN puts individual, personalized comfort in the hands of the tenants and the building manager.

benefits

FLEXIBLE DESIGN FOR CUSTOMIZED, INDIVIDUAL ZONE CONTROL

Building owners and engineers can select from a wide variety of remote controllers and timers to satisfy the exact level of tenant control on a zone-by-zone basis, while providing the ultimate in personal comfort control. The versatility of the CMCN customizes each building's controls network to address the specific design and tenant requirements, while providing unparalleled occupant comfort.

OPTIONAL EASY-TO-USE CONTROL VIA PC WEB BROWSER

From a web-browser on a PC, the building manager can now monitor, operate and schedule the HVAC system through the central controller. Plus, the building manager can enable tenants to control their own individual zones via a personal web browser on their networked PC.

EASY INSTALLATION

The CMCN uses simple, non-polar, two-wire control connections. All components are daisy-chained and added onto the M-NET communication bus. It all adds up to less labor and materials with quicker installation.

SINGLE-SOURCE CONTROL FOR UP TO 2,000 INDOOR UNITS

From a single networked PC configured with our TG-2000 software, you can control up to 2,000 units. This software, in conjunction with central controllers, empowers the building manager to control the HVAC system for multiple buildings in a business park, educational campus or retirement facility.

ENERGY ALLOCATION

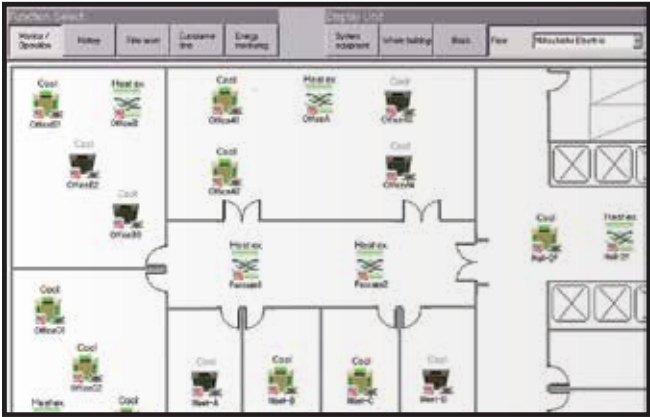

The TG-2000 software configured with the energy allocation option and interconnected with RS-485 watt-hour meter(s) can calculate the HVAC energy consumption relative to each indoor unit on a per-tenant basis and generate a CITY MULTI energy allocation per tenant. The Energy Allocation feature is also available through the AE-200A/AE-50A centralized controller.

SYSTEM INTEGRATION

Not only can our CMCN act as a stand-alone building management system, it can also integrate with existing systems via LonWorks®, BACnet® or Modbus® interfaces.

TG-2000™ INTEGRATED SYSTEM SOFTWARE

The TG-2000 integrated system software enables the user to control multiple AE-200A/AE-50A / EW-50A controllers and provide enhanced functions from a single, dedicated networked PC configured with the TG-2000 software and AE-200A/AE-50A /EW-50A software licenses. The TG-2000 configured PC is capable of controlling up to 2,000 indoor units with the AE-200A/AE-50A /EW-50A Centralized Controllers.

ENERGY ALLOCATION

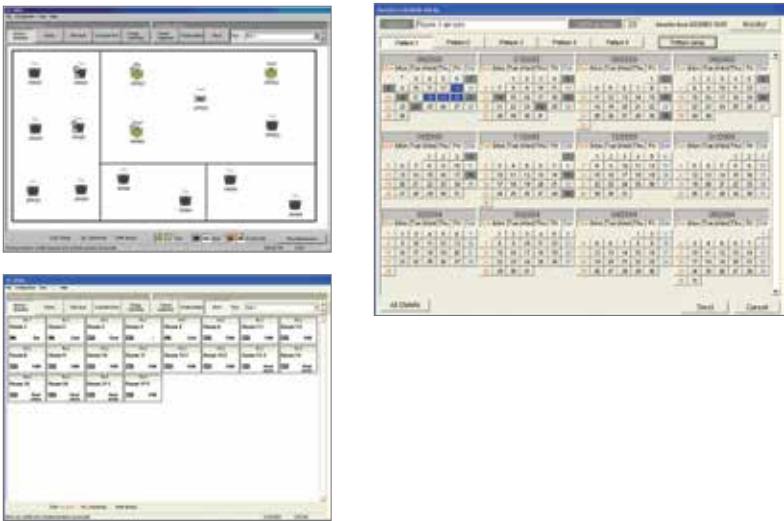

KEY FEATURES

- Appropriately allocates heating and cooling usage based on the temperature setting on their system controller.
- Great for condos and multiple tenant spaces.
- Requires software license.

OPERATION SCREEN:

SCHEDULING:

SOFTWARE OPTIONS FOR CENTRAL CONTROLLERS

The centralized controllers support operations that supersede control of the remote controllers and include system configuration, daily/weekly scheduling, operation, and malfunction monitoring. Centralized controllers are equipped with an RJ-45 Ethernet port to support interconnection with a networked PC via a closed/direct Local Area Network (LAN).

STANDARD SOFTWARE

PC MONITORING (SW-MON)

Enables the building manager to easily monitor and operate all 50 units from the PC's browser.

PC SCHEDULING (SW-SCH)

Enables the building manager to customize daily, weekly and yearly schedules for all 50 units. Schedules can be applied to a single unit, a group of units or collectively (batch) to all units.

ERROR EMAIL (SW-EMAIL)

If an error occurs on the CITY MULTI® system monitored by the centralized controller, the fault will be detected and isolated, and a detailed alert will be sent to the necessary personnel via real-time email. The user can then view and clear the error logs from the PC and use the information for troubleshooting.

ONLINE MAINTENANCE TOOL (SW-MAINT)

Performs maintenance diagnostics via a networked PC, the central controller and Maintenance Tool software. Eliminates the need to connect an MN converter.

OPTIONAL SOFTWARE

INDIVIDUAL PERSONAL BROWSER VIA PC WEB BROWSER (SW-PWEB)

Allows individual users to control their zone conditioning via personal networked PC's with or without remote controllers. Personal web browser is only supported on AE-200A, AE-50A, and EW-50A Centralized Controllers.

	Part Number	Description	AE-200A	AE-50A	EW-50A

PAC-YG82TB-J

PAC-YG84UTB-J

PAC-YG86TK-J

CENTRALIZED CONTROLLER AE-200A

Combines the power of a touch-screen interface with the remote capabilities of an Internet browser. The AE-200A is our most capable central controller for managing your CITY MULTI® and peripheral systems. Up to three AE-50A or EW-50A expansion controllers can be added up to a single AE-200A. This allows the AE-200A to control and monitor up to 200 indoor units from one touch screen.

STANDARD FEATURES

Function	Description
Touch Screen	10.4" high resolution color touch screen
Max No. of Indoor Units	Up to 200 indoor units can be controlled and monitored when three expansion controllers (AE-50A and/or EW-50A) are networked together.
ON/OFF	On/Off operation for a single group and batch operation
Operation Mode	Setback / Cool / Dry / Auto (R2- and WR2-Series) / Fan / Heat
Temperature Setting	Supports single and dual set point operation with extended set temperature range
Fan Speed Setting	Hi / Mid-2 / Mid-1 / Low / Auto (Available fan speed settings depending on indoor unit)
Airflow Direction Setting	Swing / Horizontal / Mid-0 / Mid-1 / Mid-2 / Mid-3 / Auto (settings vary depending on indoor unit model)
Permit/Prohibit Function	Individual prohibit operations for each remote controller function (ON/OFF, Set Temperature, Operation Mode and Filter Reset)
Indoor Return Air Temperature	Displays the measured return air temperature from each group
Error Indication	Displays a four-digit code and the affected unit address
Test Run Function	Allows indoor units to operate in test mode
Ventilation Interlock	Allows the group to be interlocked with Lossnay unit
Schedule Operation	Annual, Weekly, and Today schedules
External Input/Output	Inputs: Level Signal-Batch Start / Stop, Batch Emergency Stop Outputs: Start / Stop Status, Error / Normal Status
Power Supply	Built-in
Dimensions – (H x W x D)	7-27/32" x 11-5/32" x 2-17/32"

CENTRALIZED CONTROLLER AE-50A

The AE-50A Expansion Controller connects to an AE-200A over Ethernet to expanded its monitoring capability to up to 200 indoor units. It features advanced functionality with expanded monitoring, control, dual set point and trending abilities.

STANDARD FEATURES

Function	Description
Touch Screen	10.4" high resolution color touch screen
Max No. of Indoor Units	Up to 200 indoor units can be controlled and monitored when three expansion controllers (AE-50A and/or EW-50A) are networked together.
ON/OFF	On/Off operation for a single group and batch operation
Operation Mode	Setback /Cool / Dry / Auto (R2- and WR2-Series) / Fan / Heat
Temperature Setting	Supports single and dual set point operation with extended set temperature range
Fan Speed Setting	Hi / Mid-2 / Mid-1 / Low / Auto (Available fan speed settings depending on indoor unit)
Airflow Direction Setting	Swing / Horizontal / Mid-0 / Mid-1 / Mid-2 / Mid-3 / Auto (settings vary depending on indoor unit model)
Permit/Prohibit Function	Individual prohibit operations for each remote controller function (ON/OFF, Set Temperature, Operation Mode and Filter Reset)
Indoor Return Air Temperature	Displays the measured return air temperature from each group
Error Indication	Displays a four-digit code and the affected unit address
Test Run Function	Allows indoor units to operate in test mode
Ventilation Interlock	Allows the group to be interlocked with Lossnay unit
Schedule Operation	Annual, Weekly, and Today schedules
External Input/Output	Inputs: Level Signal-Batch Start / Stop, Batch Emergency Stop Outputs: Start / Stop Status, Error / Normal Status
Power Supply	Built-in
Dimensions – (H x W x D)	7-27/32" x 11-5/32" x 2-17/32"

CENTRALIZED AND EXPANSION CONTROLLER EW-50A

The EW-50A Expansion Controller is an Internet browser enabled central controller for managing your CITY MULTI® and peripheral systems. The EW-50A features advanced functionality with expanded monitoring, control, dual set point and trending abilities.

STANDARD FEATURES

FUNCTION	DESCRIPTION
Max No. of Indoor Units	Up to 50 indoor units can be controlled and monitored.
ON/OFF	On/Off operation for a single group and batch operation
Operation Mode	Setback /Cool / Dry / Auto (R2- and WR2-Series) / Fan / Heat
Function	Hold (temporarily disables schedules) / Initial setting / Operation data back-up
Displays	CITY MULTI compressor speed and hi/low pressure / AdvancedHVAC Controller (DC-AIO) input/output status / Space temperature and humidity (from SmartME or AI controller) / Error code (four-digit code and the affected unit address) / Unoccupied setback temperature range / Occupancy and brightness status from the SmartME remote controller
Temperature Setting	Supports single and dual set point operation with extended set temperature range
Fan Speed Setting	Hi / Mid-2 / Mid-1 / Low / Auto (Available fan speed settings depending on indoor unit)
Airflow Direction Setting	Swing / Horizontal / Mid-0 / Mid-1 / Mid-2 / Mid-3 / Auto (settings vary depending on indoor unit model)
Permit/Prohibit Function	Individual prohibit operations for each remote controller function include ON/OFF / Set Temperature / Fan speed and direction / Operation Mode / Filter Reset
Ventilation Interlock	Allows the group to be interlocked with Lossnay unit
Schedule Operation	Annual, Today, and Weekly schedules
External Input/Output	Inputs: Level Signal-Batch Start / Stop, Batch Emergency Stop Outputs: Start / Stop Status, Error / Normal Status (requires PAC-YG10HA)
Trending Data	Fan operation time / Thermo-on time / Set temperature / Room temperature / AI controller temperature and humidity
Power Supply	Built-in
Dimensions – (H x W x D)	8-4/16" x 6-13/16" x 3-10/16"

CENTRALIZED CONTROLLER TC-24B

Customized individual zone control via a bright and easy to use touch-screen interface. The TC-24B is perfect for light commercial and residential applications.

STANDARD FEATURES	
Function	Description
Max No. of Indoor Units	Up to 24 indoor units can be connected
ON/OFF	On/Off operation for a single group and batch operation
Operation Mode	Setback /Cool / Dry / Auto (R2- and WR2-Series) / Fan / Heat
Temperature Setting	Supports single and dual set point modes / Set temperature from 57° F – 87° F depending on operation mode and indoor unit
Fan Speed Setting	Hi / Mid-2 / Mid-1 /Low / Auto (Available fan speed settings depending on indoor unit)
Airflow Direction Setting	Airflow angles: 100° – 80° – 60° – 40° and swing / Airflow direction settings vary depending on indoor unit model
Permit/Prohibit Function	Individual prohibit operations for each remote controller function (ON/OFF, Set Temperature, Operation Mode and Filter Reset)
Indoor Return Air Temperature	Displays the measured return air temperature from each group
Error Indication	Displays a four-digit code and the affected unit address
Ventilation Interlock	Allows the group to be interlocked with Lossnay unit
Schedule Operation	Weekly schedule can be set by groups based on operation pattern
External Input/Output	Inputs: Level Signal-Batch Start / Stop, Batch Emergency Stop Outputs: Start / Stop Status, Error / Normal Status
Power Supply	PAC-SC51KUA
Dimensions – (H x W x D)	4-3/4" x 7-1/8" x 1-3/16"

ADVANCEDHVAC CONTROLLER

DC-A2IO AdvancedHVAC Controller

The AdvancedHVAC controller features customizable applications for integrating CITY MULTI indoor units with third party equipment. Physical inputs and outputs can be used for reading sensors and energizing relays. An optional analog output accessory (AL2-2DA) can be added for modulating third party equipment signals. Status of inputs and outputs are displayed on the AE-200A, AE-50A, EW-50A web browser and the PAR-U01MEDU-J SmartME Remote Controller screen.

STANDARD FEATURES

Function	Description
Inputs	Eight digital or analog inputs (sensor data collected in real time)
Outputs	Six digital outputs
Monitor and Control	Up to fifty groups (16 max indoor units per group) / Input and output status data monitored from AE-200A/AE-50A/ EW-50A Centralized Expansion Controller or PAR-U01MEDU-J SmartME Zone Controller / M-NET sensor data (collected every 70 seconds) / Error status of up to 50 indoor units / On/Off, Start/Stop, Enable/Disable
Schedule Operation	Weekly schedule can be set by groups based on operation pattern (requires AE-200A/AE-50A/EW-50A Central Controller)
Interlock Function	Interlock M-NET devices and output contacts according to status of input contacts
DC-A2IO Package	AL2-14MR-D a2 simple application controller and PAC-IF01AHC M-NET Adapter
Accessories	AL2-2DA expansion module adds 2 additional analog outputs / sensors and relays depending on application / NEMA rated enclosure / Wiring
Power Supply	24 VDC (sold separately) / 17-32 VDC M-NET Communication Power (PAC-SC51KUA M-NET power supply provided with TC-24B standard package)
Communication	M-NET
Dimensions – (H x W x D)	AL2-14MR-D: 3-1/2" x 6-1/4" x 1-9/16"

INPUT/OUTPUT CONTROL BOARDS

PAC-YG66DCA DIGITAL INPUT DIGITAL OUTPUT (DIDO) CONTROL BOARD

The DIDO controller used in conjunction with an AE-200A, AE-50A, EW-50A, or TC-24B centralized controller can control and monitor third-party general equipment.

STANDARD FEATURES

Function	Description
Inputs	Qty two Digital Status Inputs and 2 Digital Error Inputs (Non-Voltage Contacts)
Outputs	Qty two Digital Outputs (Non-Voltage Relay Contact Use only VDC with outputs)
Monitor	Status, Fault Requires AE-200A, AE-50A, EW-50A, or TC-24B Centralized Controller
Control	On/Off, Start/Stop, Enable/Disable Requires AE-200A, AE-50A, EW-50A, or TC-24B Centralized Controller
Schedule Operation	Weekly schedule can be set by groups based on operation pattern Requires AE-200A, AE-50A, EW-50A, or TC-24B Centralized Controller
Interlock Function	Interlock M-NET devices and output contacts according to status of input contacts
Power Supply	24 VDC (5W plus loads)
Communication	M-NET
Dimensions – (H x W x D)	4-3/4" x 7-7/8" x 1-13/16"

PAC-YG63MCA ANALOG INPUT (AI) CONTROL BOARD

The Analog Input (AI) Control Board is used in conjunction with an AE-200A, AE-50A or EW-50A centralized controller to alarm, monitor, and trend temperature and humidity from a field-supplied temperature or humidity sensor.

STANDARD FEATURES

Function	Description
Inputs	Qty two Analog Inputs (0/10 VDC, 4/20 mA, 1-5 VDC)
Monitor	Temperature and/or Humidity Requires AE-200A, AE-50A or EW-50A Centralized Controller and field supplied sensor
Interlock Function	Interlock M-NET devices and output contacts according to measured values on inputs
Alarms	Generate alarm based on user defined high and low limits
Power Supply	24 VDC (5W)
Communication	M-NET
Dimensions – (H x W x D)	4-3/4" x 7-7/8" x 1-13/16"

ZONE CONTROLLERS

Remote Controller for CITY MULTI systems featuring an intuitive touch screen interface with dual set point functionality and LED status indicator

Advanced functions include onboard temperature, humidity, occupancy and brightness sensors. The SmartME also displays AdvancedHVAC Controller input and output status and can send temperature and humidity set points to third party equipment through the AdvancedHVAC Controller.

PAR-U01MEDU

SMARTME

KEY FEATURES

- Intuitive backlit touch screen.
- Group control up to 16 indoor units in a single zone.
- Advanced sensor control for occupancy, temperature, humidity and brightness.
- Displays room name and humidity.
- Monitors third-party equipment through AdvancedHVAC controller.
- Supports dual set point and setback functions.
- Improved scheduling.
- Color glow status indicator LED bar.
- Dimensions (H x W x D): 4-3/4" x 5-9/16" x 1".

COLOR GLOW STATUS INDICATOR

The LED bar indicates the operation status by lighting and blinking with different colors and brightness (High/Low), or by turning off. Multiple operation status indicators include blue (Cooling), light blue (Drying), yellow (Fan), white (Auto), green (Setback), red (Heating) and lime (Energy Save). Advanced settings are available for selecting desired color per mode, LED brightness (in conjunction with room brightness sensor), and temperature range indicator.

ENERGY SAVE FUNCTION

The Energy Save function reduces energy consumption during vacancy. The user can select a mode for the Energy Save function which is activated based on vacancy detection in a room, including the following:

- Thermo-off: Puts the unit into the Thermo-off state.
- Set temperature offset: Offsets the set temperature.
- Fan speed down: Sets the fan speed to Low.
- ON/OFF: Turns off the unit.
- Operation mode: Sets the operation mode to Setback.

OCCUPANCY SENSOR

The built-in Occupancy Sensor is used to detect movement in a room. If the sensor detects no movement (or "vacancy") it will activate the selected Energy saving function mode. The Occupancy Sensor returns the system to original operating status after detecting movement. The user can adjust the away time and detection sensitivity threshold level for the Occupancy Sensor. Brightness can also be used in conjunction with motion to determine occupancy.

ZONE CONTROLLERS

Easy-to-use hand-held remote for temperature and operation mode control for CITY MULTI® and P-Series systems

PAR-FL32MA

WIRELESS MA REMOTE CONTROLLER AND MA RECEIVER

KEY FEATURES

- Hand held wireless remote control of up to 16 indoor units.
- Operation modes of Cool, Heat, Dry, Fan, Auto, Ventilation.
- Fan speed, airflow direction settings.
- Compatible with P-Series and CITY MULTI systems.
- Requires PAR-FA32MA Wireless Receiver.
- Dimensions—Remote: 2-5/16" x 3/4" x 5-1/4"
Receiver: 2-3/4" x 7/8" x 4-12/16".

Easy to use remote for temperature and operation mode control

PAC-YT53CRAU

SIMPLE MA

KEY FEATURES

- Controls up to 16 zones.
- Backlit LCD.
- Operation modes of Cool, Heat, Dry, Fan, Auto, Ventilation, Setback (depending on connected equipment).
- Fan speed settings.
- Controls air direction.
- Dimensions: 2-3/4" x 1-5/8" x 4-3/4".
- Dual set point functionality.

WIRED MA

Wired remote controller ideal for easy operation, convenience, and energy savings

PAR-31MAA

WIRED MA REMOTE CONTROLLER

KEY FEATURES

- Controls up to 16 zones.
- Large easy-to-see backlit LCD with two display modes: Full or Basic.
- Interlock and control Lossnay units.
- Operation modes: Auto, Cool, Heat, Dry, Fan.
- Fan speed settings.
- Controls air direction.
- Dimensions: 4-3/4" x 3/4" x 4-3/4"
- Dual set point functionality.

iOS MOBILE APPLICATION

The Zone Control App allows monitoring and control of Mitsubishi Electric systems. Zone Control can be utilized by building or campus managers, maintenance personnel, building owners and homeowners

Zone Control can control CITY MULTI® systems and M- and P-Series systems units connected to the M-NET and controlled from one of Mitsubishi Electric's Central Controllers, the AE-200A, AE-50A or EW-50A. The iPhone or iPod Touch's Wi-Fi connection allows Zone Control to communicate to the central controller across a Local Area Network (LAN). Network settings may vary by location, so check with your administrator for any login information that might be needed to access the LAN.

FEATURES OF INDOOR UNITS THAT ZONE CONTROL CAN CONTROL:

- On/Off
- Set Temperature
- Fan Speed
- Mode
- Space Temperature Display
- Vane Direction

benefits

ZONE CONTROL IS CONFIGURED THROUGH MENU-DRIVEN SETTINGS THAT SUPPORT:

- Multiple locations.
- Multiple controllers per location.
- Customizable names for indoor units.

Set up may need to be done with support from the installing contractor to create the network access point or assign the indoor unit location names.

SYSTEM INTEGRATION

The CMCN supports integration with Building Management Systems (BMS) via our LonWorks® and BACnet® interfaces

The Mitsubishi Electric LonWorks® interface, LMAP04U, supports up to 50 indoor units with a variety of network variables on a per indoor unit basis. Input variables include, but are not limited to: On/Off, Operation Mode, Fan Speed, Prohibit Remote Controller, and Filter Sign Reset. Output variables include but are not limited to: Model Size, Alarm State, Error Code, and Error Address.

LONWORKS® INTERFACE

KEY FEATURES

- Up to 50 units (CITY MULTI, M-Series, P-Series and/or Lossnay) can be connected with one LonWorks interface.
- Operation/Setting: Request On/Off, Set Point, Request Lossnay Mode, Request Fan Speed, Request Local Prohibit On/Off and Set Point, Request Forced Thermostat Off, Filter Sign Reset, Time Stamp, Request Limit Temperature Setting Range, Request Simplified Locking.
- Features a built-in power supply (208/230 VAC).
- Dimensions: 13-7/16" x 14-3/16" x 2-3/8".

The BAC-HD150 BACnet controller is BTL® (BACnet Testing Laboratories) listed proving its compliance with ASHRAE standards and its compatibility with building management systems supporting the BACnet/IP protocol

BACNET® INTERFACE

KEY FEATURES

- Handles up to 50 Indoor units.
- Supports the monitoring and operation of CITY MULTI indoor units, M-Series and P-Series indoor units (adapter required), and Lossnay ERV.
- BACnet/IP.
- Features a built-in power supply (100/240 VAC).

MAINTENANCE TOOL SOFTWARE

Easy-to-use, Windows®-based Maintenance Tool software

Use Maintenance Tool software to monitor pressure and temperature readings from CITY MULTI system sensors, display and control system LEV settings and display and remotely control all connected indoor units. Maintenance Tool software also allows the technician to record and save system monitor data for the purposes of trending and system analysis off site as well as display malfunction logs and email error reports to personnel responsible for servicing the system.

CMS-MNG-E

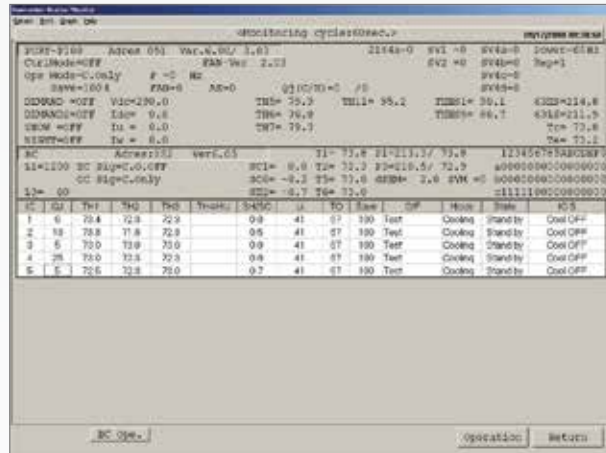

MN CONVERTER

KEY FEATURES

- Allows technicians to monitor and collect CITY MULTI system data and control various functions.
- System monitoring accomplished through direct connection between your PC and the M-NET bus line using the MN-Converter.

The mode select screen allows the user to select the method for connection to the CITY MULTI system, whether direct or remotely, or choose to analyze previously recorded data offline.

The operation status monitor screen displays the operational data for the connected system, including system pressures, temperatures, LEV settings, compressor frequency, current operational mode, and more. Pre-recorded data can also be viewed in and off-line version of this screen.

DIAMOND CONTROLS™

A branded, bundled, and seamless building controls solution packaged with our variable refrigerant flow (VRF).

Mitsubishi Electric's Diamond Controls is powered by the industry leading NiagaraAX Framework®, the industry's first software technology designed to integrate diverse building systems and devices into one seamless system. Niagara supports a wide range of protocols including LonWorks™, BACnet™, Modbus®, oBIX and Internet standards. The AX Framework also includes integrated network management tools to support the design, configuration, installation and maintenance of interoperable networks.

DC-600E

The Mitsubishi Electric DC-600-E is an embedded controller/server platform that

combines integrated control, supervision, data logging, alarming, scheduling and network management functions into a small, compact platform with Internet connectivity and web serving capabilities. The DC-600E makes it possible to control and manage external devices over the Internet, presenting real-time information to users in web-based graphical views.

DCPro

The Mitsubishi Electric DCPro is a flexible network server for all connected DC-600E stations. The

DCPro harnesses the power of the Internet to provide efficient integration of standard open protocols. The DCPro creates a powerful network environment with comprehensive database management functionality, alarm management, and messaging services. DCPro can manage global control functions, support data passing over multiple networks, connect to enterprise level software applications, and host multiple, simultaneous client workstations connected over a local network or the Internet.

OPTIONAL CONTROL ACCESSORIES

IO-16

IO-34

Optional: 16 point IO module directly connects to DC-600E IO connector with 8 universal inputs, 4 relay outputs, and 4 analog outputs.

Optional: 34 point IO module directly connects to DC-600E IO connector with 16 universal inputs, 10 relay outputs, and 8 analog outputs.

Optional: Remote 16 point IO module and RS-485 bus connected to DC-600E with 8 universal inputs, 4 relay outputs, and 4 analog outputs.

Optional: 24 Volt AC/DC power supply module.

DIAMOND CONTROLS APPLICATIONS

HIGH-RESOLUTION 3D GRAPHICS

Diamond Controls enables a new graphical user experience for variable refrigerant flow (VRF) zoning systems with the inclusion of high resolution three-dimensional floor plan graphics of your building.

DEMAND RESPONSE COMPLIANCE

Demand Response programs help utilities maintain grid reliability and enable customers to realize significant value. Diamond Controls provides Demand Response compliance to a building owner through OpenADR.

LIGHTING CONTROL

Diamond Controls can manage a building's lighting system without requiring integration with third party equipment. Lighting control provides a building manager the ability to set lighting schedules, which can be overridden by local switches if necessary.

CENTRAL PLANT CONTROL

Diamond Controls can monitor, control, and schedule a central plant to provide chilled or hot water for the buildings needs without requiring additional third party controls.

ADVANCED ALARMING

Diamond Controls advanced logic enables superior alarming capabilities for building awareness, as well as VRF zoning systems. The building owner can set-up multiple alarm conditions ranging from simple out-of-range alarms to advanced condition alarms.

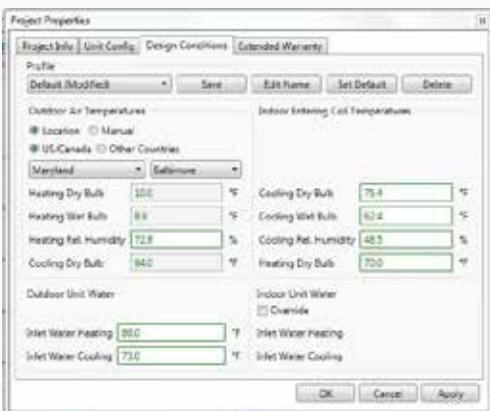

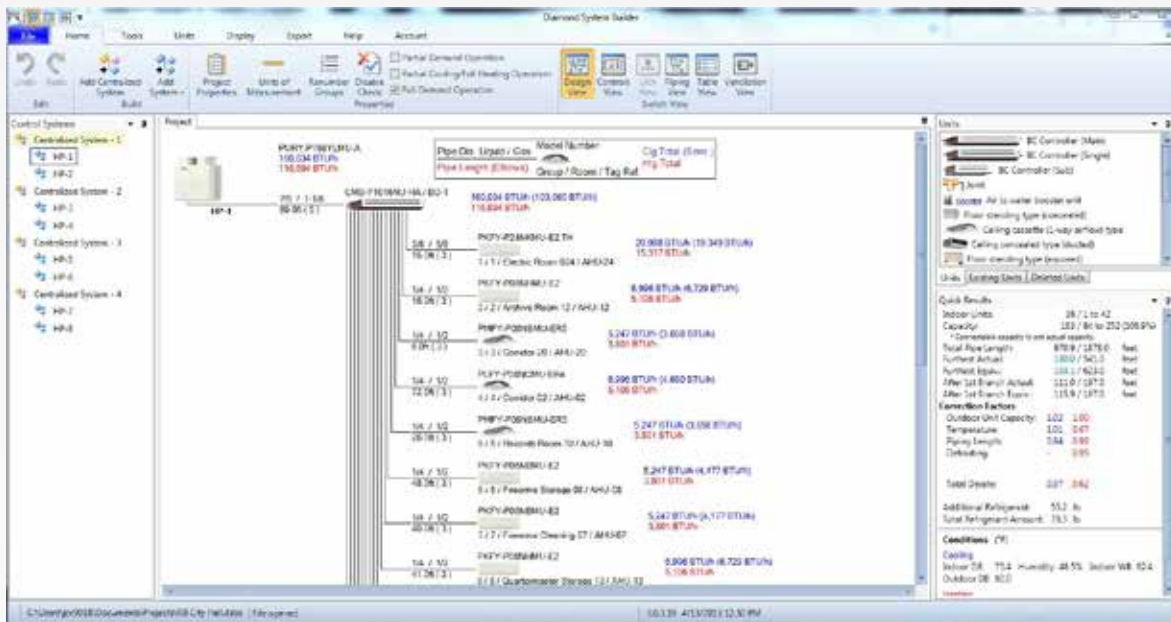

HVAC EQUIPMENT INTEGRATION

Diamond Controls can schedule, monitor, control, and integrate advanced logic within various HVAC manufacturer's equipment. Diamond Controls can also easily integrate into an existing building management system (BMS).

DIAMOND SYSTEM BUILDER

Diamond System Builder is an interactive system layout tool that speeds up the system design process

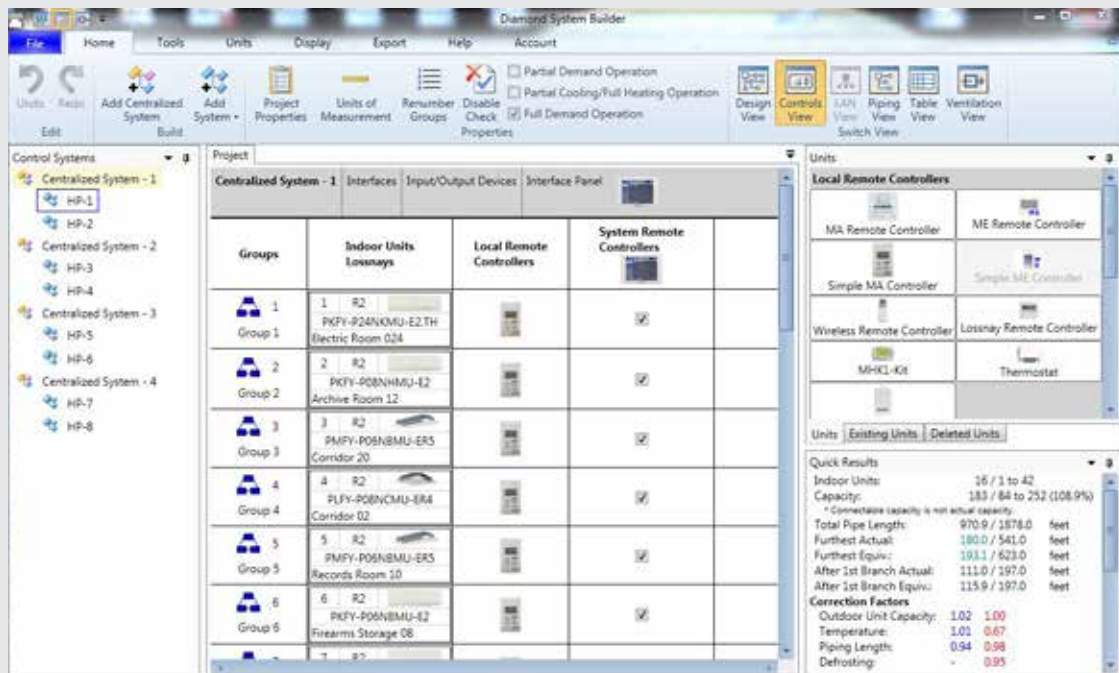

Diamond System Builder (DSB) helps users determine the cooling and heating output of selected equipment for project-specific conditions. The program has error indicators and built-in safeguards against exceeding limitations, assuring line lengths, maximum connected capacities, component selections, control schemes, etc. are within the system requirements.

PROJECT PROPERTIES

System design conditions, such as indoor and outdoor design conditions, are easily entered for both cooling and heating. Customer and project names can be entered to identify the job on the outputs.

DSB INTERFACE

Optional functions to customize the system layout to your project are available, such as labeling groups with a room name, adding equipment tags to pieces of equipment, and giving each system a project-specific name. Other features, like a custom equipment schedule, submittal packages, and AutoCAD drawings are available once the system layout has been finalized.

REVIT AND AUTOCAD OUTPUTS

KEY FEATURES

- Allows technicians to monitor and collect CITY MULTI system data and control various functions.
- System monitoring accomplished through direct connection between your PC and the M-NET bus line using the MN-Converter.

Heating | Indoor: 70° F (21° C) DB; Outdoor: 47° F (8° C) DB / 43° F (6° C) WB.
*2 Twinning Kit is required for combining two individual outdoor units in the field for PURY-P-T(Y)SLMU combined systems.
*3 Each individual outdoor unit requires a separate electrical connection. Reference electrical data for each individual outdoor unit.
*4 Maximum connectable number of branch pipes is 48.
*5 Efficiency values based on AHRI 1230 test method

than normal sound pressure levels when in heating mode.

The outdoor twinning kit (low pressure) should be connected to the low pressure side of the outdoor unit. If the connected units are different capacities, the outdoor twinning kit (low pressure) should be installed in the unit with the largest capacity.

-BS indicates Seacoast Protection option.

LIMITED WARRANTY | Seven-year warranty on compressor. One-year warranty on parts. See our website for details on specific additional application installation coverage.

Specifications are subject to change.

** Extended ambient cooling operation range down to -10° F DB Low Ambient Kit required.
NOTES: In systems with considerably long piping runs, the outdoor units may exhibit slightly louder

BV-Series Ball Valves

Model numbers:

BB14BBSI/ BB38BBSI/ BB12BBSI/ BB58BBSI

- Size available: 1/4"; 3/8"; 5/8".
- Fully factory assembled.
- Furnace brazed and pressure tested.
- Each ball valve is equipped with 1/4" Schrader® Valve for refrigerant service.
- Design working pressure: 700 PSIG.
- Temperature range: -40° F to +325° F (-40° C to +149° C).
- Forged and machined brass unibody designed with forged brass seal cap.
- Polytetrafluoroethylene (PTFE) seals and gaskets (no synthetic O-rings).
- Seal cap design permits valve operation without removal of seal cap.
- One year limited materials and workmanship warranty on Ball Valves.

- Engineered for Mini-split and Multi-split HVAC Units.
- Full Port Design.
- 700 PSIG Rated.
- R-410A Compatible.
- Braze Connections.

Part Number	SAE Braze	A	B	C	D	E

Operating Temperature Range	Cooling		**Outdoor: 23° F D.B. to 109° F D.B.			
	Heating		Outdoor: -13° F W.B. to +60° F W.B.			
Efficiency Ratings (Ducted / Non-Ducted) *4	EER		11.70 / 11.30	11.35 / 11.30	11.30 / 10.90	10.90 / 10.90
	IEER		16.80 / 16.20	16.00 / 15.40	14.40 / 13.85	13.60 / 13.10
	COP		3.66 / 3.35	3.39 / 3.35	3.56 / 3.25	3.29 / 3.25

Notes:

- *1 Rating Conditions:
Cooling | Indoor: D.B. 26.7° C (80° F), W.B. 19.4° C (67° F); Outdoor: D.B. 35° C (95° F).
Heating | Indoor: D.B. 21.1° C (70° F); Outdoor: D.B. 8.3° C (47° F), W.B. 6.1° C (43° F).
- *2 Twinning Kit CMY-Y100VBK2 is required for combining two individual outdoor units in the field for PUHY-HP-TSJMU combined systems.
- *3 Each individual outdoor unit requires a separate electrical connection. Reference electrical data for each individual outdoor unit.

*4 Efficiency values based on AHRI 1230 test method.

** For details on extended ambient cooling operation range down to 0° FDB see Low Ambient Cooling section.

-BS indicates Seacoast Protection option.

Specifications are subject to change without notice.

LIMITED WARRANTY | Seven-year compressor and one year parts. Extended warranty of up to 10 years is available. See our website for details on specific additional application installation coverage.

	Motor Type		DC Motor			
Air Filter			Polypropylene Honeycomb			
Refrigerant Pipe Dimensions	Liquid (High Pressure) (Flare)	In.	3/8			
	Gas (Low Pressure) (Flare)	In.	5/8			
Drain Pipe Dimension (O.D.)		In.	1-1/4			
Sound Pressure Levels (As Measured in an Anechoic Room)*3		(Low-Mid1-Mid2-High) dB(A)	28-30-32-34	30-32-35-37	35-38-41-43	

Notes:

*1 Cooling / Heating capacity indicates the maximum value at operation under the following conditions:
 Cooling | Indoor: 80° F (27° C) D.B. / 67° F (19° C) W.B.; Outdoor: 95° F (35° C) D.B.
 Heating | Indoor: 70° F (21° C) D.B.; Outdoor: 47° F (8° C) DB / 43° F (6° C) W.B.

*2 Net weight is shown for unit / grille.

*3 Airflow rate / sound pressure levels are at (Low-Mid1-Mid2-High).

Ventilation Air: Providing sufficient ventilation air is an important part of every building design. ASHRAE Standard 62 provides the minimum ventilation air requirements. Also check local codes.

Specifications are subject to change without notice.

LIMITED WARRANTY | Seven-year compressor and one year parts. See our website for details on specific additional application installation coverage.

PLFY-P**NCMU-ER2

Model Name			PLFY-P08NCMU-ER2	PLFY-P12NCMU-ER2	PLFY-P15NCMU-ER2

	Heating		-4° F WB to +60° F WB (-20° C WB to +15.5° C WB)		
Connectable Outdoor Unit			PUHY-P120TKMU (-BS), PUHY-P120YKMU (-BS) PUHY-P120TJMU (-BS), PUHY-P120YJMU (-BS)	PURY-P120TKMU (-BS), PURY-P120YKMU (-BS) PURY-P120TJMU (-BS), PURY-P120YJMU (-BS)	

Notes:

*1 Cooling/Heating Capacity indicates the maximum value at operation under the following conditions:

Cooling | Entering Indoor Unit: 87° F (31° C) D.B. / 80° F (27° C) W.B.

Cooling | Outdoor Unit: 87° F (31° C) D.B.

Heating | Entering Indoor Unit: 32° F (0° C) D.B.

Heating | Outdoor Unit: 32° F (0° C) D.B. / 28° F (-2° C) W.B.

Ventilation Air: Providing sufficient ventilation air is an important part of very building design ASHRAE Standard 62 provides the minimum air requirements. Also check local codes.

Specifications are subject to change without notice.

LIMITED WARRANTY | Seven-year compressor and one year parts. Extended warranty of up to 10 years is available. See our website for details on specific additional application installation coverage

INDUSTRY STANDARDS

Mitsubishi Electric HVAC continues to drive acceptance of VRF technology in the U.S. engineering and regulatory arenas.

LEADING THE VRF INDUSTRY

Mitsubishi Electric HVAC has been at the forefront of the charge to develop proper testing standards and procedures for VRF systems, providing clients the necessary information to properly incorporate these systems into their building designs.

AHRI STANDARDS

Air-conditioning, Heating and Refrigeration Institute (AHRI) Standards 210/240 and 340/360 had been used as the benchmark for establishing the testing methods of traditional unitary HVAC equipment. These standards have formalized the use of such terms as EER, COP, SEER, and HSPF— terms which are recognized and applied throughout the HVAC industry today. The simple testing procedures detailed in these existing AHRI standards, however, were not adequate to appropriately measure efficiency levels within advanced VRF systems, and could not account for such technologies as inverter-driven compressors, simultaneous cooling and heating, and variable-capacity ductless and ducted indoor units.

AHRI STANDARD 1230

Mitsubishi Electric worked with the Department of Energy (DOE) and AHRI to gain regulatory acceptance for VRF systems. Initially, Mitsubishi Electric requested DOE grant waivers from the existing testing standards for VRF systems. It was quickly recognized that waivers weren't a long-term solution, and Mitsubishi Electric immediately assisted in developing a proper testing standard for VRF systems—a standard that is now known as AHRI Standard 1230.

INTEGRATED ENERGY EFFICIENCY RATIO

IEER is the new measure of partial-load cooling performance for unitary equipment and VRF systems. IEER greatly improves the industry methodology for part-load testing by collecting data for four different outdoor testing conditions based on load on the system. The formula (shown below) used for testing, more accurately demonstrates the value and capabilities of INVERTER-driven VRF systems at part-load operation.

ASHRAE STANDARD 90.1

ASHRAE Standard 90.1 is synonymous with energy efficiency requirements in commercial buildings. Many city, state, and national codes reference the efficiency levels listed in this standard.

Test Condition "A"	=	100% Capacity at 95° FDB
Test Condition "B"	=	75% Capacity at 81.5° FDB
Test Condition "C"	=	50% Capacity at 68° FDB
Test Condition "D"	=	25% Capacity at 65° FDB

IEER = 0.02A + 0.617B + 0.238C + 0.125D

With the development and approval of AHRI Standard 1230, Mitsubishi Electric and other VRF system manufacturers had a platform that supported the introduction of VRF efficiency standards as an addendum to Standard 90.1-2007, and incorporated these standards as a part of Standard 90.1-2010. The minimum VRF efficiency standards are shown in the table on page 99.

ASHRAE STANDARDS 15 and 34

ASHRAE Standard 15 provides requirements for the safe design, construction, installation, and operation of all HVAC&R systems as a way of protecting building occupants and property. ASHRAE Standard 34 assigns reference numbers, safety classifications for flammability and toxicity, and refrigerant concentration limits (RCL) to refrigerants. These standards are referenced by both the International Mechanical Code and the Uniform Mechanical Code, which are typically adopted as part of local code requirements. Mitsubishi Electric VRF systems utilize R-410A refrigerant, which is assigned an A1 safety classification placing it in the lowest toxicity and no flame propagation categories.

Engineers and designers have great flexibility in applying CITY MULTI® VRF systems to ensure the design is compliant with ASHRAE Standard 15. Examining the project spaces and determining the occupied and connected spaces needs to be a primary consideration, and care must be taken in the location and layout of refrigerant lines and indoor units. For more detailed information please refer to the system design manual for the outdoor unit. Guidance is also provided in Application Note 2001 which can be downloaded from mylinkdrive.com.

**ELECTRICALLY OPERATED VARIABLE
REFRIGERANT FLOW AIR-TO-AIR AND APPLIED HEAT PUMPS—MINIMUM EFFICIENCY REQUIREMENTS**

Equipment Type	Size Category	Heating Section Type	Sub-Category or Rating Condition	Minimum Efficiency	Test Procedure
VRF Air Cooled, (cooling mode)	<65,000 Btu/h	All	VRF Multi-split System	13.0 SEER	AHRI 1230
	≥65,000 Btu/h and <135,000 Btu/h	Electric Resistance (or none)	VRF Multi-split System	11.0 EER 12.3 IEER 12.9 IEER (as of 7/1/2012)	
	≥65,000 Btu/h and <135,000 Btu/h	Electric Resistance (or none)	VRF Multi-split System with Heat Recovery	10.8 EER 12.1 IEER 12.7 IEER (as of 7/1/2012)	
	≥135,000 Btu/h and <240,000 Btu/h	Electric Resistance (or none)	VRF Multi-split System	10.6 EER 11.8 IEER 12.3 IEER (as of 7/1/2012)	
	≥135,000 Btu/h and <240,000 Btu/h	Electric Resistance (or none)	VRF Multi-split System with Heat Recovery	10.4 EER 11.6 IEER 12.1 IEER (as of 7/1/2012)	
	≥240,000 Btu/h	Electric Resistance (or none)	VRF Multi-split System	9.5 EER 10.6 IEER 11.0 IEER (as of 7/1/2012)	
	≥240,000 Btu/h	Electric Resistance (or none)	VRF Multi-split System with Heat Recovery	9.3 EER 10.4 IEER 10.8 IEER (as of 7/1/2012)	
VRF Water Source, (cooling mode)	<65,000 Btu/h	All	VRF Multi-split System 86°F entering water	12.0 EER	AHRI 1230
	≥65,000 Btu/h	All	VRF Multi-split System with Heat Recovery 86°F entering water	11.8 EER	
	≥65,000 Btu/h and <135,000 Btu/h	All	VRF Multi-split systems 86°F entering water	12.0 EER	
	≥65,000 Btu/h and <135,000 Btu/h	All	VRF Multi-split System with Heat Recovery 86°F entering water	11.8 EER	
	≥135,000 Btu/h	All	VRF Multi-split systems 86°F entering water	10.0 EER	
	≥135,000 Btu/h	All	VRF Multi-split System with Heat Recovery 86°F entering water	9.8 EER	
VRF Ground Water Source, (cooling mode)	≥135,000 Btu/h	All	VRF Multi-split System 59°F entering water	16.2 EER	AHRI 1230
	≥135,000 Btu/h	All	VRF Multi-split System with Heat Recovery 59°F entering water	16.0 EER	
	≥135,000 Btu/h	All	VRF Multi-split System 59°F entering water	13.8 EER	
	≥135,000 Btu/h	All	VRF Multi-split System with Heat Recovery 59°F entering water	13.6 EER	
VRF Air Cooled, (heating mode)	<65,000 Btu/h (cooling capacity)	-	VRF Multi-split System	7.7 HSPF	AHRI 1230
	≥65,000 Btu/h and <135,000 Btu/h	-	VRF Multi-split System 47° F db/43° F wb outdoor air	3.3 COP	
			VRF Multi-split System 17° F db/15° F wb outdoor air	2.25 COP	
	≥135,000 Btu/h	-	VRF Multi-split System 47° F db/43° F wb outdoor air	3.2 COP	
VRF Multi-split System 17° F db/15° F wb outdoor air			2.05 COP		
VRF Water Source, (heating mode)	<135,000 Btu/h	-	VRF Multi-split System 68° F entering water	4.2 COP	AHRI 1230
	≥135,000 Btu/h	-	VRF Multi-split System 68° F entering water	3.9 COP	
VRF Ground Water Source, (heating mode)	<135,000 Btu/h	-	VRF Multi-split System 50° F entering water	3.6 COP	AHRI 1230
	≥135,000 Btu/h	-	VRF Multi-split System 50° F entering water	3.3 COP	
VRF Ground Source, (heating mode)	≥135,000 Btu/h	-	VRF Multi-split System 32° F entering water	3.1 COP	AHRI 1230
	<135,000 Btu/h	-	VRF Multi-split System 32° F entering water	2.8 COP	

Note: For efficiency values tested in accordance with AHRI-1230, contact your local Mitsubishi Electric sales representative
