## **CARQUEST Filters Service Line**

**1-800-949-6698**

Our 1-800 Service has been expanded to better serve our customer's needs. This service is available Monday through Friday from 8:30 AM – 5:00 PM Eastern Time.

If you know your party's extension, you may dial at any time. For all other calls:

### **Press 1 – FILTER INFORMATION**

If you need assistance with Part Number Interchange, New Number Availability/Pricing, Applications Not Listed in Current Catalogs, Filter Specifications or Attributes including Performance Information, Burst Pressures, Flow Rates, Air Filter CFM Ratings and Dimensional Information.

Further assistance may be needed for Special Applications information, Trouble Shooting and Printed Educational Material.

### **Press 2 - CUSTOMER SERVICE**

If you would like to place an order, check order status, inventory status or backorder questions.

### **Press 3 – MARKETING**

### **Press 5 –WEBMASTER**

E-Learning Website Support

We appreciate the opportunity to provide these services.  
Your comments and suggestions are welcome.

The most current application and other information, is also available at:  
**[www.cficonnect.com](http://www.cficonnect.com)**

**NO PRODUCT LISTED IN THIS CATALOG HAS BEEN APPROVED OR CERTIFIED FOR AVIATION USE. APPLICATIONS ARE VERIFIED FOR VEHICLES SOLD ONLY IN THE UNITED STATES AND CANADA.**

This catalog and all information herein supersedes all previous filter catalogs and information material.

## Terms and Conditions

This Catalog is intended solely for use by purchasers or potential purchasers of aftermarket automotive parts, equipment and supplies and related services from Affinia Group Inc. ("Customers"). If you *are not* a Customer, this notice applies to you:

© 2014 Affinia Group Inc. All rights reserved. No part of this Catalog may be reproduced or utilized in any format, by any means, electronic or mechanical, including photocopying, scanning, or recording in any information retrieval or storage system, without the prior written permission of Affinia Group Inc. In particular, without limiting the foregoing, no part of this Catalog may be incorporated into another work of any kind in any format that catalogs, lists, offers or specifies aftermarket automotive parts, equipment or supplies or related services *not* sold by Affinia Group Inc.

If you *are* a Customer, your use of this Catalog is subject to the following Customer Agreement:

By using this Catalog, you agree to be bound by this Agreement. If you do not wish to be bound by this Agreement, then do not use this Catalog, and do not reproduce, record or use any Content from this Catalog.

### Content

All information in any medium or format furnished by Affinia herein, including text, images, data, graphics, links, captions, or other information (collectively, "Content") is owned by Affinia or our Content providers. All Content is protected by U.S. and international copyright laws. All rights not specifically granted under this Agreement are reserved to Affinia.

You may, subject to the terms and conditions of this Agreement:

- a) Use the Catalog for your internal use, solely to look up information related to aftermarket automotive parts, equipment or supplies or related services referenced in the website in the ordinary course of business;
- b) Use the Catalog to investigate respond to inquiries from, or to provide quotations, purchase orders or invoices, to your customers; and
- c) If necessary in relation to either a) or b) above and to directly facilitate the sale of Affinia's aftermarket automotive parts, equipment or supplies or related services, make a limited number of photocopies of one or more pages of this Catalog (but not all or substantially all of the Catalog).

You may *not*:

- a) Deliver, provide access to, directly or indirectly, or otherwise make the Content available to any third parties;
- b) Remove any copyright or other proprietary notices from the Catalog or any Content;
- c) Reformat or extract data from the Catalog or any Content, or incorporate the Catalog or any Content in whole or in part into another work of any kind in any format, including, without limitation, any work that catalogs, lists, offers or specifies aftermarket automotive parts, equipment or supplies or related services *not* sold by Affinia Group Inc.

### General

By using this Catalog, you acknowledge that you have read this Agreement, understand it and agree to be bound by its terms and conditions. You further agree that it supersedes any proposal or prior agreement, oral or written, and that it cannot be modified except by signed written agreement. If you do not comply with the terms and conditions above, this Agreement shall automatically terminate, and the notice above directed to non-Customers shall apply to you.

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing) . . . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized* Part Numbers May Not Be Available At Time Of Publication.

<sup>40</sup> Not a direct interchange - refer to application listing

<sup>180</sup> The 84791 is Extra-Efficiency (glass-cellulose combo media) Better - 85791XE is High-Efficiency (100% glass media) Best

FOR REFERENCE PURPOSES ONLY-CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.  
 Hsg(Housing) . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.  
*Italicized Part Numbers May Not Be Available At Time Of Publication.*  
<sup>82</sup> OE style <sup>155</sup> Standard version <sup>184</sup> Has lid attached to filter

# Carquest Blue Filters

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing). CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers* May Not Be Available At Time Of Publication.

<sup>40</sup> Not a direct interchange - refer to application listing    <sup>145</sup> Use # 86920 for Series 50, 55, 60 Detroit engines for 2005 and up - use # 86120 for all other Detroit engines including Series 50, 55, 60 for 2004 and back    <sup>146</sup> Element Only    <sup>236</sup> New plastic version    <sup>237</sup> Updated version with plastic lid    <sup>243</sup> Requires reusable plastic bowl    <sup>244</sup> Complete spin-on with drain (no plastic bowl required)    <sup>271</sup> Complete assembly - after this assembly is installed, only the element is required    <sup>419</sup> With self-venting drain    <sup>420</sup> With standard drain

FOR REFERENCE PURPOSES ONLY-CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER. Hsg(Housing). . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>40</sup> Not a direct interchange - refer to application listing

<sup>145</sup> Use # 86920 for Series 50, 55, 60 Detroit engines for 2005 and up - use # 86120 for all other Detroit engines including Series 50, 55, 60 for 2004 and back

<sup>419</sup> With self-venting drain <sup>420</sup> With standard drain

# Carquest Blue Filters

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER. Hsg(Housing). . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly. *Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>40</sup> Not a direct interchange - refer to application listing

<sup>83</sup> Universal style with adjustable cradles

<sup>419</sup> With self-venting drain

<sup>420</sup> With standard drain

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER. Hsg(Housing). . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>243</sup> Requires reusable plastic bowl

<sup>270</sup> Complete spin-on with drain & sensor port (no plastic bowl required)

<sup>419</sup> With self-venting drain

<sup>420</sup> With standard drain

# Carquest Blue Filters

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing) . . . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers* May Not Be Available At Time Of Publication.

<sup>145</sup> Use # 86920 for Series 50, 55, 60 Detroit engines for 2005 and up - use # 86120 for all other Detroit engines including Series 50, 55, 60 for 2004 and back

Standard version  
<sup>422</sup> High Capacity

<sup>236</sup> New plastic version

<sup>271</sup> Complete assembly - after this assembly is installed, only the element is required

<sup>419</sup> With self-venting drain

<sup>146</sup> Element Only

<sup>155</sup> With standard drain

FOR REFERENCE PURPOSES ONLY-CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing) . . . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>40</sup> Not a direct interchange -refer to application listing

<sup>446</sup> Element Only

<sup>421</sup> Complete assembly - after this assembly is installed, only the element is required

<sup>419</sup> With self-venting drain <sup>420</sup> With standard drain

FOR REFERENCE PURPOSES ONLY-CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER. Hsg(Housing) . . . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>137</sup> Standard Corrugated version      <sup>217</sup> Truck or Bus applications with oil filter housing that has a spring-loaded long post - has lid attached to filter      <sup>218</sup> Van applications with oil filter housing that has a spring-loaded long post - has lid attached to filter      <sup>219</sup> Only to be used on applications that has a short post without a spring in the oil

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing) . . . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers* May Not Be Available At Time Of Publication.

<sup>138</sup> Without bracket    <sup>139</sup> With bracket    <sup>146</sup> Element Only    <sup>184</sup> Has lid attached to filter  
<sup>236</sup> New plastic version    <sup>237</sup> Updated version with plastic Lid    <sup>258</sup> 2" Pleat    <sup>259</sup> 4" pleat  
<sup>271</sup> Complete assembly - after this assembly is installed, only the element is required

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing). CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>40</sup> Not a direct interchange - refer to application listing <sup>237</sup> Updated version with plastic Lid

<sup>419</sup> With self-venting drain

<sup>420</sup> With standard drain

86437		Racor FH900, FH1000 Turbine Fuel Series for Over-the-Road Trucks (02 and up) - 30 Micron - 86437 is the OE style (taller, light media) - 86791 is the after-market version (slightly shorter, dark media) both work fine	CFMF	9.600	T-5.040 B-4.670	T-.640 B-.750	Packed (O-Ring) Packed	.470 4.730	.310 4.470	.080 .130
86438		Replacement element for Racor 110A Fuel Assembly - 2 micron version - 86431 is the 10 micron version	CFM	2.630	2.370	T-.622 B-.697	Packed	2.800	2.500	.094
86439		Cat, Detroit, Deutz, IHC, Other - has standard drain - for self-venting drain, use 96044	SOFW	8.419	3.698	1-14	90614	2.834	2.462	.255
86440		Racor Marine Applications w/ 400 & 600 Series Head (10 micron) - replaces Racor # R45T - has open bottom that requires reusable plastic bowl - 86773 is 2 micron version - 86755 is 30 micron version - bowl threads are 3 3/4-10	SF-WOE	3.400	4.250	1-14	Packed Packed Attached	3.585 4.285	3.150 4.005	.335 .140
86441		Element for Racor 245R Fuel Assembly - 30 micron version - 86771 is 10 micron version - 86775 is 2 micron version	SF-WOE	5.530	3.800	1-14	Packed Packed	3.560 3.480	3.200 3.220	.335 .130
86442		Detroit Diesel, Isuzu Engines (can use 86418 or 96045 to avoid the use of the plastic bowl)	SF-WOE	7.400	3.620	1-12	Attached	3.520	3.160	.250
86443		Racor 225 Series - replaces Racor # R26T (10 micron version) - spin-on w/ open end that has a reusable plastic bowl attachment	SF-WOE	4.660	3.750	1-14	Attached	3.586	3.180	.270
86444		Stanadyne FM1000 Series Fuel Manager (Key-way design) - for large diesel engines that use up to 180 gallons per hour (200 to 600 HP)	KWFM	10.270	4.370		None	.000	.000	.000
86445		Racor Fuel Systems - replaces R24T Racor Fuel Filter (10 micron) - has open bottom that requires reusable plastic bowl - 86447 is the 30 micron version	SF-WOE	3.550	3.750	1-14				
86446		Racor R26S Series Fuel/Water Separator (2 micron) - has open bottom that requires a reusable plastic bowl	SF-WOE	4.660	3.750	1-14	Attached	3.586	3.180	.270
86447		Racor R24P Fuel Series (30 micron) has an open end bottom that takes a reusable plastic bowl - 86445 is the 10 micron version	SF-WOE	3.550	3.750		Attached	3.586	3.180	.270

\* CFM=Cartridge Fuel Metal Canister Filter; CFMF=Cartridge Fuel Metal Free Filter; F=Fuel (Complete In-Line) Filter; KWFM=Key-Way Style Fuel Manager Filter; SFWOE=Spin On Fuel Water Separator w/ Open End Bottom; SOF=Spin-On Fuel Filter; SOFW=Spin-On Fuel/Water Separator Filter  
 † Housing gasket not packaged with filter - order separately.

**CARQUEST BLUE PRODUCT NUMERICAL LISTING**

Part Number	Design Illustration	Principal Application	Style*	Element Dimensions			Gasket Dimensions			
				Height	O.D.	I.D.	Number	O.D.	I.D.	Thk.
86604		Various Cummins Engines - has drain and sensor port - for high efficiency version, use 86604XE - This sensor port is square w/ rounded corners - if oval shaped sensor port required - use 86422	SOFW	9.730	3.690	1-14	Attached Packed	2.845 1.290	2.500 .960	.240 .165
86604XE		Cummins Engines - Extra Efficiency Version of 86604 - has drain and sensor port	SOFW	9.700	3.700	1-14	Attached	2.820	2.475	.230
86605	G-14F	Various Volvo (03-10)	F	6.500	T-3.360 B-3.170		None	.000	.000	.000
86606		Caterpillar Equipment - Primary - has drain and sensor port (the OE part has an open bottom that requires a reusable plastic bowl - our version is a complete spin-on w/ drain and sensor port - plastic bowl no longer required) - Sensor port size is 9/16-18	SOFW	7.621	4.240	1-14	Attached	4.240	3.700	.000
86607		Various Cat Equipment - Has Drain and Sensor Port (the OE filter has an open bottom that requires a reusable plastic bowl - our filter is a complete spin-on - plastic bowl no longer required)	SOFW	9.334	4.250	1-14	Attached Packed	4.257 1.287	3.847 .988	.205 .085
86608		CAT Equipment - has drain and sensor port - sensor port thread size is 9/16-18	SF- WOE	7.483	4.260	1-14	Packed	1.273	.981	.083
86609		CAT Equipment	KWFM	7.430	T-3.270 B-3.120	.850	None	.000	.000	.000
86610		Polaris snowmobiles	F	4.752	1.468					
86611		86611 has drain + sensor port - can be used in place of 86231 or 86232 - sensor port thread is 7/16" - 20 UNF-2B (86184 has slightly different sensor port thread - 9/16-18)	SOFW	6.480	4.230	1-14	Attached	3.955	3.585	.240
86612		Volvo Equipment, Deutz Engines	SOF	2.833	3.040	16X1.5 MM	Attached	2.810	2.480	.222
86613		Cummins, Cat, Hitachi, Detroit, Other - Fuel/Water Separator version of 86116 - has drain - if upgraded media version required, use 86645	SOFW	12.095	4.700	1 1/4-12				
86614		Element for Racor 230R Fuel Assembly Series - 30 micron version - For 10 micron version, use 86432 - for 2 micron version, use 86776	SF- WOE	4.050	3.750	1-14	Packed Packed (O-Ring)	3.544 3.463	3.115 3.223	.335 .120
86615		Ford F-Series Super Duty PU w/ 6.7L diesel (11-13) - two different style fuel filters packaged together - sold as one unit (not sold separately)	CFMF	5.243	T-4.000 B-3.928	T-Closed B-2.370	Packed	4.240	3.980	.130
86616		Cummins 3.3L Engines	SOFW	5.625	3.009	3/4-16	Attached	2.720	2.459	.180
86617		Can be used in place of 86217 - This is a complete spin-on w/ drain + sensor port (sensor port connection is 7/16-20 - 86805 is the same filter w/ a different sensor port size - 1/2-20). If no sensor port needed, use 86417	SOFW	5.615	4.250	1-14	Attached	3.535	3.160	.270
86618	G-76B	Kia Rio (01-05)	F	7.401	2.795		None			
86619	G-48B	VW Models w/ 1.9L Diesel (98-06)	F	7.910	3.430		Packed (2) (O-R)	.494	.354	.070
86621		Racor Fuel Assembly - Bluebird Buses - Note: this filter will not work on the Racor 790R assembly - the 790R requires a larger 3.58" OD gasket which is not packed with this filter	SF- WOE	5.520	3.670	1-14	Packed Packed Packed	2.830 1.245 3.540	2.480 .990 3.270	.220 .215 .130
86622	G-119	Toyota Tercel & Paseo (91-95) - w/o bracket	F	4.615	T-2.790 B-2.250		None			
86623	G-91A	GM Models w/Flex Fuel Systems (02-05)	F	5.400	2.170		None			
86624		Chev/GMC "C" Series Topkick, Kodiak Trks w/ 7.8L Duramax + Cat 3126 Engines (has open-end bottom that requires reusable plastic bowl)	SF- WOE	4.025	3.790	1-12	Packed Packed	3.570 3.430	3.120 3.170	.255 .130
86625		Ingersoll-Rand Equipment	KWFM	5.364	T-3.346 B-3.127					
86626		Caterpillar 3116, 3126, 3126B & 3126E Engines	SOF	7.090	3.180	7/8-14	Attached	2.520	2.250	.110
86626MP		Master Pack version of 86626	SOF	7.090	3.180	7/8-14	Attached	2.520	2.250	.110
86627		Agco Tractors and Combines	SOFW	8.603	4.252	1-14				
86628		Various Mercedes Diesel Engines	CFMF	8.000	T-3.730 B-4.255	T-500 B-1.780	Packed	4.310	4.000	.155
86629	G-15G	Lincoln Navigator (03-06)	F	7.150	T-2.210 B-2.000		None			
86630		Racor Fuel Systems - Various Equipment - requires reusable plastic bowl - to eliminate plastic bowl use 86992 (One piece w/drain and sensor port) or 96014 (one piece w/ drain only - no sensor port)	SF- WOE	5.000	4.250	1-14	Packed Packed	3.570 4.050	3.160 3.800	.330 .125
86631	G-23C	Kia Sportage (98-02)	F	5.708	T-2.205 B-2.795		None			
86632		New Holland Tractors	KWFM	5.770	T-3.270 B-2.730		None			

\* CFMF=Cartridge Fuel Metal Free Filter; F=Fuel (Complete In-Line) Filter; KWFM=Key-Way Style Fuel Manager Filter; SF/WOE=Spin On Fuel Water Separator w/ Open End Bottom; SOF=Spin-On Fuel Filter; SOFW=Spin-On Fuel/Water Separator Filter  
 † Housing gasket not packaged with filter - order separately.

Part Number	Design Illustration	Principal Application	Style*	Element Dimensions			Gasket Dimensions			
				Height	O.D.	I.D.	Number	O.D.	I.D.	Thk.
86982	G-200	Universal in-line fuel filter housing for various motorcycle, ATV + mower applications - includes in-line housing w/ plastic mesh fuel filter and three adjustable threaded line sizes (1/4", 5-16", 3/8") - the mesh replacement element is # 86984 - can be used w/ gas or diesel (for longer version, use # 86981)	FFH	2.559	1.102		None	.000	.000	.000
86983	G-201	Plastic mesh fuel filter element replacement for in-line housing 86981 - can be used for gas or diesel	FC	1.520	.633	.482	Packed (3)	.980	.728	.135
86984	G-202	Plastic mesh fuel filter element replacement for in-line housing 86982 - can be used for gas or diesel	FC	.763	.633	.482	Packed (3)	.980	.728	.135
86985		Various Applications w/ Cummins Engines - High efficiency media - complete spin-on w/ drain + sensor port	SOFW	8.817	3.690	1-14	Attached	2.810	2.460	.190
86986		John Deere Marine Engines - has open end bottom that takes reusable bowl - also has a removable plastic fill cup that threads onto the base-plate (10 micron)	SF-WOE	8.750	4.250	1-14	Attached	3.580	3.190	.265
86987		Deutz Engines, Liebherr, Other	SOF	5.708	3.779	16X1.5 MM				
86988		John Deere 4.5L Powertech marine engine - 10 micron	KWFM	5.755	3.330	.860				
86989		Perkins Engines	CFMF	10.320	4.900	T-Closed B-2.060	Packed (O-ring)	5.406	5.146	.130
86990		Perkins Engines	CFMF	9.130	4.590	T-Closed B-2.162	Packed (O-ring)	5.394	5.124	.135
86991		IHC Maxxforce 11 & Maxxforce 13 Engines	CFMF	7.248	3.740	T-.551 B-1.771	Packed Packed	4.213 2.158	3.907 1.968	.153 .095
86992		Racor 325 series fuel systems - Complete spin-on w/ drain & sensor port - sensor size is 1/2-20 - Can be used in place of 86630 to eliminate the plastic bowl - for complete spin-on w/ drain only (no sensor), use 96014	SOFW	6.620	4.250	1-14	Attached	3.540	3.160	.210
86993		Mahindra Tractors	CFM	4.528	2.598	.531	None	.000	.000	.000
86994		IHC Trucks w/ DT466E, MaxxForce Engines	CFMF	5.540	3.280	T-Closed B-1.169	Packed (2)	.000	.000	.000
86995		Primary F/W Separator for Various Mack, Volvo Trucks - has stepped-down female threaded open end bottom that takes a reusable plastic bowl	SF-WOE	5.118	4.347	1-14	Attached Packed	4.093 3.493	3.727 3.243	.271 .125
86996		Applications with Deutz Diesel engines - (w/standpipe - if standpipe not required, use 86961)	SOF	3.212	3.149	16X1.5 MM	Attached	2.815	2.461	.200
86997		Davco 210 Fuel Processor - Primary Fuel - 10 micron	SOF	6.930	3.180	16X1.5MM				
86998		Davco 210 Fuel Processor - Primary Fuel - 25 micron	SOF	6.930	3.180	16X1.5MM

89004		Replacement Element for 89003 or 89744 - Can use w/ ethanol or methanol.	FC	7.937	1.687	T-Closed B-.534	90194	1.887	1.609	.139
89005		Bennett Dispensing Pumps	CFM	3.926	2.312	T-Closed B-1.000	Attached	2.125	1.020	.031
89006		Dispensing Pump Fuel Filter (UL Approved) - Can be used w/ gas or diesel	SOF	5.200	3.674	1-12	Attached	2.729	2.415	.255
89006MP		Master Pack Containing (12) 89006	SOF	5.200	3.674	1-12	Attached	2.729	2.415	.255
89019		Conversion Base For Cooling System Filters - 11/16-16" Threaded Base Stud - Inlet + Outlet has 3/8" NPT	BASE							
89023		Remote Mounting Base - Accepts 1-14 Threaded Filters. Dual Inlet/Outlet with female 1/4-18 NPT Threads - Includes 2 Plugs	BASE			1-14				
89027		Fuel Dispensing Pumps Using Gasoline/Alcohol Blends/ Diesel Fuel - Has water alert feature with two layers of media - one has special water absorbing capacity that can hold up to 8 oz of water - once media is saturated, the flow rate is reduced to 1 GPM to let the operator know the filter needs to be changed.	WASF	5.207	3.694	1-12	Attached	2.729	2.415	.255
89029		Dispensing Pump Filter (10 Micron)	SOF	5.171	3.698	1 1/2-16	Attached	3.437	2.930	.218
89034		Base For 89006, 89027, 89347 Fuel Filters or Base for 85453 Hydraulic Applications (3/4" inlet and outlet) UL Approved.	BASE			1-12				
89037		Adapter Stud For British Leyland Cars - 5/8-18 to 3/4-16	STUD							
89038		Conversion Adaptor Kit - converts CAV fuel systems from cartridge style filters to spin-on (Converts 86166 and 86196 to various spin-on options - can use : 86195 - 86358 - 86373 - 86192 - 86472)	BASE							
89042		Goldenrod Fuel System - Water Absorbent Version - Housing is 89380	CFM	4.900	2.940	1 1/8-12	Packed	.000	.000	.000
89043		Goldenrod Fuel Systems - Standard Version (for Water Absorbent Version, use 89042) - Housing is 89380	CFM	4.940	3.080	1 1/8-12	Packed	.000	.000	.000
89044		Fuel Pump Applications - Replacement element for 89003 or 89744 (24 micron)	CFM	7.903	1.673	.534	Packed	1.865	1.625	.120
89050		Dispensing Pump Filter (19 Micron)	SOF	11.228	5.007	1 1/2-16	Packed	4.976	4.656	.187
89051		Dispensing Pump Filter (10 Micron)	SOF	11.228	5.007	1 1/2-16	Packed	4.976	4.656	.187
89055		Liquid Cooling System Treatment (55 Gallon Drum)	LCT							
89056		Liquid Cooling System Treatment (One Pint) to be used w/ traditional (green) antifreezes - one pint = 4 units of DCA	LCT							
89057		Liquid Cooling System Treatment (5 Gallon)	LCT							
89058		Liquid Cooling System Treatment (1/2 Gallon)	LCT							
89060		Extended Drain Liquid Coolant (1 Quart) - Use with Part #s 89083, 89084, 89091, 89092	LCT							
89061		Spin-on Conversion Kit for Chevrolet V-8 Engines - converts 85129 or 85143 cartridges to 85061 spin-on (Contains base, gasket, mounting bolts and instructions)	COKIT				90124	3.998	3.772	.125
89066		Dispensing Pump F/W Separator - can use w/ diesel, biodiesel up to B15 (15%) or gasoline (30 Micron)	SOFW	7.500	3.670	1 3/8-12	Attached	2.729	2.415	.255
89067		Spin-on Conversion Kit for Cummins Engines (69-75) This allows you to replace 85954 cartridge to 85970 spin-on	COKIT				90628 90629	6.281 2.230	5.875 1.700	.203 .203
89069		Cooling System Filter with No Chemicals - shorter version of 89070	CSO	4.317	3.694	1 1/16-16	Attached	2.834	2.462	.200
89070		Cooling System Filter with No Chemicals	CSO	5.214	3.694	1 1/16-16	Attached	2.834	2.462	.200
89071		Cooling System Filter/Conditioner - contains 4 units of DCA	CSO	4.317	3.694	1 1/16-16	Attached	2.834	2.462	.200
89071MP		Master Pack containing (12) 89071	CSO	4.317	3.694	1 1/16-16	Attached	2.834	2.462	.200
89072		Cooling System Filter/Conditioner - contains 6 units of DCA	CSO	4.317	3.694	1 1/16-16	Attached	2.834	2.462	.200
89073		Cooling System Filter/Conditioner - contains 8 units of DCA chemical conditioner	CSO	5.214	3.694	1 1/16-16	Attached	2.834	2.462	.200
89073MP		Master Pack of (12) 89073	CSO	5.214	3.694	1 1/16-16	Attached	2.834	2.462	.200
89074		Cooling System Filter/Conditioner - contains 12 units of DCA conditioner	CSO	6.987	3.694	1 1/16-16	Attached	2.834	2.462	.200
89075		Various Cummins, Detroit, Cat Engines - contains 15 units of DCA4 dry chemical additive	CSO	5.400	3.700	1 1/16-16

89091		Volvo Extended Drain (No Chemical)	CSO	4.180	3.690	16X1.5 MM	Attached	2.850	2.470	.230
89092		Volvo Extended Drain, High Capacity (No Chemical)	CSO	5.440	3.690	16X1.5 MM	Attached	2.850	2.470	.230
89093		Remote Mounting Base - Accepts Duel 3/4-16 Threaded Filters. Duel 1/2-14 NPT Inlet And Outlets.	BASE							
89094	A-48	Caterpillar D11R & 950G - Cab Air	AP	2.300	10.750	11.850				
89098		Remote Base That Accepts 5/8-18 Threaded By-Pass Filters. It Has Duel 1/4-18 NPT Inlet and Outlet Ports - Includes 2 Plugs - used w/ 85050 - 85051 - 85320 or 85704	BASE			0.000				
89100		Complete Assembly For Oil Burning Furnaces and Heaters (3/8" Female Pipe Thds)(UL Approved) - includes base and filter together - 89104 is filter only	FFC	5.375	2.619	1-14	90182	1.005	.799	.103
89101		Complete Assembly for Oil Burning Furnaces and Heaters (1/4" Female Pipe Thds)(UL Approved) - includes base and filter together - 89104 is filter only	FFC	5.375	2.615	1-14	90182	1.005	.799	.103
89104		Replacement Filter for 89100, 89101 (UL Approved) - for home furnaces	FFE	4.344	2.619	1-14	90182 Packed	1.005 .340	.799 .189	.103 .060
89105		Coolant Test Strips for Standard Service - test for 3 things: nitrite level, freeze point, pH level (48 Strips - 12 - Four Packs + reference chart) NOTE: test strips will not work for extended or long life antifreezes (only for traditional, standard antifreezes)	CTK							
89106		Coolant Test Strips for Standard Service (50 Count Bottle) - test for 3 things: nitrite level, freeze point, pH level - NOTE: test strips will not work for extended or long life antifreezes (only for traditional, standard antifreezes)	CTK							
89107		Coolant Test Kit for Standard Service Coolant (Contains 50 test strips, syringe, index reference chart) - test for 3 things: nitrite level, freeze point, pH level - NOTE: test strips will not work for extended or long life antifreezes (only for traditional, standard antifreezes)	CTK							
89112		Cummins ISX Engine	CSO	5.760	3.772	36X2.0 MM	Attached	3.725	3.175	.200
89113		Cummins ISX Engines	CSO	5.760	3.772	36X2.0 MM	Attached	3.725	3.175	.200
89114		Volvo VED12 Engines - contains 8 units of DCA4	CSO	5.424	3.690	16X1.5 MM	Attached	2.775	2.470	.250
89115	A-340	Various IHC/Navistar Trucks - cabin air	AP	.590	10.030	13.660				
89116	A-339	Peterbilt Trucks - cabin air	AP	.790	6.810	11.180				
89117		Various Sterling Trucks - cabin air		.910	4.520	5.780				
89122		Replacement Element for 89121 (10 Micron)	CFM	6.656	3.546	T-1.267 B-.625	90218	4.225	3.740	.062
89123		Spin-on Conversion Kit for Late Model Ford Trucks Contains Base,Gasket,Threaded Bushing and Instructions for Converting O.E. Verticle Base Pot Type Filters.	COKIT				90090	4.955	4.400	.062
89124		Spin-on Conversion Kit for Early Model Ford Trucks. Contains Base, Gasket, Threaded Bushing and Instructions for Converting O.E. Engine Block Mounted Pot Type Filters.	COKIT				90090	4.955	4.400	.062
89142		Scania Trucks + Buses	CSO	4.000	3.675	1 1/16-16	attached	2.750	2.470	.230
89150		Cummins Fleet Kit contains: (1) 84746XD, (1) 86651	MK

**CARQUEST BLUE PRODUCT NUMERICAL LISTING**

Part Number	Design Illustration	Principal Application	Style*	Element Dimensions			Gasket Dimensions			
				Height	O.D.	I.D.	Number	O.D.	I.D.	Thk.
89744		Complete In-line Fuel Filter Assembly for Fuel Dispensing Pumps - Can be used w/ alcohol or methanol - 3/4" female pipe thread on both ends - This includes the assembly + 89044 cartridge element (24 micron)	F							
89746		Fuel Filter Base for 89850 or 89851 - has 1 1/2-16 threaded stud	BASE			1 1/2-16				
89750		Conversion Base to Convert 85750 Series Filters to 85749 Spin-on Filters	BASE							
89755		By-Pass Filter Base to Add Spin-on By-Pass Filter on Small Gas and Diesel Engines - used w/ 85050 - 85051 - 85320 or 85704 which have 5/8-18 threads - line sizes are 1/8 NPT in and out	BASE							
89759		Mounting Base w/ 1 1/2-16 Threads (85632, 85746, 85756, 85758, 85759, 85846, 85847, 85849, 85859, 85860, 85861), 85865 - comes with gasket # 90661	BASE				90661	5.030	4.440	.190
89762		Remote Mounting Base - Accepts 3/4-16 Threaded Filters. (Single Inlet/Outlet with Female 1/2" NPT)	BASE							
89763		Remote Mounting Base for 86225 or 86226 - has 11/16-16 threads - the inlet and outlet lines are 1/2" female N.P.T.	BASE							
89764		Remote Mounting Base - Accepts 3/4"-16 Threaded Filters - (Dual Inlet/Outlet with Female 1/2" NPT)	BASE							
89766		Remote Mounting Base - Accepts 13/16"-16 Threaded Filters. (Dual Inlet/Outlet with Female 1/2" NPT)	BASE							
89768		Remote Mounting Base - Accepts 1-12 Threaded Filters. (Dual Inlet/Outlet with Female 1/2" NPT)	BASE							
89770		Remote Mounting Base - Accepts 1-14 Threaded Filters. (Dual Inlet/Outlet with Female 1/2" NPT)	BASE							
89800		Air Filter Service Gauge (Direct Mount)	GAUGE							
89801		Light Duty Grommet Mounted Air Filter Monitor Kit (Includes Grommet and Instruction Card)	GAUGE							
89802		Air Filter Service Gauge (Remote mount, contains mounting bracket, ten feet of hose and 1/8 inch NPT brass fitting.)	GAUGE							
89804		Air Filter Service Gauge (Contains ten feet of hose and a 3/8 inch Brass fitting.)	GAUGE							
89848		Fuel Dispensing Fuel Filter for Fuel Pumps (Has Water Absorbing Media - 30 micron) If base required, use 89960 - can be used with unleaded gasoline, diesel, biodiesel up to B20 (20%) and kerosene	SOF	8.600	3.640	1 3/8-12	Attached	2.810	2.420	.210
89849		Fuel Dispensing Filter for Fuel Pumps (Has Water Absorbing Media - 10 Micron) (If base required, use # 89958) - can be used with unleaded gasoline, diesel, biodiesel up to B20 (20%) and kerosene	SOF	11.380	5.020	1 1/2-16	Packed	5.086	4.710	.188
89850		Fuel Dispensing Filter for Fuel Pumps (Has Water Absorbing Media - 10 Micron) - If base required, use 89746 - can be used with unleaded gasoline, diesel, biodiesel up to B20 (20%) and kerosene	SOFW	5.500	T-3.850 B-3.675	1 1/2-16	Attached	3.480	2.970	.230
89851		Fuel Dispensing Filter for Fuel Pumps (specifically for ethanol blended fuels up to E85 (85%) - 10 Micron) If base required, use 89746	SOF	5.420	3.750	1 1/2-16	Attached	3.480	2.970	.320
89885	A-22	Replacement Element for Obsolete Conversion Kits 89785.	A	14.500	6.250	T-.910 B-4.620				
89886	A-22	Replacement Element for Obsolete Conversion Kits 89786 or 89789.	A	14.383	8.641	T-.906 B-7.053

96096		Universal style key-way fuel manager - replaces Baldwin # BF7785D (no keys)	KWFM	7.700	3.270					
96103		Detroit Diesel DD13, DD15 Engines - two different elements sold together as one unit - the smaller element is a strainer	CFMF	10.048	T-4.600 B-4.105	T-Closed B-1.642	Packed (O-Ring) Packed (O-Ring)	2.675 5.075	2.435 4.721	.120 .177
99013	A-348	Volvo Equipment - cabin air	AP	2.085	7.126	11.732				
99014	A-50	John Deere Loaders - cabin air	AP	1.300	6.500	12.625				
99015	A-129	Cat Equipment - cabin air	AP	.785	5.315	9.650				
99016	A-48	Caterpillar Equipment - cabin air	AP	1.419	6.750	15.875				
99017	A-45	Cat Loaders - Cabin air	AP	1.020	9.970	15.750				
99018	A-45	Case Construction Equipment	AP	2.204	5.753	29.450				
99019	A-50	Challenger Tractors - cabin air	AP	2.420	6.750	24.250				
99020	A-348	Hitachi, John Deere Equipment - cabin air	A	2.796	9.893	14.000				
99026	A-355	Volvo Loaders - cabin air	AP	2.770	13.000	15.500				
99029	A-30	Spin-on air dryer filter - DAF trucks	SPA	5.288	5.480	41X1.5 MM - 6H				
99030		Plastic Bowl Assesory - used w/ these filters: 96012 - 96013 - 96015, 96021 - 96022 - remove sensor drain from filter, install bowl, then place sensor drain in the bottom of the newly installed bowl - if sensor drain required, order part # 99032 separately	BOWL							
99032		Threaded sensor port drain for plastic bowl assessor part 99030 - sensor thread size is 1/2-20	SPD							
99056	A-48	Cat Skid-Steer Loaders	AP	2.313	5.867	12.875				
99059	A-357	Komatsu Equipment - cabin air	AP	.775	8.000	8.000				
99061	A-50	Cat Equipment - cabin air	AP	2.525	5.520	16.500				
99065		Various HD diesel engines - has 23 units of DCA4 dry chemical additive in the filter - for units w/ 81 to 91 gallons cooling capacity	CSO	7.870	3.670	1 1/16-16	Attached	2.830	2.440	.250
99068	A-358	Caterpillar Equipment -cabin air	AP	.972	9.850	11.800				
99069	A-48	Agco, Massey-Ferguson, Challenger, Other	AP	2.380	5.550	34.250				
99070	A-30	Air dryer spin-on for brake system - Various Scania Trucks - has hex-nut on domed end	SPA	7.000	5.529	1 1/4-11 BSP	Packed (O-ring)	.000	.000	.000
99071	A-30	Various HD Equipment - air dryer spin-on	SPA	6.625	5.220	2 1/2-12				
99087	A-367	Komatsu Equipment - cabin air	AP	.775	5.600	10.375				
99097	A-1	John Deere Tractors (cabin air)	CA	2.902	12.875	9.500				
99098	A-48	Various John Deere Equipment - cabin air	AP	3.382	4.037	24.000				
AC10		AquaChek Water Removal Spin-on. The kit with the base is part # ACK10.	WRS	5.235	3.660	1 1/16-16UN2B				
AC11		AquaChek Water Removal Spin-on. The kit with the base is part # ACK10.	WRS	7.875	3.720	1 1/16-16UN2B				
AC20		AquaChek Water Removal Spin-on. The kit with the base is part # ACK20.	WRS	7.875	3.715	1-12 UNF 2B				
AC30		AquaChek Water Removal Spin-on. The kit with the base is part # ACK30 (takes one element) or ACK40 which takes two AC30 elements.	WRS	11.250	4.670	1 3/4-12UNF				
ACG1		Gauge for AquaChek Kits (Used w/ ACKG15, ACKG25, ACKG35, ACKG45) - This is the gauge only (Tells you when to change the AquaChek filter)	GAU							
ACK10		AquaChek Water Removal Kit - contains: Mounting Base with 1/4" inlet + outlet; 2 Brass Plugs for Base; One AquaChek Spin-on Filter (Part # AC10); One 4 oz. bottle of pneumatic lubricating oil; Teflon tape	WRK							
ACK20		AquaChek Water Removal Kit - contains: Mounting Base with 1" inlet + outlet; One AquaChek Spin-on Filter (Part # AC20); Teflon tape	WRK							
ACK30		AquaChek Water Removal Kit - contains: Mounting Base with 1 1/2" inlet + outlet; One AquaChek Spin-on Filter (Part # AC30); Teflon tape	WRK							
ACK40		AquaChek Water Removal Kit - contains: Mounting Base with 2" inlet + outlet; Two AquaChek Spin-on Filters (Part # AC30); Teflon tape. This kit takes two AC30 spin-ons.	WRK							
ACKG15		AquaChek Kit w/ gauge - includes: base w/ differential pressure gauge, 1 AC10 AquaChek spin-on filter, teflon tape + instruction sheet	WRK

**CARQUEST BLUE PRODUCT NUMERICAL LISTING**

Part Number	Design Illustration	Principal Application	Style*	Element Dimensions			Gasket Dimensions				
				Height	O.D.	I.D.	Number	O.D.	I.D.	Thk.	
ACKG25		AquaChek Kit w/ gauge - includes: base w/ differential pressure gauge, 1 AC20 AquaChek spin-on filter, teflon tape + instruction sheet	WRK								
ACKG35		AquaChek Kit w/ gauge - includes: base w/ differential pressure gauge, 1 AC30 AquaChek spin-on filter, teflon tape + instruction sheet	WRK								
ACKG45		AquaChek Kit w/ gauge - includes: base w/ differential pressure gauge, 2 AC30 AquaChek spin-on filters, teflon tape + instruction sheet	WRK								
CCK11		Various Ford Applications - Fuel Filter Clip used w/ 86595 or 86097 - This is shorter than the clip packed w/ the filter - 10 Per Box - Replaces Ford clip part # 2F1Z9A317AA - order separately	CLIP								
CQ490		Sealing Grommet for Air Filter Housing # 89490 - Required to install air housing on vehicles with air charge temperature sensors (ACTS) - vehicles with mass air flow sensors (MAFS) do not require this grommet	GRO								
MM955		Oil Change Decal - 200 per pack	OCD

TECHNICAL DATA

SERVICE: H-Hydraulic, L-Lube, T-Transmission, PS-Power Steering.  
 8 Housing gasket not packaged with filter - order separately.

MEDIA: D-Depth, P-Paper, W-Wire, WS-Wire Screen, G-Glass.  
 TYPE: BP-By-Pass, FF-Full Flow, FB-Full Flow/By-Pass.

TECHNICAL DATA

SERVICE: H-Hydraulic, L-Lube, T-Transmission, PS-Power Steering.  
 8 Housing gasket not packaged with filter - order separately.

MEDIA: D-Depth, P-Paper, W-Wire, WS-Wire Screen, G-Glass.  
 TYPE: BP-By-Pass, FF-Full Flow, FB-Full Flow/By-Pass.

TECHNICAL DATA

SERVICE: H-Hydraulic, L-Lube, T-Transmission, PS-Power Steering.  
<sup>8</sup> Housing gasket not packaged with filter - order separately.

MEDIA: D-Depth, P-Paper, W-Wire, WS-Wire Screen, G-Glass.  
 TYPE: BP-By-Pass, FF-Full Flow, FB-Full Flow/By-Pass.

TECHNICAL DATA

SERVICE: H-Hydraulic, L-Lube, T-Transmission, PS-Power Steering.  
 8 Housing gasket not packaged with filter - order separately.

MEDIA: D-Depth, P-Paper, W-Wire, WS-Wire Screen, G-Glass.  
 TYPE: BP-By-Pass, FF-Full Flow, FB-Full Flow/By-Pass.

TECHNICAL DATA

SERVICE: H-Hydraulic, L-Lube, T-Transmission, PS-Power Steering.  
<sup>8</sup> Housing gasket not packaged with filter - order separately.

MEDIA: D-Depth, P-Paper, W-Wire, WS-Wire Screen, G-Glass.  
 TYPE: BP-By-Pass, FF-Full Flow, FB-Full Flow/By-Pass.

**BY THREAD SIZE**

**SPIN-ON LUBE, HYDRAULIC & TRANSMISSION FILTERS**

AIR FILTER DESIGN ILLUSTRATIONS

A-1

A-1

Plastisol end seals, woven screen inner body, perforated metal outer body and pleated paper media. Used on passenger cars, pick up trucks and small industrial engines. Heavy duty versions available for severe service. (See illustration number A-19).

AIR FILTER DESIGN ILLUSTRATIONS

A-5 — A-7

A-5

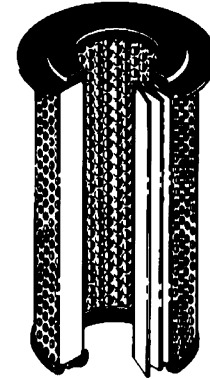

Round air filter with plastisol ends. Smaller in diameter than A-1 design. Perforated metal inner and outer bodies with pleated paper media. (88377 has an outer wrap attached). NOTE: Part number 88188 has exposed pleated media outside.

Light duty panel air filter. Has perforated metal on outlet side. Has exposed pleated media on the inlet side. Has a plastisol seal around the top perimeter. Filter has six sides.

Length	Width	Height	Part Number
9.250	8.375	1.470	93042
9.250	8.375	1.471	93041
11.200	8.880	2.265	83102
11.204	8.936	1.862	83545

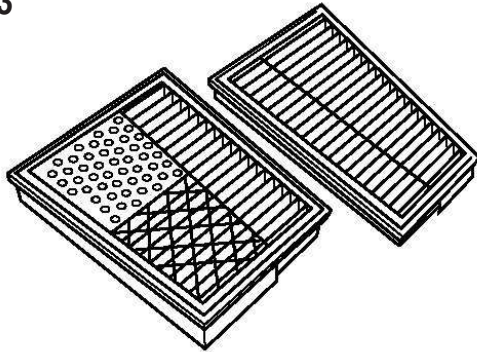

**A-262**

Light duty panel air filter. Has exposed pleated media top and bottom. Element has a seal around the perimeter on the top. The seal extends beyond the element on one side for removal purposes.

Length	Width	Height	Part Number
9.375	8.125	1.700	93036
9.803	8.287	1.968	83404

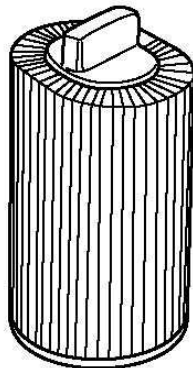

**A-263**

Light duty panel air filter. Filter consists of two elements. One element has exposed pleated media on both sides with a plastisol seal around the top perimeter. The other element is the same with half of the top covered with a plastic frame. Both elements have only half the media on the bottom.

Length	Width	Height	Part Number
9.842	8.255	1.395	87468

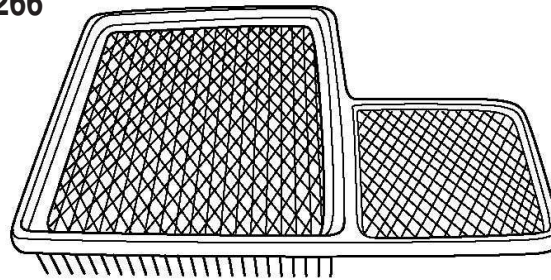

**A-264**

Light duty air filter. Element is oval shaped with exposed pleated media outside and a plastic frame inside. The top end is closed with a plastic handle for removal purposes. The bottom is open with a plastisol end.

Height	Top or Major O.D.	Bottom or Minor O.D.	Top or Major I.D.	Bottom or Minor I.D.	Part Number
9.862	5.216	5.216	CLOSED	2.736	83214

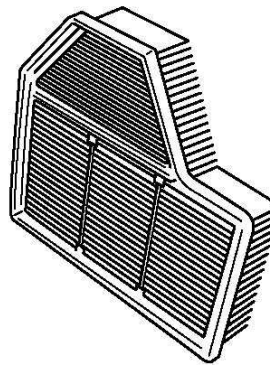

**A-266**

Heavy duty panel air filter. Has exposed media on the bottom and perforated metal on the top. Filter has a plastisol seal around the top perimeter with one side extended from the side for removal purposes.

Length	Width	Height	Part Number
10.039	7.795	1.539	83130

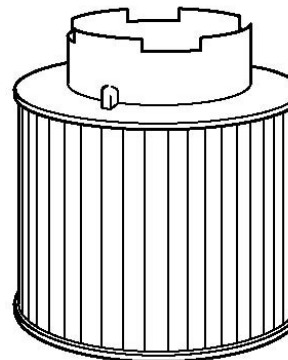

**A-267**

Light duty panel air filter. Element has exposed pleated media top and bottom. There is a plastisol seal around the top perimeter. Element has seven sides.

Length	Width	Height	Part Number
10.150	9.250	2.250	83715
10.150	9.250	2.250	83714

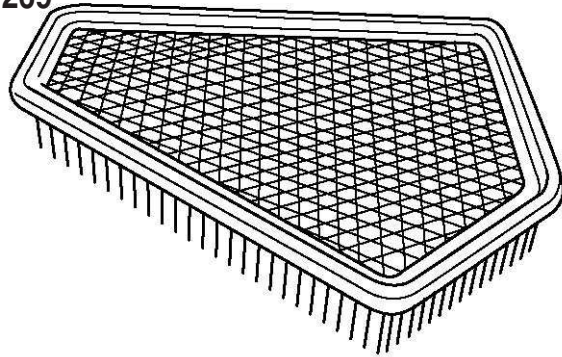

**A-268**

Light duty air filter. Has exposed pleated media outside with a plastic frame inside. Filter has hard plastic ends with a small hole on one end and a larger hole with a collar on the other end.

Height	Top or Major O.D.	Bottom or Minor O.D.	Top or Major I.D.	Bottom or Minor I.D.	Part Number
7.540	6.500	6.500	1.188	3.310	83846

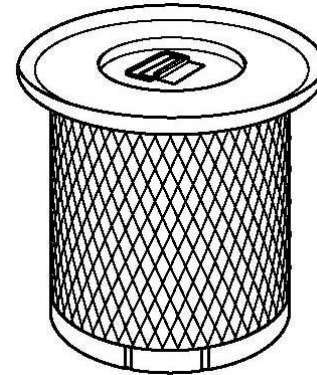

**A-269**

Light duty panel air filter. Has exposed pleated media on the bottom and perforated metal on the top. Element has a plastisol seal around the top perimeter. Filter is five-sided.

Length	Width	Height	Part Number
11.160	9.250	2.139	83475
11.338	9.338	1.963	83499
11.375	9.375	2.115	83498

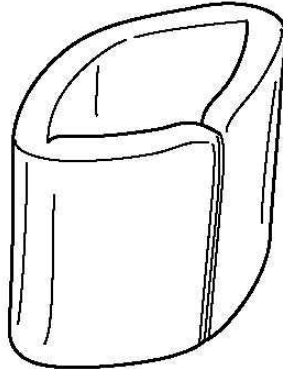

**A-289**

Heavy duty radial air filter. Perforated metal inside and out. Polyurethane end on bottom is open. Top has a flanged end cap with a metal handle. Has pleated paper media.

Height	Top or Major O.D.	Bottom or Minor O.D.	Top or Major I.D.	Bottom or Minor I.D.	Part Number
11.350	11.910	10.122	.000	4.870	83519

# Air Filter Wraps

## Get Heavy Duty Protection For Light Duty Vehicles

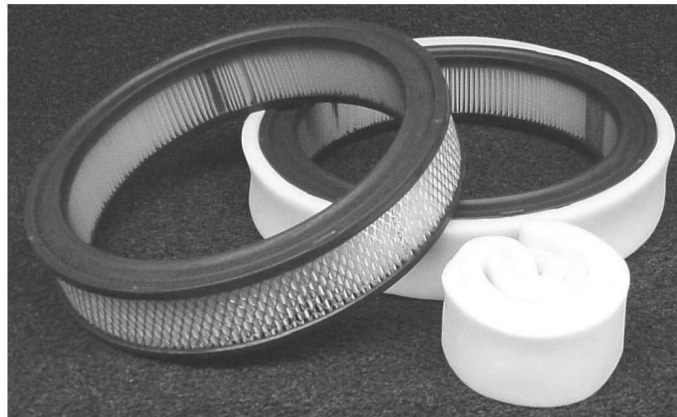

Most pickup trucks and utility vehicles are no strangers to heavy duty dirt. If you drive off-road or on gravel roads, you need more protection than you get with a standard filter.

### CARQUEST Filters Two-Stage Air Filter Gives You Heavy Duty Protection

CARQUEST Filters recognizes that all driving environments are not created equal and that some vehicles need more filtering capacity. To meet that need, we designed a foam rubber wrap that slips easily over your CARQUEST air filter to provide extra dirt-holding capacity.

- **Traps particles without restricting air flow.** The foam rubber wrap is specially designed for efficient air flow.
- **Increases up to 100% of the dirt holding capacity of your filter.** That saves you money by extending the life of your filter and giving your engine greater protection.
- **Slips on easily.** To install your CARQUEST filter wrap, simply slip it over your CARQUEST air filter. We have a size for most light truck applications. See the chart below for the filters that utilize the new filter wraps.

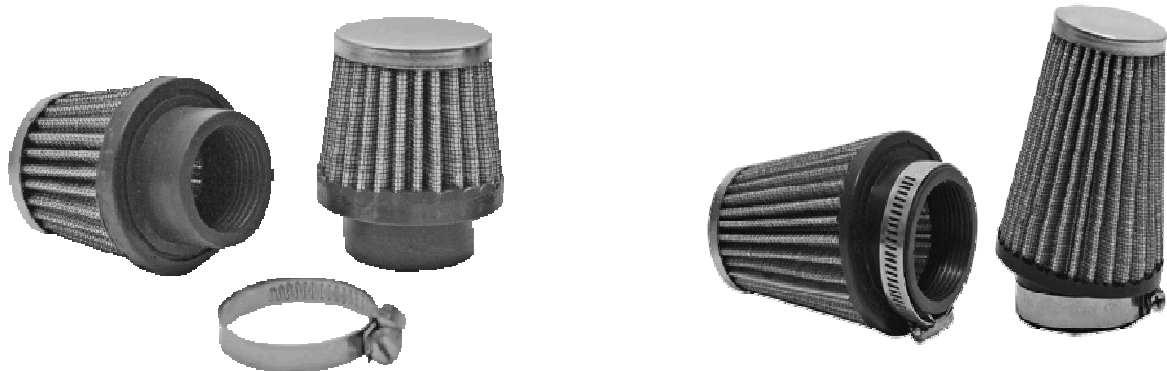

Standard Air Filter	Heavy Duty Wrap
87101	89701
87049	89702
87091	89703

## Universal Style Motorcycle/ATV Conical Air Filters

**Great for Motorcycles, All Terrain Vehicles, Mowers and other small engines!**

Part #	Height	OD Top	OD Bottom	Design	Mounting Flange ID
89982	2.90	2.00	2.43	A-247	1-3/8" mounting flange I.D.
89983	3.43	1.99	2.90	A-247	1-9/16" mounting flange I.D.
89984	3.23	2.00	2.94	A-247	1-11/16" Mounting Flange I.D.
89985	3.80	2.00	2.91	A-247	1-13/16" Mounting Flange I.D.
89986	4.78	2.98	2.98	A-246	1-7/8" Mounting Flange I.D. - centered
89987	4.56	2.00	2.97	A-248	1-7/8" Mounting Flange I.D. - has a 10% angle
89988	3.43	2.00	2.93	A-247	1-15/16" Mounting Flange I.D.
89989	4.46	2.00	3.53	A-247	2-1/16" mounting flange I.D.
89990	3.46	2.00	3.04	A-247	2-1/8" mounting flange I.D.
89991	3.25	2.00	3.06	A-247	2-1/8" mounting flange I.D.
89992	4.45	2.00	3.36	A-247	2-1/4" mounting flange I.D.

# Air Filter Monitors

## Here's What It Does For You...

The CARQUEST Air Filter Monitor eliminates time-consuming guesswork for knowing when to change light-duty and heavy-duty air filters by providing service personnel with an accurate and easy-to-use mechanical restriction gauge.

The Air Filter Monitor measures the amount of restriction to airflow through the air filter housing assembly. An increase in airflow restriction may cause a reduction in power and an increase in fuel consumption.

Through constant monitoring of your air filters restriction, maintenance personnel can tell at a glance when filter service is required. The monitor "lock up" at the highest restriction measured during engine operation and can be read before or after engine shutdown. The Air Filter Monitor reduces the need for time-consuming filter inspections and needless replacement, just because the filter looks dirty.

Constructed of temperature resistant materials that are precision fitted, the Air Filter Monitor can stand up to a wide range of conditions in both the heavy-duty and light-duty environment. To prevent contamination from airborne vapors or dirt, each monitor is engineered with a sintered bronze filter inside the brass fitting.

The CARQUEST Air Filter Monitor is a practical and accurate tool for determining correct filter maintenance intervals, thus preventing over-servicing of your Air Filters, which lead to excessive costs to you.

## Easy To Install

The CARQUEST Air Filter Monitor is available in four easy-to-install models; the Direct Mount (part no. 89800), Direct Mount (part no. 89801), Remote Mount (part no. 89802), or the Chrome Bezel Dash Mount (part no. 89804).

**89800**

### Direct Mount #89800 HD Air Filter Monitor

Constructed of temperature resistant materials to be installed directly to the outlet section of the air filter housing. Installation instructions are included.

## Air Filter Monitors

**89801**

### **Direct Mount 89801 LD Air Filter Monitor**

For use on light-duty, fuel-injected gasoline or diesel engines. Constructed of temperature resistant materials to be installed directly to the outlet section of the air filter housing. Complete installation instructions are included.

### **Remote Mount 89802 Air Filter Monitor**

Various locations can be achieved with ten feet of hose, adhesive mounting bracket and 1/8" NPT brass fitting. Mounting bracket is engineered for screw mounting. Installation instructions are included.

**89802**

**89804**

### **Dash Mount 89804 Air Filter Monitor**

Comes complete with 10 feet of hose and a 3/8" brass fitting. Detailed instructions are included.

Part numbers 89800, 89802 and 89804 are suitable for heavy-duty gas and diesel engines and a must when checking turbo-charged diesel engines. Each gauge has a reset button so that the unit indicator can be reset to 0 after each change-out, allowing you to maintain accurate restriction records.

A "must-have" part of your Preventive Maintenance System now available to you from CARQUEST Filters.

**New 6.0 Liter  
Powertrap® Replacement**

**Less Restrictive During Harsh Conditions  
Performs Better in Higher Humidity  
Pleated Media Filter – Better Air Flow  
1/3 Price of Existing OE Replacement Filters  
Significantly Reduces Blocking of Air to Engine Caused  
by Snow and Water Ingestion  
43% More Capacity Than Other Replacement Filters**

**Application: 2003-2007 Ford Super Duty F Series  
(F-250, F-350, F-450) & Excursions with 6.0 Liter  
Turbo Diesel Engines**

**Complete Kit - #89490: Contains 1 Upper/Lower  
Housing, 4" Powertrap® Filter and Inlet Duct**

**Powertrap® Replacement Filter #83490**

**Housing Made By Visteon**

*For vehicles equipped with Mass Air Flow Sensors (MAFS) only.  
For vehicles with Air Charge Temperature Sensor (ACTS), order grommet part #CQ490*

## Multiple Usage In-Line Fuel Filters

Range of usage on many Japanese based vehicles. The ability to simply rotate the filters to provide the correct cradle angle and position provides immediate coverage for many new models without having to wait for new product introductions.

Along with greatly reducing inventory levels, these filters offer the advantage of coated steel construction, new copper washers for leak-free fittings and easy installation.

The installation procedure for this filter is as simple as depressurizing the system, carefully removing the old filter, selecting the correct position for the new filter and properly installing it.

**86500**

**86502**

## Universal In-line Fuel Filter Housing

- Replaceable plastic mesh fuel filter element.
- Three adjustable line sizes that screw into either end of the housing.
- Threaded end that can be removed so the filter can be replaced.
- Can be used for gasoline or diesel!
- Great for lawnmowers, small engines, motorcycles, and ATVs!

### Housing (Long and Short)

#### 86981 (Long Version)

Housing Length is 3.386"

Contents:

1. One Universal fuel filter housing – uses see-thru plastic construction.
2. One plastic mesh fuel filter element.
3. Six adjustable threaded lines (2- 1/4" line sizes, 2- 5/16" line sizes, 2- 3/8" line sizes)

#### 86982 (Short Version)

Housing Length is 2.559"

Contents:

1. One Universal fuel filter housing – uses see-thru plastic construction.
2. One plastic mesh fuel filter element.
3. Six adjustable threaded lines (2- 1/4" line sizes, 2- 5/16" line sizes, 2- 3/8" line sizes)

### Replaceable Fuel Filter Elements

#### 86983

Used with housing # 86981 (Long Version)

Contents: Three plastic mesh fuel filter elements and three gaskets.

#### 86984

Used with housing # 86982 (Short Version)

Contents: Three plastic mesh fuel filter elements and three sealing gaskets.

# Cartridge-Style Diesel Fuel Filters - New and Improved

## Improved serviceability and performance from an upgraded design...

- Ford and IHC trucks with Powerstroke 7.3L diesels  
*(Part No. 86818 for '99-'03 models; Part No. 86817 for '94-'98 models)*
- Permanently attached plastic lid simplifies installations
  - Media features phenolic resin binding
  - Square-cut gasket for error-proof change outs
- Extremely effective removal of free and emulsified water.

Our CARQUEST 86817 and 86818 Cartridge-Style Fuel Filters have been designed for 7.3 liter Powerstroke diesel engines and offer a series of product improvements that benefit both installers and consumers.

### Start at the top ...

Unlike the OEM model with its reusable, segregated lid, the upgraded 86817 and 86818 feature a molded plastic lid integrated with the filter element as a single assembly for fast, easy disposal. One less part to fumble with during servicing.

### Efficient water handling ...

Our enhanced and robust media, with fibers bound by phenolic resins, provides exceptional separation capabilities for free and emulsified water. No extra membrane to wrap the media is required.

### Error-free gasketing ...

Our 86817 and 86818 fuel filters come with a square-cut gasket – not a bevel-cut one – so changeouts are completed quickly and with no confusion over gasket positioning.

**Fact:** With the new CARQUEST 86817 and 86818, the innovative design is made apparent by its appearance, but the real proof is in the uncompromising fit and performance that it offers. New and improved for sure!

# Fuel Filters Special Applications Dispensing Equipment

## Fuel Pump Filters

A spin-on filter designed for either gasoline or diesel fuel (part no. 89006) was developed for use on dispensing pumps between the pump and the meter. It guarantees the delivery of clean fuel to the vehicle while also protecting the pump meter. The filter can easily be installed, inside or outside the pump. For applications involving a severe dirt situation, the longer 89347 filter can be used. Part number 89348 can be used for dirt and water removal.

If the pump does not come equipped with a filter (and most pumps don't), two filter mounting bases are available. The bases are identical except for the inlet and outlet thread sizes and either base will accept the filters listed below.

## Specifications For Fuel Pump Filters

Part No.	Description	Dimension	Thread Connections	Micron Rating	Max. Flow
90195	Gasket for 89002 Cap	O.D. 2.700" I.D. 2.500"	---	---	---
89001	Adapter Base	Lgth. 3.750" Hgt. 2.830"	1" Female	---	15 gpm

## Fuel Filters Special Applications Dispensing Equipment

The CARQUEST Filter line includes a variety of filters designed for a wide array of fuel dispensing systems and other special applications. The benefits of these special fuel filters will be of special interest to fleets, contractors, farmers, truck stops and others who utilize terminal or on-site fuel dispensing systems. All of the filters are designed to remove harmful contaminants before the fuel is installed in a vehicle and offer the additional benefits of easy installation and service.

### Spin-On Types

### Versatile Fuel Filters Heating Units...Small Engines...Steam Jennies

This small 89104 spin-on filter provides effective filtration for a number of applications ranging from household heating, curing sheds, hatcheries, greenhouses, space heaters, outboard motors and small engines.

The steel housing is strong and durable while the replaceable paper filter element delivers a clean supply of fuel for faultless combustion. Protects all parts of the fuel system to minimize maintenance and service. Service is fast and easy and requires no special tools. Simply spin off the old filter and throw it away. Spin on the new unit for trouble-free filtration. This filter is approved by Underwriters Laboratories.

### Can Be Used With Two Different Mounting Heads

Two different fuel filter heads – easily installed in the fuel lines – can be used with the 89104 fuel filter.

The 89100 comes complete with the 89104 filter and a mounting head that can be installed in lines using 3/8" pipe threads. The 89101, also a complete filter/mounting head assembly, is installed in lines with 1/4" pipe threads.

Both heads feature an exclusive air bleed and a locking screw to discourage tampering by children or accidental fuel leakage.

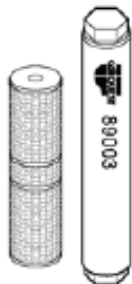

Part No.	Description	Dimensions	Thread Connections	Micron Rating	Maximum Flow
89104	Replacement filter element only	Hgt. 4.344" O.D. 2.619"	1"-14"	10	6 gph*
89100	Mounting base & filter	Hgt. 5.375" O.D. 2.619"	3/8" Female Pipe	10	6 gph*
89101	Mounting base & filter	Hgt. 5.375" O.D. 2.619"	1/4" Female Pipe	10	6 gph*

\* gallons per hours

## Fuel Filters Special Applications Dispensing Equipment

89003 & 89004

### In-Hose Fuel Filters

For complete final protection against contaminant entry in the vehicle fuel system, we recommend this in-hose filter that can be easily installed just ahead of the pump nozzle. Equally effective for both diesel and gasoline fuel, the filter features a protective vinyl coating and is approved by Underwriters Laboratories, Inc.

Underwriters Laboratories recognized  
Component for gasoline pumps.

Part No.	Description	Dimensions	Thread Connections	Micron Rating	Maximum Flow
89003	Complete in-hose filter assembly*	Lgth. 11" O.D. 2 1/4"	3/4" Female Pipe	7	12 GPM
89004	Replacement element	Lgth. 7 15/16" O.D. 2 1/4"	---	7	12 GPM
89744	Complete in-hose filter assembly*	Lgth. 11" O.D. 2 1/4"	3/4" Female Pipe	24	12 GPM
89044	Replacement element	Lgth. 7 15/16" O.D. 2 1/4"	---	24	12 GPM

\* Includes replacement filter element

### Water Trap Fuel Filter

A must for contractors, farmers, oil exploration crews and others whose gasoline or fuel oil is dispensed from pumps, skid tanks or mobile service facilities. The 89389 filter effectively removes dust, grit, dirt and other airborne contaminants while its water-removing capacity eliminates the hazard and expense of fuel-line freeze-ups in cold climates. The filter consists of a rustproof aluminum body with a removable, transparent bowl which is unaffected by either gasoline or fuel oil. All filters are pressure tested to 100 psi.

The low-cost, easy-to-change replacement filter element for the water trap fuel filter is part no. 89390. The pleated paper element provides 354 sq. inches of filtering surface and is specially treated to remove water from gasoline or diesel fuel.

**NOTE: DO NOT use on pressure type dispensing pumps.**

Part No.	Description	Dimensions	Thread Connections	Micro Rating	Max. Flow
89389	Complete filter assembly*	Hgt. 11" O.D. 4 1/2"	1" Female Pipe	10	12 GPM

89338	Bowl Replacement	---	---	---	---

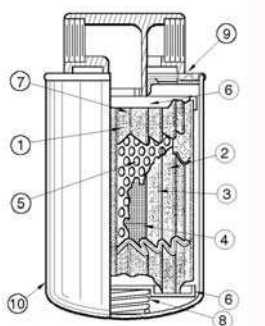

\* Includes filter element and bowl

# Fuel Filters Special Applications Dispensing Equipment

## 89027 Water Sensor Fuel Pump Filter For Gasoline, Diesel Fuel, Gasoline Blends\* and Oxygenated Fuels (MTBE)\*

The problem of contamination bulk fuel storage has changed considerably especially with the introduction of alcohol blended or oxygenated fuel. The solid contaminant problem can be greatly increased during changeover period due to the scouring action of the blends on existing corrosion in the storage facilities and delivery lines. The potential water problem has drastically changed. When enough water is introduced into the blends to lower concentration, the alcohol becomes incapable of staying in solution and separates from the fuel. This condition is termed "phased separation". Introduction of fuel in this condition into a vehicle's fuel system will result in erratic engine operation.

### Product Features

 Underwriters Laboratories recognized  
Component for gasoline pumps.

The CARQUEST 89027 Fuel Dispensing Pump Filter, which can be used with gasoline, diesel fuel, gasoline blends and oxygenated fuels (MTBE), provides numerous features and advantages.

1. Primary filter media of pleated cellulose and chemically enhanced filter media remove solid contaminants and water from the fuel.
2. Secondary filter media – a second layer of chemically enhanced filter media for greater water absorption capacity.
3. Synthetic wrap prevents media migration and acts as final dirt barrier.
4. Woven fiberglass screen supports media migration barrier.
5. Spiral, perforated metal center tube supports filter media and provides for an optimum flow rate.
6. Plated steel end caps prevents leaks from pressure, cracking and corrosion.
7. Plastisol adhesive provides a leak proof seal between the filter media and the end caps.
8. Coiled steel tension spring holds the filter element firmly in place to prevent internal bypass.
9. Specially formulated gasket for leak proof seal.
10. Environmentally friendly filter shell. Differentially coated tinplate can be recycled. Does not contain any hazardous materials.

### Installation/Activation

The CARQUEST 89027 Fuel Dispensing Pump Filter is installed on a conventional spin-on filter base between the fuel dispensing tank and the dispensing nozzle. In this position, all fuel must pass through the filter and is cleaned of solid contaminants.

When water is introduced and phase separation occurs, the special sensing layer will selectively absorb the water from the fuel causing it to swell. This will result in an increase in differential pressure and a drop in flow rate from approximately 12 GPM to less than 1 GPM in about 60 seconds. When the special sensing layer is activated and the fuel flow is drastically reduced, this signals the operator that water is present. If a new filter is installed without eliminating the water contamination, the filter will again reduce the rate of fuel flow as it absorbs water.

### Fully Tested

Laboratory and field test have shown our chemically enhanced filter media readily absorbs approximately 8 oz. of water in fuel. When water is introduced and phase separation occurs the pressure drop beings to increase and the flow decreases from approximately 12 GPM to less than 1 GPM in about 60 seconds.

\* Maximum 15% Alcohol (Methanol or Ethanol)

# Fuel Filters for Special Applications Dispensing Equipment

When the job calls for high speed fuel dispensing, CARQUEST Filters has what it takes. Our high capacity filters are available in 30 GPM and 60 GPM models, which are ideal for truck stops and other commercial high speed fuel dispensing applications.

Additionally, two types of filters are available – solid contaminant removal and solid contaminant removal plus water absorption. Both are offered in 10 and 30 micron ratings.

Replacement elements are available with Water Sensor media to prevent the dispensing of water into vehicle fuel tanks. In fact, the filter automatically shuts off the flow of fuel after approx. 12 ounces of fuel has been removed by the special media.

For most applications, the 10 micron elements are recommended, and especially for high hydrocarbons such as gasoline. For heavier distillates, such as No. 2 fuel oil or diesel, the 30 micron element provides less filtration but offers longer filtration life. CARQUEST 86677 Fuel Filter

## Product Features

Special Water Sensor media prevents passage of water through the filter and shuts off flow when necessary, preventing contaminated fuel from being dispensed.

Water Sensor element contains 700 square inches of filter media; non-water sensor element contains 1700 square inches of filter media.

Part Number	Description	Dimensions	Micron Rating
<b>89841</b> (Will be replaced by the 86677 when inventory is depleted.)	Water Sensor Filter Element	Hgt. 9.31 inches O.D. 4.50 inches	10
<b>89842</b> (Will be replaced by the 86679 when inventory is depleted)	Standard Filter Element	Hgt. 9.31 inches O.D. 4.50 inches	10
<b>89845</b> (Will be replaced by the 86678 when inventory is depleted.)	Standard Filter Element	Hgt. 9.31 inches O.D. 4.50 inches	30

\* Element only, CARQUEST mounting base numbers 89840, 89843, 89846 and 89847 are no longer available.

## Fuel Dispensing Filters and Bases

Today's modern engines are more refined and complex than ever and the fuel that they consume has in many cases changed to meet stricter environmental standards. For these reasons and others, it is more important than ever to deliver fuel that is free of contaminants and impurities. Whether you are using traditional or alternative fuels we have the product to meet your needs.

### Our dispensing filters:

- Provide high-efficiency particulate filtration.
- Are compatible with Gasoline, Petroleum Diesel, Ethanol blends and Bio-Diesel blends. (See chart for details.)
- Are constructed with epoxy coated shells for corrosion protection.
- Have been extensively tested to meet exacting performance standards.
- Are available for alcohol or alcohol-free fuel.
- Provide enhanced protection from phase separation in alcohol blended fuels. (See chart for details.)

Part Number	Description	GPM	Unleaded Fuel	Petroleum Diesel	Up to 15% Ethanol	Up to 85% Ethanol	Up to 20% Bio-Diesel	Kerosene/ Fuel Oil

## Diesel Engines Fuel Filtration

**Extremely Efficient – Removes Water & Particles**  
**Fuel Flow Rates Up To 80 GPH Or About 350 HP**  
**Base Contains 2 Inlet & Outlet Ports 1/4 x 18 NPTF**  
**Maximum Operating Pressure Of The Filter Is 60 psi**  
**Unique Dry Change Element Eliminates Fuel Spillage**  
**Marine Series Have Corrosion Resistant Parts**

Micron Rating	5	30	150
Filter/Base Assembly	89911	89912	89913
Replacement Element Only	86911	86912	86913
Marine Assembly	89914	89915	89916
Replacement Element Only	86914	86915	86916

### **Complete Assembly**

**150-Micron Coalescing Pre-Filter/Water Separator:** Ideal for cold weather applications, removes most water and large contaminants before the final filter.

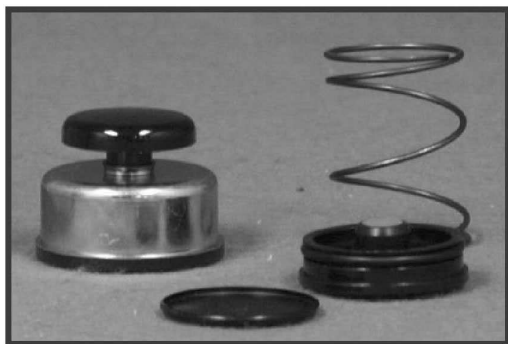

**Element**

**30-Micron “Primary” or Pre-Filter/Water Separator:** Designed to be used with a final filter, a pre-filter will extend service intervals and ensure maximum protection of the injection system.

**5-Micron Final Filter/Water Separator:** Filter can be used on its own or in combination with a 150 or 30-micron pre-filter assembly.

## Available Accessories

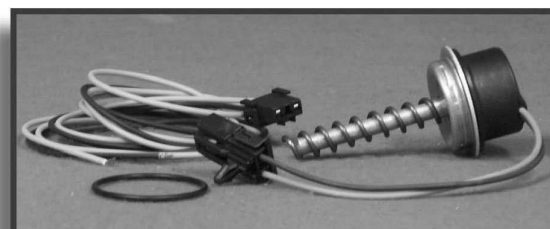

### **\*Hand Primer - # 89921:**

An optional Hand Primer quickly purges air from the fuel system after an element change, maintaining flow integrity on vacuum-side filter applications.

### **\*150W Heater Kit - # 89922:**

A 12V reliable sensor reacts to the fuel temperature, when needed, activates a high-efficiency heating element. Fuel flows the length of the heater for rapid and uniform warming. Melting wax crystals back into suspension just prior to entering the filter's media, which helps avoid filter plugging.

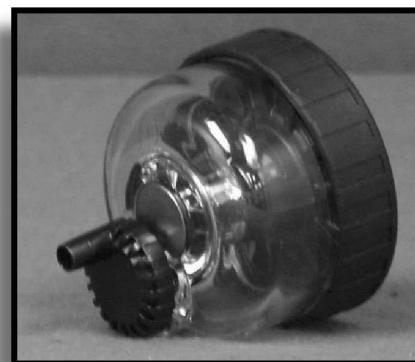

### **\*12V Water Sensor Kit - # 89923:**

This optional electronic module signals that water has accumulated in the filter and must be drained. Ideal for applications where a see-thru bowl cannot easily be seen.

### **\*See-Thru Plastic Bowl - # 89924:**

A see-thru plastic bowl is a popular option module, allowing immediate and easy visual inspection of water and residue levels.

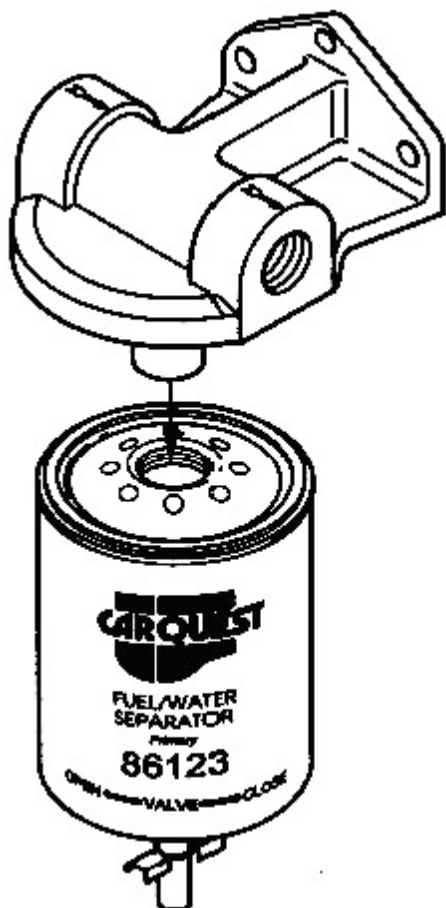

\* Sold Separately

Manufactured by Stanadyne  
for CARQUEST Filters

## Fuel/Water Separator Filter Installation Kit

89309 Adapter Base

The CARQUEST fuel filter/water separator filter removes harmful solid contaminants and water from fuel on diesel and gasoline engines. Water can be drained through the convenient petcock on the bottom of the filter.

This kit may be used to convert cartridge type filters to convenience of spin-on or can be added as a supplemental filter for increased dirt removal capacity and water removal.

The kit is suitable for use on any size diesel or gasoline engine up to 400 H.P. Ideal for passenger cars and small trucks where original filter is too small or does not remove water.

Part No.	Description	Dimension	Thread Connections

86418	Spin-on Filter	Hgt. 8.410 O.D. 3.812	1"-12
89309	Adapter Base	Lgth. 3 1/2" Hgt. 3 1/4"	1/2" Female Pipe

# CARQUEST Standard Service Interval (S.S.I.) Coolant Products

## How To Use CARQUEST S.S.I. Coolant Products With Supplemental Coolant Additives (S.C.A.s)

### Initial Installation

For best product and system performance, the following procedures are required:

1. Start with a clean cooling system. If your system is dirty, completely drain the entire system and chemically clean it with a heavy duty cooling system cleaner. After the system has been cleaned, thoroughly flush the entire system with clean water to insure all the chemical cleaner is removed.
2. Refill your cooling system with the following: 40% to 60% low silicate glycol based antifreeze and clean, soft water. The antifreeze can be either ethylene or propylene glycol type. Engine manufacturers recommend using 50% antifreeze and 50% suitable water.

Clean soft water is defined as clear water containing no more than the following:

Chloride – 40 parts per million or less  
Sulfates – 100 parts per million or less  
Hardness – 170 parts per million or less (Calcium/Magnesium)

The preferred water for use in cooling systems is deionized, distilled or demineralized. However, if you are using tap water and are unsure of its suitability for use in your cooling system, consult your water supplier for the values of these contaminants or have it evaluated by our coolant analysis laboratory.

3. Refer to the initial service and maintenance chart. Find your cooling system's TOTAL CAPACITY in the left hand column. Then to the right, under column labeled initial installation, find the correct CARQUEST S.S.I. coolant product for your system. Install the correct filter and if necessary, the correct amount of CARQUEST Cooling System Treatment. Your cooling system is now ready for use. (Maintenance charts are also included with each filter).

### S.S.I. Maintenance Procedures

1. Find your cooling system's TOTAL CAPACITY under the maintenance section of the chart. Then to the right of the capacity, select the correct maintenance filter or filter and CARQUEST Cooling System Treatment liquid combination for the maintenance interval desired. Properly install the selected products in your cooling system.
2. Use a CARQUEST Cooling System Test Kit. To insure that the antifreeze concentration, the coolant's pH level and the CARQUEST coolant conditioner additives are at the proper level, check the cooling system conditioner every 250 hours or 15,000 miles with a CARQUEST test kit. If testing indicates some maintenance is necessary, please follow maintenance instructions on the test kit instruction card. If your maintenance schedule calls for exceeding 250 hours or 15,000 miles for cooling system maintenance, our Extended Service Interval (E.S.I.) products should be used.

**Dispose Of All Used Cooling System Products In Accordance  
With All Applicable Laws and Regulations.**

# CARQUEST Standard Service Interval (S.S.I.) Coolant Products

## Supplemental Coolant Additive (SCA) DCA IV Corrosion Inhibitor

The cooling system must receive complete and proper maintenance to ensure efficient engine operation. Our SCA DCA IV Corrosion Inhibitor is formulated to provide maximum protection for engine cooling systems while providing for Standard Service Interval capabilities.

This inhibitor package is completely compatible with all glycol based coolants (both normal and extended service formulas) concentrated or pre-mixed. It is **NOT** for use in systems using only water. All in-field test kits, regardless of the supplier, are compatible with this new inhibitor formulation.

Our low solids technology approach to this supplemental coolant additive (SCA) virtually eliminates the possibility of gelation problems in properly mixed systems. The presence of greatly reduced total dissolved solids (T.D.S.) in the cooling system results in better heat transferability of the coolant, reduced water pump leakage, a much lower potential for pitting corrosion in metal components, the virtual elimination of cavitation erosion in sleeve assemblies and the potential for extended total system drain and flush intervals.

Solid contamination in the cooling system (dirt, rust, etc.) is eliminated with the use of our coolant filters as they contain a special filter media in addition to the SCA inhibitor. All of our coolant filter cans are epoxy coated to give extra protection from corrosion induced failures.

### Initial Installation

System Capacity Gallons	Initial Installation 0 Hours (or pre-charge)	
	Filter	CQ Cool
1-4	89070	+ 1 pint
5-8	89071	+ None
9-12	89072	+ None

49-64		89074	+ None
65-80		89075	+ None
81-91		99065	+ None

### Application Specific S.S.I. Coolant Products

Part #	Application	Thread Size	Replaces	Services
89114	Volvo VED 12	16x1.5mm	3945411 Volvo	Maintenance
89196	Volvo	16x1.5mm	1661964 Volvo	Maintenance
89197	IHC/Navistar	11/16-16	1820361C1 IHC	Pre-Charge
89206	IHC/Navistar	11/16-16	1822313C1 IHC	Maintenance

**NOTE: Antifreeze concentration must be between 40% to 60%. CARQUEST Cooling System Treatment is available in pint, ½ gallon, 5 gallon and 55 gallon sizes for your convenience.**

\* If using this maintenance interval on a 1-4 gallon system, do not use filter for more than 50,000 miles, 1000 hours, or one year. Replace with a 89070 filter when these limits are reached.

\*\* If using this maintenance interval on a 5-8 gallon system, do not use filter for more than 50,000 miles, 1000 hours, or one year. Replace with a 89071 filter when these limits are reached.

To insure proper coolant conditioner concentration, use a CARQUEST test kit at intervals of 250 hours or 15,000 miles. When using the test kit, follow maintenance practices outlined in the test kit instruction card. Depletion rates of the CARQUEST Supplement Coolant Additive (SCA) may vary according to engine condition, cooling system condition, engine type or operating condition.

## CARQUEST Standard Service Interval (S.S.I.) Coolant Products

### Coolant Test Kits

Cooling systems that have been treated with Dry Chemical Additives (DCA) type Supplemental Coolant Additives (SCA) may be checked with these kits. These kits are not suitable for use with extended service, long life or fully formulated anti-freezes, chemistries or antifreeze colors other than traditional green.

These kits determine the Dry Chemical Additive, Dry Chemical Additive IV and liquid CARQUEST Cooling System SCA concentrations. They determine if the SCA concentration level is acceptable, or if the SCA concentration is high or low and, if so, to what degree.

One of the key ingredients in our SCA products is Sodium Nitrite. The test kits measure the levels of this additive in the coolant. In addition to testing Nitrite levels, our 3-Way test strips also measure the coolant pH and freeze point.

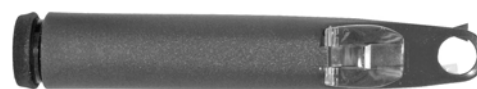

To maintain proper system balance and to ensure accurate SCA test results, the antifreeze concentration must be between 40-60%. We recommend a refractometer (89584 or 89585) be used to accurately determine antifreeze concentration.

Simple, easy to follow, instructions are included with each test kit. The best time to use a test kit is every 250 hours or every 15,000 miles of operation.

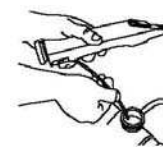

### 3-Way Nitrite/Freeze Point/pH Test Kit

Part No.	Description
89107	Complete Test Kit w/ 50 Test Strips, Syringe, Chart
89105	48 Test Strips/12 Packs of 4 Test Strips per Pack
89106	Container of 50 Test Strips

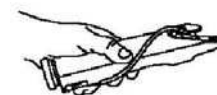

Use CARQUEST's refractometer 89584 (Fahrenheit) or 89585 (Celsius) to determine Antifreeze concentration in three easy steps.

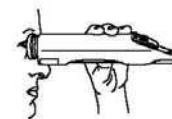

1. Take sample

2. Place a few drops of sample on the measuring prism and close the cover.

3. Hold up to a light and read the scale.

# CARQUEST Standard Service Interval (S.S.I.) Liquid Inhibitors

For years, maintenance personnel and supervisors have realized that over half of all premature catastrophic engine failures are directly related to the cooling system. Cooling system problems are usually the result of improper cooling system maintenance techniques and/or simple confusion as to how to use all the cooling system products available today. CARQUEST Filters put an end to all this with a logical solution: CARQUEST Cooling System Treatment and a 50,000 mile, additive free mechanical filter.

## CARQUEST Liquid Cooling System Treatment

CARQUEST Cooling System Treatment is a complete one step, low solids liquid cooling system treatment. CARQUEST Cooling System Treatment is available in 16oz. bottles (part number 89056), ½ gallon containers (part number 89058), 5 gallon containers (part number 89057), and 55 gallon drums (part number 89055). Pour the correct amount based on the **Total Capacity** of the cooling system, directly into the radiator or coolant recovery container. It's just that simple and easy to use. CARQUEST Cooling System Treatment is a balanced, low solids, film forming inhibitor system specifically designed to protect the metal components of the cooling system while maintaining a favorable alkaline balance. It chemically ties up the hardness in the cooling system fluids to prevent the build-up of rust or scale.

### You Have All These Benefits With CARQUEST Cooling System Treatment

- Protects all metals in the cooling system from corrosive attack.
- Keeps engine coolant passages free from heat absorbing sludge and mineral scale build-up, which dramatically reduces the engine's heat transfer capacity.
- Completely compatible with all glycol based antifreezes, both normal service and extended service formulas, concentrated or pre-mixed. It is **NOT** for use in systems using only water.
- Low solids formulation virtually eliminates gelation problems in properly mixed systems.
- Lower total dissolved solids results in reduced water pump leakage, better coolant heat transferability, a lower potential for pitting corrosion and the potential for extended total system drain and flush intervals.
- Provides cavitation erosion protection.
- Has no harmful affect on hoses or other non-metallic parts in cooling system.
- Extends equipment life, reduces down time and maintenance costs.

### How To Use CARQUEST Cooling System Treatment

#### I. Before Treatment

Drain and thoroughly flush the cooling system to remove dirt deposits, oil, rust particles and other additives that require the use of neutralizers (especially in low flow or single pass style cooling systems).

#### II. Install Additive Free Cooling System Filter

The use of an additive free filter, while not technically required on a system utilizing the liquid CARQUEST Cooling System inhibitor, is an excellent way to remove solid contamination in the cooling system and insure long, trouble free cooling system service.

### Dispose Of All Used Cooling System Products In Accordance With All Applicable Laws And Regulations

### III. Initial CARQUEST Cooling System Treatment

The cooling system must be **PRE-CHARGED** with CARQUEST Cooling System to provide the proper, initial strength of inhibitors. Add CARQUEST Cooling System directly to the cooling system as indicated on the chart below. The system should already contain a mixture of 50% suitable water and 50% glycol based antifreeze. The system's antifreeze concentration should not be lower than 40% or higher than 60%.

Application Chart for **PRE-CHARGING** the Cooling System

Cooling System Capacity	Quarts	4-16	20-32	36-48	52-64	68-80	84-95	100-112	Over 112
	Gallons	1-4	5-8	9-12	13-16	17-20	21-24	25-28	Over 28
CARQUEST Cooling System Pre-Charge	Pints	1 pint	2 pints	3 pints	4 pints	5 pints	6 pints	7 pints	1 pint per ea. 4 gal.

### IV. Regular Service Interval

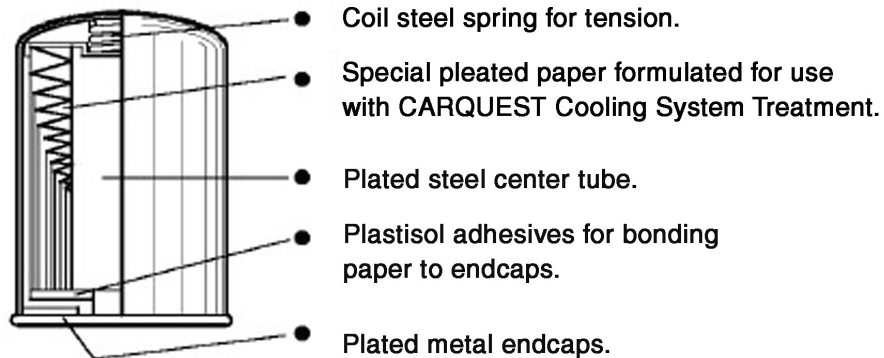

- A. Line Haul, High Mileage Vehicles – At every 15,000 miles, add CARQUEST Cooling System as indicated below.
- B. Low Mileage Trucks, Stationary Engines, Marine Units – Add CARQUEST Cooling System after each 250 hours of operation as follows:

System Capacity	17-80 Quarts	Over 80 Quarts
CARQUEST Cooling System	1 Pint	1 Pint for every 20 Gallons or Fraction Thereof

### The CARQUEST Additive Free Mechanical Coolant Filter

Even if we didn't manufacture filters, we would recommend the use of a mechanical filter for the cooling system. Core sand is always a possibility in an engine. Scale build-up prior to the use of CARQUEST Cooling System can break loose causing system problems.

While CARQUEST Cooling System will keep your cooling system clean, it won't clean it all by itself! That's why we recommend our low cost, additive free mechanical filter (part number 89070) as part of every cooling system. Part number 89069 can be used where space limitations may be a concern. Additive free type filters are to be used either in systems where our liquid CARQUEST Cooling Treatment SCA is being used or where antifreeze, either new or recycled with SCAs already in it, is being used. The additive free filters are NOT to be used in systems using just water or just water and antifreeze.

**Dispose Of All Used Cooling System Products In Accordance With All Applicable Laws And Regulations**

# Frequently Asked Questions About CARQUEST Liquid Cooling System Treatment

**Is CARQUEST Liquid Cooling System Treatment recommended by major engine companies?**

SCA type coolant conditioners (CQ Liquid Coolant Treatment) are recommended by virtually all engine and equipment manufacturers.

**Will CQ Liquid Coolant Treatment separate in my cooling system?**

No. It forms a true solution in cooling systems and will not separate.

**Can it be used in gasoline engines, including cars?**

Yes. You will have the same benefits in gasoline powered units as you do in diesels.

**Should I use a filter with soluble oil?**

A filter is not absolutely necessary. However, if you start with a clean system, keep it that way with an additive free filter.

**Is it compatible with soluble oil?**

No. We suggest you remove soluble oil because the ethylene glycol in antifreeze can react with soluble oil to form "green slime". The use of soluble oil and stopleak is not recommended by engine manufacturers. They are not compatible with other additives.

**Why use CQ Liquid Coolant Treatment in addition to antifreeze?**

Two reasons: (1) Antifreeze will not prevent scale deposits and (2) the corrosion inhibitors in antifreeze deplete with use.

**How does CQ Liquid Coolant Treatment stop cavitation?**

Three ways: (1) By forming a physical barrier (a chemical film), (2) by preventing corrosion of the metal surface, thus strengthening its resistance to cavitation and (3) by reducing foaming which means less air entrapment – a major cause of cavitation.

**Must I clean before using?**

Yes. However, if your unit is already clean, you may add this product directly to it.

**How can I remove core sand without a filter?**

You can't! Filters are a must.

**Is it compatible with antifreeze?**

CQ Liquid Coolant Treatment is compatible with most glycol-based antifreezes. Consult with CARQUEST Filters Technical Service Department on use with Dowtherm 209 and extended life antifreeze.

**What effect does CQ Liquid Coolant Treatment have on lube oils?**

No effect. If coolant gets in lube oil, a sludge will form due to the presence of water and/or antifreeze. CQ Liquid Coolant Treatment will neither worsen nor prevent the sludge.

**Does CQ Liquid Coolant attack seals and hoses?**

No. It is compatible with all seals and hoses.

**Can I overtreat? Can I undertreat?**

Yes, to both. Follow dosage and change intervals recommended in charts and instruction sheets.

**How does it keep my engine running cool and clean?**

By preventing scale and corrosion, it provides a clean cooling system, which allows the maximum, original design heat transfer.

**How does CQ Liquid Coolant Treatment stop corrosion?**

It contains a balanced film-forming inhibitor system and protects all metals in the cooling system against corrosion while maintaining a beneficial alkaline (pH) environment.

**How does it stop scale deposits?**

By chemically tying up the hardness in the water to prevent the formation of a hard adherent deposit.

**Why is preventing scale deposits important?**

Scale retards heat transfer. Because of its insulating properties, only 1/16 of an inch of mineral scale may cause a 40% drop in heat transfer. This can result in overheating causing cracked heads and warped or cracked blocks.

**How often is the filter to be changed?**

At the time you first add CQ Liquid Coolant Treatment, install a CARQUEST Cooling System Additive Free Filter. Change the filter at 20,000 miles. Install a new filter and then change the filter at 50,000 mile intervals or annually. Check for proper part number of filter. This applies to part numbers 89069 and 89070 filters and requires the use of CARQUEST Liquid Coolant Additive.

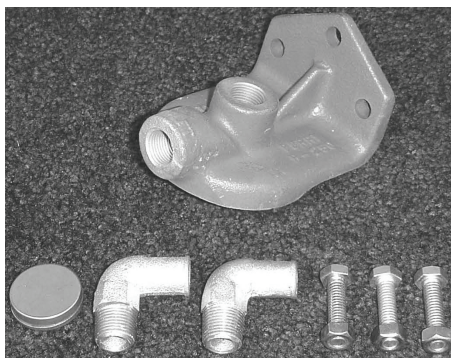

To ensure proper coolant conditioner concentration, use CARQUEST Test Kit (#89107) at intervals of 250 hours or 15,000 miles. When using the test kit, follow maintenance practices outlined in the test kit instruction card. Depletion rate of the CARQUEST Chemical Additive may vary according to engine condition, cooling system condition, engine type or operating condition.

## CARQUEST Standard Service Interval (S.S.I.) Cooling System Products

### Spin-On Conversion Kit

With our universal mounting base (Part Number 89019) you can either convert existing cartridge style coolant filters to spin-on styles or you can add the protection of a coolant filter to virtually any cooling system. The 89019 kit comes with easy to understand installation instructions. Our product line includes a variety of spin-on filters that can be used with the 89019 kit.

Additive Free Type: 89069, 89070, 89083, and 89084  
Additive Type: 89071, 89072, 89073, 89074, 89082, and 89088

### For Mack Truck Applications

CARQUEST part numbers 89428 (3/4-20 thread) and 89429 (1-16 thread) are used for MACK brand applications. These filters contain a supplemental chemical additive (SCA) that goes into the coolant solution and deposits a protective coating on all interior metal cooling system components while maintaining the correct pH level and helping to soften the water. These filters are compatible with glycol-based antifreezes, both normal service and extended service types that are either concentrated or pre-mixed.

Part Number 89430 is the additive free version of 89428. Additive free type filters are to be used either in systems where our liquid CARQUEST Cooling System Treatment SCA is being used or where antifreeze, either new or recycled, with SCAs already in it, is being used. The additive free filters are **NOT** to be used either in systems using just water or just water and antifreeze.

The filter eliminates harmful cooling system contamination. They must be changed in accordance with the vehicle manufacturer's recommended maintenance schedule.

# CARQUEST Extended Service Interval (E.S.I.) Coolant Products

Today's cooling system maintenance programs are undergoing some changes from what has been the "traditional" approach. While many fleet maintenance programs still make very efficient and effective use of our Standard Service Interval (S.S.I.) products, which require a service interval of 15,000 miles or 250 hours, some fleets are looking to go to an extended service interval program. To meet the particular needs of an "extended" approach, CARQUEST Filters offers our Extended Service Interval (E.S.I.) products. These products are specifically designed for a service interval of 150,000 miles, 4000 hours or 1 year. Maintenance personnel now have the options they need to customize their cooling system maintenance procedures to an interval that fits with the rest of their maintenance program.

## Product Usage and Selection Guide

Extended Service Interval (E.S.I.) coolant products are available in both the liquid additive form and the solid, slow additive release form contained in various filter applications. These products are totally compatible with other "extended life/long life" products and with all glycol-based antifreezes, either regular formulas or "fully formatted" types. **No** CARQUEST E.S.I. product is designed for use on or in any cooling system that uses only water.

### Liquid E.S.I. Additive and Additive Free Filters

There are two distinctly different ways to use the 1 quart liquid additive, part number 89060. First, it may be added to a system that has just been drained, cleaned and thoroughly flushed. For a system up to 20 gallons total capacity, 1 quart of E.S.I. additive is all you need. For systems with larger capacities, 1 quart of E.S.I. additive is required for the first 20 gallons and 1 quart per each additional 20 gallon capacity. The fractional break down is ½ pint E.S.I. liquid is required per 5 gallons cooling system capacity.

The other way to use the E.S.I. liquid additive is to simply pour it into any cooling system just after a normal maintenance interval service has been performed. The amount of E.S.I. liquid to use is the same as that used in a system that been drained and flushed. From this point on, your system should be treated as an extended life system.

Regardless of how the E.S.I. liquid additive is added to a particular cooling system, we highly recommend the use of an E.S.I. coolant filter on every system to insure all types of solid contamination are removed from the coolant. Part numbers 89083, 89084, 89086, 89091 and 89092 are additive free filters specifically for use on cooling systems utilizing the E.S.I. liquid additive. If a system does not currently have a filter on it now, our part number 89019 add-in coolant filter mounting base kit can be used to add 89083 and 89084 filters to any system.

### Extended Service Intervals (E.S.I.) Filters

The use of filters to introduce supplement coolant additives (SCAs) to a cooling system has been very popular for a very long time. If your vehicle is currently using a filter for this purpose or if you would like to add a filter to any system, CARQUEST has the E.S.I. products required for either direct replacement on existing setups or conversion to extended service interval technology.

CARQUEST Extended Service Interval (E.S.I.) filters are designed to last 150,000 miles or 4000 hours or 1 year. Metal component thickness has been increased. Key components have been coated for better corrosion resistance. The media, gaskets, adhesive materials and inner element support springs in these filters are specifically designed to withstand the environment of extended service intervals. CARQUEST E.S.I. filters with extended service interval additives in them are part numbers 89082, 89085 and 89090. The 89082 can be added to any coolant system by using our part number 89019 add-on coolant filter mounting base kit.

The extended service additives in these filters are a patented combination of a controlled solubility, time release coating on the additive pellets and a diffusion orifice to slowly released additives during extended service intervals without adding harmful contaminants to the cooling system. The additives in E.S.I. filters are especially designed to only replace additives depleted with system operation. This minimizes the total dissolved solids (TDS) level in cooling systems. Lower TDS results in better heat transferability of the coolant, reduced water pump leakage and a lower potential for metal pitting corrosion.

CARQUEST also offers two other part numbers for coolant system maintenance. The additives in these two part numbers are more closely related to traditional DCA type SCAs and are designed to replace the slow release (“need”) filters. These part numbers are 89088 and 89089. Their design and componentry contains the same durability the E.S.I. filters do. The 89088 can be added to any coolant system by using our part number 89019 add-on coolant filter mounting base kit.

Although E.S.I. technology extends the time between actual service intervals, we highly recommend the periodic physical testing of the coolant to insure the required levels of additive protection is present and the overall condition of the coolant is acceptable for continued use. Periodic additive level protection is accomplished by simply using our 3-way test strips, part number 89105, 89106 or 89107. This type of testing should be done a minimum of two times during the normal E.S.I. service intervals of 1 year, 150,000 miles or 4000 hours of use. A full coolant analysis should be done every 3 years, 450,000 miles or 12,000 hours of service to determine if the coolant is still acceptable for continued use or if the system should be drained, cleaned, flushed and re-charged with E.S.I. additives. An easy to use coolant analysis kit is available from your local CARQUEST Filters District Sales Manager.

### Coolant Products Description and Application Guide

Part Number	Thread Size	Filter Height (In.)	Application	Comments
89060	NA	NA	1 Quart E.S.I. Liquid SCA	For use with part numbers 89083, 89084, 89086, 89091, 89092
89082	11/16"-16	5.43	Caterpillar, Cummins, Detroit, Others	E.S.I. chemicals in filter
89083	11/16"-16	4.173	Caterpillar, Cummins, Detroit, Others	Non-chemical E.S.I. filter
89084	11/16"-16	5.430	Caterpillar, Cummins, Detroit, Others	Non-chemical E.S.I. filter
89085	3/4"-20	5.430	Mack	E.S.I. chemicals in filter
89086	3/4"-20	4.170	Mack	Non-chemical E.S.I. filter
89087	11/16"-16	5.410	Cummins	Non-chemical E.S.I. filter
89088	11/16"-16	5.440	Caterpillar, Cummins, Detroit, Others	Slow release (need type) chemical in filter
89089	3/4"-20	5.430	Mack	Slow release (need type) chemical in filter
89090	16 x 1.5mm	5.440	Volvo	E.S.I. chemicals in filter
89091	16 x 1.5mm	4.180	Volvo	Non-chemical E.S.I. filter
89092	16 x 1.5mm	5.440	Volvo	Non-chemical E.S.I. filter
89112	36 x 2.0mm	5.760	Cummins (Signature)	E.S.I. chemicals in filter
89113	36 x 2.0mm	5.760	Cummins (Signature)	Non-chemical E.S.I. filter
89396	16 x 1.5mm	5.388	Volvo	Non-chemical E.S.I. filter

## Cooling System Maintenance for Heavy Duty Engines

There are many cooling system problems and failures. Most of these problems have occurred due to incorrect information and maintenance practices. The following will address these problem areas by correcting the erroneous information and listing the proper maintenance practices.

The chart shown below is a listing of the six most common problems seen in today's cooling system. Along with each problem is a description of how it occurs, how it affects your engine and, most importantly, how to prevent it.

Problem	How It Happens	What It Can Do	Prevention
*Rust	Oxidation within the system	Clogs the system, causes accelerated wear	The inhibitors in a quality Supplemental Coolant Additive prevent the oxidation for rust to occur.
Scale (Water Hardness)	Present in all tap water are salt minerals, especially calcium and magnesium. These minerals can solidify and adhere to hot metal surfaces.	1. Clog system passages. 2. Deposit on high temperature areas and reduce the heat transfer rate causing hot spots. This results in uneven metal expansion, scuffing, scoring, accelerated ring wear and eventually, cracked heads and/or blocks.	The Supplemental Coolant Additive keeps salt minerals in suspension so they cannot deposit on engine metal surfaces or clog passages.
Acidity (pH)	1. Glycol antifreeze reacts with oxygen in the air and forms acid. 2. A loose head gasket or other leakage can allow sulfuric acids formed by the burning of fuel to leak into cooling system.	Corrode iron, steel and aluminum	A quality Supplemental Coolant Additive neutralizes acids to prevent corrosion.
Pitted Cylinder Liners	Constant vibration of the cylinder liner causes a momentary vacuum to form on its surface. Coolant boils into the vacuum and vapor bubbles implode on the surfaces of the liner, digging into unprotected liners.	Cause pits, which can extend over time, through the thickness of the liner and allow coolant to enter the combustion chamber or crankcase.	The Supplemental Coolant Additive coats the liner with a thin film to protect it from cavitation erosion without impeding heat transfer.
Foam	Foam – The aeration of coolant – occurs from air leakage into the system.	Adds to the cavitation erosion problem, particularly in the areas of water pump impellers.	A quality Supplemental Coolant Additive has an antifoam agent to prevent formation of air bubbles. This foam prevention agent is effective at all temperatures, even during startup.
Pitted Water Pump Impellers	Flow rates and turbulence are high at the impeller blade. This causes cavitation. In addition, there is a possibility that abrasive particles are present in the system.	Cause loss of pump efficiency and total pump failure.	The Supplemental Coolant Additives protect the impeller from cavitation erosion and the filter holds particulate matter to reduce abrasive wear on cooling system components.

\* It should be noted that rust can appear even within a chemically protected system when oil is present in the coolant. If you do notice the presence of rust, the oil cooler should be inspected for possible leaks.

**Starting Right** – Before changing the coolant, the system should be thoroughly flushed to remove any contamination. A clean system is free of solid and liquid contaminants including oil.

## Starting Right

Before changing the coolant, the system should be thoroughly flushed to remove any contamination. A clean system is free of solid contaminants and oil.

## Make-Up Water

Proper coolant system maintenance requires a quality make-up water. All make-up water is corrosive but water with high mineral content cannot be made fit for use. As soft of tap water as possible should be used. Tap water that has been softened by some type of salt or chloride process should not be used. Most engine manufacturers have set up specifications for water used in their engines. The following chart shows some of these specifications.

	Caterpillar	Cummins	Detroit
Hardness	100ppm	300ppm	170ppm
Chlorides	40ppm	100ppm	40ppm
Sulfates	100ppm	100ppm	100ppm
Total Dissolved Solids	340ppm	500ppm	340ppm

## Antifreeze

Antifreeze, glycol, propylene glycol or long life/extended life, should be used in the cooling system year round. The glycol in the antifreeze provides freeze protection. It also provides a stable environment for gaskets and seals. These same gaskets will shrink in straight water and leakage could occur.

Some of the major problems we see in cooling systems today occur due to antifreeze related problems. One of the most publicized problems is silicate gelation/dropout. Silicate gel problems have increased in frequency since the early 1980's. The two major causes of this problem are:

1. High Silicate Antifreeze
2. Over concentration of antifreeze and/or Supplemental Coolant Additives.

All antifreezes used in today's heavy-duty engines should meet GM 6038M or ASTM D-4985 specifications for silicate content. The antifreeze concentration should be held between 40% and 60% (40% antifreeze and 60% water to 60% antifreeze and 40% water). A 50% blend is ideal. The use of a refractometer or hydrometer will insure the glycol concentration levels are maintained properly.

Another problem caused by over concentration is water pump leakage. In a study by Cummins Engine Company, 54% of the water pump failures they examined occurred due to over concentration. 78% of the total pumps examined showed over concentration regardless of the cause of the failure.

## Supplemental Coolant Additives (SCA)

Using the proper amount of a high quality Supplemental Coolant Additive (SCA) is very critical in preventing the problems mentioned in the chart on the previous page. When filling a cleaned system with fresh antifreeze and water, a Supplemental Coolant Additive (SCA) is required. These additives may contain inhibitors not found in today's antifreeze.

When precharging, be sure to use the proper precharge filter for your size cooling system or 4 ounces (120ml) of liquid Supplement Coolant Additive (SCA) per gallon (3.8ltr) of coolant (4 ounce [120ml] requirement based on the most common Supplemental Coolant Additive). In either case, be sure to follow the Supplemental Coolant Additive (SCA) manufacturer's specifications.

## Service

Supplemental Coolant Additives (SCA) are used up (depleted) while in the process of protecting the metal surfaces which are in contact with the coolant. These additives must be replenished through the use of filters containing SCA's or a liquid SCA at specified intervals to maintain the proper concentration levels.

## Periodic Draining and Flushing

Antifreeze breaks down to corrosive acids due to temperature cycles within the cooling system. The coolant can also become contaminated by dirt, oil combustion gases and spend inhibitors. While a high quality coolant filter will remove the solid contaminants, it will not remove the oil or combustion gases. Due to the breakdown of the antifreeze, all engine manufacturers recommend periodic draining and flushing. Caterpillar and Detroit Diesel recommend annually draining and flushing while Cummins and Mack recommend a maximum of two years.

There are many specialized products on the market today which can help you develop a quality cooling system maintenance program. The antifreeze concentration level is a key area which could lead to silicate gelation and water pump leakage. The recommended range is 40 – 60% based on ambient temperature. The use of a refractometer or hydrometer will insure the glycol concentration levels are maintained properly.

There are several types of Supplemental Coolant Additive test kits on the market. The primary types check one or more of the following:

1. Sodium Nitrite
2. MBT
3. pH

Use the test kit recommended by your Supplemental Coolant Additive (SCA) supplier. CAUTION: Test strips or testers which register the pH as the sole determining factor in adding your Supplemental Coolant Additive (SCA) should not be used.

# Lube Filter Conversion Kits

## Ford and Chevrolet Passenger Cars and Light Trucks

### Chevrolet Cars/Trucks

Today, there are many thousands of 1956-67 Chevrolet cars and trucks operating with the old-style, pot-type filter. Changing the filter is a time-consuming and dirty job.

CARQUEST Part No. 89061 is a complete conversion kit that comes with complete installation instructions and the 4 bolts making it possible to install the conversion base in either cars or trucks. The kit includes two 1/4" bolts for attaching the conversion base to passenger cars and two 5/16" bolts for Chevrolet truck applications. All necessary gaskets are included.

Simple, fully illustrated installation instructions come with the kit, making it easy to convert to the convenience of spin-ons.

Element To Be Converted	Conversion Kit	Conversion Kit Includes	Spin-on Replacement Only
85129	89061	Base, Gasket and Mounting Bolts	85794
85143	89061	Base, Gasket and Mounting Bolts	85061

### Ford Cars/Trucks

The engine block mounted cartridge filter used on Ford cars and some late models of trucks can be converted to easy change spin-on with part number 89124. The kit comes complete with a threaded bushing, engine base plate, sealing gasket and instruction sheet.

Some models of Ford Trucks using a vertical base mounted cartridge filter can be converted to a spin-on by using part number 89123. The kit comes complete with a threaded bushing, engine base plate, sealing gasket and instruction sheet.

Element To Be Converted	Conversion Kit	Conversion Kit Includes	Spin-on Replacement Only
85004, 85271 (Vertical Base Mounted)	89123	Base, Threaded Bushing and Gasket (Bushing-3/4-16 x 3/4-24)	85515 85773
85004, 85271 (Engine Block Mounted)	89124	Base, Threaded Bushing and Gasket (Bushing-3/4-16 x 3/4-16)	85515 85773

# Lube Filter Conversion Kits

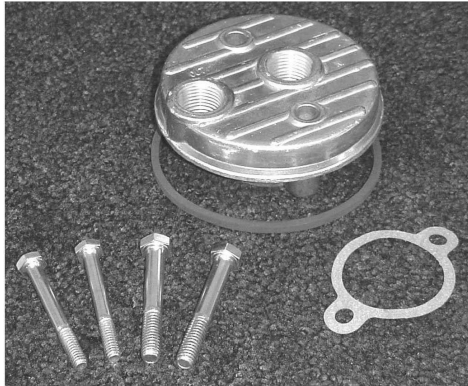

## Adapters For Converting Engine Mounted Filters To Remote Mounted Base

These cast aluminum adapters are designed for **converting engine mounted spin-on oil filters** to remote mounted spin-on filters. Each adapter has a female thread to mate with the engine male thread stud. Two 1/2" N.P.T. female threaded ports are used for connecting the flexible oil lines. O-ring sealing gaskets are included with each adapter.

89730

Part No.	Dimensions	Engine Base Threads	Oil Line Threads
89730	O.D. 3-1/8" Hgt. 1-1/2"	3/4"-16 Female	1/2" N.P.T. Female
89732	O.D. 3-1/8" Hgt. 1-1/2"	18x1.5mm Female	1/2" N.P.T. Female
89734	O.D. 3-5/8" Hgt. 1-1/2"	13/16"-16 Female	1/2" N.P.T. Female
89736	O.D. 3-5/8" Hgt. 1-1/2"	20x1.5mm Female	1/2" N.P.T. Female

89738

Cast aluminum adapter for converting canister type filters on 1956-1967 Chevrolet V8 and 1958-1969 Chevrolet/GMC truck V8 engines to remote mount spin-on filter. Adapter replaces all canister filter components including the bypass valve assembly. A spin-on filter with bypass valve must be used on the remote base.

Adapter comes complete with gaskets, two 1/4"-20 bolts for passenger car engines and two 5/16-18 bolts for truck engines. Two 1/2" N.P.T. female threaded ports are used for connecting the flexible oil lines.

Part No.	Dimensions	Oil Line Threads
89738	O.D. 4" Hgt. 1-3/4"	1/2" N.P.T. Female

## Remote Mount Spin-On Filter Bases

89762

Cast aluminum base for remotely mounting filter. Mounting holes are conveniently located. Vertical inlet and outlet ports are 1/2" female N.P.T. Select suitable filter from listing on following pages.

Part No.	Dimensions	Filter Thread	Oil Line Threads
89762	Length 4" Width 3-1/8" Height - 2-1/2"	3/4"-16	1/2" N.P.T. Female

## Remote Mount Bases

These remote mount bases may be used in a variety of applications including lube, fuel, hydraulic and transmission. They feature double inlet and outlet horizontal ports. Two brass plugs are included for blocking off the unused ports. Three mounting holes are provided. A variety of filters may be selected from the list below.

Part No.	Dimensions	Filter Thread	Oil Line Threads
89763	Length – 4.090" Width – 3.100" Height – 1.850"	11/16" – 16	1/2" N.P.T. Female
89076 (Dual Port)	Length – 4.050" Width – 3.090" Height – 1.870"	3/4" - 16	1/4"-18 N.P.T. Female
89093 (Dual Base)	Length – 6.950" Width – 3.090" Height – 1.870"	3/4" - 16	1/2"-16 N.P.T. Inlet and Outlet

**Note:** When remote mountings are used for spin-on lube, hydraulic and transmission applications, **the system must be protected with a bypass relief valve.** The lube and hydraulic filters listed all have built in bypass valves.

**Caution:** When selecting a filter for use on these remote bases, size, flow rate and performance characteristics must be considered.

Contact the CARQUEST Technical Service Department for assistance.

# Lube Filter Conversion Kits

## Full Flow For Cummins Diesel Engines

Most Cummins engines manufactured since 1969 can be easily converted to spin-on oil filters using the CARQUEST Kit Number 89067. It allows you to replace the CARQUEST 85954 cartridge type filter with an easy-change 85970 spin-on.

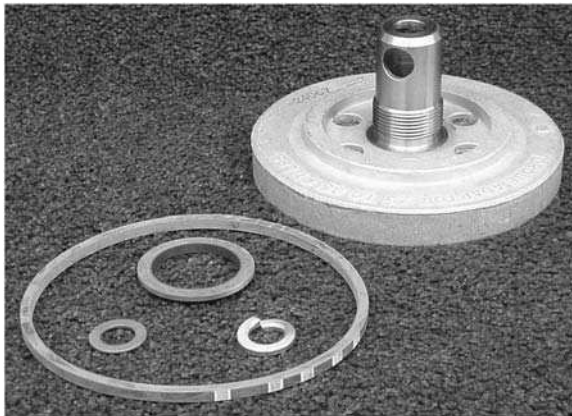

The kit includes an adapter plate, sealing gaskets, washers and instruction sheet. A cap screw (bolt) is not supplied with this kit. The appropriate length cap screw should be determined and purchased from a local source. All cap screws should be Grade 5, 5/8"-18 UNF-2A.

**NOTE:** The CARQUEST Kit Number 89067 does not include the 85970 lube oil filter, which should be ordered as a separate item.

### Important

The engine model series shown in the chart is for **reference purposes only**.

Before attempting to convert any of these engine model series, you must determine the head (filter mounting base) part number and match it with one shown in the chart. If the head part number is not listed in the chart, the conversion cannot be made.

**Kit No. 89067**

\*\* The "head" is the cast metal base to which the filter shell is attached. The part number is normally found in the recessed cavity of the head.

Engine	Description	Head Part** No.	Capscrew (Bolt) Required
N-927	Vertical Mount Full Flow Cooling	208148	6"
NH-855	Vertical Mount Full Flow Cooling	210832 210915 214636 210785	5 1/2"

V-12	Triple Head	208752	6"
K-6	Dual Head	206229	5 1/2"
All	Remote Mount	177058	4 1/2"

\*Requires grade 7 bolt

## Lube Filter Conversion Kits

### Bypass Filter For Small Gas and Diesel Engines

Small engines equipped with cartridge type bypass filters can be converted to the convenience of a spin-on with this kit. The kit may also be used to add on supplemental bypass filtration to provide increased engine protection. A choice of four different sized filters is available.

Part No.	Description	Dimensions	Thread Connections
89098	Adapter Base	Length: 4.050" Height: 1.870"	Dual 1/4" - 18 Female Pipe
89755	Adapter Base	Length: 3.050" Height: 2.750"	1/8" Female Pipe
85050	Spin-On Filter	Height: 5.387" O.D.: 3.812"	5/8" - 18
85051	Spin-On Filter	Height: 4.281" O.D.: 3.812"	5/8" - 18
85320	Spin-On Filter	Height: 3.750" O.D.: 3.812"	5/8" - 18
85704	Spin-On Filter	Height: 6.952" O.D.: 3.663"	5/8" - 18

### Bypass Filter For Large Gas and Diesel Engines

#### Conversion Base

With our Part No. 89750 you can convert old-fashioned pot type element housings to the convenience of spin-ons. You save time and money during filter changes and eliminate the cleaning of messy pots. May be used on any diesel engine including Detroit Diesel, Cat, Mack, IHC, etc.

#### Spin-On Bypass Lube Filter

The CARQUEST 85749 filter ends the mess and wasted time in servicing your equipment. Easy to convert...easy to service...saves dollars in service time and down time. The CARQUEST 85749 exceeds the performance requirements for the Cummins Diesel Engine specifications. CARQUEST has designed the 85749 using the same special top quality premium grade of paper, as you would find in all our heavy-duty lube filters.

#### Note to Cummins Owners

As of May 1982, Cummins is manufacturing engines with a 9-gallon oil pan using the spin-on type bypass filter. Remember, Cummins Engine Company requires that 85749 retrofits, for on-highway applications, retain the 750-bypass housing, which will act as an oil reservoir. Off highway applications may use the spin-on bypass filter in place of the housing.

Conversion Base	Spin-On Filter
89750	85749

## Double Protection Oil Analysis System

Simply order the CARQUEST Filters Double Protection Oil Analysis Kit you need.

Part No. **89077** – Contains sample bottle for used oil, request sheet and mailer container. Instructions included.

Part No. **89078** – Contains sample bottle for used oil, request sheet, mailer container and section of 1/4 inch plastic tubing. Instructions included.

Part No. **89290** – Contains a section of 1/4 inch plastic tubing and suction pump. Instructions included.

Be sure to follow the directions thoroughly in filling out the request form and obtaining the oil samples. Analysis for wear metal concentration can be evaluated and wear rates determined only if all pertinent information necessary for analysis is available. To help us better evaluate your vehicles' used oil, the request sheet must be accurately completed. Only with all of this information can precise determinations of wear rates be made. Since concentrations of suspended materials are not necessarily the same throughout the lubricating system, proper sampling techniques must be employed (sampling instructions are provided on the back of the request form). In fact, improper sampling procedures can lead to misleading results.

For more information please visit our web site at [www.cficonnect.com](http://www.cficonnect.com).

## Hydraulic Filter Installation Kits

For fluid flow rates up to 40 gallons per minute, with a maximum working pressure of 100 psi, adapter base part number 89759 and the following filters can be used. Special order filter gasket 90661 is required for use with this base (included with each base) **NOTE: The filter bypass (25psid) valve is located in the adapter base.**

Part No.	Description	Dimensions	Thread Connections	Micron Rating	Media Type	Max. Flow	Gasket
89759	Adapter Base	Hgt. 3.59, O.D. 5.34	1-1/4" N.P.T.F.			40 gpm	90661
85632	Spin-On Filter	Hgt. 6.872, O.D. 5.007	1-1/2 x 16	7	Glass	40 gpm	90661
85735	Spin-On Filter	Hgt. 6.872, O.D. 5.041	1-1/2 x 16	11	Glass	40 gpm	90661

85758	Spin-On Filter	Hgt. 6.872, O.D. 5.007	1-1/2 x 16	25	Paper	40 gpm	90661
85759	Spin-On Filter	Hgt. 6.872, O.D. 5.007	1-1/2 x 16	10	Paper	40 gpm	90661
85847	Spin-On Filter	Hgt. 11.257, O.D. 5.007	1-1/2 x 16	5	Glass	40 gpm	90661
85849	Spin-On Filter	Hgt. 11.257, O.D. 5.007	1-1/2 x 16	10	Glass	40 gpm	90661
85860	Spin-On Filter	Hgt. 9.107, O.D. 5.007	1-1/2 x 16	10	Paper	40 gpm	90661
85861	Spin-On Filter	Hgt. 9.107, O.D. 5.007	1-1/2 x 16	25	Paper	40 gpm	90661
85864	Spin-On Filter	Hgt. 9.107, O.D. 5.007	1-1/2 x 16	25	Paper	40 gpm	90661
85865	Spin-On Filter	Hgt. 6.872, O.D. 5.007	1-1/2 x 16	25	Paper	40 gpm	90661
84200	Spin-On Filter	Hgt. 6.872, O.D. 5.007	1-1/2 x 16	3	Glass	40 gpm	90661
85399	Spin-On Filter	Hgt. 7.875, O.D. 5.045	1-1/2 x 16	7	Paper	40 gpm	90661
A09A01G	Spin-On Filter	Hgt. 10-354, O.D. 5.04	1-1/2 x 16	1	Glass	79 gpm	Packed(2)

Hydraulic systems require fluid for efficient operation and long component life. These adapter bases and hydraulic filters are ideal for use on log splitters, farm and construction equipment, lift trucks or anywhere a filter is not currently being used. **CAUTION:** The base and filter **MUST** be installed in the return line (low pressure) to the fluid reservoir.

For fluid flow rates up to 12 gallons per minute, with a maximum working pressure of 100 psi, the following adapter bases and filter can be used. **NOTE: The filter bypass (7-9 psid) valve is located in the filter.**

Part No.	Description	Dimensions	Thread Connections	Micron Rating	Media Type	Max. Flow	Gasket
89001	Adapter Base	Hgt. 3.75, O.D. 2.25	1" N.P.T.F.			12 gpm	
89034	Adapter Base	Hgt. 3.75, O.D. 2.25	3/4" N.P.T.F.			12 gpm	
85453	Spin-On Filter	Hgt. 5.495, O.D. 3.698	1 x 12	35	Paper	12 gpm	

## Doubleseam-Style Sealing Gaskets

There are several spin-on filter part numbers that utilize a very unique design to achieve a proper seal between the filter and the mounting base. A square cut gasket is supplied with the filter and a rectangular style (Part No. 90661) is available as a special order.

As the diagram illustrates, the proper gasket is **first** installed in the retaining groove in the **filter mounting base**. The width of the retaining groove determines which gasket is used. The width of the gasket should be the same approximate size of the retaining groove.

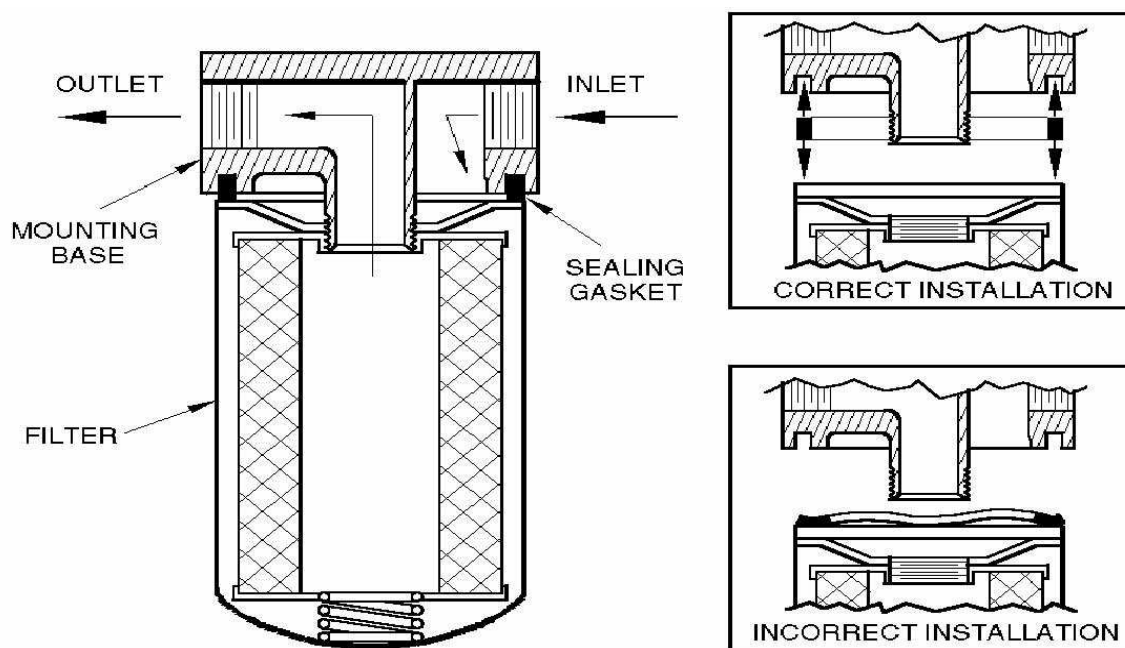

The filter is then spun up to the mounting base where the outside diameter (the double seam) of the filter contacts the gasket to form the seal. The tightening instructions printed on the filter can must be followed to assure the seal is complete.

Any attempt to install this style of gasket in any other manner, including placing it inside the filter's base plate assembly, will result in fluid leakage, gasket damage and possible system failure.

A third style gasket (Part No. 90658) is available as a special order and is L-shaped. This gasket **must be** placed on the filter prior to installation.

Part numbers currently available with this design are:

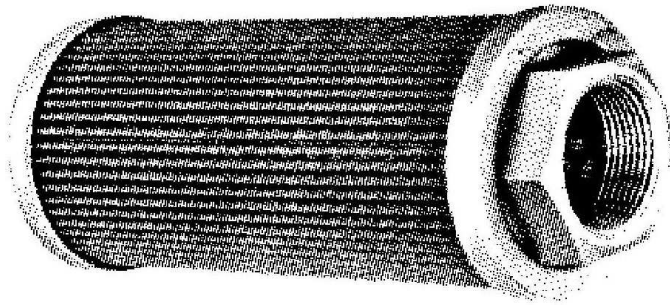

85632	85824	85864
85735	85846	85865
85746	85847	84200
85756	85849	84399
85758	85860	A09A01G
85759	85861	

## Wire Mesh In-Tank Hydraulic Filters

These filters feature:

- 100 mesh cleanable stainless steel wire cloth media
- Built-in bypass valve protection set at 3 psid
- Flow capacities rated at 5fps (feet per second) outlet line velocity with pressure drops of less than .5 psi
- Element endcaps utilizing a reversed taper on the outside diameter and epoxy sealant to prevent bonding failures, even when used on rough terrain applications
- Compatibility with all petroleum based oils, fire resistant hydraulic fluids, coolants and lubricants

**Part Number Specifications**

Part Number	Outlet Port	Overall Length	Rated Flow Capacity	BPV Setting
84450	1" NPTF	4.6"	14 GPM	3 PSID
84451	1-1/4" NPTF	6.6"	23 GPM	3 PSID
84452	1-1/2" NPTF	8.6"	32 GPM	3 PSID
84453	2" NPTF	7.2"	53 GPM	3 PSID

# AquaChek Air Drying Filters and Kits

## Setting A New Standard For Compressed Air Moisture Control

Advanced Filter Technology designed to specifically address the issue of system wide and point of use compressed air moisture control. An absolute must to protect air tools and equipment from moisture.

### Questions and answers about AquaChek Air Drying Filtration Products

Q: Why do I need to protect my air tools and equipment from moisture?

A: When moisture comes in contact with metal, corrosion occurs. Rust can form on the internal surfaces of your tools, which causes premature failure. Rust and corrosion are the single largest causes for tool and equipment failure.

Q: How does AquaChek Air Drying Technology work?

A: AquaChek filtration products use special super-absorbing polymer media that traps free water as well as airborne particulate down to one-half (.5) micron. This media will trap and hold up to 28 times its weight in water. Even when it becomes saturated, it will not release the moisture trapped inside. As the water molecules come in contact with the AquaChek polymer media fibers, the two react. The polymer captures the water molecules and encapsulates them, locking them in a semi-solid state.

Q: How does moisture get in my air compressor?

A: When air is compressed, the relative humidity increases. When relative humidity rises above 70%, the water vapor condenses into free water droplets. Standard water traps and dryers reduce free water, but water vapor passes through to collect down line and later condenses into free water. AquaChek Air Drying filters absorb free water but also reduce relative humidity in the air to less than 30%, resulting in cleaner, dryer air downstream.

Q: Doesn't my compressor control water?

A: Most compressor packages don't include equipment to control moisture. Many air compressors have holding tanks with drains for water but this does nothing to stop water vapor.

Q: I have a dryer system – why do I need AquaChek filters?

A: Most drying systems fail to deal with water vapor. In order to control free water, water vapor must be controlled.

Q: Is there a system that removes 100% of all free water and water vapor?

A: Although different moisture removal technologies remove varying levels of water, one thing is consistent among all solutions: unless you literally freeze the air to a minus 35° F, some moisture will get through.

Q: Should I use a Primary and Secondary Moisture Removal System

A: It's recommended. Installing a water trap before the AquaChek Air Drying filter will capture a lot of the free water passing through the line. This will extend the life of the AquaChek filter.

## Determining CFM (Cubic Feet per Minute) Requirements For Your System

Selecting the correct AquaChek filtration system for your needs depends on the specific CFM capacity of your system. To calculate the CFM rating on your compressor, simply multiply the compressor's horsepower by four. Example: A 10 horsepower compressor will produce about 40 CFM. Use the AquaChek chart on the next page to find the proper kit and filter for your system.

## Setting A New Standard For Compressed Air Moisture Control

2 – AC30	1 3/4-12 UNF	200	250	90 oz.	ACK40

### Installation Instructions

Installation of AquaChek filters requires a filter mounting base (see above chart for proper base + filter) and tools to cut and thread the airline at the location the filter mounting base is being installed. It is recommended that a self-venting water trap be installed between the air compressor and the AquaChek mounting base and filter. This will prolong the life of the AquaChek filter. **Important: The AquaChek mounting base must be installed a minimum of 10 feet away from the compressor.** This allows the air to cool enough to achieve maximum moisture removal. It is vital that the inlet and outlet sides of the mounting base be installed with the proper configuration. It is recommended a flow control valve be installed just before the filter to prevent possible polymer migration. **Change Out Circuit:** In situations where taking the compressor off line for filter changes is undesirable, the installation of an isolation circuit around the filter system is recommended. The isolation circuit requires 2 two-way valves installed to allow routing of air around the filter system during filter change-outs. **Note:** Apply thread-sealing tape to all male thread surfaces when installing the AquaChek base and filter. See our AquaChek website for more complete information and installation instructions at: [www.aquachekfilters.com](http://www.aquachekfilters.com).

## Setting A New Standard For Compressed Air Moisture Control

### AquaChek Kits

Kit #	Kit Contents	CFM Rating	PSI Rating	Water Capacity
ACKG15	Single filter mounting base w/ 1/2" NPT inlet + outlet and differential pressure gauge 2-1/2 x 1/4 reducer bushings 1-AquaChek AC10 spin-on filter 1-1/2" flow control valve 1-1/2" nipple Small roll of thread sealing tape Instruction sheet	15	175	10 oz.
ACKG25	Single filter mounting base w/ 1" NPT inlet + outlet and differential pressure gauge 2-1" x 3/4" reducer bushings 1-Aquachek AC20 spin-on filter 1-1" flow control valve 1-1" nipple Small roll of thread sealing tape Instruction sheet	50	175	20 oz.
ACKG35	Single filter mounting base w/ 1 1/2" NPT inlet + outlet and differential pressure gauge 1-Aquachek AC30 spin-on filter 1-1 1/2" flow control valve 1-1 1/2" nipple Small roll of thread sealing tape Instruction sheet	100	250	45 oz.
ACKG45	Dual Filter Mounting Base w/ 2" NPT inlet + outlet and differential pressure gauge 2-AquaChek AC30 spin-on filters 1-2" flow control valve 1-2" nipple Small roll of thread sealing tape Instruction sheet	200	250	90 oz.

### Replacement Gauge

ACG1 1 – Differential pressure gauge specifically designed for use on ACKG15, 25, 35, 45 kit bases only. The ACG1 gauge **cannot** be used on the mounting bases in our ACK10, 20, 30 or 40 kits.

The ACG1 is an easy way to read differential pressure gauge that will indicate exactly when it is time to change the AquaChek air-drying filter. This assures optimum protection and performance.

## Technical Service Bulletins

The following Technical Service Bulletins (TSBs) are available from the Filter Manufacturers Council (FMC). The FMC represents the entire North American filtration industry. These TSBs represent the opinion of the filter industry, not an individual manufacturer. While some of these are printed in this catalog, to access the complete library, containing over 40 TSBs, please contact your local filter District Sales Manager or go to [www.filtercouncil.org](http://www.filtercouncil.org), click on the Related Sites tab, click on the FMC link and then click on the Technical Data tab.

<b>TSB Number</b>	<b>Title</b>

## Over-Pressurized Lube Oil Filters

From time to time every filter manufacturer has had a filter that has been severely over-pressurized returned from a customer. Often the deformed filter is the only sign the car owner has that a problem existed in their lube oil system.

It's possible that the damaged filter was not noticed until it was removed during the next scheduled oil change. However, if the pressure was sufficient to blow out the gasket or unroll the lock seam, the car owner may have experienced immediate and costly problems.

With the "evidence" in their hands, they tend to put the blame on the damaged filter. It's not surprising that they are more than a little aggravated when the filter manufacturer denies any responsibility for the damage. What, then, has caused the over-pressurization?

A look at how a lube oil system functions will show that oil pressure is created by the oil pump. The upper limit of this pressure is controlled by a pressure regulating valve, which is usually an integral part of the pump.

Figure 1 is a simplified diagram of the lube oil system showing the pump, regulating valve, filter and bearings.

The pump supplies sufficient flow to lubricate the bearings and other moving parts of the engine. This oil must be under pressure if it is to properly separate the highly loaded parts of an engine and prevent excessive wear. The purpose of the regulating valve is to provide this pressure, which on most passenger cars is between 40 PSI (280kPa) and 60 PSI (410kPa).

The regulating valve is made up of a ball or plunger, which regulates pressure with the aid of a spring. The spring is calibrated so that the plunger will lift off its seat when the oil pressure reaches the desired amount. Once the valve is open, the pressure remains fairly constant with only small changes occurring as the engine speed varies.

The filter and all other components in the lube system are subjected to the pressure established by the regulating valve. If this pressure is excessive, filter damage may occur. This is the point that many people who are not familiar with lube systems fail to realize.

What can cause the pressure in the system to exceed the regulating valve setting? The answer is that either the valve must be stuck in the closed position or it is sluggish and slow to move to the open position after the engine has started.

Figure 2 shows the system operating with the regulating valve stuck in the shut position. Under these conditions the pressure builds up equally on all components in the system until something happens to relieve the pressure. If the regulating valve becomes unstuck, the pressure will return to normal.

Normal operating pressure causes no permanent deformation of the filter body. When the system pressure reaches 150 PSI (1,000 kPa) due to a faulty regulating valve, most filters become permanently deformed. At this pressure, the gasket usually will not blow out and the lock seam will remain sound.

If the regulating valve still remains stuck, the pressure will increase further and the gasket between the filter and the base can be blown out. This will probably cause the loss of all the oil in the system.

If the filter has been installed on the tight side, the gasket may not blow out and the lock seam will unwind as the pressure continues to rise.

The main point is that the deformed filter is not the cause of this excessive pressure, but the victim of a faulty regulating valve.

If the customer is alert and shuts the engine off at the first sign of trouble (red light on or reduced oil pressure), they can limit their loss to a tow job, oil change and new filter. If the vehicle continues to be driven, engine failure is probable.

The customer may ask if a plugged filter could have caused the over-pressurized condition. The answer is no; if the regulating valve is functioning properly, it will maintain the pressure on the filter at 40 PSI (280 kPa) or 60 PSI (410 kPa) even if the filter is plugged.

In summary, if a lube filter distorts due to excessive pressure in the system, the fault lies with the oil pump pressure regulating valve and not with the filter.

### Low Engine Oil Pressure Problem

Insufficient oil pressure is serious, since the oiling system must be properly pressurized to keep the moving parts of the engine lubricated to prevent excessive wear. Most vehicles use a visual indicator, which may be a light or gauge, mounted in the instrument panel to alert the driver of low engine oil pressure.

The oil pressure indicator is connected with a pressure switch, as shown in Figure 1. The pressure switch sends a signal when the oil pressure is below 5 PSI (3.5 kPa). This pressure is established by the engine manufacturer based upon individual engine characteristics and requirements.

When the engine is not running and the ignition switch is turned on, the warning light illuminates. If the vehicle is equipped with a gauge there will be no indication of pressure. When the engine is started, oil pressure will compress the diaphragm in the pressure switch, opening the contacts and cause the light to go out or, in the case of a gauge, a positive pressure reading will be indicated. If the warning light remains on, or the gauge fails to register a normal pressure several seconds after start up, shut the engine off immediately. Check the oil level and fill as necessary.

If the warning light remains on or the gauge fails to register normally when the oil level is correct, there are a number of possibilities that may be the cause of the problem:

1. The oil pressure switch could be faulty.
2. The wiring between the oil pressure switch and warning indicator could be grounded or disconnected.
3. The oil pump may have lost its prime.
4. The oil pump intake screen could be clogged.
5. The oil pump pressure regulating valve could be stuck in the open position.

If the warning light does not illuminate with the ignition switch in the on/run position, and the engine is not running, then the bulb, pressure switch, and wiring should be checked and repaired as necessary.

On some engines the filter is mounted in a position which could allow the oil in the filter to drain back to the crankcase when the engine is shut down. This would be the case for the filter shown in Figure 2 where the filter is horizontal and is above the level of the oil in the crankcase. Normally, it takes less than five (5) seconds for the pump to fill the filter after the engine has been started, during which time the warning device will indicate no or low oil pressure.

Filters designed for these mounting positions contain an anti-drain back valve to prevent the engine from operating without oil pressure for the period of time after start up. This valve is usually in the form of a rubber gasket, which is visible through the inlet holes of the filter, and allows the flow of oil through the filter in the correct direction. When the engine is shut down, the anti-drain back valve prevents the oil in the filter from draining back to the crankcase.

Filter Knowledge, Unfiltered

## Technical Service Bulletin 83-2R2

Under some conditions the warning light may fluctuate when the engine is running. This usually happens when the vehicle is going around a corner or is on a relatively steep hill. If oil pressure fluctuation occurs under these conditions, it is because the oil level is low and the oil pump strainer is no longer fully submerged in the oil. The oil level should be immediately filled to the proper level.

In summary, the oil pressure warning device provides vital information to the driver. If there is an indication of low or no oil pressure when the engine is running, it should be shut off immediately and the cause investigated.

FOR REFERENCE PURPOSES ONLY—CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER. Hsg(Housing). . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly. *Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>40</sup> Not a direct interchange -refer to application listing

<sup>217</sup> Truck or Bus applications with oil filter housing that has a spring-loaded long post - has lid attached to filter

<sup>258</sup> 2" Pleat

INTERCHANGE

FOR REFERENCE PURPOSES ONLY-CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER.

Hsg(Housing). . . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers* May Not Be Available At Time Of Publication.

<sup>40</sup> Not a direct interchange -refer to application listing

<sup>217</sup> Truck or Bus applications with oil filter housing that has a spring-loaded long post - has lid attached to filter

<sup>258</sup> 2" Pleat

FOR REFERENCE PURPOSES ONLY-CHECK VEHICLE APPLICATION LISTING FOR CORRECT CARQUEST BLUE FILTER. Hsg(Housing) . CARQUEST BLUE NUMBER is Replacement Element to be used in filter housing assembly.

*Italicized Part Numbers May Not Be Available At Time Of Publication.*

<sup>40</sup> Not a direct interchange -refer to application listing

<sup>217</sup> Truck or Bus applications with oil filter housing that has a spring-loaded long post - has lid attached to filter

## Warranty Information

### Manufacturer's Warranties

Consumer purchasers of automotive filters are sometimes told by an automotive dealer's service writer or mechanic that a brand of replacement filter cannot be used in the consumer's vehicle during the warranty period. The claim is made that use of the brand will "void the warranty" with the statement or implication that only original equipment brand of filters may be used. This, of course, tends to cast doubt on the quality of the replacement filter.

That claim is simply not true. If the consumer asks for the statement in writing, he will not receive it. Nevertheless, the consumer may feel uneasy about using replacement filters that are not original equipment. With the large number of do-it-yourselfers who prefer to install their own filters, this misleading claim should be corrected.

Under the Magnuson-Moss Warranty Act and general principals of the Federal Trade Commission Act, a manufacturer may not require the use of any brand of filter (or any other article) unless the manufacturer provides the item free of charge under the terms of the warranty.

So, if the consumer is told that only the original equipment filter will not void the warranty, he should request that the OE filter be supplied free of charge. If he is charged for the filter, the manufacturer will be violating the Magnuson-Moss Warranty Act or other applicable law.

By providing this information to consumers, the AFMC can help combat the erroneous claim that a brand of replacement filter other than original equipment will "void the warranty".

It should be noted that the Magnuson-Moss Warranty Act is a federal law that applies to consumer products. The Federal Trade Commission has authority to enforce the Magnuson-Moss Warranty Act, including obtaining injunctions and orders containing affirmative relief. In addition, a consumer can bring suit under the Magnuson-Moss Warranty Act.

## Limited Warranty

New car and equipment warranties remain in effect when CARQUEST filters are used.

CARQUEST Filters warrants each CARQUEST filter to be free from defects in material and workmanship during the period of service life recommended by the engine or equipment manufacturer. This warranty does not apply if the filter has been improperly installed, abused, damaged, used in competitive racing or on modified high performance engines or if used in any aircraft or aviation application.

If your CARQUEST filter is found to be defective in material or workmanship during the period of service life recommended by the ending or equipment manufacturer, CARQUEST Filters will replace the defective filter with another CARQUEST filter. In addition, CARQUEST Filters will reimburse you for the reasonable costs of the parts and labor required to repair your engine or equipment to the extent the damage was solely attributable to a defect in your CARQUEST filter.

In order to obtain engine or equipment repairs under this warranty, the customer must, within 30 days after discovery of damage, submit a claim to any CARQUEST representative, our CARQUEST distributor, or directly to the address below. The customer must also allow the CARQUEST Technical Service Department to examine the filter and, if required, the engine or equipment, to determine the extent of damage and whether it was caused by a defective CARQUEST filter. The filter must be returned in its original, undamaged condition to the CARQUEST Technical Service Department for examination.

This warranty is exclusive of any other warranty, express or implied. CARQUEST FILTERS EXPRESSLY DISCLAIMS, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE. The foregoing states CARQUEST Filters entire and exclusive liability and the buyer's exclusive and sole remedy for any damages or claim made in connection with the sale of a CARQUEST filter. CARQUEST Filters shall in no event be liable for any special, incidental, or consequential damages whatsoever, except those specifically provided for in this warranty.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusion may not apply to you.

This warranty gives you specific legal rights and you may also have other rights, which vary from state to state.

CARQUEST Filters, P.O. Box 1692, 1 Wix Way, Gastonia, NC 28053-1967

# HOW DO YOU DRIVE?

## ARE YOU BLUE?

Best combination of capacity & efficiency for engine protection.

- Demanding Driving Routines\* (*Stop and Go Traffic, Short Trips, Interstate*)
- Extreme Driving Conditions\* (*Dirty Roads, On/Off Highway, Construction Sites, De-iced Roads, Higher Than 90°F Weather*)
- Dry Start Protection Past Traditional Change Interval
- OE Recommended Service Interval
- For Conventional, Synthetic, or Synthetic Blends
- 50% More Dirt Holding Capacity than Red
- 99% Coverage

\*80% of all drivers

## ARE YOU RED?

Good engine protection for normal driving conditions.

- Moderate Driving Routines (*Daily Travel*)
- Normal Driving Conditions (*Highway*)
- Traditional Service Interval
- For Conventional Oil
- Designed and manufactured to meet all performance requirements
- 98.3% Coverage
