

**AUTHORIZED FEDERAL SUPPLY SERVICE  
INFORMATION TECHNOLOGY SCHEDULE PRICELIST  
GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY  
EQUIPMENT, SOFTWARE AND SERVICES**

Special Item No. 132-8 Purchase of Equipment  
Special Item No. 132-12 Maintenance, Repair Service and Repair Parts/Spare Parts  
Special Item No. 132-51 Information Technology Professional Services

**SIN 132-8 PURCHASE OF EQUIPMENT**

FSC CLASS 5820 - RADIO AND TELEVISION COMMUNICATION EQUIPMENT, EXCEPT AIRBORNE  
Microwave Radio Equipment/Antennas and Waveguides

NOTE: Installation must be incidental to, in conjunction with an direct support of the products sold under SIN 132-8 of this contract and cannot be purchased separately. If the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act apply.

**SIN 132-51 - INFORMATION TECHNOLOGY (IT) PROFESSIONAL SERVICES**

FPDS Code D301	IT Facility Operation and Maintenance
FPDS Code D302	IT Systems Development Services
FPDS Code D306	IT Systems Analysis Services
FPDS Code D307	Automated Information Systems Design and Integration Services
FPDS Code D310	IT Backup and Security Services
FPDS Code D311	IT Data Conversion Services
FPDS Code D316	IT Network Management Services
FPDS Code D317	Automated News Services, Data Services, or Other Information Services
FPDS Code D399	Other Information Technology Services, Not Elsewhere Classified

Note 1 : All non-professional labor categories must be incidental to and used solely to support hardware, software and/or professional services, and cannot be purchased separately.

Note 2: Offerors and Agencies are advised that the Group 70 – Information Technology Schedule is not to be used as a means to procure services which properly fall under the Brooks Act. These services include, but are not limited to, architectural, engineering, mapping, cartographic production, remote sensing, geographic information systems, and related services. FAR 36.6 distinguishes between mapping services of an A/E nature and mapping services which are not connected nor incidental to the traditionally accepted A/E Services.

Note 3: This solicitation is not intended to solicit for the reselling of IT Professional Services, except for the provision of implementation, maintenance, integration, or training services in direct support of a product. Under such circumstances the services must be performed by the publisher or manufacturer or one of their authorized agents.

**INFORMATION FOR ORDERING OFFICES  
APPLICABLE TO ALL SPECIAL ITEM NUMBERS**

**SPECIAL NOTICE TO AGENCIES: Small Business Participation**

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service ([www.fss.gsa.gov](http://www.fss.gsa.gov)). The catalogs/pricelists, GSA Advantage!™ and the Federal Supply Service Home Page ([www.fss.gsa.gov](http://www.fss.gsa.gov)) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

*Domestic delivery* is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. Domestic delivery also includes a port or consolidation point, within the aforementioned areas, for orders received from overseas activities.

*Overseas delivery* is delivery to points outside of the 48 contiguous states, Washington, DC, Alaska, Hawaii, Puerto Rico, and U.S. Territories.

Offerors are requested to check one of the following boxes:

- The Geographic Scope of Contract will be domestic and overseas delivery.
- The Geographic Scope of Contract will be overseas delivery only.
- The Geographic Scope of Contract will be domestic delivery only.

2. Contractor's Ordering Address and Payment Information:

20 Orville Dr.  
Bohemia, NY 11716

Contractors are required to accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery orders. Government purchase cards will not be acceptable for payment above the micro-purchase threshold. In addition, bank account information for wire transfer payments will be shown on the invoice.

The following telephone number(s) can be used by ordering agencies to obtain technical and/or ordering assistance:

**631-348-3535**

3. LIABILITY FOR INJURY OR DAMAGE

The Contractor shall not be liable for any injury to Government personnel or damage to Government property arising from the use of equipment maintained by the Contractor, unless such injury or damage is due to the fault or negligence of the Contractor.

4. Statistical Data for Government Ordering Office Completion of Standard Form 279:

Block 9: G. Order/Modification Under Federal Schedule  
Block 16: Data Universal Numbering System (DUNS) Number: 01-402-7770  
Block 30: Type of Contractor - A. Small Disadvantaged Business  
Block 31: Woman-Owned Small Business - No  
Block 36: Contractor's Taxpayer Identification Number (TIN): 11-3403030

4a. CAGE Code: 1D4Z9

4b. Contractor has registered with the Central Contractor Registration Database.

5. FOB Destination

6. DELIVERY SCHEDULE

a. TIME OF DELIVERY: The Contractor shall deliver to destination within the number of calendar days after receipt of order (ARO), as set forth below:

SPECIAL ITEM NUMBER	DELIVERY TIME (Days ARO)
132-8	90 Days
132-12 & 132-51	As negotiated

b. URGENT REQUIREMENTS: When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering agency, agencies are encouraged, if time permits, to contact the Contractor for the purpose of obtaining accelerated delivery. The Contractor shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies shall be confirmed by the Contractor in writing.) If the Contractor offers an accelerated delivery time acceptable to the ordering agency, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

7. Discounts: Prices shown are NET Prices; Basic Discounts have been deducted.

a. Government Educational Institutions receive the same discount as other Government customers.

8. Trade Agreements Act of 1979, as amended:

All items are U.S. made end products, designated country end products, Caribbean Basin country end products, Canadian end products, or Mexican end products as defined in the Trade Agreements Act of 1979, as amended.

9. Statement Concerning Availability of Export Packing: Not applicable

10. Small Requirements: The minimum dollar value of orders to be issued is \$100

11. Maximum Order (All dollar amounts are exclusive of any discount for prompt payment.)

a. The Maximum Order value for the following Special Item Numbers (SINs) is \$500,000:

Special Item Number 132-8 - Purchase of Equipment

Special Item Number 132-51 - Information Technology (IT) Professional Services

## 12. ORDERING PROCEDURES FOR FEDERAL SUPPLY SCHEDULE CONTRACTS

Ordering activities shall use the ordering procedures of Federal Acquisition Regulation (FAR) 8.405 when placing an order or establishing a BPA for supplies or services. These procedures apply to all schedules.

- a. FAR 8.405-1 Ordering procedures for supplies, and services not requiring a statement of work.
- b. FAR 8.405-2 Ordering procedures for services requiring a statement of work.

## 13. FEDERAL INFORMATION TECHNOLOGY/TELECOMMUNICATION STANDARDS

**REQUIREMENTS:** ordering activities acquiring products from this Schedule must comply with the provisions of the Federal Standards Program, as appropriate (reference: NIST Federal Standards Index). Inquiries to determine whether or not specific products listed herein comply with Federal Information Processing Standards (FIPS) or Federal Telecommunication Standards (FED-STDS), which are cited by ordering activities, shall be responded to promptly by the Contractor.

**13.1 FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATIONS (FIPS PUBS):** Information Technology products under this Schedule that do not conform to Federal Information Processing Standards (FIPS) should not be acquired unless a waiver has been granted in accordance with the applicable "FIPS Publication." Federal Information Processing Standards Publications (FIPS PUBS) are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST), pursuant to National Security Act. Information concerning their availability and applicability should be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161. FIPS PUBS include voluntary standards when these are adopted for Federal use. Individual orders for FIPS PUBS should be referred to the NTIS Sales Office, and orders for subscription service should be referred to the NTIS Subscription Officer, both at the above address, or telephone number (703) 487-4650.

**13.2 FEDERAL TELECOMMUNICATION STANDARDS (FED-STDS):** Telecommunication products under this Schedule that do not conform to Federal Telecommunication Standards (FED-STDS) should not be acquired unless a waiver has been granted in accordance with the applicable "FED-STD." Federal Telecommunication Standards are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST), pursuant to National Security Act. Ordering information and information concerning the availability of FED-STDS should be obtained from the GSA, Federal Supply Service, Specification Section, 470 East L'Enfant Plaza, Suite 8100, SW, Washington, DC 20407, telephone number (202)619-8925. Please include a self-addressed mailing label when requesting information by mail. Information concerning their applicability can be obtained by writing or calling the U.S. Department of Commerce, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone number (301)975-2833.

## 14. CONTRACTOR TASKS / SPECIAL REQUIREMENTS (C-FSS-370) (NOV 2001)

- (a) **Security Clearances:** The Contractor may be required to obtain/possess varying levels of security clearances in the performance of orders issued under this contract. All costs associated with obtaining/possessing such security clearances should be factored into the price offered under the Multiple Award Schedule.
- (b) **Travel:** The Contractor may be required to travel in performance of orders issued under this contract. Allowable travel and per diem charges are governed by Pub .L. 99-234 and FAR Part 31, and are reimbursable by the ordering agency or can be priced as a fixed price item on orders placed under the Multiple Award Schedule. The Industrial Funding Fee does NOT apply to travel and per diem charges.  
**NOTE:** Refer to FAR Part 31.205-46 Travel Costs, for allowable costs that pertain to official company business travel in regards to this contract.
- (c) **Certifications, Licenses and Accreditations:** As a commercial practice, the Contractor may be required to obtain/possess any variety of certifications, licenses and accreditations for specific FSC/service code classifications

offered. All costs associated with obtaining/ possessing such certifications, licenses and accreditations should be factored into the price offered under the Multiple Award Schedule program.

(d) Insurance: As a commercial practice, the Contractor may be required to obtain/possess insurance coverage for specific FSC/service code classifications offered. All costs associated with obtaining/possessing such insurance should be factored into the price offered under the Multiple Award Schedule program.

(e) Personnel: The Contractor may be required to provide key personnel, resumes or skill category descriptions in the performance of orders issued under this contract. Ordering activities may require agency approval of additions or replacements to key personnel.

(f) Organizational Conflicts of Interest: Where there may be an organizational conflict of interest as determined by the ordering agency, the Contractor's participation in such order may be restricted in accordance with FAR Part 9.5.

(g) Documentation/Standards: The Contractor may be requested to provide products or services in accordance with rules, regulations, OMB orders, standards and documentation as specified by the agency's order.

(h) Data/Deliverable Requirements: Any required data/deliverables at the ordering level will be as specified or negotiated in the agency's order.

(i) Government-Furnished Property: As specified by the agency's order, the Government may provide property, equipment, materials or resources as necessary.

(j) Availability of Funds: Many Government agencies' operating funds are appropriated for a specific fiscal year. Funds may not be presently available for any orders placed under the contract or any option year. The Government's obligation on orders placed under this contract is contingent upon the availability of appropriated funds from which payment for ordering purposes can be made. No legal liability on the part of the Government for any payment may arise until funds are available to the ordering Contracting Officer.

15. CONTRACT ADMINISTRATION FOR ORDERING ACTIVITIES: Any ordering activity, with respect to any one or more delivery orders placed by it under this contract, may exercise the same rights of termination as might the GSA Contracting Officer under provisions of FAR 52.212-4, paragraphs (l) Termination for the ordering activity's convenience, and (m) Termination for Cause (See C.1.)

#### 16. GSA Advantage!

GSA Advantage! is an on-line, interactive electronic information and ordering system that provides on-line access to vendors' schedule prices with ordering information. GSA Advantage! will allow the user to perform various searches across all contracts including, but not limited to:

- (1) Manufacturer;
- (2) Manufacturer's Part Number; and
- (3) Product categories.

Agencies can browse GSA Advantage! by accessing the Internet World Wide Web utilizing a browser (ex.: NetScape). The Internet address is <http://www.fss.gsa.gov/>.

#### 17. PURCHASE OF OPEN MARKET ITEMS

NOTE: Open Market Items are also known as incidental items, noncontract items, non-Schedule items, and items not on a Federal Supply Schedule contract. ODCs (Other Direct Costs) are not part of this contract and should be treated as open market purchases. Ordering Activities procuring open market items must follow FAR 8.402(f).

For administrative convenience, an ordering activity contracting officer may add items not on the Federal Supply Multiple Award Schedule (MAS) -- referred to as open market items -- to a Federal Supply Schedule blanket purchase agreement (BPA) or an individual task or delivery order, **only if-**

- (1) All applicable acquisition regulations pertaining to the purchase of the items not on the Federal Supply Schedule have been followed (e.g., publicizing (Part 5), competition requirements (Part 6),

acquisition of commercial items (Part 12), contracting methods (Parts 13, 14, and 15), and small business programs (Part 19));

- (2) The ordering activity contracting officer has determined the price for the items not on the Federal Supply Schedule is fair and reasonable;
- (3) The items are clearly labeled on the order as items not on the Federal Supply Schedule; and
- (4) All clauses applicable to items not on the Federal Supply Schedule are included in the order.

#### 18. CONTRACTOR COMMITMENTS, WARRANTIES AND REPRESENTATIONS

a. For the purpose of this contract, commitments, warranties and representations include, in addition to those agreed to for the entire schedule contract:

- (1) Time of delivery/installation quotations for individual orders;
- (2) Technical representations and/or warranties of products concerning performance, total system performance and/or configuration, physical, design and/or functional characteristics and capabilities of a product/equipment/ service/software package submitted in response to requirements which result in orders under this schedule contract.
- (3) Any representations and/or warranties concerning the products made in any literature, description, drawings and/or specifications furnished by the Contractor.

b. The above is not intended to encompass items not currently covered by the GSA Schedule contract.

#### 19. OVERSEAS ACTIVITIES

The terms and conditions of this contract shall apply to all orders for installation, maintenance and repair of equipment in areas listed in the pricelist outside the 48 contiguous states and the District of Columbia, except as indicated below:

None

Upon request of the Contractor, the ordering activity may provide the Contractor with logistics support, as available, in accordance with all applicable ordering activity regulations. Such ordering activity support will be provided on a reimbursable basis, and will only be provided to the Contractor's technical personnel whose services are exclusively required for the fulfillment of the terms and conditions of this contract.

#### 20. BLANKET PURCHASE AGREEMENTS (BPAs)

The use of BPAs under any schedule contract to fill repetitive needs for supplies or services is allowable. BPAs may be established with one or more schedule contractors. The number of BPAs to be established is within the discretion of the ordering activity establishing the BPA and should be based on a strategy that is expected to maximize the effectiveness of the BPA(s). Ordering activities shall follow FAR 8.405-3 when creating and implementing BPA(s).

#### 21. CONTRACTOR TEAM ARRANGEMENTS

Contractors participating in contractor team arrangements must abide by all terms and conditions of their respective contracts. This includes compliance with Clauses 552.238-74, Industrial Funding Fee and Sales Reporting, i.e., each contractor (team member) must report sales and remit the IFF for all products and services provided under its individual contract.

#### 22. INSTALLATION, DEINSTALLATION, REINSTALLATION

The Davis-Bacon Act (40 U.S.C. 276a-276a-7) provides that contracts in excess of \$2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating)

of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall receive less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act apply.

The ordering activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act. The proper Davis-Bacon wage determination will be issued by the ordering activity at the time a request for quotations is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 132-8.

23. SECTION 508 COMPLIANCE.

If applicable, Section 508 compliance information on the supplies and services in this contract are available in Electronic and Information Technology (EIT) at the following: [www.dasnetcorp.com](http://www.dasnetcorp.com)

24. PRIME CONTRACTOR ORDERING FROM FEDERAL SUPPLY SCHEDULES.

Prime Contractors (on cost reimbursement contracts) placing orders under Federal Supply Schedules, on behalf of an ordering activity, shall follow the terms of the applicable schedule and authorization and include with each order –

- (a) A copy of the authorization from the ordering activity with whom the contractor has the prime contract (unless a copy was previously furnished to the Federal Supply Schedule contractor); and
- (b) The following statement:

This order is placed under written authorization from \_\_\_\_\_ dated \_\_\_\_\_. In the event of any inconsistency between the terms and conditions of this order and those of your Federal Supply Schedule contract, the latter will govern.

25. INSURANCE—WORK ON A GOVERNMENT INSTALLATION (JAN 1997)(FAR 52.228-5)

- (a) The Contractor shall, at its own expense, provide and maintain during the entire performance of this contract, at least the kinds and minimum amounts of insurance required in the Schedule or elsewhere in the contract.
- (b) Before commencing work under this contract, the Contractor shall notify the Contracting Officer in writing that the required insurance has been obtained. The policies evidencing required insurance shall contain an endorsement to the effect that any cancellation or any material change adversely affecting the Government's interest shall not be effective—
  - (1) For such period as the laws of the State in which this contract is to be performed prescribe; or
  - (2) Until 30 days after the insurer or the Contractor gives written notice to the Contracting Officer, whichever period is longer.
- (c) The Contractor shall insert the substance of this clause, including this paragraph (c), in subcontracts under this contract that require work on a Government installation and shall require subcontractors to provide and maintain the insurance required in the Schedule or elsewhere in the contract. The Contractor shall maintain a copy of all subcontractors' proofs of required insurance, and shall make copies available to the Contracting Officer upon request.

26. SOFTWARE INTEROPERABILITY.

Offerors are encouraged to identify within their software items any component interfaces that support open standard interoperability. An item's interface may be identified as interoperable on the basis of participation in a Government

agency-sponsored program or in an independent organization program. Interfaces may be identified by reference to an interface registered in the component registry located at <http://www.core.gov>.

27. ADVANCE PAYMENTS

A payment under this contract to provide a service or deliver an article for the United States Government may not be more than the value of the service already provided or the article already delivered. Advance or pre-payment is not authorized or allowed under this contract. (31 U.S.C. 3324)

**TERMS AND CONDITIONS APPLICABLE TO PURCHASE OF  
GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT  
(SPECIAL ITEM NUMBER 132-8)**

1. MATERIAL AND WORKMANSHIP

All equipment furnished hereunder must satisfactorily perform the function for which it is intended.

2. ORDER

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPA) agreements shall be the basis for purchase in accordance with the provisions of this contract. If time of delivery extends beyond the expiration date of the contract, the Contractor will be obligated to meet the delivery and installation date specified in the original order.

For credit card orders and BPAs, telephone orders are permissible.

3. TRANSPORTATION OF EQUIPMENT

FOB DESTINATION. Prices cover equipment delivery to destination, for any location within the geographic scope of this contract.

4. INSTALLATION AND TECHNICAL SERVICES

a. INSTALLATION. When the equipment provided under this contract is not normally self-installable, the Contractor's technical personnel shall be available to the Government, at the Government's location, to install the equipment and to train Government personnel in the use and maintenance of the equipment. The charges, if any, for such services are listed below, or in the price schedule:

None

b. INSTALLATION, DEINSTALLATION, REINSTALLATION. The Davis-Bacon Act (40 U.S.C. 276a-276a-7) provides that contracts in excess of \$2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating) of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall received less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act applies.

The requisitioning activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act. The proper Davis-Bacon wage determination will be issued by the ordering activity at the time a request for quotations is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 132-8.

c. OPERATING AND MAINTENANCE MANUALS. The Contractor shall furnish the Government with one (1) copy of all operating and maintenance manuals which are normally provided with the equipment being purchased.

5. INSPECTION/ACCEPTANCE

The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any equipment that has been tendered for acceptance. The Government may require repair or replacement of nonconforming equipment at no increase in contract price. The Government must exercise its postacceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

6. WARRANTY

a. Unless specified otherwise in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist will apply to this contract.

b. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

c. Limitation of Liability. Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

d. If inspection and repair of defective equipment under this warranty will be performed at the Contractor's plant, the address is as follows:

FiberSensys: 2925 NW Aloclek Drive, Hillsboro, OR 97124

7. PURCHASE PRICE FOR ORDERED EQUIPMENT

The purchase price that the Government will be charged will be the Government purchase price in effect at the time of order placement, or the Government purchase price in effect on the installation date (or delivery date when installation is not applicable), whichever is less.

8. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City or otherwise) covering work of this character, and shall include all costs, if any, of such compliance in the prices quoted in this offer.

9. TRADE-IN OF INFORMATION TECHNOLOGY EQUIPMENT

When an agency determines that Information Technology equipment will be replaced, the agency shall follow the contracting policies and procedures in the Federal Acquisition Regulation (FAR), the policies and procedures regarding disposition of information technology excess personal property in the Federal Property Management Regulations (FPMR) (41 CFR 101-43.6), and the policies and procedures on exchange/sale contained in the FPMR (41 CFR part 101-46).

**TERMS AND CONDITIONS APPLICABLE TO INFORMATION TECHNOLOGY (IT)  
PROFESSIONAL SERVICES (SPECIAL ITEM NUMBER 132-51)**

1. SCOPE

- a. The prices, terms and conditions stated under Special Item Number 132-51 Information Technology Professional Services IT Services within the scope of this Information Technology Schedule.
- b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. PERFORMANCE INCENTIVES

- a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract in accordance with this clause.
- b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
- c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. ORDER

- a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
- b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. PERFORMANCE OF SERVICES

- a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
- b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
- c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
- d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)

(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

- (1) Cancel the stop-work order; or
- (2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

(b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

- (1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
- (2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

(c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

(d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

The Inspection of Services-Fixed Price (AUG 1996) (Deviation - May 2003) clause at FAR 52.246-4 applies to firm-fixed price orders placed under this contract. The Inspection-Time-and-Materials and Labor-Hour (JAN 1986) (Deviation - May 2003) clause at FAR 52.246-6 applies to time-and-materials and labor-hour orders placed under this contract.

7. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Deviation - May 2003) Rights in Data - General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Services.

9. INDEPENDENT CONTRACTOR

All IT Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

## 10. ORGANIZATIONAL CONFLICTS OF INTEREST

### a. Definitions.

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

## 11. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for IT services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

## 12. PAYMENTS

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.232-7 (DEC 2002), (Alternate II – Feb 2002) (Deviation – May 2003) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.232-7 (DEC 2002), (Alternate II – Feb 2002) (Deviation – May 2003) applies to labor-hour orders placed under this contract.

## 13. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

## 14. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. DESCRIPTION OF IT SERVICES AND PRICING

**See Attached Tables**

## Labor Category Descriptions

DasNet IT-70 GSA Schedule GS-35F-0321L	
LABOR ID#	LABOR CATEGORY DESCRIPTIONS
1	Administrative Assistant
	<i>Minimum/General Experience:</i> 0-2 years of experience in office administration.
	<i>Functional Responsibilities:</i> Assist with the application of automated office software suite (e.g., word processing, spreadsheets, graphics, database, communications). Implements administrative office policies and procedures. Coordinates meeting agendas, schedules conferences, and provides related logistics support. Produces and disseminates briefing materials and reports, maintains project files, and manages document tracking and control system. Monitors fax and e-mail transmissions, and performs Internet searches and downloads as required.
	<i>Minimum Education:</i> High school diploma or equivalent.
2	Administration/Clerical (Entry Level)
	<i>Minimum/General Experience:</i> Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
	<i>Functional Responsibilities:</i> (a) Responsible for developing, drafting, writing and editing reports, briefs, proposals, and other documents in support of a client's requirements. (b) Interfaces with personnel to coordinate meetings, maintain logs, records and files, provides end-user support, and performs general administrative duties. (c) Assists in budgetary, billing, and financial management. (d) Responsible for preparing and/or maintaining systems, programming and operations documentation, procedures and methods, including user reference manuals.
	<i>Minimum Education:</i> High school diploma or equivalent.
3	Administration/Clerical (Journeyman)
	<i>Minimum/General Experience:</i> Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
	<i>Functional Responsibilities:</i> (a) Responsible for developing, drafting, writing and editing reports, briefs, proposals, and other documents in support of a client's requirements. (b) Interfaces with personnel to coordinate meetings, maintain logs, records and files, provides end-user support, and performs general administrative duties. (c) Assists in budgetary, billing, and financial management. (d) Responsible for preparing and/or maintaining systems, programming and operations documentation, procedures and methods, including user reference manuals.
	<i>Minimum Education:</i> Associate Degree or related field or college enrollment with/or 8+ years of administrative experience.
4	Administration/Clerical (Senior)
	<i>Minimum/General Experience:</i> Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.

LABOR ID#	LABOR CATEGORY DESCRIPTIONS
	<i>Minimum/General Experience:</i> Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.
	<i>Functional Responsibilities:</i> (a) Responsible for determining enterprise information security standards. Develops and implements information security standards and procedures. (b) Provides tactical information security advice and examining the ramifications of new technologies. (c) Ensures that all information systems are functional and secure.
	<i>Minimum Education:</i> Masters degree or related field or college enrollment with/or 8+ years of field experience.
19	<b>Communications Systems Engineer - Principal</b>
	<i>Minimum/General Experience:</i> More than 9 years of experience in providing specialized system engineering services in support of operational communication systems and data, voice, and video applications. Working knowledge and/or familiarity with applicable DOD/Federal system acquisition processes and standards.
	<i>Functional Responsibilities:</i> Provides technical guidance and advisory assistance in analyzing network characteristics and components, and documents communications system requirements. Installs, tests, and operates communications software and hardware. Conducts performance engineering and predictive modeling in support of system maintenance and prototyping. Inspects communication facilities (inside/outside the cable plant), troubleshoots connectivity and interoperability problems, and designs alternative architectures to alleviate shortcomings. Develops integration and transition plans in support of open system standards and the Defense Information Infrastructure's Common Operating Environment (DII COE).
	<i>Minimum Education:</i> Masters degree in Systems Engineering, Computer Science, Telecommunications, or related field or college enrollment with/or 10+ years of field experience. Certified as Novell, Windows NT, or other network operating Systems Engineer and/or Solutions Developer, Product Specialist, or Trainer.
20	<b>Communications Systems Engineer - Senior</b>
	<i>Minimum/General Experience:</i> More than 6 years of experience in providing specialized system engineering services in support of operational communication systems and data, voice, and video applications. Working knowledge and/or familiarity with applicable DOD/Federal system acquisition processes and standards.
	<i>Functional Responsibilities:</i> Leads tasks and supervises staff in analyzing network characteristics and components, and documents communications system requirements. 22	<b>Communications Systems Engineer - Junior</b>
	<i>Minimum/General Experience:</i> Less than 3 years of experience in providing specialized system engineering services in support of operational communication systems and data, voice, and video applications. Working knowledge and/or familiarity with applicable DOD/Federal system acquisition management process and methodologies.
	<i>Functional Responsibilities:</i> Participates in/supports analysis of network characteristics and components, and documents communications system requirements. Installs, tests, and operates communications software and hardware. Conducts performance engineering and predictive modeling in support of system maintenance and prototyping. Inspects communication facilities (inside/outside the cable plant), troubleshoots connectivity and interoperability problems, and designs alternative architectures to alleviate shortcomings. Develops integration and transition plans in support of open system standards and the Defense Information Infrastructure's Common Operating Environment (DII COE). Performs advanced planning studies in state of the art GOTS and/or COTS communication system technologies.
	<i>Minimum Education:</i> Bachelors degree in Systems Engineering, Computer Science, Telecommunications, or related field or college enrollment with/or 2+ years of field experience. Certified as Novell, Windows NT, or other network operating Systems Engineer and/or Solutions Developer, Product Specialist, or Trainer.
23	<b>Computer Scientist</b>
	<i>Minimum/General Experience:</i>
	<i>Functional Responsibilities:</i> (a) Acts as a senior consultant in complex or mission critical client requirements. (b) Develops, modifies, and applies computer modeling and programming applications to analyze and solve mathematical and scientific problems affecting system and program performance. (c) Participates in all phases of scientific and engineering projects such as research, design, development, testing, modeling, simulating, training, and documentation.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 8+ years of field experience.
24	<b>Computer Forensic and Intrusion Analyst</b>
	<i>Minimum/General Experience:</i>

**DasNet IT-70 GSA Schedule  
GS-35F-0321L**

<b>LABOR ID#</b>	<b>LABOR CATEGORY DESCRIPTIONS</b>
	<p><i>Functional Responsibilities:</i> (a) Provides knowledge in computer and network forensics. (b) Conducts vulnerability assessments/penetration tests of information systems. (c) Develops, researches and maintains proficiency in tools, techniques, countermeasures, and trend in computer and network vulnerabilities, data hiding, and encryption. (d) Identifies, deters, monitors, and investigates computer and network intrusions. (e) Provides computer forensic support to high technology investigations in the form of evidence seizure, computer forensic analysis, and data recovery.</p>
	<p><i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 4+ years of field experience.</p>
25	<p><b>Configuration/Data Management Analyst - Senior</b></p>
	<p><i>Minimum/General Experience:</i> More than 6 years of experience in configuration control and data administration.</p>
	<p><i>Functional Responsibilities:</i> Leads tasks and supervises staff in preparing configuration management plans and procedures, performs configuration audits, monitors trouble reports and change requests, evaluates and selects tools to automate the change control process, and provides status accounting support. Coordinates with users and developers on the release of new software versions. Establishes, operates, and maintains program documentation support libraries. Assists in the evaluation, definition, standardization, and tracking of data elements and object names. Determines entity relationships, assigns attributes, and develops procedures for maintaining enterprise data models. Facilitates working groups of functional experts to establish central repository requirements for data storage, protection, and retrieval. Creates and populates data dictionaries. Provides full range of data mapping, validation, and documentation support.</p>
	<p><i>Minimum Education:</i> Bachelors degree in Engineering, Computer Science, Business, or related field or college enrollment with/or 8+ years of field experience.</p>

LABOR ID#	LABOR CATEGORY DESCRIPTIONS
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 12+ years of field experience.</i>
31	Data Architect
	<i>Minimum/General Experience:</i>
	<i>Functional Responsibilities:</i> (a) Designs and builds relational databases. Performs data access analysis design, and archive/recovery design and implementation. (b) Develops strategies for data acquisitions, archive recovery, and implementation of a database. (c) Works in a data warehouse environment, which includes data design, database architecture, and metadata repository creation. (d) Translates business needs into long-term architecture solutions. (e) Defines, designs, and builds dimensional databases. (f) Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems. (g) Reviews and develops object and data models and the metadata repository to structure the data for better management and quicker access.
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 12+ years of field experience.</i>
32	Data Warehousing Specialist (Entry Level)
	<i>Minimum/General Experience:</i> Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
	<i>Functional Responsibilities:</i> (a) Coordinates the data administration technical function for both data warehouse development and maintenance. (b) Facilitates change control, problem management, and communication among data architects, programmers, analysts, and engineers. (c) Establishes and enforces processes to ensure a consistent, well managed, and well-integrated data warehouse infrastructure. (d) Analyzes and identifies data and metadata requirements. (e) Defines user requirements and database design specifications. (f) Designs, implements, and supports data warehousing requirements. Implements business rules via stored procedures, middleware, or other technologies. (g) Provides product support and maintenance of the data warehouse. (h) Performs data warehouse design and construction. (i) Prepares/implements data verification and testing methods for the data warehouse.
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 2+ years of field experience.</i>
33	Data Warehousing Specialist (Journeyman)
	<i>Minimum/General Experience:</i> Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
	<i>Functional Responsibilities:</i> (a) Provides the implementation, maintenance, and support of company messaging system. (b) Provides technical support on local groupware replication and client dial-up access issues.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 4+ years of field experience.
61	Hardware Engineer (Entry Level)
	<i>Minimum/General Experience:</i> Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
	<i>Functional Responsibilities:</i> (a) Provides analysis related to the design, development, and implementation of hardware for products. (b) Develops test strategies, devices, and systems. (c) Performs stress and performance tests on a variety of computer hardware including circuit boards, processors and wiring.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 2+ years of field experience.
62	Hardware Engineer (Journeyman)
	<i>Minimum/General Experience:</i> Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance

	metrics where applicable.
	<i>Functional Responsibilities:</i> (a) Provides analysis related to the design, development, and implementation of hardware for products. (b) Develops test strategies, devices, and systems. (c) Performs stress and performance tests on a variety of computer hardware including circuit boards, processors and wiring.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 4+ years of field experience.
63	<b>Hardware Engineer (Senior)</b>
	<i>Minimum/General Experience:</i> Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.
	<i>Functional Responsibilities:</i> (a) Provides analysis related to the design, development, and implementation of hardware for products. (b) Develops test strategies, devices, and systems. (c) Performs stress and performance tests on a variety of computer hardware including circuit boards, processors and wiring.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 8+ years of field experience.
64	<b>Hardware Engineer (Master)</b>
	<i>Minimum/General Experience:</i> Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.
	<i>Functional Responsibilities:</i> (a) Provides analysis related to the design, development, and implementation of hardware for products. (b) Develops test strategies, devices, and systems. LABOR ID#	LABOR CATEGORY DESCRIPTIONS
68	Help Desk Technician - Journeyman
	<i>Minimum/General Experience:</i> More than 3 years of experience in manning hotlines or help desks in an automated, multi-user, PC-based office environment.
	<i>Functional Responsibilities:</i> Conducts direct telephone and provides in-person support to users in desktop and electronic mail applications. Installs COTS software and peripherals on individual workstations. Assists users in diagnosing and correcting operating system problems and repairing equipment. Produces service request/problem incident reports, initiates follow-up to ensure timely disposition and closeout, and tracks all action items and referrals through resolution.
	<i>Minimum Education:</i> Associates degree in Engineering, Computer Science, Telecommunications, or related field or college enrollment with/or 2+ years of field experience.
69	Help Desk Technician - Junior
	<i>Minimum/General Experience:</i> Less than 3 years of experience in manning hotlines or help desks in an automated, multi-user, PC-based office environment.
	<i>Functional Responsibilities:</i> Participates in direct telephone and in-person support to users in desktop and electronic mail applications. Installs COTS software and peripherals on individual workstations. Assists users in diagnosing and correcting operating system problems and repairing equipment. Produces service request/problem incident reports, initiates follow-up to ensure timely disposition and closeout, and tracks all action items and referrals through resolution.
	<i>Minimum Education:</i> High school diploma or equivalent.
70	Information Assurance/Security Specialist (Entry Level)
	<i>Minimum/General Experience:</i> Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
	<i>Functional Responsibilities:</i> (a) Determines enterprise information assurance and security standards. (b) Develops and implements information assurance/security standards and procedures. (c) Coordinates, develops, and evaluates security programs for an organization. Recommends information assurance/security solutions to support customers' requirements. (d) Identifies, reports, and resolves security violations. (e) Establishes and satisfies information assurance and security requirements based upon the analysis of user, policy, regulatory, and resource demands. (f) Supports customers at the highest levels in the development and implementation of doctrine and policies. (g) Applies know-how to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. (h) Performs analysis, design, and development of security features for system architectures. (i) Analyzes and defines security requirements for computer systems which may include mainframes, workstations, and personal computers. (j) Designs, develops, engineers, and implements solutions that meet security requirements. (k) Provides integration and implementation of the computer system security solution. (l) Analyzes general information assurance-related technical problems and provides basic engineering and technical support in solving these problems. (m) Performs vulnerability/risk analyses of computer systems and applications during all phases of the system development life cycle. (n) Ensures that all information systems are functional and secure.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 2+ years of field experience.

(l) Supervises complex operations that involve two or more additional functions such as, but not limited to, network operations, systems security, systems software support, and production support activities. (m) Monitors and responds to hardware, software, and network problems. (n) Provides the routine testing and analysis of all elements of the network facilities (including power, software, communications machinery, lines, modems, and terminals). (o) Utilizes software and hardware tools and identifies and diagnoses complex problems and factors affecting network performance. (p) Troubleshoots network systems when necessary and makes improvements to the network.</p>
	<p><i>Minimum Education: Bachelors degree in related field or college enrollment with/or 12+ years of field experience.</i></p>
86	<p><b>Program Manager</b></p>
	<p><i>Minimum/General Experience: 10 years of professional experience in managing and conducting multi-project/multi-task contract assignments.</i></p>
	<p><i>Functional Responsibilities:</i> Ultimately responsible for overall project performance. Leads strategic planning, budgeting, and staffing efforts in response to task requirements. Formulates, communicates, and enforces quality work standards. Monitors progress and resolves any identified issues impacting upon successful product/service delivery. Ensures compliance with all administrative and contractual requirements. Serves as primary point-of-contact with government contract management staff for reporting project status and negotiating change orders. (a) Organizes, directs, and manages contract operation support functions, involving multiple, complex and inter-related project tasks. (b) Manages teams of contract support personnel at multiple locations. (c) Maintains and manages the client interface at the senior levels of the client organization. (d) Meets with customer and contractor personnel to formulate and review task plans and deliverable items. Ensures conformance with program task schedules and costs.</p>
	<p><i>Minimum Education: Masters degree in Business, Engineering, Information Systems Management, or related field or college enrollment with/or 12+ years of field experience.</i></p>

<b>LABOR ID#</b>	<b>LABOR CATEGORY DESCRIPTIONS</b>
87	<p><b>Project Manager</b></p> <p><i>Minimum/General Experience:</i> 8 years of professional experience in managing and conducting technical work assignments.</p> <p><i>Functional Responsibilities:</i> Responsible for handling the day to day management and administration of project tasks. Develops detailed work plans and schedules in response to support service requests. Assigns staff responsibilities and supervises all staff efforts. Utilizes, maintains control over, and redirects available resources as necessary to complete taskings in accordance with scheduled milestones and budgetary constraints. Performs quality checks of all work products. Interacts continually with government technical representatives to present interim results, discuss concerns, and ensure total product/service satisfaction. (a) Leads team on large projects or significant segment of large complex projects. (b) Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components. (c) Provides applications systems analysis and programming activities for a Government site, facility or multiple locations. (d) Prepares long and short-range plans for application selection, systems development, systems maintenance, and production activities and for necessary support resources. (e) Oversees all aspects of projects.</p> <p><i>Minimum Education:</i> Bachelors degree in Business, Engineering, Information Systems Management, or related field or college enrollment with/or 10+ years of field experience.</p>
88	<p><b>Quality Assurance Specialist (Entry Level)</b></p> <p><i>Minimum/General Experience:</i> Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.</p> <p><i>Functional Responsibilities:</i> (a) Provides development of project Software Quality Assurance Plan and the implementation of procedures that conforms to the requirements of the contract. (b) Provides an independent assessment of how the project's software development process is being implemented relative to the defined process and recommends methods to optimize the organization's process. (c) May be responsible for all activities involving quality assurance and compliance with applicable regulatory requirements. (d) Conducts audits and reviews/analyzes data and documentation. (e) Develops and implements procedures and test plans for assuring quality in a system development environment which supports large databases and applications.</p> <p><i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 2+ years of field experience.</p>
89	<p><b>Quality Assurance Specialist (Journeyman)</b></p> <p><i>Minimum/General Experience:</i> Possesses and applies expertise on multiple complex work assignments. LABOR ID#	LABOR CATEGORY DESCRIPTIONS
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 4+ years of field experience.</i>
90	<b>Quality Assurance Specialist (Senior)</b>
	<i>Minimum/General Experience:</i> Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.
	<i>Functional Responsibilities:</i> (a) Provides development of project Software Quality Assurance Plan and the implementation of procedures that conforms to the requirements of the contract. (b) Provides an independent assessment of how the project's software development process is being implemented relative to the defined process and recommends methods to optimize the organization's process. (c) May be responsible for all activities involving quality assurance and compliance with applicable regulatory requirements. (d) Conducts audits and reviews/analyzes data and documentation. (e) Develops and implements procedures and test plans for assuring quality in a system development environment which supports large databases and applications.
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 8+ years of field experience.</i>
91	<b>Quality Assurance Specialist (Master)</b>
	<i>Minimum/General Experience:</i> Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise others.
	<i>Functional Responsibilities:</i> (a) Provides development of project Software Quality Assurance Plan and the implementation of procedures that conforms to the requirements of the contract. (b) Provides an independent assessment of how the project's software development process is being implemented relative to the defined process and recommends methods to optimize the organization's process. (c) May be responsible for all activities involving quality assurance and compliance with applicable regulatory requirements. (d) Conducts audits and reviews/analyzes data and documentation. (e) Develops and implements procedures and test plans for assuring quality in a system development environment which supports large databases and applications.
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 12+ years of field experience.</i>
92	<b>Research Analyst</b>
	<i>Minimum/General Experience:</i>
	<i>Functional Responsibilities:</i> (a) Plans, organizes, and conducts research in a variety of areas, such as new or existing products, science, social science, law or business, etc. in support of an IT initiative. (b) Searches sources such as reference works, literature, documents, newspapers, statistical records, and other sources of information. May use Internet, Intranet, magazines, periodicals, journals, and other media to perform research. (c) Analyzes information and statistical data to prepare reports and studies for use by professionals.
	<i>Minimum Education: Bachelors degree in related field or college enrollment with/or 4+ years of field experience.</i>

LABOR ID#	LABOR CATEGORY DESCRIPTIONS
93	Software Process Improvement (SPI) Consultant I
	<i>Minimum/General Experience:</i> 7 years of software development experience, 3 years of project management experience, and 2 years of acquisition life cycle support experience.
	<i>Functional Responsibilities:</i> Leads consulting assignments to set up an organizational infrastructure capable of initiating and generating software process improvements. Provides expert technical advice and guidance in establishing Software Engineering Process Groups (SEPGs) and facilitates SEPG workshops to document existing software processes and determine those Key Process Areas (KPA) in need of improvement. Provides expert technical advice and guidance in establishing Process Action Teams (PATs) and facilitating PAT meetings to identify and prioritize action items, develop action plans and measures for success, and monitor progress toward the resolution of all process weaknesses in accordance with the Capability Maturity Model (CMM™). Assists external evaluation teams in conducting an independent assessment of SPI efforts and in measuring progress since an initial Software Capability Evaluation (SCE). Also leads consulting assignments to perform SCEs and assess an organization's software development process against the Capability Maturity Model (CMM™) framework. As Lead Evaluator, searches for evidence that documented processes actually exist and for proof that the process documentation is actually understood and used throughout the organization. Reviews documentation, interviews system managers and software practitioners, and defines the process baseline. Analyzes strengths and weaknesses of the software development process, generates findings based on the maturity levels of the organization's processes, and prepares recommendations delineating those areas where software process improvements will be most beneficial.
	<i>Minimum Education:</i> Bachelors degree in Computer Science, Information Systems Management, or related field. Also certified by Carnegie Mellon University's Software Engineering Institute (SEI) in the principles of CMM™ and/or SCE.
94	Software Process Improvement (SPI) Consultant II
	<i>Minimum/General Experience:</i> 7 years of software development experience covering system analysis and programming, testing, configuration management, quality assurance, and database administration.
	<i>Functional Responsibilities:</i> Participates in and supports consulting assignments to set up an organizational infrastructure capable of initiating and generating software process improvements. Assists in establishing Software Engineering Process Groups (SEPGs) and facilitating SEPG workshops to document existing software processes and determine those Key Process Areas (KPA) in need of improvement. Assists in establishing Process Action Teams (PATs) and facilitating PAT meetings to identify and prioritize action items, develop action plans and measures for success, and monitor progress toward the resolution of all process weaknesses in accordance with the Capability Maturity Model (CMM™) and/or SCE. Also participates in and supports consulting assignments to perform SCEs and assess an organization's software development process against the Capability Maturity Model (CMM™) framework. Assists in reviewing documentation, interviewing system managers and software practitioners, and defining the process baseline. Assists in analyzing the strengths and weaknesses of the software development process, generating findings based on the maturity levels of the organization's processes, and preparing recommendations delineating those areas where software process improvements will be most beneficial.
	<i>Minimum Education:</i> Bachelors degree in Computer Science, Information Systems Management, or related field. Also certified by Carnegie Mellon University's Software Engineering Institute (SEI) in the principles of CMM™ and/or SCE.
95	Strategic/Capital Planner

<b>LABOR ID#</b>	<b>LABOR CATEGORY DESCRIPTIONS</b>
100	Systems Engineer/Analyst - Principal
	<i>Minimum/General Experience:</i> More than 9 years of experience in providing system architecture development and software engineering design support.
	<i>Functional Responsibilities:</i> Provides technical guidance and advisory assistance in establishing integrated system level requirements for an overall information, technical, and data architecture in support of multiple software applications. Performs platform capability analyses and COTS/GOTS evaluations, selects components, and develops system and LAN interfaces to ensure compliance with OSI, ISO, IEEE, DII COE, and DoD TAFIM requirements. Constructs models and simulations of computer systems to demonstrate ability to meet user requirements. Executes system stress tests to identify software performance constraints; tunes application and operating system software to enhance performance accordingly. Conducts system engineering analyses to detect hardware/firmware problems and define spectrum of alternative solutions. Plans and implements Software Quality Assurance (SQA) reviews.
	<i>Minimum Education:</i> Masters degree in Engineering, Computer Science, Information Systems, or related field or college enrollment with/or 10+ years of field experience.
101	Systems Engineer/Analyst - Senior
	<i>Minimum/General Experience:</i> More than 6 years of experience in providing system architecture development and software engineering design support.
	<i>Functional Responsibilities:</i> Leads tasks and supervises staff in establishing integrated system level requirements for an overall information, technical, and data architecture in support of multiple software applications. Performs platform capability analyses and COTS/GOTS evaluations, selects components, and develops system and LAN interfaces to ensure compliance with OSI, ISO, IEEE, DII COE, and DoD TAFIM requirements. Constructs models and simulations of computer systems to demonstrate ability to meet user requirements. Executes system stress tests to identify software performance constraints; tunes application and operating system software to enhance performance accordingly. Conducts system engineering analyses to detect hardware/firmware problems and define spectrum of alternative solutions. Manages Software Quality Assurance (SQA) reviews.
	<i>Minimum Education:</i> Bachelors degree in Engineering, Computer Science, Information Systems, or related field or college enrollment with 8+ years of field experience.
102	Systems Engineer/Analyst - Journeyman
	<i>Minimum/General Experience:</i> More than 3 years of experience in providing system architecture development and software engineering design support.
	<i>Functional Responsibilities:</i> Establishes integrated system level requirements for an overall information, technical, and data architecture in support of multiple software applications. <b>LABOR ID#</b>	<b>LABOR CATEGORY DESCRIPTIONS</b>
	<i>Minimum/General Experience:</i> Applies fundamental concepts, processes, practices, and procedures on technical assignments. Performs work that requires practical experience and training. Work is performed under supervision.
	<i>Functional Responsibilities:</i> (a) Provides technical direction and engineering knowledge for communications activities including planning, designing, developing, testing, installing and maintaining large communications networks. (b) Ensures that adequate and appropriate planning is provided to direct building architects and planners in building communications spaces and media pathways meet industry standards. (c) Develops, operates, and maintains voice, wireless, video, and data communications systems. (d) Provides complex engineering or analytical tasks and activities associated with one or more technical areas within the communications function.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 2+ years of field experience.
116	Voice/Data Communications Engineer (Journeyman)
	<i>Minimum/General Experience:</i> Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
	<i>Functional Responsibilities:</i> (a) Provides technical direction and engineering knowledge for communications activities including planning, designing, developing, testing, installing and maintaining large communications networks. (b) Ensures that adequate and appropriate planning is provided to direct building architects and planners in building communications spaces and media pathways meet industry standards. (c) Develops, operates, and maintains voice, wireless, video, and data communications systems. (d) Provides complex engineering or analytical tasks and activities associated with one or more technical areas within the communications function.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 4+ years of field experience.
117	Voice/Data Communications Engineer (Senior)
	<i>Minimum/General Experience:</i> Possesses and applies a comprehensive knowledge across key tasks and high impact assignments. Plans and leads major technology assignments. Evaluates performance results and recommends major changes affecting short-term project growth and success. Functions as a technical expert across multiple project assignments. May supervise others.
	<i>Functional Responsibilities:</i> (a) Provides technical direction and engineering knowledge for communications activities including planning, designing, developing, testing, installing and maintaining large communications networks. (b) Ensures that adequate and appropriate planning is provided to direct building architects and planners in building communications spaces and media pathways meet industry standards. (c) Develops, operates, and maintains voice, wireless, video, and data communications systems. (d) Provides complex engineering or analytical tasks and activities associated with one or more technical areas within the communications function.
	<i>Minimum Education:</i> Bachelors degree in related field or college enrollment with/or 8+ years of field experience.
118	Voice/Data Communications Engineer (Master)
	<i>Minimum/General Experience:</i> Provides technical/management leadership on major tasks or technology assignments. Establishes goals and plans that meet project objectives. Has domain and expert technical knowledge. Directs and controls activities for a client, having overall responsibility for financial management, methods, and staffing to ensure that technical requirements are met. Interactions involve client negotiations and interfacing with senior management. Decision making and domain knowledge may have a critical impact on overall project implementation. May supervise
