

Arthropods

Arthropods account for more than 65% of global species and 85% of animal species. On a temperate grassland, arthropods hold a huge biomass (1,000kg/ha), seconded to plant (20,000kg/ha) and microorganisms (7,000kg/ha) but much higher than mammals (1.2kg/ha), birds (0.3kg/ha), and nematodes (120kg/ha). Arthropods play the role of both pests and beneficial organisms. Some arthropods are important crop pests but others are natural enemies. Some arthropods are important health pests but many crustaceans are important food sources of humankind. Arthropods govern the structures and functions of natural ecosystems, but are always ignored by researchers. On the global scale, the surveys of mammals, birds and vascular plants were relatively perfect because they were economically important and easily surveyed. However, arthropods, despite their ecological and economical importance, have not yet been fully surveyed and recorded due to their difficulties to be sampled. The research on arthropods must be further promoted. The journal, *Arthropods*, is inaugurated to provide a public and appropriate platform for the publication of studies and reports on arthropods.

ARTHROPODS (ISSN 2224-4255) is an international journal devoted to the publication of articles on various aspects of arthropods, e.g., ecology, biogeography, systematics, biodiversity (species diversity, genetic diversity, et al.), conservation, control, etc. The journal provides a forum for examining the importance of arthropods in biosphere (both terrestrial and marine ecosystems) and human life in such fields as agriculture, forestry, fishery, environmental management and human health. The scope of *Arthropods* is wide and embraces all arthropods-insects, arachnids, crustaceans, centipedes, millipedes, and other arthropods. Articles/short communications on new taxa (species, genus, families, orders, etc.) and new records of arthropods are particularly welcome.

Authors can submit their works to the email box of this journal, arthropods@iaees.org. All manuscripts submitted to *Arthropods* must be previously unpublished and may not be considered for publication elsewhere at any time during review period of this journal.

In addition to free submissions from authors around the world, special issues are also accepted. The organizer of a special issue can collect submissions (yielded from a research project, a research group, etc.) on a specific topic, or submissions of a conference for publication of special issue.

Articles

Gastropod shell species utilized by hermit crabs (Decapoda: Anomura) along the Turkish coast of the Levantine Sea

Tahir Özcan, Bilal Öztürk, Tuncer Katagan, Banu Bitlis 45-52

Biodiversity of cultivable molluscan resources from Pulicat Lake, southeast coast of India

D. Mohan, V. Elumalai, G. Subbulakshmi, S. Jayalakshmi, M. Srinivasan 53-65

The most common insect pollinator species on sesame crop (*Sesamum indicum* L.) in Ismailia Governorate, Egypt

S.M. Kamel, A.H. Blal, H.M. Mahfouz, M. Said 66-74

Recurrence of a marine brachyuran crab, *Parapanope euagora* (Crustacea: Decapoda: Brachyura: Galenidae) from East Coast of India

C. Viswanathan, T.V. Suresh, V. Elumalai, M. Pravinkumar, S. M. Raffi 75-79

Morphometric study of newly emerged unmated queens of honey bee *Apis mellifera* L. in Ismailia Governorate, Egypt

S.M. Kamel, M.A.M. Osman, M.F. Mahmoud, K.M. Mohamed, S.M. Abd Allah 80-88

Crustacean fauna of a mussel cultivated raft system in the Black Sea

Murat Sezgin, Eylem Aydemir Çil 89-94

The International Academy of Ecology and Environmental Sciences (IAEES) is a nonprofit and registered international organization. It devotes to promote global ecology and environmental sciences and protect global ecological environments, by publishing scientific publications, conducting research activities, launching environmental programs, disseminating knowledge and technologies, sponsoring conferences, and providing information and discussion spaces, etc. The responsibility for these publications rests with the International Academy of Ecology and Environmental Sciences.
