NEC

Performance

Versatility

A New Line on Customer Response.

In business environments of intense competition, smart companies know what it takes to get ahead: heightened customer response. So, NEC presents a smart new tool to help businesses sharpen that edge: the D^{term} Series E, an intelligent digital terminal. With features and

an elegant and sophisticated business tool that helps you pick up performance

benefits that brilliantly capture the essence of form and function, it helps your business take service and performance to newer, more profitable heights.

Strengthen Your Business Connections.

Ergonomically designed for natural comfort, the D^{term} Series E offers a veritable "toolbox" of menu-driven, softkey functions — each delivering power, versatility and programmability to every station user. In fact, the entire organization of its surface elements is designed for user productivity, helping you strengthen your business connections with speed, service and performance.

Feature-rich and Functionally Powerful.

With stylish designation cards, available in a variety of colors and set against a matte-black or soft-white body, the D^{term} Series E adds an air of attractive sophistication to any room or workstation. There is a model for every level of your business. Each terminal comes complete with these standard — but exceptional — features: 12-foot handset cord, wall-mount unit, speakerphone,

long-loop circuitry, and even a convenient headset jack, built in, at no extra cost.* Personalization functions include: off-hook ring on/off, mute on/off, microphone on/off, headset on/off, plus help and exit keys.

Pick up Your Ability to Respond.

The D^{term} Series E. How form, fit and function combine to elevate service and performance. Pick up your ability to respond.

*The DTP-2 does not support all features. Refer to chart on back cover for specifications.

easy-to-read
3-line display

16 16-LINE WITH DISPLAY

The D^{term} Series E 16-Button with Display is a premiere solution for users whose decisions are driven by information. With 16 buttons and 3 lines of LCD display, it is an ideal solution for management personnel, professional areas and secondary answering positions.

- 16 programmable line keys for immediate line, trunk or feature access
- 2-color LED per key immediately indicates call status
- 8 dedicated function keys for ease of operation
- 3 lines of LCD information (adjustable) with 24 characters per line displays more information for more informed decisions
- Call/message indicator lamp for more immediate call response
- Standard modular connectors for interoperability
- Hands-free speakerphone operation for increased productivity
- Convenient built-in headset jack
- Volume/contrast control for greater user comfort
- 8 softkeys for desktop programmability

16 16-LINE HANDSET CORDLESS

The D^{term} Handset Cordless enables users to move more freely about their workspaces. Based on the popular D^{term} Series E 16-Line Deskset, it provides most of the features and functions of a Series E phone with none of the cord limitations.

- 40 channels for simultaneous use
- 30 – 100 ft. range between handset and base without obstructions
- Fully functional dial pad on handset
- Headset connection
- 4 hours talktime
- 40 hours standby
- Adjustable handset ring tone
- Handset message indication lamp

Note: Supports all Series E features except Optional Accessories; unit is not wall mountable. Battery must be initially charged for 17.5 hours without interruption.

programmable at desktop

32 32-LINE DISPLAY WITH DCU-60 ADD-ON MODULE

The D^{term} Series E 32-Button with Display is a reliable choice for users responsible for multiple lines. With a total of 32 buttons and 3 lines of LCD display, it is ideal for call-intensive areas, receptionists and customer service operations.

- 16 programmable line keys for immediate line, trunk and feature access
- 2-color LED per key immediately indicates call status
- 8 dedicated function keys for ease of operation
- 16 programmable speed dial keys for access to frequently dialed numbers
- 3 lines of LCD information (adjustable) with 24 characters per line displays more information for more informed decisions
- Call/message indicator lamp for more immediate call response
- Standard modular connectors for interoperability
- Hands-free speakerphone operation for increased productivity
- Convenient built-in headset jack
- Volume/contrast control for greater user comfort
- 8 softkeys for desktop programmability
- The Add-On Module delivers flexibility and growth to the D^{term} Series E.
- 60-Button Add-On Module for larger attendant operations
- 48 programmable line keys to increase attendant productivity

1 ADD-ON MODULE

The Add-On Module delivers flexibility and growth to the D^{term} Series E.

- 60-Button Add-On Module for larger attendant operations
- 48 programmable line keys to increase attendant productivity

8 8-LINE WITH DISPLAY

The D^{term} Series E 8-Button with Display brings 3 lines of LCD information to the standard user station. It is an ideal solution for middle management personnel, sales staff and customer service operations.

- 8 programmable line keys for immediate line, trunk and feature access
- 2-color LED per key immediately indicates call status
- 8 dedicated function keys for ease of operation
- 3 lines of LCD information (adjustable) with 24 characters per line displays more information for more informed decisions
- Call/message indicator lamp for more immediate call response
- Standard modular connectors for interoperability
- Hands-free speakerphone operation for increased productivity
- Convenient built-in headset jack
- Volume/contrast control for greater user comfort
- 8 softkeys for desktop programmability

2 2-LINE NON-DISPLAY

Cost-effective digital multiline set.

8 8-LINE NON-DISPLAY

The D^{term} Series E 8-Button is a flexible and reliable station terminal. It is ideal for low-traffic, courtesy or production applications.

- 8 programmable line keys for immediate line, trunk and feature access
- 2-color LED per key immediately indicates call status
- 8 dedicated function keys for ease of operation
- Call/message indicator lamp for more immediate call response
- Standard modular connectors for interoperability
- Hands-free speakerphone operation for increased productivity
- Convenient built-in headset jack
- Volume control for greater user comfort

built-in ADAPTABILITY

The D^{term} Series E incorporates advanced voice/data features for optimal user efficiency on the NEAX 2400 IPX, NEAX 2000 IVS², NEAX EXPRESS and Electra Elite integrated voice platforms.

A microprocessor within the Series E terminal detects events and accepts direction from the system, making the Series E among the most flexible and adaptable station terminals available today.

HEADSET-READY

All D^{term} Series E terminals come with a

built-in headset jack for quick and easy switching between handset and headset use.
