	DM-MD128X128	128x128 DigitalMedia™ Switcher	PRICE
●		A modular blade-based 128x128 DigitalMedia matrix switcher offering ultra-fast digital video and audio switching for massive signal routing applications. Enables lossless HD signal distribution over CAT type twisted pair copper or fiber optic cable. Provides complete management for SD, HD, UHD, 2K, 4K, and computer signals with advanced HDCP support, EDID resolution management, CEC signal management, USB signal routing, integrated Ethernet switch, and a range of selectable input and output types. Hot-swappable redundant power supplies ensure ultimate reliability for mission-critical projects.

CH-PWM1-IW	In-wall 1 channel LED control module	PRICE
-------------------	---	--------------

The interface CH-PWM1-IW is a Cresnet control module to dim a single channel low voltage LED light. Additional inputs allow local control via pushbuttons or a potentiometer with feedback to the Control System. The CH-PWM1-IW has an additional output to connect a slave module CH-PWM3S-IW to control multiple LED fixtures on the same circuit or to have more power. The compact design allows installation in a single gang European electrical backbox.
