#### Make free calls over the Internet!\*

The Hawking HNT1 Net-Talk™ USB Internet Phone is a one-of-a-kind handset that allows you to make free\* voice calls from anywhere around the world with a broadband Internet connection! The Internet Phone is designed to be as easy to use as a standard cell phone and lightweight too. Whether you're calling via a laptop from a cafe or making international calls from the airport; the Internet Phone gives you the freedom to make discreet calls anywhere you go.

Designed for Skype, the handset allows you to control the program's most commonly used features all from the unit itself. With advanced features like echo-cancellation and built-in volume controls, your calls remain crystal clear. The Internet Phone is also compatible with today's most popular messaging software that support voice call capabilities, including AIM, MSN Messenger, Yahoo Messenger, and Google Talk. Additionally, the phone can also double as a separate microphone and speaker unit for recording audio content and listening to music. With the Hawking Net-Talk™ Internet Phone, your calls are now clear and free!

#### READY, NETWORK & GO!

It's easy to install, it's easy to use! Everyone can do it.

#### Step 1 - Connect the HNT1 to the Computer

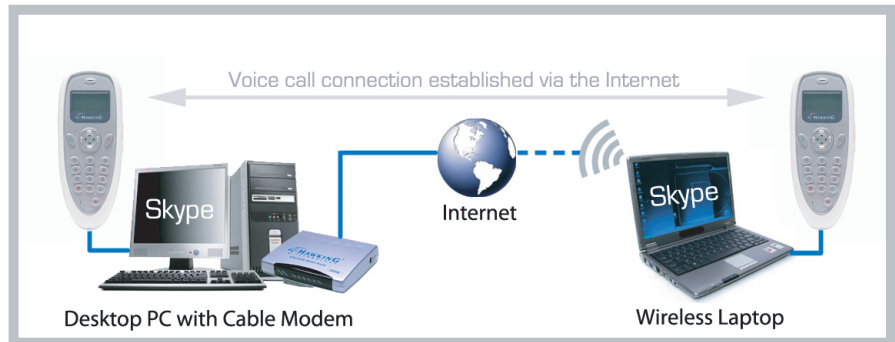

Plug in the USB Phone via the included USB cable into your computer. Let Windows install the necessary audio drivers for you.

#### Step 2 - Install the Net-Talk™ software for Skype

Insert the included Setup Wizard CD into your computer's CD-ROM drive. Then follow the on-screen instructions to configure your USB Phone.

#### Step 3 - Launch Skype (or compatible VoIP program) and call your friends!

#### WIRELESS NETWORK DIAGRAM:

\*Voice call quality depends on condition of the network you are using.
