

Product Notice No: 0097

New SW Key Options for MSBG Products

A. Notice Subject

In MSBG with SW version 6.0 new License (Feature) Key options were added to the existing options, in order to allow different packages and services.

B. Notice Date

May 31, 2010

C. Notice Effective Date

May 31, 2010

D. Notice Details

Multi-Service Business Gateway products, Mediant 1000 MSBG and Mediant 800, as of SW version 6.0, support new license key options. Those options enable and disable different chargeable services and options (see Effect Part Numbers below):

- Firewall + VPN – this License Key is enabled by default for all MSBG
- SBC
- SAS
- ADVANCED Routing – now supporting OSPF
- BGP
- Routing – if disabled, the MSBG behaves as a pure VoIP gateway without WAN and Routing functionality.

E. Upgrade to Version 6.0

When upgrading a Mediant 1000 MSBG or a Mediant 800 from version 5.8 to version 6.0 and higher, the user should verify that the Routing option in the license key is enabled (e.g., via the ini file or Software Upgrade Key page). If it is not, a SW upgrade (license key) must be ordered.

In case an MSBG product will be upgraded to version 6.0 that was shipped without the Routing option, the Data section in the Web GUI is not be displayed.
