1-3 DISCLAIMER

The guidelines contained in this document are for reference only. The material is provided without warranty or liability of any kind to the Department. Every effort has been made to make the documentation as complete and accurate as possible without errors.

This information is provided on an "as is" basis. Updates to these guidelines will be made as needed due to any errors found in the documentation, new programs, changes in software, software enhancements, or as policy and management dictate.

As with any documentation or guidelines, improvements can and should be made. Any additions, suggestions or comments for improvement are encouraged. This documentation is not meant to be a complete instructional document. The intent is to provide guidelines that, if followed, will result in better quality and consistency for electronic plans and documents.

Any recommendation for improvement to this documentation is welcomed. Any errors found should be brought to the attention of the DOT so corrections can be made. Any additional information or detailed explanation needed to this documentation should be documented and mailed to:

Director of Engineering
Georgia Department of Transportation
One Georgia Center
600 W. Peachtree St. N.W.
Atlanta, GA 30308, US

Attn: Plan Presentation Committee

Or email to:

SolutionsCenter@dot.ga.gov

(When submitting issues through the Solutions Center/Remedy, please specify a subject line of "*Plan Presentation Committee*" to ensure the issue can be assigned correctly.)

1-4 EDG REVISION SUMMARY

Version History:

- Version 5.1 – Release Date: **October 2016**
- Version 5.0 – Release Date: **April 2016**

Any subsequent revisions to Version 5.0 of this document shall be documented below.

Revisions

October 2016	EDG Version 5.1
	Removed white active point in each REQD R/W cell.
	Repaired level filters.
	Repaired Section 60 - Reference attachment button.
	Repaired Section 11 - Reference attachment macro for PW, added Fence Block and Shape, and Clip Boundaries buttons.
	Repaired Section 28 - Reference attachment macro and level settings.
	Corrected pavement fabric width in v8i cell library, changed to 18" to match 446-1100 pay item.
	Revised ROW Cover Legend to reflect updates to utility cells.
	Removed note, "Designed in English Units" from Cover sheet cells.
	Added 30 Scale cell selector for Utility Office.
	Revised Sign General Notes.
	Added Sections "19" Staging Cross-Sections and Profiles to titleblock of GPLN cell.
	Added Limited Access cells.
	Added level for North Arrow - Section 20 Plans.
	Added PESMT-Desc text level to Section 19 Plans.
	Revised current list of Erosion Control cells- V8i.
	Revised current list of Erosion Control cells- V7.
	Revised 30 scale cell selectors for Utilities on Signal Plans.
	Revised Bridge V8i workspace files.
	Turned off designated Control points in Sections 11, 13, 24, 25, 27, 30, 32, 34, & 44.
	Added Type 12A, B, and C guardrail anchors.
	Revised "No Place" note for construction debris.
April 2016	Released EDG Version 5.0

~ This page intentionally left blank ~

1-5 GENERAL INFORMATION

Term EDG

In places where EDG is mentioned in this document, unless otherwise stated, it represents an acronym for Electronic Data Guidelines and not the MicroStation “EDG” utility which is a non-graphical design file editor.

English Units

This document and the supporting CADD Standard files were written based upon Projects with English Units. Metric (System International) versions of these items will only be produced if the Department elects to initiate new projects in the Metric format.

Reference Files

The use of MicroStation reference files is required to prevent duplicate design information. Therefore, project design elements should exist in only one design file in most cases.

Models

The only model used in MicroStation for all Department DGN files shall be the “Default” model. No other model names or types are permitted.

DGN Files

All DGN files shall be in “2D” utilizing the Department supplied MicroStation seed file.

Topography

Only one topography file shall exist for a project. Topography updates shall be coordinated between the project manager and the SDE.

As a general rule, topography files will remain independent files and should not be modified. However, special situations may require manipulation of these files at the discretion of the project manager and may require coordination with the project SDE. Only topographic information should be included in topography files. No centerline information should be created or shown in the topography files.

1-6 CURRENT DOT SOFTWARE VERSIONS

The current versions of major software used and accepted by the Department are identified on the R.O.A.D.S. website:

<http://www.dot.ga.gov/PS/DesignSoftware#tab-2>

All project deliverables shall be submitted to the Department in MicroStation and InRoads Suite software format. Technical support and documentation for MicroStation and InRoads Suite versions other than the version identified on the R.O.A.D.S. website shall not be provided by the Department. The INI files, DGNLIB files, XIN files, drawing commands, grid files, menus, workspaces, etc., provided by the Department may not work for other versions.

MicroStation provides methods for exchanging select file types with other CADD and graphics software formats, but data is often modified during the conversion process. If CADD or graphics software other than MicroStation V8i is used, those files shall be converted to MicroStation V8i file format and thoroughly reviewed prior to transmitting to the Department.

The Department shall not provide any assistance in the conversion of non MicroStation V8i CADD or graphics software files to MicroStation V8i format. All files converted to MicroStation V8i file format shall be required to meet all Department standards as defined in this document.

1-7 GUIDELINES FOR SUBMITTING ELECTRONIC DATA TO THE DEPARTMENT

All electronic data furnished to the Department shall use the appropriate naming scheme and format for the type of data to be transmitted. It is very important to clearly communicate what is being transmitted and to describe the format of the transmitted files.

A letter shall be attached to **all submissions** stating briefly:

1. File content
2. File format (zipped, Windows 7, MicroStation, InRoads Suite etc. and the utility used)
3. MicroStation and InRoads Suite version (as identified on R.O.A.D.S. website)
4. Number of CD/DVDs.
5. Files shall be in the proper format before transmitting to the Department. No translating of information by Department personnel shall be required.
6. If files are zipped or backed up, a brief explanation of the recommended procedure to extract the files shall be included.
7. Versions of software must be current to or fully compatible with that of the Department.
8. Each disk submitted shall be labeled and dated with a minimum of the PI# and date. If a series of disks are transmitted, the disk label shall also include the disk number and the total disks of that set, (ex: 1 of 10). Other subsequent disks shall be labeled so as to uniquely identify each group or set and shall include the sequence number followed by the total number in the group (ex: 2 of 10, 3 of 10, etc.)
9. The Department reserves the right to reject any file transmitted that does not conform to these guidelines.

Deviation from Format

Any file to be submitted that deviates from the above mentioned format must have prior Department approval. The approval must be in writing with the name of the individual from the Department who permitted the varying format.

Using Backup, Disks, and Compression

In general, all files are to be furnished on one of the following in order of preference:

- 1) **CD**
- 2) **DVD**
- 3) **FTP**

Winzip

If data compression is necessary, WINZIP shall be the standard format used. In addition the WINZIP executable used shall be included with the transmitted files.

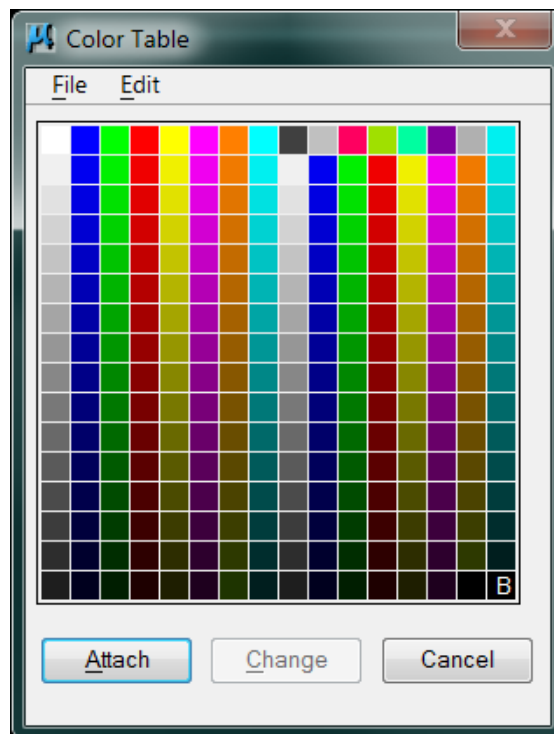

1-8 GRAPHIC STANDARDS

MicroStation

Color Table:

The Department has one acceptable MicroStation color table: GDOTcolor.tbl

GDOTcolor.TBL

MicroStation

Line Code:

LC	=	#	→	RESULTING LINE STYLE
0	=	0	=	SOLID
1	=	1	=	DOTTED
2	=	2	=	MEDIUM DASH
3	=	3	=	LONG DASH
4	=	4	=	DOT DASH
5	=	5	=	SHORT DASH
6	=	6	=	DASH DOT DOT
7	=	7	=	LONG DASH SHORT DASH

MicroStation

Weight Number:

WT = # → RESULTING WEIGHT / THICKNESS

0	=	0.005"
1	=	0.010"
2	=	0.015"
3	=	0.020"
4	=	0.025"
5	=	0.030"
6	=	0.035"
7	=	0.040"
8	=	0.045"
9	=	0.050"
10	=	0.055"
11	=	0.060"
12	=	0.065"
13	=	0.070"
14	=	0.075"
15	=	0.080"
16	=	0.085"

WEIGHT VS. THICKNESS

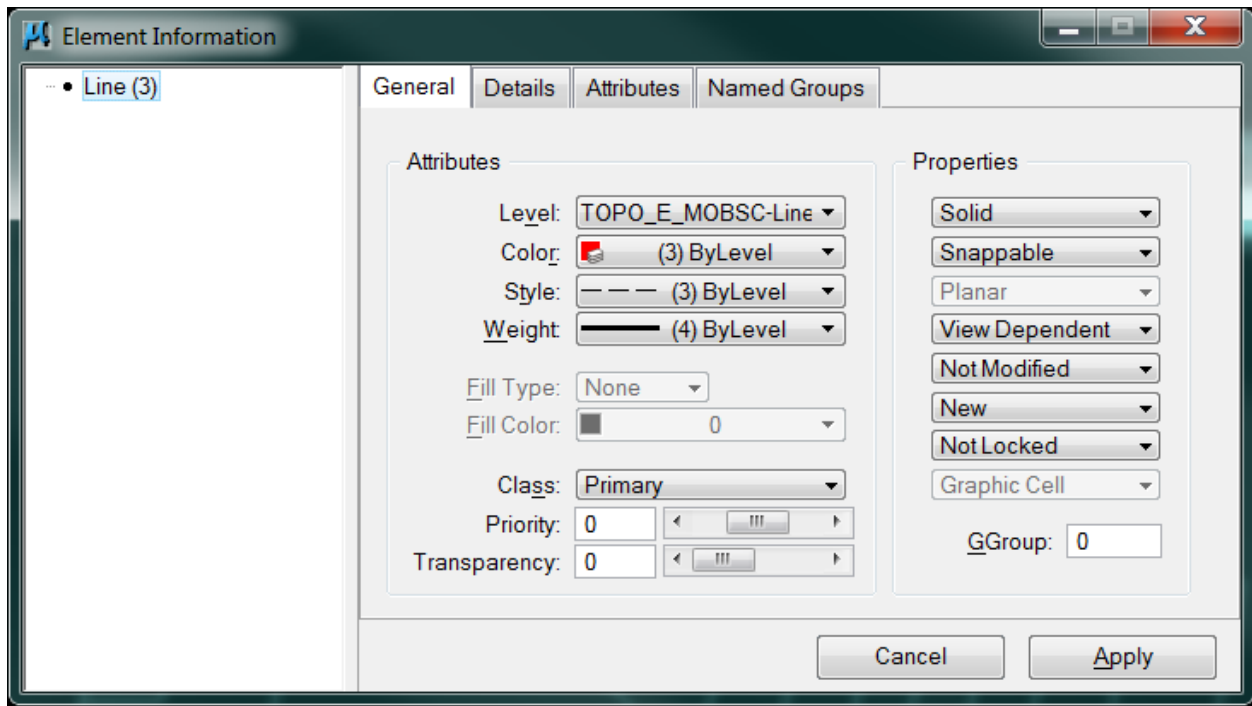

*** NOTE:** MicroStation weights range from 0 to 31. The resulting weight as shown above is not a MicroStation design file thickness value as viewed on the monitor screen, but is the measured width or thickness on a hardcopy plot from an output device such as a printer or a plotter. The resulting value may vary slightly in appearance or measured width due to plotter specific controls. A measured value of width or thickness as shown above is desired and should be obtained by the user automatically when utilizing the Department’s supplied MicroStation V8i workspace.

If upon review of plans submitted to the Department or submitted by another office of the Department, it is found that the line thickness, weight, or style does not meet the Departments guidelines, the Department shall reserve the right to reject those plans.

MicroStation Element Symbology with ByLevel

ALL graphic elements placed in ALL MicroStation DGN files shall utilize “ByLevel” symbology for Color, Style and Weight. The definitions for all level symbologies are controlled by the level DGNLIB that is included in GDOT MicroStation Workspace. All graphic elements placed in DGN files must utilize ByLevel symbology to maintain the proper display characteristics to meet the Department’s EDG standards.

The ByLevel element display settings for color, style and weight are automatically set each time that a user selects a new active level within MicroStation when utilizing the GDOT MicroStation Workspace. This feature eliminates the user having to set the element display characteristics manually for each graphic element placed. The user only needs to select the proper level for a particular element and begin drawing; the newly placed elements will automatically pick up the correct ByLevel display symbology for each level.

MicroStation

User Defined Line Styles:

The Department has created over 450 user defined line styles for use in displaying Utilities, Erosion Control Items, Guardrail, Fencing and many other linear displayed features. The only acceptable line styles that the Department will accept are those that the Department has provided. Any suggestions for future line styles should be submitted to the **Plan Presentation Committee**.

Email to:

SolutionsCenter@dot.ga.gov

(When submitting issues through the Solutions Center/Remedy, please specify a subject line of “*Plan Presentation Committee*” so the issue will be assigned correctly.)

Microstation - File Format

The English Seed file is noted as GDOT_V8_2D.DGN and is different than the SEED2D.DGN provided with the MicroStation software. The original SEED2D.DGN file provided with MicroStation shall not be used for creating files for the Department.

English Units

FOR ALL ENGLISH MICROSTATION FILES

MicroStation V8i file format shall be used for all CADD files submitted to the Department using the Department supplied seed file “GDOT_V8_2D.dgn”.

1-9 Working Units

MicroStation allows the user to draw in real world units such as feet and inches. These real world units are called working units. Working units are expressed as Master Units (the largest units in a design file, such as feet) and fractional Sub Units (such as tenths or inches).

The default definition for the foot in MicroStation is the International Foot. The Georgia State Plane Coordinate System upon which GDOT roadway design jobs are based is measured in U.S. Survey Feet. GDOT uses the U.S. Survey Foot definition, **not the International Foot**, as the standard Master Unit.

U.S. Survey Feet (Georgia DOT plans)

U.S. Survey Feet → 1 foot = 1200/3937 meters ≈ 0.3048006096012 meters (0.3048006 rounded)

International Feet (not for use in Georgia DOT plan submissions)

International Feet → 1 foot = 0.3048 meters

GDOT has developed a standard unit definition file, *GDOT_Units.def*, to define the U.S. Survey Foot as the standard Master Unit. This file can be obtained from the Georgia Department of Transportation website.

MicroStation design files used in plan preparation shall use the following standard working units as defined in the GDOT seed files and in *GDOT_Units.def*:

Unit Names	Label
Master Unit: US Survey Feet	'
Sub Unit: US Survey Inches	“

The GDOT seed files have been created with the standard working units described above and with a standard resolution of 12,000 per U.S. Survey Foot. These settings shall not be changed by the user.

1-10 MINIMUM TEXT SIZES

English Text Size Guidelines – Construction Plans

The minimum size for text on a set of Construction plans shall be 0.12 inches on the final D size (24"x36") plot.

Text information shown on all sections of Construction plan drawings (except Right of Way Plans) shall be placed at a minimum size of (0.12 X the scale for the plans). Plans are usually done at 1 inch equals fifty feet (1"=50') which would equal a text size of 6 feet ($0.12 \times 50 = 6$) or for 1 inch equals twenty feet (1"=20') which would equal a text size of 2.4 feet ($0.12 \times 20 = 2.4$).

English Text Size Guidelines - Right of Way Plans

The minimum size for text on a set of Right of Way plans shall be 0.15 inches on the final D size (24"x36") plot.

Text information shown on Right of Way plan drawings shall be placed at a minimum size of (0.15 X the scale for the plans). Plans are usually done at 1 inch equals fifty feet (1"=50') which would equal a text size of 7.5 feet ($0.15 \times 50 = 7.5$) or for 1 inch equals twenty feet (1"=20') which would equal a text size of 3.0 feet ($0.15 \times 20 = 3.0$).

NOTE ON WEIGHT FOR TEXT

It is important on small text to keep the weight to a maximum of weight=2 and preferably either weight 0 or 1. Heavier weights, especially numbers, when reduced to a small document will appear as blurred objects and are not legible.

Why the minimum size and weight for text

The primary need for the minimum text size is to allow for filing legible courthouse documents, deeds, etc. Plans or selected areas of plans are often reduced to a letter size document to provide the legal description to be filed in the courthouse as the final document.

1-11 SAVING VIEWS IN MICROSTATION FOR PLOTTING

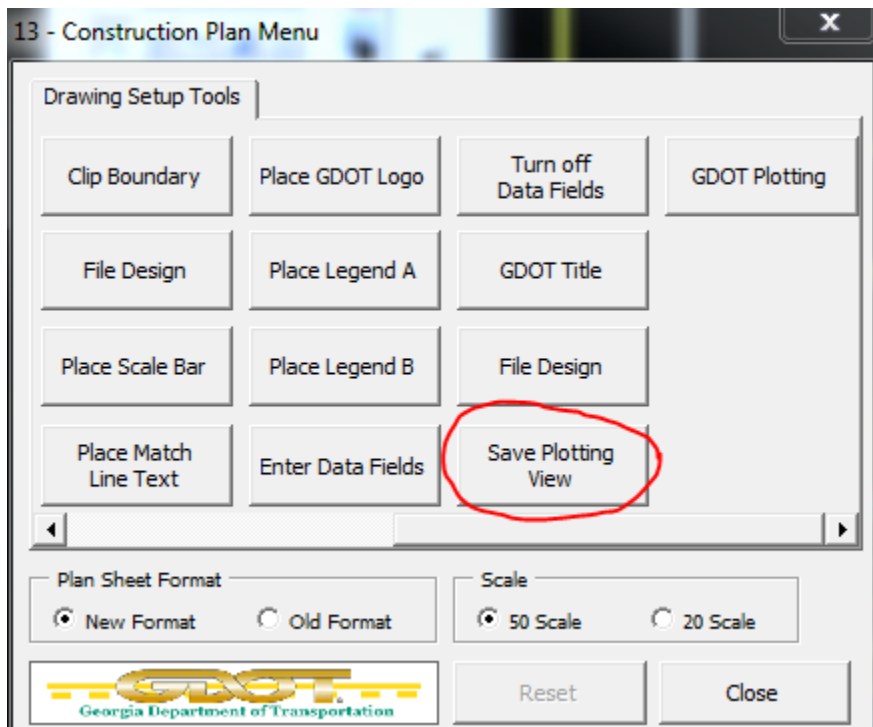

Problem: Recalling information to plot

When design files are provided for review, modification, revision, etc., the personnel viewing or modifying the design files cannot easily determine which reference files were attached or what levels were displayed in producing the final hardcopy plot.

Solution: Saved Views

For each drawing file and all major files for which a plot is created from, a Saved View called “***G*PLOT**” shall be created that contains the exact levels displayed for the active file and all reference files attached which produce the final plot.

Once the file is rotated on the screen correctly; the view attributes are set correctly; all reference files attached with appropriate levels displayed; all reference files clipped; the user can key-in: “***SV=G*PLOT**” to save the view. This will create a saved view named “***G*PLOT**” with all the level and clipping settings for plotting. Alternatively, the “***G*PLOT**” view can be saved with GDOT Tools, as shown below:

1-12 FILE LOCATIONS

USING PI # FOR SUBDIRECTORY

The P.I. # followed by four characters shall be used to describe the type of MicroStation design file.

Assuming the drive letter M:\ is used as the root directory and a PI Number of 1234567 is the active project. The file prefix shall be the **7 digit number** 1234567 plus the 4 character description.

Example: 1234567MAIN.dgn for the main design file.

This naming convention allows many of the processes in attaching reference files to be automated. The **7 digit number prefix** shall be used in order for these automation tools to function properly.

All design file names shall use the 7 digit PI Number as part of the file name with the exception of the **Sheetlayout.dgn** file.

All MicroStation files shall be located in a subfolder of the PI Number named \DGN\.

Example: M:\1234567\DGN

Note: **MicroStation reference files shall be attached without the Save Full path option on.** By following the conventions set forth in the file names and their locations, the project will work whether or not a drive letter changes due to the transfer of files.

1-13 MISCELLANEOUS ITEMS

A clipped boundary shall be placed so that a match line is created for the adjacent drawings to be plotted. This minimizes the possibility for duplication of data between plan drawings.

It is recommended to display levels on a final plot as illustrated later in these guidelines. This will help ensure consistency as well as assist in the automation of procedures. As with any document there may be items that have not been addressed and the project designer will need to make the final determination of level display for each drawing. **Documentation shall be provided with a detailed summary for any information placed in MicroStation files that is not listed in Sections 2-4, 2-5, 2-6, 2-7, and 4-2.**

Documentation of procedures and project history shall be maintained in a project log file.

2-1 Design File Names and Level Schemes

The following sections describe in a spreadsheet format the Design File Name and Level Conventions that shall be used on all Georgia Department of Transportation plans.

2-2 PLAN DRAWING DGN FILE NAMES

The Department utilizes two formats for naming the drawing DGN files. The drawing file naming is based on being a single drawing per drawing DGN file or a multi drawing per drawing DGN file. This naming format must be followed to utilize the GPLOT plotting utilities.

As the name implies Single Drawing DGN files shall contain only one plan drawing per DGN file. As a general rule all Single Drawing DGN files will have a plan view showing one or more reference files based on the State Plane Coordinate System. All plan sections designated as Single Multi DGN File sections shall utilize the Single Drawing format.

Multi Drawing DGN files will typically contain multiple plan drawings in the same DGN file. These plan drawings are primarily sections that do not show information referenced to the State Plane Coordinate System.

Some plan sections contain drawing DGN files for both Single Drawing and Multi Drawing formats.

The Plan Sections designated as Single Drawing DGN are as follows:

- (01) Cover Drawing
- (11) Construction Layout
- (13) Construction Plan
- (18) Special Grading Drawings
- (21) Drainage Area Map
- (24) Utility Plans
- (30) Mitigation Plans
- (44) Utility Relocation Plans
- (50) Erosion Cover Drawing
- (53) ESPCP Drainage Area Map
- (55) EC Watershed Map-Site Mon.
- (60) Right of Way Plans-Cover
- (61) Right of Way Plans-Drawings

Georgia Department of Transportation
ELECTRONIC DATA GUIDELINES Version 5.1

The Plan Sections that contain Single Drawing and Multi Drawing DGN files are as follows:

- (19) Staging Plans
 - Plan Drawings – Single Drawing DGN
 - Profile Drawings – Multi Drawing DGN
 - Cross Sections – Multi Drawing DGN
- (25) Lighting Plans and Details
 - Plan Drawings – Single Drawing DGN
 - Detail Drawings – Multi Drawing DGN
- (26) Signing and Marking Plans
 - Plan Drawings – Single Drawing DGN
 - Detail Drawings – Multi Drawing DGN
- (28) ITS Plans
 - Plan Drawings – Single Drawing DGN
 - Detail Drawings – Multi Drawing DGN
- (29) Landscaping Plans
 - Plan Drawings – Single Drawing DGN
 - Detail Drawings – Multi Drawing DGN
- (32) Retaining Wall Plans
 - Plan Drawings – Single Drawing DGN
 - Detail Drawings – Multi Drawing DGN
- (34) Sound Barrier Plans
 - Plan Drawings – Single Drawing DGN
 - Detail Drawings – Multi Drawing DGN

All other Plan Sections will utilize Multi Drawing DGN drawing files.

Single Drawing DGN File Name Format

Single Drawing DGN drawing file name prefixes shall utilize the 7 digit P.I. # plus the 2 digit Plan Section number followed by the 4 digit Drawing Number. The following example demonstrates shows the proper naming for Section **(13) Construction Plan**:

- First plan drawing: 1234567_13-0001.dgn
- Second plan drawing: 1234567_13-0002.dgn
-

Multi Drawing DGN File Name Format

Multi Drawing DGN drawing file name prefixes shall utilize the 7 digit P.I. # plus the 2 digit Plan Section number. The following example demonstrates the proper naming for Section **(15) Mainline Roadway Profile**:

- 1234567_15.dgn

Note: It is possible to have a Multi Drawing DGN drawing file containing only one plan drawing. Single Drawing DGN drawing files shall contain one plan drawing only.

**Georgia Department of Transportation

File Name	Level Name	Number	Description
2-5 (51) ESPCP General Notes	SHT_B_51-ESPC-General-Notes	28043	ESPCP General Notes (sheet specific)
	SHT_B_Legend-Logo-Scale	28056	Sheet border legend, logo, scale bars, location sketch-Cell
	SHT_B_Misc-P	28067	Sheet border miscellaneous items, notes, etc. (plotted)
	SHT_B_North-Arrow	28068	Sheet border north arrow-Cell
	SHT_B_Plot-Sub-Text	28069	Sheet border plot substitution text-Text
	SHT_B_Plotting-Info-Tags	28070	Sheet border plotting information tags-Text
	SHT_B_Sheet-Outline-Line	28072	Sheet border sheet outline lines-Line
	SHT_B_Sheet-Outline-Text	28073	Sheet border sheet outline text-Text
	SHT_B_Title-Block	28075	Sheet border Title block-Cell
	SHT_B_Plot-Border-Inner-Line	28085	Plot border inner line-Line
	SHT_B_Plot-Border-Outer-Line	28086	Plot border outer line-Line
	SHT_B_51-ESPC-General-Notes-Table-Instructions	28090	ESPCP Notes table instructions-Text (This level does not plot!)
	SHT_B_51-ESPC-General-Notes-Table-0	28091	ESPCP General Notes Table 0-Text
	SHT_B_51-ESPC-General-Notes-Table-2	28092	ESPCP General Notes Table 2-Text
	SHT_B_51-ESPC-General-Notes-Table-Link	28093	ESPCP General Notes Table Link
	SHT_B_51-ESPC-General-Notes-Table-1	28094	ESPCP General Notes Table 1-Text
	SHT_B_51-ESPC-General-Notes-Table-3	28095	ESPCP General Notes Table 3-Text
	SHT_B_51-ESPC-General-Notes-Table-4	28096	ESPCP General Notes Table 4-Text
	SHT_B_51-ESPC-General-Notes-Table-5	28097	ESPCP General Notes Table 5-Text
	SHT_B_51-ESPC-General-Notes-Table-6	28098	ESPCP General Notes Table 6-Text
	SHT_B_51-ESPC-General-Notes-Table-7	28099	ESPCP General Notes Table 7-Text
	SHT_B_51-ESPC-General-Notes-Table-8	28100	ESPCP General Notes Table 8-Text
	SHT_B_51-ESPC-General-Notes-Table-9	28101	ESPCP General Notes Table 9-Text
	SHT_B_51-ESPC-General-Notes-Table-10	28102	ESPCP General Notes Table 10-Text
	SHT_B_51-ESPC-General-Notes-0	28103	ESPCP General Notes 0-Text
	SHT_B_51-ESPC-General-Notes-1	28104	ESPCP General Notes 1-Text
	SHT_B_51-ESPC-General-Notes-2	28105	ESPCP General Notes 2-Text
	SHT_B_51-ESPC-General-Notes-3	28106	ESPCP General Notes 3-Text
	SHT_B_51-ESPC-General-Notes-4	28107	ESPCP General Notes 4-Text
	SHT_B_51-ESPC-General-Notes-5	28108	ESPCP General Notes 5-Text
	SHT_B_51-ESPC-General-Notes-6	28109	ESPCP General Notes 6-Text
	SHT_B_51-ESPC-General-Notes-7	28110	ESPCP General Notes 7-Text
	SHT_B_51-ESPC-General-Notes-8	28111	ESPCP General Notes 8-Text

4-1 Master Level Name and ByLevel Symbology Index

The following sections describe in a spreadsheet format the Master MicroStation Level Name and Bylevel Symbology Index that shall be used on all Georgia Department of Transportation plan drawings.

**Georgia Department of Transportation
ELECTRONIC DATA GUIDELINES Version 5.1
4-2 Level Name - Reference File Name Designations**

The Root Names of each of the level sections are used to separate the levels into the appropriate DGN files. Under no circumstances are levels without the appropriate root name to be used in any GDOT DGN file, as such there will never be more than one of the thirty-six Level Root Names used in any file (excluding Cross Section, Profile, Traffic Diagram and Typical Section DGN files).
