One inch in space constitutes a square. Business Cards, five lines or less, five cents per line for first insertion, and five cents per line for each subsequent insertion. Transient advertisements must be paid for in advance. Regular advertisements payable quarterly.

SECRET SOCIETIES.

- Unity Lodge Number Twenty-two. A. O. U. W. Meets every Wednesday evening in Bronson's Block.
- A. B. HENNING, T. F. STAIR, Recorder, Master
- Crescent Lodge, No. 77, A. F. & A. M. Regular Communication 1st and 3d Wednesdays each month. S. E. BRONSON, W. G. M. J. H. GREENING, Secy.
- Mazomanie Lodge, No. 14, I. O. G. T. Meets every Friday evening, Bronson's Block. FRED. W. JOHNS, LILLY A. PECK, W. R. S., W. O. T.
- Mazomanie Grange, P. of H. Holds meetings at Bute Hall, 2d and 4th Saturdays in each month.

BUSINESS DIRECTORY.

PUBLIC LIBRARY.
The Good Templar Public Library is open every day, except Sundays, from 11 A. M. to 7 P. M. M. SCHLAPF, Librarian.

T. F. STAIR, M. D.,
Office at Residence, on Hudson St. opposite Cong. church.

W. H. GLEASON, M. D.,
Physician and Surgeon. Office 2d door West of Howe's Store, Hudson St., Mazomanie, Wisconsin. Office hours 10 A. M. to 1 P. M. and after 7.

E. A. BROWN, M. D.,
Omnipotent Physician and Surgeon. Mazomanie, Wis. Office at residence on Hudson St. Office hours 10 A. M. to 1 P. M. and after 7.

HENRY HOWARTH,
Attorney and Counselor at Law, Collections made and promptly returned. Bank Block, Mazomanie, Wis.

ROBERT LANG,
Barber Shop.
OLD BANK BLOCK, MAZOMANIE, WIS.

The shop has been neatly painted, papered and furnished, and we are prepared to assure our patrons of entire satisfaction in every respect.

C. H. HART,
Attorney at Law and Notary Public, Conveyancing and Collections a Specialty. All business will receive prompt attention. Office in the Park Block, Mazomanie, Wis.

WILSON & HART,
INSURANCE AGENTS,
MAZOMANIE, WISCONSIN.

Represent the North American, Pennsylvania Fire, Northwestern, National and all the best and leading Fire Insurance Companies of the United States.
Office over Bute's Store.

PROF. WM. GILLETT,
PIANO AND ORGAN-TUNER.
Will visit Mazomanie occasionally. Your patronage is respectfully solicited. Satisfaction guaranteed. Residence, Madison, Wis.

O. A. DOCKLUM,
Practical Watch-Maker
Difficult parts of watches made to order. REPAIRING AND MANUFACTURING IN GOLD AND SILVER.

Engraving Neatly Done.
N. B.—Great pains taken with broken pieces to solder them as neatly as new. Bronson's Block, Sign of Big Watch, Mazomanie.

S. F. BUCK,
TONSORIAL ARTIST.
When you wish anything in the Barber line call on me at any time.
My rooms are at the corner of Hudson and 2d streets.
And everything I think you'll find to suit the taste and please the mind.
Razors and Shavers ground and put in order.
Antiseptic treatment of Confectionery for sale cheap. A No. 15c. CLARK—175 boxes.
HARD GOODS made to order. Ladies' Milling anything in the line, please call.
And all our art and skill are done. If you will call, if we'll do for you. Shop on Hudson street.

The Largest Clock in the World.

The great Parliament House clock in London, England, usually called the Westminster clock, the largest clock in the world, says Mr. W. A. Hendrie, in the *Watchmaker and Metalworker*, was contracted for in the year of our Lord 1847, and started running in 1850, and started striking in July of the same year, although the construction was nearly completed in 1854 by the first Mr. Dent, a big name among watch and clock makers at the present day. The architect was Sir Edmund Beckett Denison, who, as a designer in horology, has also proved himself on the top perch.

The clock in its general design is of that kind known as the platform kind, and its plates measure 16 feet over all the ends are built into the wall, while the bracing resembles the trussing of our bridges. There are three trains of wheels: the time train in the center; hour strike train on the left; quarter train on the right. The main wheels are 40 inches in diameter, while the cam lifters for hammer tails are 38 inches diameter. There is only one cam lifter on the main row wheel, with 10 cams and 3 1/2 inch faces of steel. In this connection the above strength is necessary on account of the weight of the hammer to be raised (420 lbs.) to strike the great 15-ton bell. The quarter chime hammers are much lighter, being in proportion to the bells to be struck by them. There are four, and they weigh from 3 tons 18 cwt. down to 1 ton 1 cwt. The diameter of hoop wheel is 30 inches, and the flies are in the usual proportion, but as the flies are driven with one pair of miter wheels to throw them on end and reduce friction, the flies appear resemble a large sized barn door, and the way they make the wind blow is awful. I will now describe the time train.

The main wheel is 28 inches in diameter, while the barrel is 16 inches, with a capacity for 2 feet of line. Great wheel has 183 teeth; center 120; third 120, with pinions of 12, 16, and 9. This brings me down to the escapement, which is the far-famed one—the gravity. This one is called the three-legged, and is formed of two wheels with three teeth each on the same arbor, with space between, and in this space comes the lifting pallets, which are driven by the weight, and as soon as the pendulum swings against the partly-lifted pallet it is released, thus allowing the pallet or arm to propel the pendulum on its opposite passage where the same action takes place and a corresponding impulse is given. This escapement takes away all imperfections of trains, as the weight or pallet arm alone gives impulse. This clock beats two seconds; length of pendulum 13 1/4 feet from suspension to line of oscillation; weight of bell 985 lbs.; length of suspension spring, 5 inches, 3 inches wide, and one-sixth of an inch thick; glass used in dials, 21 tons, and with iron cost £5,334. Going part takes 20 minutes to wind; depth of well for weights, 174 feet; clock frame 4 feet 7 inches wide; dials 22 feet diameter; weight of minute hand, 2 cwt.; length, 14 feet; the pendulum rod is composed of iron, with an appliance for regulating. The cost of this clock, in addition to dials and hands, as above mentioned, was a little over £3,490, making the clock when finished cost the sum of £8,734. The writer of this will never forget the beautiful sounds of the bells which the clock gives out when striking. The large bell is heard ten miles off, and the small ones four to five. This clock is reported giving an error of only 90 seconds per annum; but the appliance for regulating by making it faster or slower, as our city observatory does, debars us from forming an idea what it might be if left alone for one year.—*Scientific American.*

American Cars Lighted by American Electric Lamps in England.

A regular train of Pullman cars is now run upon the London, Brighton, and South Coast Railway, England. The train includes a parlor car, a drawing-room car, with ladies' boudoir and smoking room, a restaurant car, and a smoking car, while a compartment at each end of the train—next to the luggage compartment—is provided for servants. The cars are kept at an equal temperature by means of hot water pipes. There is electric communication between the parlor, drawing room, and smoking cars and the restaurant car, and in many ways the comfort of passengers is provided for. The most important and novel feature of the train is, however, that it is lighted throughout by electricity.

Earth Connections for Telegraph Wires and Lightning Rods.

When the return current in a telephone or telegraph circuit is carried through the earth it is, of course, necessary to make a very perfect connection between the line and the earth. When

it is inconvenient or impossible to make use of water or gas pipes this is accomplished by the use of large plates of copper buried in the earth. Such plates are expensive, and they soon become oxidized so as to be almost insulated. The later condition takes place still sooner with iron rods or plates.

In the use of strong constant currents, as for ringing bells on railways, etc., disturbances are attributed to faults in the machinery or the batteries are frequently caused by imperfect earth connections. According to the *Zeitschrift für Elektricitätswissenschaften*, Zschub, Griener makes use of coke for grounding the current as well as for the lower end of lightning rods. It possesses the advantages of durability and is comparatively cheap.

A massive block of fine grained coke has a hole bored in it a foot deep, and about 2 inches in diameter. In it are placed some pieces of pure beeswax, which are melted by means of a blow-pipe and alcohol lamp. This is continued until the wax is no longer absorbed into the pores in the walls of the hole. Then the copper wire, one-eighth inch in diameter, which is to serve as line closer, is inserted in the hole. It is made like a clasp at the end and bent upward and then downward. It is now heated by the blow-pipe until the wax in the hole is boiling hot, and then carefully driven in until it touches the bottom of the hole. The vacant space around the wire is filled next with lead. Finally the upper edge of the hole receives a coating of hot wax, and over it a second one of tar or asphalt. The durability of the earth connection depends upon carrying out the above details carefully and accurately.

In laying the earth conductor the piece of coke that has been united with the copper wire, as before described, is buried in a hole about forty inches long and of the same width. Its depth will depend upon the amount of moisture in the earth at that place. It is embedded in fine earth, and a piece of lead pipe or tubing about one-eighth or one quarter inch in diameter is slipped over the wire, its lower end in contact with the piece of coke, and long enough to reach to the surface of the ground. At the upper end a piece of larger pipe, about one or two inches in diameter, and three inches long, is put over it, and filled with pitch or asphalt to prevent moisture from penetrating.

About twenty five or thirty pounds of coke, in pieces, is thrown in the hole around the big coke block and packed against it. Over this comes fine earth on which water is thrown so it will fill up the spaces between the coke and adhere to it. The hole is finally filled with any kind of dirt or earth that has been taken out of it. At the upper end, too, the lead tube and wire is bent downward to prevent the water from entering it. It has been found that such earth connections do good service even in coarse material and tilling without the addition of fine earth.

The Sciete la Force et la Luanerie, who was in charge of the batteries, reported that but 30 were brought into use on the down journey, and only a portion of the electricity stored in these were expended. On the up journey these and four fresh boxes were brought into operation. For the present the accumulators will be charged each evening at the society's depot at Charing Cross but as soon as the necessary arrangements can be made it is intended that the recharging shall be done at Victoria with a dynamo-machine worked by a small stationary engine. It is not improbable, however, that before long the electricity required may be generated on the train itself, the chief practical difficulty in the way of this saving of force arising, the *London Times* says, from the unavoidable alterations in the speed of the train—a mechanical difficulty in the way of charging the accumulators in this way which the ingenuity of the electrical engineers will no doubt soon overcome.—*Scientific American.*

A Fossil Stone Wall.

The Lexington (Ky.), Press says the workmen engaged in quarrying rock for Mr. Shannon, one mile from town on the old Frankfort pike, came upon a massive stone wall. It had every appearance of having been built by human hands, the mortar seams and joints being very plain. Above it about ten feet of drift and twenty feet of rock had been removed by the workmen, and on the side exposed the men had advanced fully forty feet from where they first struck rock. Thus it was firmly embedded in a solid limestone quarry, which certainly has formed about it since the wall was built. The face of the wall was well dressed, and its massive appearance gave evidence of the skill of hands perished long centuries ago, and could well be envied by the best of the stone masons of to-day.

[While there is no obvious reason for questioning the sincerity of this specific statement of the Press, we should be glad to see the report of some competent geologist upon the "fossil" wall.]
Scientific American.

The Largest Bell in England.

The long-promised big bell for St. Paul's Cathedral, in London, has been cast. Twenty-one tons of metal were used in the operation, and from three furnaces liquid streams were pouring for four and three-quarters minutes before the huge hole in the sand was filled. When dug out, the bell weighed 17 1/2 tons, which makes it the largest bell in England and one of the largest in Europe. Following are the weights of other famous bells: The first big bell at Westminster, 15 tons 5 cwt.; the second 2 tons lighter; Great Peter, at York Minster, 10 1/2 tons; Great Tom, of Lincoln, 5 1/2 tons; the previous big bell of St. Paul's, 5 1/4 tons; that at Osmuts, 17 tons 15 cwt.; Vienna, 17 tons 14 cwt.; Erfarth, 13 tons 13 cwt.; Sens, 13 tons; Paris, 12 tons. It will not be possible to take the new bell to London by rail; it must go by horse road.—*Scientific American.*

Goats to Protect Sheep.

The farmers of Hunterdon and Somerset counties, New Jersey, use goats to protect their sheep from dogs. Two goats can drive away a dozen dogs, and two are about all each farmer puts in with his sheep. As soon as a dog enters the field at night, the goats attack him, and their butting propensities are too much for the canine, who soon finds himself rolling over and over. A few repetitions of this treatment causes the dog to quit the field, limping and yelping. Formerly when a dog entered a sheep field at night, the sheep would run wildly around and cry piteously. Since the goats have been used to guard them, they in line behind the goats and seem to enjoy the fun. The idea of utilizing goats in this way came from the West, where they are put in sheep pens to drive away wolves.—N. Y. Sun.

M. D. ALVORD,
Insurance Agent,
MAZOMANIE, WISCONSIN.
Representing the best Insurance Companies, Continental, Home S. F., Atlas, Queen, Liverpool and London, Globe, and North-western Mutual Life. Also dealer in Farm Implements, Repairs, etc. Office in Higgins' building, Mazomanie, Wis.

[Established 1851, in Germany.]
F. W. GIESE,
Watchmaker,

—DEALER IN—
Fine Jewelry, Heavy Plated Silver Ware, Elgin Watches, Clocks and Musical Instruments. Near Freeman House, Mazomanie, Wis.
Repairing a Specialty.

G. C. KOLLOK,
Firm of Kollock & Robinson
DENTISTS,

Corner of Pickney and Main sts., Madison, Wis. Will be in Mazomanie Full Upper and Under set of Best Gum Teeth for \$1.00. Each Small Gold Filling \$1.00 to \$1.50. Extracting 25 cents. Examination and Advice, gratis. Satisfaction Guaranteed.
LEWIS, STICKS & HARDING,
Attorneys and Counselors at Law,
Madison, Wisconsin.
One of the firm will be in Mazomanie on Saturday of each to attend to Legal Business. Office back of post office.

Mazomanie Brewery,
AMBROSE LANG, Proprietor.
JOSEPH WITTEK, Foreman.

The Brewery has been recently put in good order, with all modern machinery and appliances, and the manufacture will equal the best Milwaukee beer.

NEW MEAT MARKET.

W. M. HILLIER, Prop.
I shall aim to get the best livestock that can be procured and to serve my customers in every way that will be entirely satisfactory to them. A general assortment of meats will be kept in the market.

WHITNEY'S
Variety Store.

FRESH GROCERIES OF ALL KINDS,
CANNED PEACHES, STRAWBERRIES, BLACKBERRIES, PEAS, CORN, TOMATOES, SALMON, LOBSTERS, SARDINES, ETC.

TOBACCO & CIGARS,
A LARGE STOCK
OF PIPES AND
Cigar Holders
at reduced prices.

Fancy Goods
in endless variety.

FANCY CRACKERS, GINGER AND CREAM CAKES, BERNHARDT'S, ETC.

EXCHANGE & COLLECTOR OFFICE
BRONSON, DRAPER & CO.
MAZOMANIE, WISCONSIN.
Exchange bought and sold. Collections made, and returned on day of payment.

MAZOMANIE, WIS.

BRONSON, DRAPER & CO., Proprietors.

THE OPEN CHEST.

Tranlation from Lenau. Really I slept to my mother a room— Had her treasured away, and came home no more— Now she lay in the quiet tomb— Lonely and orphaned, my heart was sore.

CURIOUS, USEFUL AND SCIENTIFIC

USEFUL FOR IRON WORKERS. The surface of cast iron may be softened for turning or planing by immersion for twenty-four hours in a solution of one part of nitric acid to four of water.

It is predicted by M. Dupouchet that the next sun-spot maximum period will be before 1890. It may perhaps occur in 1888, but the great probability is that it will present itself in 1892.

A WEB CONDUCTOR. Prof. W. E. Ayrton has invented a sort of web conductor closely resembling that made by M. Andre. The metal wires form the web of a fabric of which cotton or hemp forms the warp.

A NEW LIFE-SAVING INVENTION. Some engineers of Dundee, Scotland, have tried with success a new gun for throwing a line to a wrecked vessel. The gun is about two feet in length and has a bore of two and a half inches in diameter.

A NEW MEDICINAL OIL. A new medicinal oil has been introduced in Great Britain. It is known as olivecan oil, and is said to have the same properties as cod-liver oil. It is obtained from a fish called olivecan by the North American Indians.

PREVENTING SPERM OIL FROM GUMMING. If sperm oil is added to sperm oil it will prevent the oil from gumming. Mix thoroughly one hundred parts of oil with four parts of chloride of lime and twice of water.

EFFECT OF WALL-PAPER DESIGNS. Any pattern or design which shows prominently any set pattern, or spots which suggest a sun in multiplication, or which, in the light of day, or early morning, might be likely to set themselves upon the tired brain, suggesting all kinds of weird forms, are especially to be avoided.

GOOD RESULTS ARE TO BE OBTAINED FROM THIS METHOD OF COPPERING AND BRONZING ZINC. Prepare a solution of 15 parts of blue vitriol and one of sulphate of cyanide of potassium, and mix them together. Incorporate the liquid well with 100 parts of pipe-clay and rub the resulting mass on the surface of the zinc.

ABOUT THE MANNA OF SCRIPPTURE. Botanists and travelers have been rather unsuccessful in attempting to ascertain the origin of the different kinds of manna known in commerce. In the valley of Gohr, to the south of the Dead Sea, Buckhardt found what he called manna dropping from twigs of several kinds of trees.

NAMES OF IRISH PLACES.

Strange Words Which Tell of Old Manners and Customs. A year ago the Irish published an article giving the literal meaning of the names of the principal cities and towns in Ireland, and just now, when the cable is burdened every day with the weird names of a similar name, where agrarian crimes, are perpetrated, or suspects arrested, or collisions occur between the people and the police, it may not be uninteresting to read the list.

WORDS OF THE HEART. It is generally supposed that wounds of the heart kill immediately, and a correspondent has seen to the effect of the heart with the left auricle partially annihilated and the upper half of the left ventricle torn completely through by a bullet, so that three fingers can be readily passed through the wound into the cavity. Notwithstanding the extent of the injury, the star ran about sixty yards, the first ten yards up hill.

What Came of a Happy Woman's Letter. Elizabeth Dandurand and her husband H. C. Dandurand, parties who are heirs to the estate of the late William Lay, of Binghamton, N. Y., have been found in this city. The estate amounts to about \$250,000, and she was a young girl when the old man died—no one in the place knew that he had a relative in the world.

A Hospital for Animals. The most curious of all the institutions of Bombay is the hospital which the Hindoos have established for animals. Within the enclosure of several acres, located in one of the densest quarters of the city, the sick and maimed of all domestic species are collected in sheds and stables for treatment or rest. Every morning early wagons are sent throughout the city to gather the waste and outcasts, that nothing with life may be destroyed, in violation of the Vedic law.

A New York Merchant doing business heretofore in Leonard Street, where an immense iron building on the corner of that street and West Broadway has just been completed, has had a bridge erected for the convenience of his customers over the new building across Leonard street to the old quarters of the firm, and over this trestle, which has covered sidewalks and is held up by iron trusses, the removal of the sidewalk and other property is being made. The object is to save the expense of trucking.

THE ORGANS OF THE WORLD.

Some of the most curious organs in Europe, says Eugene Thayer in the Youth's Companion, is the great one at Wexingham, near Wexingham. It was built by a monk, the celebrated Abbot Hild, who was an organ-payer as well as a priest. It has 6,000 pipes, he having been paid a florin for each pipe, large and small. It was evidently not unkindly of earthly things, for the sixty old dominie filled the organ full of small pipes called mixtures. Ordinary organs have five to eight ranks or rows of mixture; this one has over a hundred. One would naturally suppose that the tone of the organ would consequently be very shrill. This was not the case, however. The organ was musical enough to have them voiced so delicately that the effect, although it cannot be called legitimate, was altogether charming.

The largest organ in the world is in the Royal Albert Hall, London. The sufficient hall in which it is placed is octagonal, or egg-shaped, the organ standing somewhat above the level of the lower floor. Above three galleries and over these a grand tier of boxes extending completely around the auditorium. The hall is capable of holding from 12,000 to 14,000 persons (if I remember rightly), and it will be seen that only an organ of great power could adequately fill so large a space. The organ case is massive and strong, although not of ornate design, and the front pipes are neatly of iron in 100 cent alloy only, and their bright polish gives the organ a very beautiful and imposing appearance. This organ has four manuals and a complete pedal.

The next largest organ in the world (the Ulm cathedral organ) has just 100 registers. None of these very large organs can be called successful in the full sense of the word. When the full power is used, only music of a very slow and massive character can be played, without more or less confusion as the result. An organ of sixty, or at most, seventy pipes, can fairly do the variety that can possibly be needed, and if more power is desired the pressure can be increased to any desired degree. Sixty registers (about 4,000 pipes) can be made to speak together. A greater number than this never did and never will speak with precision or clearness.

Of all the great organs in our land, the organ in the Boston Music Hall is the most famous. It is about two-thirds the size of the Albert Hall instrument, and is justly celebrated as one of the most beautiful of the great organs of the world. By this I mean its softer combinations are all of a most beautiful and lovely character, and their tone of great purity and beauty. In the full organ is the same old story in confusion in tone and slowness in speech which is found in every one of the great organs. This organ has four manuals, 13 combination pedals (all double pedals) and a pedal which has not one, but three 32-foot registers. It was made by Walcker, of Ludwigsburg, Germany, and was seven years in course of construction.

The Sparrow. A few years ago Australia welcomed with many demonstrations of joy the arrival of a few pairs of English sparrows. To-day there is a promising prospect of a dozen upon the heads of the little creatures, which have multiplied to an amazing extent amid their congenial surroundings, are a source of great lure to fruit-growers. Before the war the appointed to inquire into the matter one witness said that in the short space of ten days the sparrows took a toll of a half of grapes. They stripped the figs off the trees, and kept the tiffen acre of lucerne during the summer. Another complaint that in the season they took 200 worth of fruit; while a third declares that some 200,000 of the little creatures, and each time they were destroyed by the sparrows. Neither apricots, cherries, figs, apples, grapes, peaches, plums, pears, nectarines, loquats, olives, all barley, oats, cabbage, cauliflower, nor seeds, nor fruit of any kind are spared by the sparrows' omnivorous bill; and all means of defense tried against its depredations—traps, snares, traps, netting, shooting, or poisoning, are declared to be inefficient to cope with the enemy.

Mrs. CLEANWELL is what may be called pizen nice. Cleanwell says when he caught his better half washing off the Ester eggs he had paid half a dollar for the soap, and she had washed the rest of it off with soap. He says that there was such a thing as being too nice.—Boston Transcript.

FIRE-SIDE CHIT-CHAT.

Why do girls kiss each other, while boys do not? Because girls have nothing better to kiss, and the boys have.—Yale News.

KEYHOLE CAUTION.

When a man is about to take a secret he shuts the door. When it is open the man opens the door to be sure no one is listening outside.—French Era.

HARRIS'S BAZAR.

American women, as a whole, spend far more money on dress than the French do, yet without achieving the same perfection of result.

YOUNG MAN WITH PEN-WIPERS.

A young man who was presented with eleven Green Anne pen-wipers on Christmas day by his lady friends continues to wipe his pen on his coat-tail.—Norristown Herald.

MRS. SENATOR LOGAN.

and other leading ladies in Washington society have formed a secret association called the "Guardian Angels," which intends to exert social influence upon congressmen in behalf of temperance.

A NOTE BY A PHYSICIAN.

As the most profuse cause of woman's nervous disease, hysteria, spinal diseases and sick headache is high colored blood. When he can persuade his patients to cease wearing them, they are patients no longer.

DEMONSTRATION.

It is said to be a fact capable of demonstration that two summer marriages, and in diversions, winter marriages. Hence, probably, the wisdom of a citizen in evincing a desire to change the marrying season.

THE MARQUIS OF LORNE.

made a speech at the other day, in which he told about the same of a woman observed during his Manitoba trip, which he made to send English girls over to supply the demand for wives.

IT HAS COST GEORGE.

George Francis Train his liberty, Theodore Tilton his home, and Eli Perkins his reputation for veracity to secure notoriety which Oscar Wilde has won by a few flowers, a rap look and a new dialect.—New York Sun.

FOUR COUPLES.

Four couples were recently married at one time in Richmond, Va. The gentlemen involved in the matrimonial affair were prominent friends, and finding that they had all arranged to visit the blessed bonds of matrimony, all determined to be married in company, to which the ladies assented.

TREASON.

A pretty little scene at Pontefract, on the Austrian frontier, a fortnight ago, where a group of young Italian and Austrian girls, dressed in white, gave Margaret of Italy a lovely bouquet in 100 cent alloy only, with many affectionate words, by the beautiful and stately young queen.

UPPER-LIP CORNERS.

softly tinted correspondence cards and sheets of note paper the signs of indolent fingers are introduced in the shape of flowers and all complete, and with corresponding quotations such as, "In a rapid ecstasy say," "You hold yourself like this," "Consumption is life," etc.

THE MOST UNIQUE CONCERT.

in the way of a magic toilet is that lately worn by an European lady of high rank at a garden fete. Her robe was so dark as might during the day, but after the stars came out it shone with a strange radiance, the wonderful gloss being caused by thousands of innumerable lights confined under delicate black tissue.

CLUB OF "UNFORTUNATE LOVERS."

was formed in the town of Herne, England, and already four members are enrolled. An elderly bachelor, who has met with repeated rebuffs, has been elected chairman, and the organization having been thus happily effected, the particular kind of sympathy implied in the club name will hereafter know where to go for company. It may be noted, in passing, that those "unfortunate lovers" whose woes date from the successful termination of their suits need not apply.

DAUGHTER OF EX-SECRETARY EVARTS.

made herself a favorite in Washington society, not alone by her snowy complexion, but as well by her curls of chocolate. The Mexican minister used to say that in his own land no beverage was so delicious. It was made of the best already sweetened chocolate, broken and placed in a warm spot to melt. When afterwards put into a farina kettle, boiling milk was poured upon it, and from the moment the first glass was imbibed it until it was done it was stirred. It was allowed to boil for several minutes, and when it was served in delicate cups it was thick and almost jelly-like, and was capped with whipped cream.

A THIEF'S PECULIAR TRICK.

John Debois took a great deal of trouble to get a good pair of boots in St. Louis for nothing, but he achieved success. He was a traveler staying at the Grand Central Hotel. He went to a store and ordered the finest pair that could be made. He was exact in his stipulations as to the material, style, and wished them sent to his room at a certain time. Then he gave the same order in another store, except that the delivery was to be made on a day later. The boy who brought the first pair was sent back with the left boot stretched, and the boy who carried the second pair was sent back with the right one stretched. Debois then put two pairs on, for which he had not paid, and caught the next out-bound train.

A WINTER REVERIE.

New white fates and then the light of day. While over hill and plain shafts twilight gray. Shrouding both lowly and lordly land...

The wind comes swift through the branches here Of sturdy oak and pine, whose boughs, so fair And green, are wreathed in misty haze...

The thrush brooks within sweetest bird and glad. Who murmuring some sweet accompaniment Adds To the song of the birds, now so glad and loud...

The merry linnets who in colors fair Off danced so lightly on the cedar boughs...

All things are hushed and still: no stir above the sea To catch some muffled sound—no light but the stars...

But yet a little while, and once again Nature shall cheer in glad, exultant strain...

Then shall the heart again in steady grove And leafy dale glad voices raise...

The snows appearing from Earth's genial breast In all their glory, herbaceous crown down...

Earth's many voices shall harmonize blend In one glad chorus, which shall ever ascend...

Here Winter's past, and merry Spring is here. To bring the gladness of the year.

SEASONABLE FARM NOTES.

To keep oats well a cellar should be cool, dark and not very dry.

WARMEN pen should be a comfort to pigs and a source of profit to farmers...

A NEW YORK farmer says that Canada thistles may be killed by plowing them under about the first of July...

It is said that two thicknesses of paper, used in lining the barrel in which apples are packed...

It is selling an ox weighing 2,000 pounds, only as much nitrogen is sent from the farm as would be lost by selling about one and a half tons of English hay...

SOMETHING for breeders to remember—that from the male parent are mainly derived the external structure, configuration and outward characteristics...

On a movable poultry house are small cabins, some with wooden floors three or four inches from the ground...

The very early lambs are dropped during this month, and if mild weather favors them they may be made very profitable for the early market...

The nitrogenous and mineral value of much manure is lost when it is sold for \$1.05 per ton, water-cooked or nearly three to one in favor of the latter...

The Massachusetts Ploughman reasons that if the potato was the true seed there would be little doubt that planting the largest and best specimens would result in the improvement of the quality of the product...

The demand for mutton for summer consumption in every town and village is a thing to be envied by farmers.

A flock of sheep is safe to pay 100 per cent profit in the hands of a competent manager.

When sheep are more numerous kept than dogs, the dog question will be raised.

AMERICAN complaint: A maiden of advanced years and very good appearance having been told by gentlemen that she reminded him of a lady once famed as a belle and who at sixty still retained many traces of her former beauty, was

A CHICAGO girl has sued a man for \$10,000 for kidnapping her twice. The man who would hang a girl only twice deserves to be hanged in heavy damnation.—Norristown Herald.

The Latest News.

This is just a trifle sweeping: Senator Plumb, of Kansas, introduced a senate bill yesterday introducing a constitutional amendment which shall prohibit the manufacture, or sale, or importation, of intoxicating liquors as beverages, in any portion of the United States. It is not alleged against Mr. Plumb that he has the remotest idea his bill will pass.

There is a general movement throughout the country, among the large cities to force the telegraph companies to place their wires underground and relieving the streets of the pole nuisance. The mayor of Baltimore, in a message to the council of that city, says: "I have no means of ascertaining the number of miles of telegraph, telephone and electric light wires now in use in the city, but their extent must be very great. The poles upon which these wires are suspended constitute a constant source of complaint and are an ever-present eyesore. There seems to be no remedy for it, except by compelling all such companies to lay their wires underground."

Small-Pox Cure.

Many of the papers are republishing an old remedy for the small-pox, which it is claimed has been very successfully used for the cure of that loathsome disease. It is also said to be equally good in cases of scarlet fever. The following is the prescription: "Sulphate of zinc, one grain; foxglove (diglyssa), one grain; half a teaspoonful of sugar; when thoroughly mixed add four ounces of water. Take a spoonful every hour. Either disease will disappear in 12 hours. For a child, smaller doses, according to age."

A great many well attested cases of cure with this remedy are given, and it is certainly worth the while of physicians to try its effects. Speaking of it, one physician said: "When Jenner discovered cow-pox in England, the world of science buried an avalanche of fame upon his head; when the most scientific school of medicine in the world—that of Paris—published this panacea for small-pox it passed unheeded. It is as unfeeling as fate, and conquers in every instance. It is harmless when taken by well persons. It is remarkable that this remedy should not be more widely known if it is what is claimed."

Postmaster at Madison.

The long agony is over, E. W. Keyes goes out, and William Helm, who has been his assistant for the past fifteen years, will probably go in. Acting on the proposition of Postmaster General Howe to suggest a suitable man in the place of E. W. Keyes, Congressman Caswell has recommended William Helm to be the next postmaster at the capital city. It does not look as if the recommendation could be ignored, as Helm is acknowledged to be a faithful and efficient official, and in the proper line of promotion according to the best rules of civil service reform. Mr. Keyes was naturally very anxious to have Mr. Helm appointed, as there are competitors not friendly to him and who, he apprehended, might get the place through the influence of Mr. Rublee and the postmaster general. Mr. Keyes has held the office under Lincoln's, Grant's and Hayes' terms—over twenty years—and therefore, according to our republican form of government, he has had a sufficiency of this one position. The promotion of Mr. Helm is very similar to that of Pearson as postmaster of the city of New York when James was appointed postmaster general. Pearson was his first assistant.—Eve. Wisconsin.

Washington.

Washington, January 23.—Senator Pugh's bill, which he will introduce on the first opportunity, is to make it a criminal offense for any person to frame and get up simulated electoral returns from a state. The object of the bill is to prevent contests over electoral returns for the purpose of complicating the count of the vote with a view to political advantage and to confine such contests to legal ground. In almost every presidential election there are bogus electoral returns sent in and this bill is intended to prevent this by making the parties to them responsible and amenable to criminal punishment. There is evident disposition on the part of the senate to pass the law at this session to regulate and control the counting of electoral votes and it is believed the house will readily take up the subject. Senators of both parties agree that a bill of this character will be passed at the present session. They say that now with the next presidential election nearly three years off political considerations and party expediencies will not influence action, as they naturally do when an election is near at

hand. Some democratic senators are now strongly in favor of Senator Edmunds' bill which passed the senate of the forty-fifth congress. Senator Pugh for one says no better bill could be framed. It provides that each state may regulate its own method of deciding a controversy over election returns by laws passed prior to the origin of controversies and that the state's decision shall be final and conclusive. In the last congress this bill did not meet with democratic favor because the democrats were then a majority in both houses of congress, and naturally they wanted to keep control of the count of decisions of contests in congress because the election of 1880 was just ahead. The indications are that Edmunds' bill will have considerable democratic support, sufficient at all events to pass through the senate. In connection with this subject an event of interest in relation to the count of 1876 has been recalled by a number of democratic congressmen who were conferring with regard to the importance of legislation this session to regulate the count of the electoral votes. A democratic senator, who was then in the senate, stated that in 1875 Senator Morton's bill prescribing a method for a count passed the senate, receiving several democratic votes.

EDITOR SICKLE:—The year 1882 has dawned upon us. How many of humanity has taken a retrospective view of the year just past, and searched well its shortcomings, and resolve to amend where we failed; or does vain pride hold us back to its weakness and vain glory, or shall many principle carry us through with a firmer determination to do our duty and uphold right, regardless of anything but eternal truth. How often do we see in our midst oppression practiced, and the weak oppressed, because they have not the power to prove their rights; and are taken advantage by crafty and designing ones, who try to pass off as very nice amongst society, but it only needs the smallest amount of discernment to discover the real motive of the man. Humility is the only grace that is needed to show the boasting, vain, pride its true meaning and character. We have many churches and church-going men. They live up to their professions simply being a professor and not a possessor. It is worse than nothing, but a professor and a possessor who has the nobleness of character to dare to do right, having a nobler motive than mere pleasure; having a motive of "then God seeth me," is what we want more of. Humility is a noble grace worthy of all commendation here and in a higher sphere, there is nothing that appears more prominent in the character of most mankind than pride, which displays itself in a thousand different modes in the intercourse of society. It is uniformly accompanied with haughtiness of demeanor, self-conceit, arrogance, and a whole train of ignorant passions and affections; it is the pest of society; the greatest curse that can fall on a christian church, where it insinuates itself into the midst of those who love to have the pre-eminence; it is a source of torment to its possessor and to all around him, but he cares not for a little accumulation of the manum of unrighteousness, and will perhaps clear his skirt in this world. He may think it is peculiar to fallen and depraved men for it is certain from the very constitution of the moral system, that no emotions of pride or haughtiness are ever felt in the breasts of angels, or any other holy beings, because such affections are incompatible with the love to God and to our fellow creatures. But we live in a fast age says ignorance. We are told by God that he resisteth the proud but giveth grace to the humble. That even a proud look is an abomination in His sight while he beholds with complacency the humble and the contrite spirit. How ever much relief may be derived from Home and such infidels, humanity has nothing to boast of. A little sickness brings the haughty spirit down to the foot-stool of mercy, where he sees he has nothing to bring to merit the favor of the Divine Being he cannot boast that he has lots of horses, and cattle, and lands, and has received a fortune, and a pile would be worse than nothing. A clean heart and a contrite spirit is what God wants, then oppression will vanish like a cloud. When the man possesses a new life he must be born again, or in other words, be converted a true disciple and follower of the meek and lowly Jesus, who is a pattern for men to follow. Then will boasting cease and a different class of people will bless us, and the world will be the better for every man who dares to do right and vindicate the principles of right.

Dyspepsia & Liver Complaint.

It is not worth the small price of 75 cents to free yourself of every symptom of these distressing complaints, if you can think call at our store and get a bottle of Shiloh's Vitalizer, every bottle has a printed guarantee on it, use accordingly and if it does you no good it will cost you nothing. Sold by Smith & Campbell.

THOSE WHO KNOW IT

SAY

That the "DOMESTIC"

Is the best SEWING MACHINE on Earth!

The new under-braider attachment is a new and useful invention that no other machine possesses.

For quality of work, for rapidly, for durability and for simplicity of construction the "DOMESTIC" is superior to all others.

A large invoice of these celebrated Sewing Machines,

JUST RECEIVED BY J. A. SCHMITZ.

More people suffer from Biliousness than any other ailment. If Bilious you will be restless, your Head aches, low Spirits, Costiveness, no Appetite, want of Energy and other symptoms which never fail to give warning of impending danger from a siege of sickness. All this can be avoided, and at a nominal cost, without any expense for physicians. Go to your drugist with a silver dollar or a greenback either, and tell him you want a bottle of Dr. Marshall's Bromine for the above complaints, and take according to directions. You should take of the Bromine until you feel entirely free from all sickness. Sold by J. Jones, Smith & Campbell.

SHILOH'S CATARRH REMEDY. A marvelous cure for Catarrh, Diphtheria, Canker mouth, and Head Ache. With each bottle there is an ingenious nasal injector for the more successful treatment of these complaints without extra charge. Sold by Smith & Campbell.

Why let your horses suffer with Cuts, Wounds, Galls, Scratches, or diseases of the hoof when you can readily cure them by the use of Cole's Veterinary Carbolicative? It will thoroughly cleanse the worst sore, cause it to heal readily, (without a scar) and the hair to come in its natural color, and is the best remedy in existence for stable use. J. Q. Smith, Veterinary Surgeon, Madison, Wis., says: "I have used Cole's Veterinary Carbolicative and consider it the best thing in the market." Sold at 50 cents and \$1 a box by all Druggists in Masonic.

We have a speedy and positive Cure, for Catarrh, Diphtheria, Canker mouth and Head Ache, in SHILOH'S CATARRH REMEDY. A nasal Injector free with each. Use it if you desire good health and sweet breath. Price 50 cts. Sold by Smith & Campbell.

WEEKLY SICKLE.

Masomanie, Wis., Jan. 28, 1882.

S. E. BRONSON, Editor.

LOCAL SHEAVES.

Julius Butz, of Darlington, Wis., is home for a few days.

Walt Curtis and wife, of Mt. Horeb, spent Sunday in town.

B. D. C. is returned from Minneapolis on Friday evening last.

Mrs. O. Bisbee, of Horton, Iowa, is visiting her many friends here.

C. H. Hart, of Milwaukee, spent Monday among his friends here.

Mr. & Mrs. Ed. Rich, of Devil's Lake, are visiting friends in Mazo.

Geo. Moore's infant child, which he reported as dangerously ill last week, died on Friday evening last.

H. G. Brunleib, salesman for J. Fernick & Bro., Milwaukee, and H. N. Hempstead, Milwaukee, receive flattering acknowledgements from them for his evident success in his new vocation.

The firm of Greening & Warner, of Grand Meadow, Minn., has been dissolved by mutual consent. F. R. Warner will remove to Minneapolis and buy an interest in R. L. Warner's business in that city. C. F. Greening will continue the business at Grand Meadow.

On Saturday night last, at about 11:30 o'clock, our citizens were aroused from their quiet slumbers, by the alarm of fire. A one-story building, owned by Geo. Lyford, was enveloped in flames. Mr. L. and family were not at home, and before aid reached the burning building the fiery fiend had full possession, and it, with all its contents burnt to the ground. It was insured for about \$600 or \$700.

The pleasant matrimonial ceremony which took place at the Freemason House on Wednesday evening, was witnessed by many relatives and intimate friends of the young couple. Miss Gertrude Hopkins is one Mazo's fairest daughters, and much admired by all, and Mr. Dimmock certainly displayed a large amount of good taste in his excellent choice. The whole community extend to them their best wishes in behalf of their future happiness and success.

Died, on Saturday the 21st of pneumonia, near Masomanie, Mrs. Liva, wife of Charles Harrop, aged 20 years, 9 mo. and 25 days, leaving husband, two children and many relatives and friends to mourn her loss. She helped prepare a Christmas dinner for loved ones, and is now in the grave. Her sickness was severe, but she sought and found Christ very precious. She left many words of cheer, and several promised to meet her in heaven. Funeral sermon was held in the M. E. church, at Maso., many friends attending. Many prayers go up for her loved ones. G. W. N.

Card of Thanks.
Ed. Sickle.—We wish, through your columns, to kindly thank our friends for their valuable assistance during the sickness and death of our child.
MR. & MRS. GEO. MOORE.

Card of Thanks.
Ed. Sickle.—Permit me through your paper to tender to my neighbors and friends my grateful thanks for their care and many kind acts to me during the sickness and death of my beloved daughter, Minnie.
W. T. BOARDMAN.

Arens, Jan. 24, 1882.

The following are the officers of the Masomanie Grange, No 318, P. of H., installed Sat. Jan. 14, 1882 for the ensuing year:

- W. M.—Henry Powell.

- W. L.—Mrs. S. Humphrey.
- W. S.—Chas. Kerr.
- W. Sec.—Laura Greening.
- W. Treas.—Mrs. Chas. Kerr.
- W. C.—Mrs. M. Greening.
- W. Ceres.—Mattie Powell.
- W. P.—Mrs. S. C. Harnden.
- W. F.—Mrs. H. Powell.
- L. A. S.—Mrs. O. B. Haseltine.
- Gate-keeper—J. Burchell.
- Purchasing Agent, O. B. Haseltine.

Small-Pox.
It certainly is not necessary in this enlightened age to elaborate on the proofs of the fact that the great discovery of the immortal Jenner, vaccination protects the human subject against the terrible scourge of small-pox. But in order that the protection be continued re-vaccination should be practiced, as it is well-known that from twenty-five to forty per cent. of re-vaccinations "work." It is claimed, however, by an eminent authority, that re-vaccination does not afford the same amount of protection that the first vaccination, well performed, does. The first great object to aim at, is to vaccinate well in infancy. This is the sheet anchor. Parents should by all means have their children vaccinated, and if for any reason the first operation fails, have it repeated until success is assured. The physicians of the town are prepared to serve all who may desire vaccination, so there need be no excuse for one neglecting to perform this manifest duty.

T. F. STARR, M. D., Health Officer.

Preamble and Resolutions.

Resolutions of condolence adopted by Forward Lodge, No. 555, L. O. G. T. on the death of sister Minnie Boardman, who died Jan. 14, 1882, of pneumonia, aged 20 yrs. 9 mo.

WHEREAS, he has pleased our heavenly Father to remove from our midst by death sister Minnie, and in this dispensation of Divine Providence, our lodge has lost an efficient and faithful worker and the home an affectionate daughter and sister. Therefore be it Resolved, that the members of this Lodge while bowing in humble submission to the will of Him "who doeth all things well," tender the family and friends of the deceased our heartfelt sympathy in this their great affliction.

Resolved, that as a further token of respect to our sister's memory, our Charter and regalia be draped in mourning for thirty days, and that a page of our records be dedicated to her sacred memory; also that the foregoing be printed in the *Wisconsin Temperance Journal*, *WEEKLY SICKLE* and *Dodgeville Chronicle*, and a copy of the same be presented to the stricken family.

JENNIE COLDWELL.
HENRIETTA SUTCLIFFE.
JOHN M. WILSON.

Committee.

GUILTY!

On Wednesday afternoon, the 25 inst. Judge Porter finished his remarkable speech in denunciation of the assassin. Judge Cox immediately read his charge to the jury which occupied one hour and a half in delivering.

The jury then retired to their room and naturally expecting considerable delay the court was adjourned for a short recess. But the crowd remained. The villain stepped into an adjoining room for refreshments. Ten minutes later a knock was heard and the foreman of the jury announced that they had reached a decision. The villain was brought out, and his looks betrayed his anxiety.

The jurymen filed in and in response to the question of the court the foreman replied that they had found the prisoner guilty of murder in the first degree. Then each individual jurymen arose in his place and pronounced the word "Guilty."

The crowd broke into a glad applause and this same demonstration of approval was hurled at the wretch as he was led to the prison van and started back to jail. Owing to the slow process of law it is thought the execution will not take place till July. Now that it is all over with the leniency of Judge Cox has the appearance of wisdom. He conducted the trial in such a manner that there can be no excuse for giving the villain a new trial. He has had extraordinary privileges and none of his trials before the law have been abridged.

The feeling of relief and satisfaction is universal throughout the country and there is but one thing that could have added to the completeness of the result and that would be the restoration of our lamented president.

It has been said, rather than a spirit of vengeance, that has filled the heart of the stricken widow.

Call and try fresh groceries from Window & Bartholomew, they keep a full supply.

MARRIED.

DIMMOCK—HOPKINS.—At the residence of the bride's uncle, Mr. T. Freeman, on Wednesday evening, Jan. 25, 1882, by Rev. G. W. Nuzum; Mr. Charles C. Dimmock to Miss Gertrude Hopkins, both of Masomanie.

HINEY—ALFORD.—At the M. E. parsonage on Wednesday, Jan. 17, 1882, by Rev. G. W. Nuzum; Mr. Frank Hiney, of Springfield, to Miss Emma Alford, of Masomanie.

COLDWELL—TYLER.—At Masomanie Dane County, Wis., Jan. 24, A. D. 1882, by George Cutler, Justice of the Peace, Mr. William B. Coldwell to Miss Evalena O. Tyler, both of the town of Arens, Iowa County, Wis.

The Madison Sensations.

Madison is just now certainly a center of capital sensations. One of these is the granting to Mrs. E. W. Keyes a divorce from her husband. Another is the granting of a divorce to ex Governor Taylor from his wife on the ground of desertion on her part, she having left his home in 1880 and taken up her residence at the home of her daughter, Mrs. Kanouse, of Pulton, Rock County. The ex-governor represents his financial circumstances as being very unfavorable. There is a mortgage of \$10,000 on his farm of 400 acres in Cottage Grove, Dane County, besides \$1,000 of accumulated interest. He found his affairs so discouraging that he offered to deed to his wife the farm, the stock and all other property, except two cows and one team which he would reserve for himself, if she would undertake the entire management. She deliberately refused this offer, as she thought she could not pay the debts which encumber the farm, and therefore left him as he stated. The ex-governor represents his personal condition as being deplorable, and that he has to eat cold victuals at home, as the partner of his bosom, who was his help, has deserted him. The court has granted Taylor's petition for divorce with the condition that he should pay his wife \$1,200 cash, and thereafter \$150 annually.

Mr. Taylor has been married forty years, and this is certainly an unfortunate and unhappy denouement. But it seems to realize the truth of the old adage, that when poverty comes in at the door, love goes out at the window.

The third sensation at Madison is over the postoffice. William Helm is Mr. Keyes' favorite candidate as his successor, and Mr. Frank, a brother-in-law of Horace Rublee, is his most prominent competitor for the postoffice. The Sentinel correspondent thus graphically relates a rich scene in this postoffice wrangle which occurred in the Democrat office:

The contest over the Madison postoffice took a decidedly sensational turn to-night. Mr. Keyes was in the Democrat office talking with Editor Raymer about how Frank had obtained signatures to his petitions by securing the names of women and boys and had even asked through graveyards for names. He had also gone out to Mount Horeb for men to endorse his (Frank's) application for the postoffice. While Keyes was talking this way, in comes Mr. Frank himself. Frank was about to back out of the room when Editor Raymer called out to him to come in and settle the postoffice business right here and now. Keyes continued to condemn Frank for his course, and Frank retaliated by bringing up the Keyes divorce suit, saying that he (Frank) had such a record he wouldn't dare show his face in town. This exasperated Keyes, and he commenced berating Frank in a very excited manner, saying that Frank was proud, that he was a deacon of a church and wore the knees of his pants out praying. This wild warfare continued until he was about to blow up. They were about to have a regular fight, when editor Raymer said he was not going to have any blood shed in the Democrat office and pulled them apart.

Black Earth Items.

Our January thaw got badly frozen. The ice harvest has been begun by our several ice merchants.

Mr. Henry Lawrence is quite sick with lung fever.

Mr. Enoch Wood has returned from the East.

John S. Barber has returned to Beloit, Kansas.

A bran new girl at O. C. Olson's residence.

Mrs. W. Randle is suffering with paralysis.

Mr. Hyde and daughter Nellie started for their home in Nebraska, Thursday.

Mrs. G. W. Vosburg continues to be ill with the rheumatism.

Mr. Olaf C. Olson has had another attack of bleeding at the lungs the past week.

Mrs. Adams and Lizzie spent a couple of days in Madison this week.

Barber & Son are rushing the work on their new store very rapidly.

Albert Myers has traded off his horn trowsers for a more staidler team because he is getting old and feeble.

James Aylward is quite sick with lung fever.

ORDER—Appointing time to hear petition for administration.

State of Wisconsin, County Court for Dane County.

In the matter of the Estate of Lewis O. Roberts, deceased. In Probate.

On filing Petition of Ida Roberts, of Masomanie, in said County, representing among other things that Lewis O. Roberts, of Masomanie, in said County, died on the 4th day of May, last, leaving estate in said County, and praying the appointment of an Administrator thereon.

EXCITEMENT IN ROCHESTER.

The Commotion Caused by the Statement of

An unusual article from the Rochester... Democrat and Chronicle, was reprinted...

Dr. J. B. Henion, who is well-known... in Rochester but is scarcely ever in America...

Every one of them and many additional ones... I did not then return, and I am not surprised...

"How to the world did you, a physician, come to be brought to this?"

"But it is a true one. The medical profession... have been treating symptoms instead of diseases...

"This, then, is what you meant when you said that I had forgotten the cause for most of the time..."

"Presley, thousands of so-called diseases are nothing more than symptoms of Bright's disease..."

"And all these cases have simple symptoms at first?"

"Every one of them, and might have been cured as I was by the timely use of the same remedy..."

"I am getting my eyes open to the matter and think I am helping others to see the facts and their possible danger also..."

"Fully satisfied of the truth and force of the doctor's words, the first half hour of my day and called on Mr. Henion at his establishment..."

"It is true that Bright's disease has increased wonderfully, and we are, by reliable statistics, that in the past few years its growth has been 350 per cent..."

"I have thousands of people afflicted with it to-day who do not realize it, Mr. Warner?"

"Hundreds of thousands, I have a striking example of this in my own case..."

"I believe then that it has no symptoms of its own and is frequently mistaken even by the person who is afflicted with it?"

"I have no symptoms of its own and very often none at all. Usually no two people have the same symptoms..."

"You speak of your own experience, what was it?"

"A fearful one. I had felt languid and unfit for business for years, but I did not know what ailed me..."

"I know it can. I know it from the experience of hundreds of persons who were given up to die by both their physicians and friends..."

"I believe then that Bright's disease can be cured?"

"No, it cannot be so investigated. I went to the principal cities with Dr. Craig, the discoverer, and saw the physicians prescribing and using it..."

For the Complete Cure of a Cough, pain in the chest, difficulty of breathing, hoarseness, and other lung diseases which tend to Consumption, you will find Allen's Lung Balsam...

There is a man in the west who has moved so often that whenever a covered wagon comes near, his chickens all fall on their backs and cross their legs...

Dr. R. V. French, Buffalo, N. Y. I am 56 years old, and have been afflicted with a cough for six years and could scarcely walk about my house...

A Nashville merchant worth \$5,000 worth of goods and chattels was in view of the commotion which the publicity of Dr. Henion's article has caused...

Cancers and other Tumors are treated with unusual success by World's Dispensary Medical Discovery, Buffalo, N. Y. Send stamp for pamphlet.

For weak lungs, spitting of blood, shortness of breath, consumption, night sweats and all lingering coughs, Dr. Parro's "Golden Medical Discovery" is the best remedy...

The Baby Tower of Shanghai. The baby tower! Look through that rent in the stonewall—not too close, or the stream of effluvia will kill you...

Keep your bowels and kidneys in a healthy state by the use of Kidney-Water.

The American Linen Thread Company in a paralyzed condition in Mechanicville, N. Y., and the property was sold on a mortgage of \$45,000...

Universal Satisfaction. Universal satisfaction—no every drug but only Parro's Cough-Consumption Cure...

Sex advertisement regarding Magneto Inoculation. The Voltaic Belt Co., Marshall, Mich. will send their Electro-Voltaic Belts and other Electrical Appliances...

Sex advertisement regarding Magneto Inoculation. The Voltaic Belt Co., Marshall, Mich. will send their Electro-Voltaic Belts and other Electrical Appliances...
