Fritzmann

Dear business partners,

for 115 years the name Fritzmann stands for customer proximity, reliability and service. We offer you and your customers products in the field of hunting, outdoor and shooting sports that meet the highest quality standards. It was, it is and will always be our philosophy in the future: We do our utmost to fulfill your wishes in the short and long term and to cultivate a strong, successful and future-oriented business partnership with you. So, we want to share our tradition and long experience with you while driving innovation in the hunting branch. This is also reflected in our collection. With our new catalog 2019/2020, we would like to introduce you to our high-selling assortment, where proven products, developments and novelties come together to form a complete program in the areas of optics, hunting accessories, gear, hunting ground equipment and sport shooting supplies. In particular, we introduce you to the novelties in the field of night vision, thermal imaging and optics. This growing market represents a decisive change for the hunt. Through our products and our know-how, we want to support you in the best possible way.

With this catalog, we offer you a variety of ways to respond to individual wishes and needs of your customers. We would also like to thank you for your loyalty and wish you much success with this catalogue.

Sincerely
Georg Fritzmann & Söhne GmbH

Thermal imager IR510 Nano N2

Lightweight, handy thermal imaging device for detecting or searching game. The integrated VOx sensor offers an overwhelming picture quality. Realistic picture due to high frame rate. Due to selectable color modes (Black Hot, White Hot, Red Hot) and an advanced algorithm it is easier and faster to recognize objects.

- detector: 400 x 300 / 17 µm
- frame rate: 50 Hz
- temperature sensitivity: ≤50mK @ 30 °C
- objective lens: 25 mm
- object recognition: 500 m
- digital magnification: 1x, 2x and 4x
- waterproof: IP67
- battery: fully charged Li-Ion battery, 3,200 mAh to charge via USB
- battery life in continuous operation: approx. 5 hours
- size: 168 x 67 x 62 mm
- weight: 375 g

37151-02

Thermal imaging attachment TA435

This handy and lightweight device allows you to detect animals with high contrast and realistic images even in adverse conditions, such as fog, due to its high frame rate and extremely good temperature sensitivity. The high-end OLED color display is currently the highest quality screen available on the market. As a result, it is possible to use it on optics with up to 6x magnification. With five scene modes (standard, city, forest, snow and desert) the device can be adapted to the ambient conditions with just one touch of a button so the targeted objects can be optimally highlighted. The device can be used at temperatures between -30°C to 50 °C and in adverse conditions such as heavy rain.

- for mounting on spotting scopes or binoculars
- detector: 400 x 300 / 17 µm
- frame rate: 50 Hz
- temperature sensitivity: ≤50mK @ 30 °C
- objective lens: 35 mm
- screen: 1024 x 768 pixels
- object recognition: 620 m
- digital magnification: 1x, 2x and 4x
- waterproof: IP67
